PREFACE

This is the Twenty-seventh report presenting 2005 Health Statistics in Botswana.

Quality Statistical information is a prerequisite for evidence based and developmental programmes at different levels. The information in this report is about all activities for policy formulation monitoring and evaluation purposes.

It should be noted that this is the second report of its kind after the revision of data collection tools in 2003 which were implemented in 2004 as well as introduction of International Classification of Diseases 10th Edition. This was done as a result of recommendation after the development of Health Indicators in 1996.

All information in this report is based on routine data extracted from statistical returns compiled by health workers and medical records personnel from health facilities throughout the country. Data on non-institutional births and deaths have been included.

The report comprises five sections:

Section I: Health Facilities

Section II: Health Personnel

Section III: Outpatient Statistics

Section IV: Inpatient Statistics

Section V: Mental Health Statistics

The Central Statistics Office greatly appreciates the Ministry of Health and Local Government for the continuous support and the effort put in by the health workers and all other stake holders involved in this process.

I am grateful to the staff of Department of Policy, Planning, Monitoring and Evaluation under Ministry of Health (Health Statistics Unit) who worked tirelessly and their dedication in the collection and compilation of this health information, ensuring its accuracy and reliability.

We note the late publication of this report which resulted from change of systems Central Statistics Office is putting in place interventions to normalise the situation in order to publicise reports on timely basis.

A.Majelantle

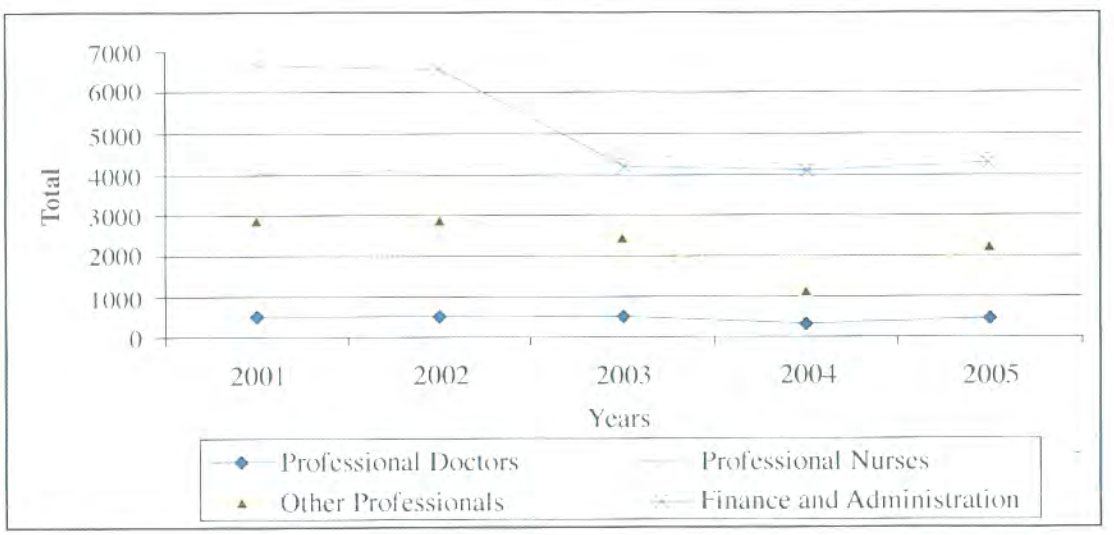
Analysis of Results

1.0 HEALTH PERSONNEL

There is an observed change in the categories used in 2005 from previous years reported because starting 2004, District Health Team (DHT) included both health post and clinic personnel whereas previously these were separate categories. In addition, Institute of Health Sciences (IHS) now includes Oral health services.

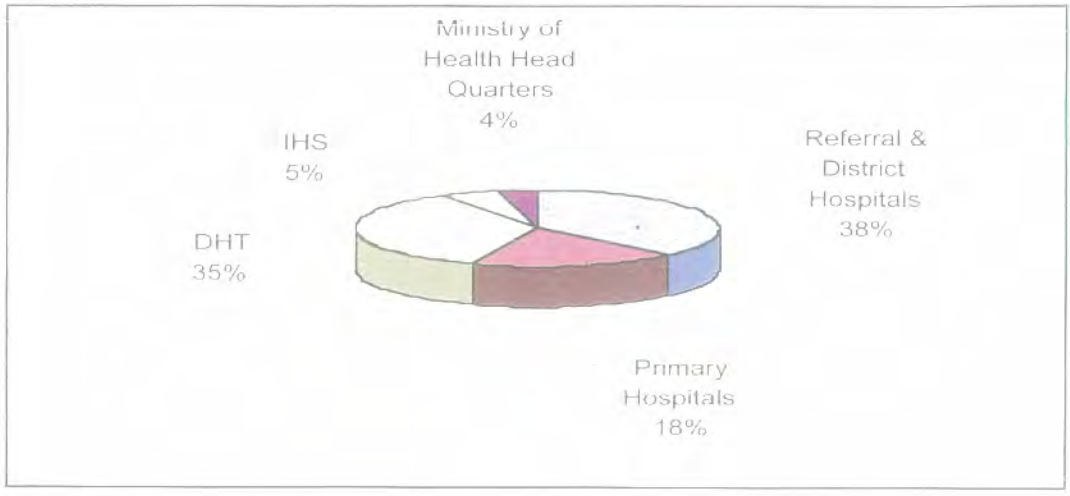
When examined by category across all districts, number of Professional Doctors increased from 352 in 2004 to 466 in 2005. The number of Professional Nurses also increased from 4,211 to 4468. A decrease of 13.7 percent is noticed in the number of Other Professionals from the 2004 (2,583) figure to 2005 (2,229). A decrease is found among Finance and Administration personnel which peaked in 2001 with 6,662 individuals followed by a decrease of 6,598 to the current level of 4, 253 personnel in 2005.

Figure 1.1 Trends in health personnel by category, 2001-2005



In 2005 hospital personnel accounted for the greatest percentage of health personnel in the country (91 percent).

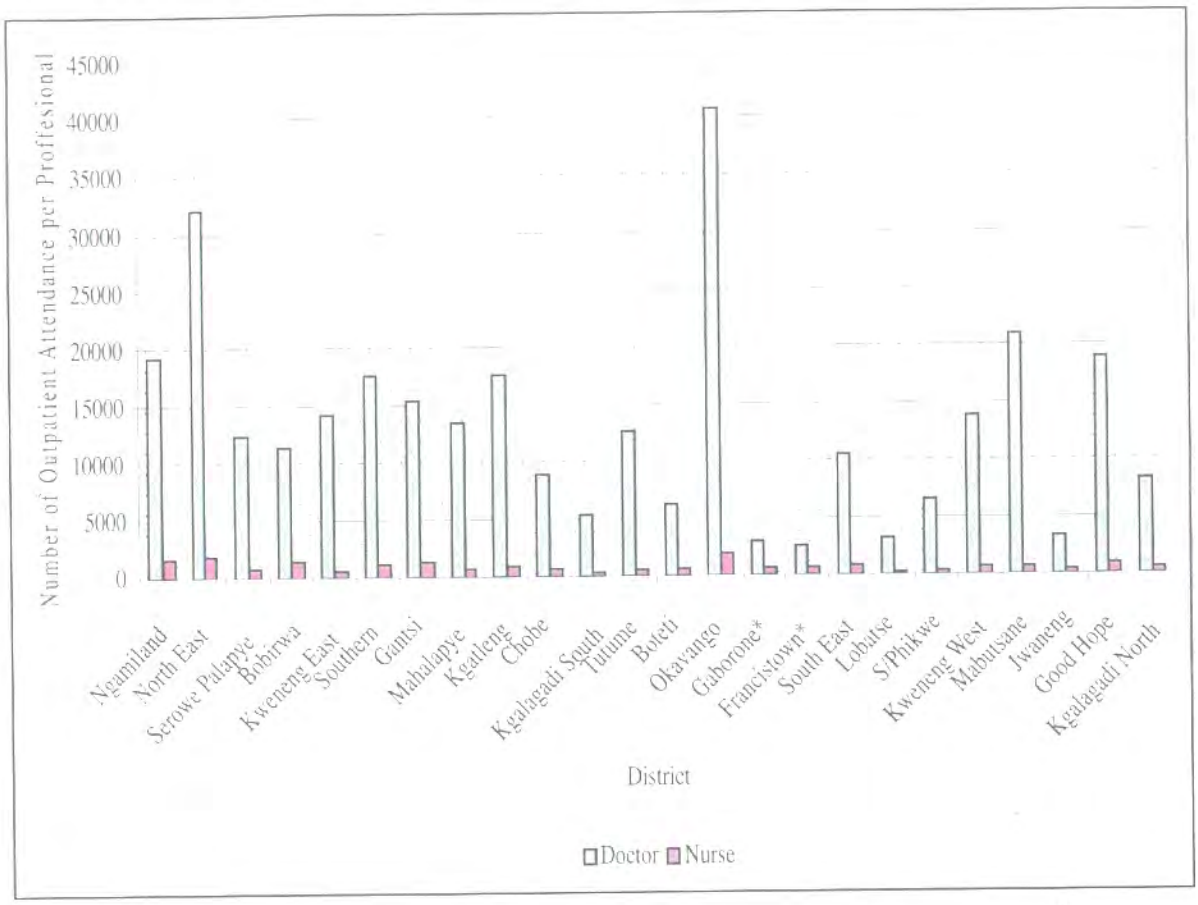
Figure 1.2 Percentage of Health personnel by location type - 2005



Human resource allocation by district was examined by looking at the ratio of professional doctors and nurses to the number of outpatient attendances (see Technical Notes, attendances-outpatient) in 2005. For example, in North East health district, there were four professional doctors and 98,711 outpatient attendances, thus the ratio was 1 doctor to 24,678 outpatient attendances (Figure 1.3).

Across all districts there is a higher scarcity of doctors than nurses. North East has the greatest scarcity of doctors, followed by Okavango with a ratio of 1:21,470. Okavango also has the highest ratio of nurses to outpatient attendances at 1:1,171.

Figure 1.3 Ratios of Health Personnel per Outpatient Attendance by Health District - 2005



*Districts with underreporting

Of note, two referral hospitals, Princess Marina in Gaborone health district and Nyangabgwe in Francistown health district, briefly submitted outpatient attendances therefore the ratio of professionals to outpatient attendances may be underestimated in these districts.

1.1 Access To Primary Health Care Services In Botswana

In Botswana Healthcare is delivered through decentralised system with primary health care being the pillar of the delivery system. Botswana has an extensive network of health facilities (hospital, clinics, health posts, mobile stops) clustered in the twenty four (24) health districts.

Health services are under management of both the Ministry of Health (MOH) which oversees all hospitals (referral, districts and primary) and the Ministry of Local Government, which is in charge of clinics, health posts and mobile stops.

Table 1.1 below gives a summary of Population with access to health services within 15 km radius; 8km and 5 km radius from the nearest Health Facility by Urban/ Rural Residence.

At national level, 84 percent of population is within 5 km radius from the nearest health facility. There is an 11 percent population between between 5 km and 8 km radius, which translate into a total of 95 percent population within 8 km radius. The Urban areas data show that 96 percent of urban residents are within 5 km radius from the nearest Health Facility compared to 72 percent of rural residents. Only 4 percent of urban residents live between 5km and 8km radius from the nearest health facility. The 4 percent is found in Palapye and Jwaneng areas.

In Rural areas, 72percent and 17 percent of population are within 5 km and 8 km radius from the nearest health facility respectively, giving a total of 89 percent within 8 km radius in rural areas. North East,Southern and Kgagaladi South have all (100 %) their inhabitants within 5 km radius from a health facility, while areas of Serowe,Bobirwa, Mahalapye and Gomare have all their inhabitants within 8 km radius. Kweneng West has the lowest proportion of population within 5 km radius of 5 percent followed by South East with 14 percent.

Percentage of Population with Access to Primary Health Care Services within 15km, 8 km and 5 km Radius from Health Facility by Urban /Rural Residence - April 2007

Residence	Percentage of population Between 8 and 15 km radius from facility	Percentage of population Between 5 and 8 km radius from facility.	Percentage of population Within 5 km radius from facility

This information was collected between December 2006 and April 2007 .Health districts were requested to submit distances that people travel to reach primary Health Facilities, to the Health Statistics Unit in Gaborone.The Health Statistics Unit calculated proportion of population in given localities as per the given distances from the nearest facility using the 2007 Population projections.

2.0 OUTPATIENT STATISTICS

2.1 Introduction

The revised data collection tool (MH1049/Rev2003) and International Classification of Disease 10th edition (ICD10) codes were introduced in 2004. However, some facilities used old form (MH1049/Rev95) as the revised tools reached these facilities late.

The number of outpatient attendances is a count of the number of diagnosis/conditions a person presents. For example a person that presents two diagnosis/conditions on one visit is counted as two attendances. In the revised tool MH1049/Rev2003 consultation should be recorded either as new or repeat cases. New consultation refers to a case where a patient is seeking health service for a condition for the first time, whereas repeat refers to cases where a patient is getting services for the same condition for the second time, or several times.

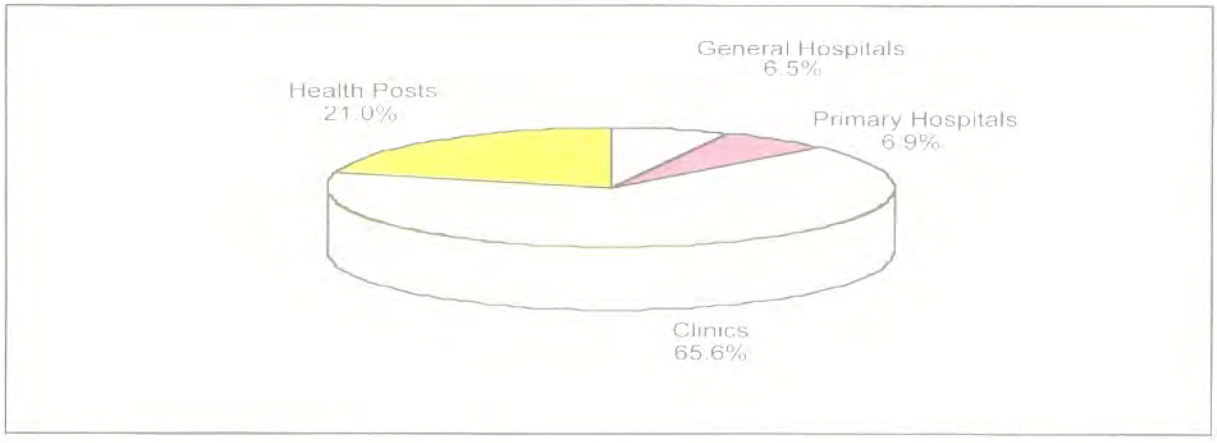
Data reported is maintained and used to determine the number of attendances of notifiable diseases, sexual transmitted infections, family planning supplies, child health services and non institutional births and death among others. The statistics does not include information from private practitioners.

Nationally, clinics are the most frequently used health facility- type for outpatient services followed by health posts because of:

(a) Policy of visit clinics and health posts before visit hospital i.e. upper level of care

(b) Clinics and health posts are spread therefore more accessible (Figure 2.1)

Figure 2.1: Percentage of Outpatient attendances by Health Facility Type – 2005



2.2 Outpatient Morbidity

The total number of outpatient attendances increased by 4.5 percent from 3,261,166 in 2004 to 3,408,787 in 2005. The major contributing condition in outpatient morbidity was disease of the respiratory system (e.g. cough and colds) by 31.91 percent, followed by hypertension and diseases of musculoskeletal with 13.47 percent and 13.33 percent respectively. Skin conditions followed closely by 12.40 percent. (Table 2.2)

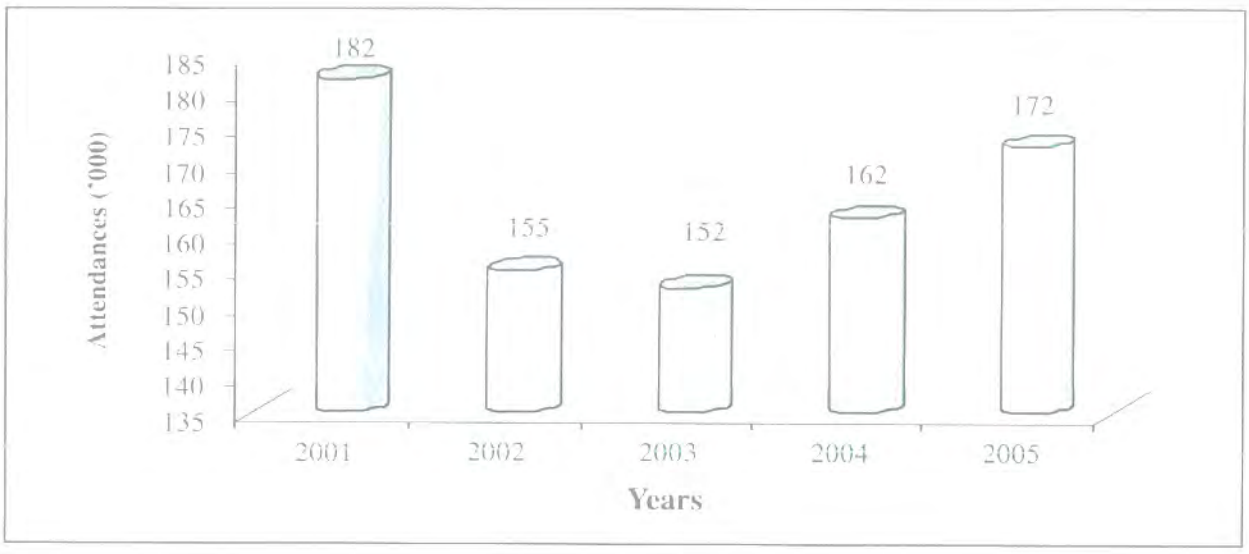
Table 2.2: Major causes of outpatient morbidity - 2005

Diagnosis	Attendances	Percentage (%)
Disease of respiratory system	658,769	31.91
Hypertension	278,043	13.47
Diseases of musculoskeletal	275,098	13.33
Skin conditions	256,062	12.40
Tonsillitis	127,438	6.17
Eye diseases/conditions	132,714	6.43
Other external causes of injuries	119,378	5.78
Ear diseases/conditions	75,257	3.65
HIV positive	79,465	3.85
Diarrhoea (acute) with some dehydration	62,165	3.01
Total	**2,064,389**	

2.3 Sexually Transmitted Infections

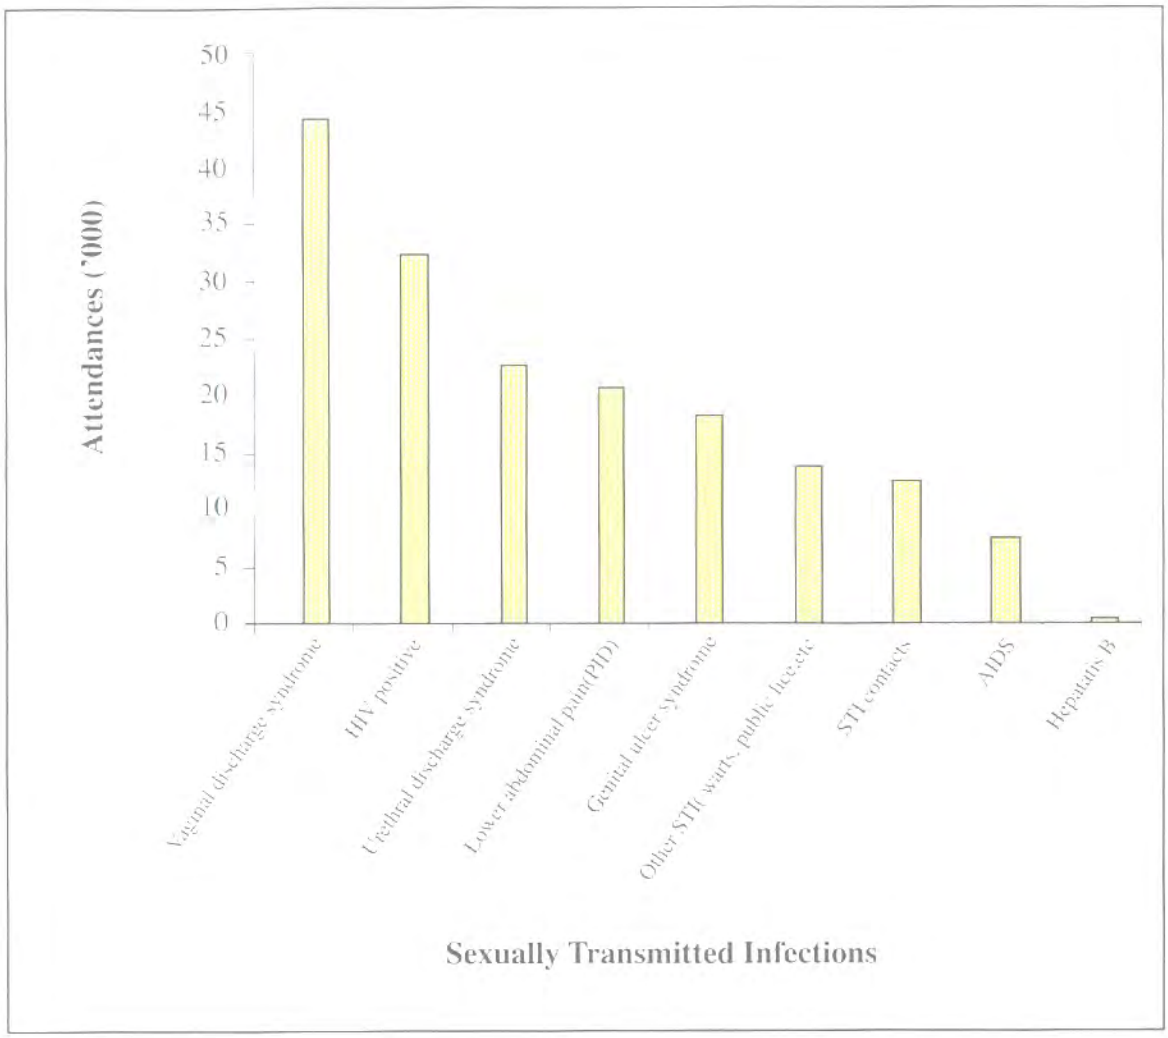
Since 2001 the first increase in sexually transmitted infections was noticed in 2004 followed by a 6.2 percent increase in 2005 by 172,230 STI's. This increase could be the result of reporting changes when STI's attendances started to include HIV positive and AIDS. (Figure 2.3.1)

Figure 2.3.1 Number of Sexual Transmitted Infections: - 2001-2005('000)



In overall, STI's are common amongst females with a total percentage of 63.3 percent as compared to males with 36.7 percent. STI's are mostly common among the age group 30+ with age group 0-14 constituting only about 4.7 percent of the overall total (Table 3.5). The most common diagnosis of STI's in 2005 was vaginal discharge syndrome by 44,132 which accounts for 25.6 percent of total attendances followed by HIV positive with 18.8 percent. Other common conditions were urethral discharge syndrome with 13.2 percent, lower abdominal pains (PID) and genital ulcer syndrome followed closely by 12 percent and 10.5 percent respectively. AIDS constitutes 4.3 percent of the overall STI's attendances (Figure 2.3.2).

Figure 2.3.2: Sexually Transmitted Infections Attendances – 2005('000)

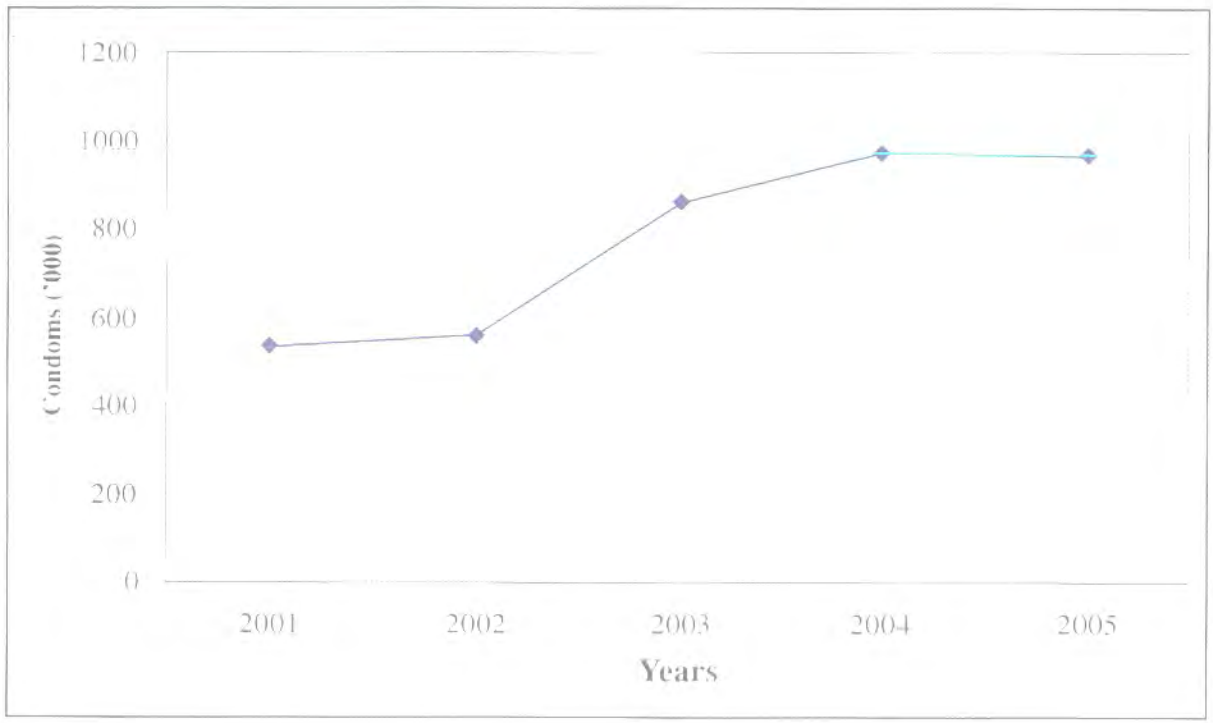


2.4 Family Planning (FP)

Family planning visits have decreased by 2.9 percent from 1,166,717 in 2004 to 1,132,547 in 2005 (Figure 2.5.1) The number of people who received family planning services as repeat visits show the largest frequency with 929,332 attendances while 203,215 were new attendances. The preferred method of contraception is similar among new and repeat visits, majority of both being condoms at 84.4 percent.

The second preferred method of family planning is pill at 7.5 percent followed by injections at 6.9 percent. Total of first time and repeat Family Planning visits by preferred method of contraception are shown in Table 3.7. Gaborone health district reported the highest number of FP visits among all health districts in 2004 with a total of 80,063 attendances of which 99.8 percent were reported at clinics.

Figure 2.4.1: Condom Use, 2001 – 2005 ('000)



From 2002 condom use has been steadily increasing over time, a slight decrease was noticed in 2004 through 2005. (Figure 2.4.1).

2.4.1 Ante - Natal

In 2005 an increase of 14.9 percent in the total number of antenatal visits was noticed from the 2004 figure of 278,638. There were a total of 320,318 ante natal visits in 2005, of which 47,574 were new visits and 272,744 repeat visits.

Data collected on ante natal visits by age group shows that majority of attendances were in the age group 20-24 with 58,898 visits followed by age group 25-29 with 46,312 visits and age group 30-39 with 36,543 visits. At health district level the highest frequency of ante natal visits was in Gaborone health district with 33,563 followed by Kweneng East health district with 19,739. The lowest frequencies were in Mabutsane health district by 1,234 visits.

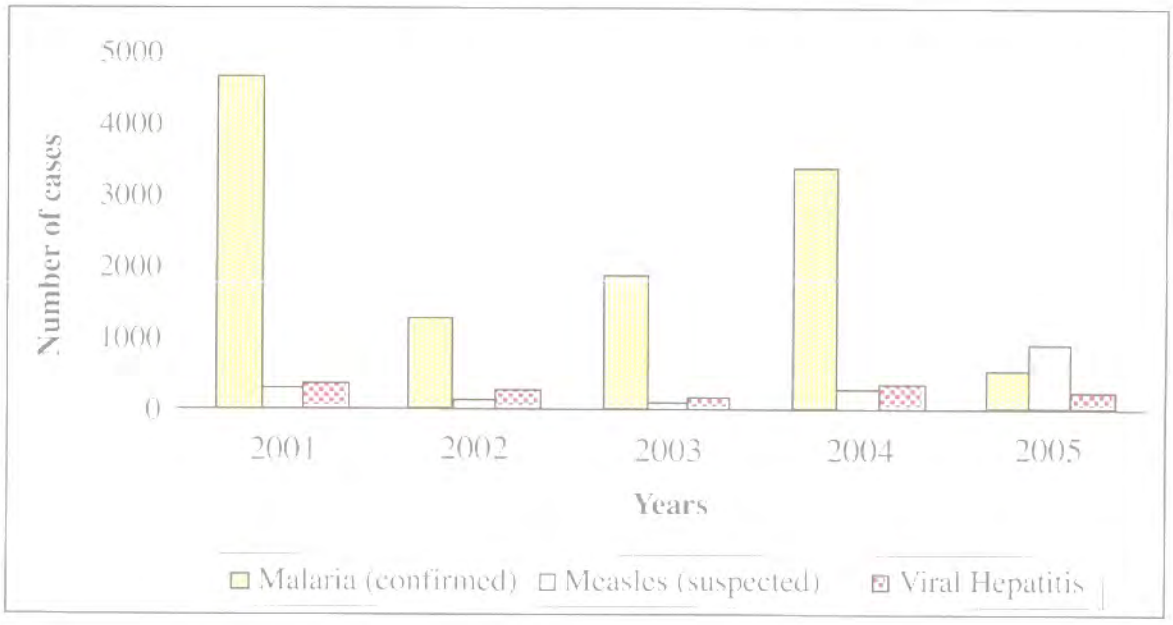
Figure 2.4.2: Number of Family Planning and Ante Natal Visits – 2005 ('000)

2.5 Notifiable Diseases

The notifiable disease surveillance system is used to monitor and control the outbreak and spread of certain diseases to control the possibility of an epidemic. Notifiable diseases are reported on a weekly and monthly basis. The four most significant are malaria, measles, viral hepatitis and diarrhoea.

Between 2004 and 2005 number of confirmed malaria and viral hepatitis cases have all fluctuated as has the number of measles cases among both children under the age of five and all persons over five years (Figure 2.5).

Figure 2.5 Trends in Select Notifiable Diseases, Botswana: 2001-2005



2.6 Eye Outpatient

The number of eye outpatient attendances in 2005 was 90,019, of which 58,350 were new and 31,669 were repeat attendances. Other conjunctivitis had the greatest frequency and accounted for 19.24 percent followed by examination of the eye and vision accounting for 18.95 percent .This was followed by pterygium at 5.22 percent. (Table 3.11)

The most affected age group was 15-44 years with 43071 (47.8 percent) of the total number of eye outpatient attendances. Age group 65 and above followed by 16949(18.8 percent). Females constituted 56.6 percent of eye outpatient attendances, whereas male constituted 43.4 percent of the overall total.

2.7 Non Institutional Statistics.

This information is based on reported livebirths and deaths that occur in non health institutions such as at homes. In 2005 there were 806 non institutional livebirths, a decrease of 19.2 percent as compared to 2004 which had a total of 997. Most cases were reported at Tutume health district followed by Gantsi health district with 284 and 155 respectively.

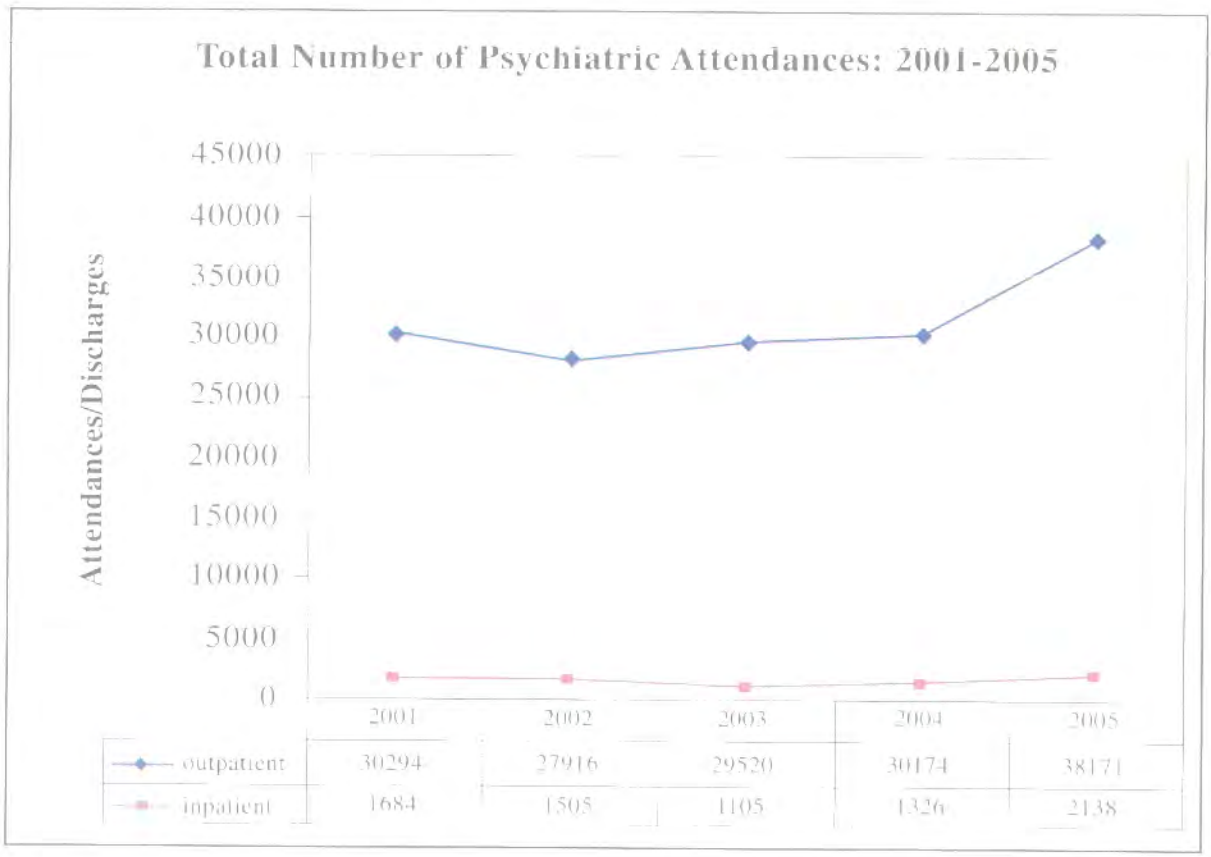
A total of 408 non institutional deaths were reported in 2005, a significant drop of 57.4 percent as compared to 2004 with 957 cases. Mahalapye health district reported more deaths with 85 cases followed by Bobirwa health district with 78 cases.

2.8 Mental Health

Generally Mental Outpatient attendances have increased over time to the current level of 38,171, an increase of 26.5 percent as compared to 2004 with 30,175 total attendances (Table 5.1).

The most prevalent outpatient psychiatric diagnosis was schizophrenia with a total of 15,934 attendances (41.7 percent) followed by epilepsy with 6,316 attendances (16.5 percent) and depressive episode with 5,769 attendances (15.1 percent).

Psychiatric inpatient attendances increased significantly by 61.2 percent from 2004 with 1,326 to 2,138 in 2005. In overall, male accounted for more attendances than females in both outpatient and inpatient psychiatric.



3.0 INPATIENT STATISTICS

3.1 Hospital Activities

Hospital activities are recorded and reported from general hospitals, primary hospitals and clinics with maternity wards. The number of beds and inpatient admissions have increased from 3,704 to 3,955 (6.8 percent increase) respectively from 2001 to 2005 (See Table 3.1). However, there has been an increase in number of patient days from 811,841 to 908,300 (11.9 percent increase) between 2001 and 2005. (Table 3.1). The frequency of inpatient deaths has increased between 2001 and 2005 by 6%.

Bed turnover rate is the average number of patients during the year that have occupied each bed at a given facility. The trend of hospital activities shows that the occupancy rate declined in 2001 and has remained stable through 2003 at approximately 60%, and increased between 2004 and 2005 (Table 3.1). The average length of stay declined slightly in 2001 and has since remained constant through 2003 but dropped down between 2004 and 2005. The bed turnover rate showed a fluctuation between 2001 and 2005.

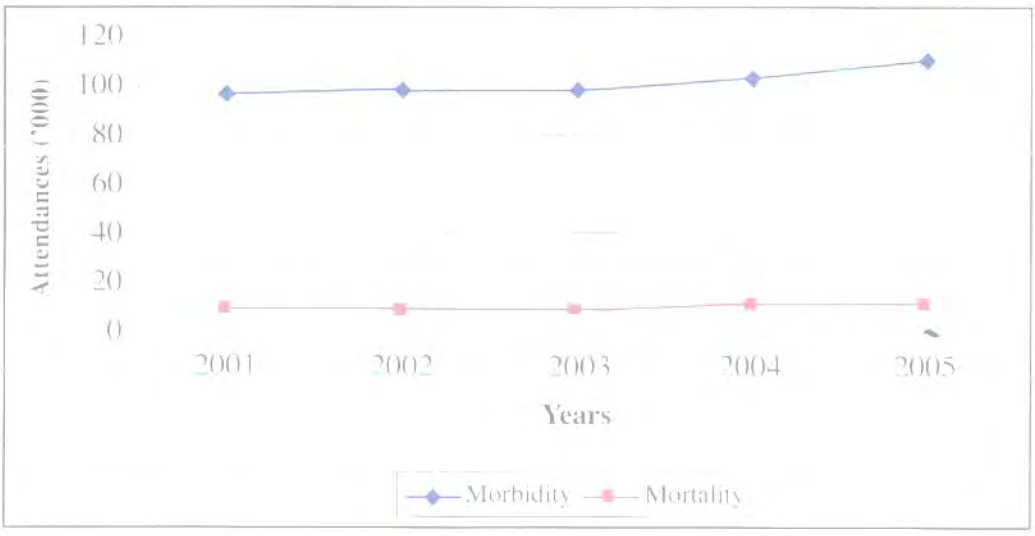
Table 3.1 Trends in hospital Activities by Type, Botswana: 2001-2005

	2001	2002	2003	2004	2005
Number of Beds	3,704	3,843	3,816	3,889	3,955
Inpatient Admissions	128,176	131,974	142,478	143,694	175,125
Inpatient Deaths	9,064	9,682	10,062	9,193	9,468
Patient Days	811,741	836,281	845,645	824,569	908,300
Occupancy Rate	60	59.6	60.7	58.1	62.9
Average length of stay (days)	5.9	5.9	5.9	5.8	5.4
Bed turnover rate	37.1	36.9	37.6	36.9	42.6
Newborns	35,736	37,017	38,278	36,328	44,328
Born before arrival	1,336	1,471	1,576	1,619	1,739
Discharged Alive	38,115	39,253	39,893	38,079	44,151
Discharged Dead	682	641	672	826	1,231

3.2 Morbidity and Mortality

In 2005 there were a total of 109,942 inpatient morbidity attendances and 10,958 mortality cases in Botswana. Inpatient morbidity attendances have increased since 2001 and a slight decrease has been noticed in inpatient mortality from 2004 to 2005.
(Figure 3.2.1).

Figure 3.2.1 Inpatient Morbidity and Mortality, Botswana 2001-2005



The distribution of morbidity by age shows that individuals between 25-34years old accounted for 23% of those attendances (Figure 3.2.2). Infants (excluding neonatal) accounted for 5% of attendances and children aged one to less than five years accounted for 10%. In overall, females accounted for 57% of all inpatient attendances.

Figure 3.2.2 Inpatient Morbidity by Age Group and Sex in 2005, Botswana

	<1	1-4	5-14	15-24	25-34	35-44	45-54	55-64	65+	NS

*NS: age not stated

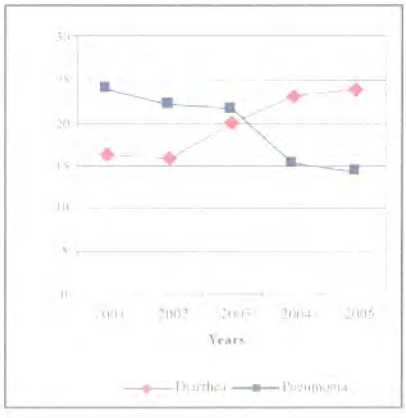
3.3 Morbidity of Infant, Children (<5yrs) and All Ages

Morbidity over time among inpatients differs by age category. From 2001 to 2005, the overall number of infant morbidity increased from 5,325 cases to 6,604 cases in 2005. The proportion of infant cases for diarrhea increased by 16.2 percent in 2001 to 24 percent in 2005, and pneumonia decreased by 23.8 percent in 2000 to 14 % in 2005. In children (including infants), the number of attendances has increased from 15,977 in 2004 to 15,985 in 2005. This is shown in Figure 3.3.

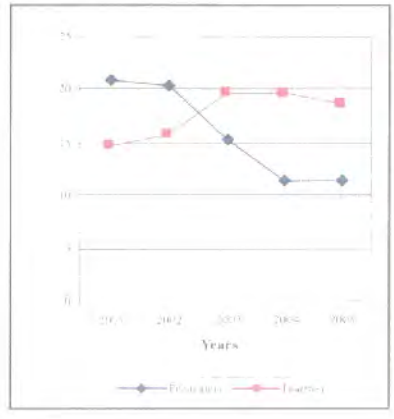
The proportion of children with inpatient attendances due to diarrhea has been stable at 19% in 2004 and 2005. Among all ages (infants, children and adults but excluding neonatal), the overall number has increased from 102,980 in 2004 to 109,942 in 2005. The proportion of inpatients attending health care facilities due to pneumonia has increased from 4 percent in 2004 to 4.2 percent in 2005. Pulmonary tuberculosis was not a major cause of morbidity among infants and children under 5 years old and therefore is not presented in the corresponding figures.

Figure 3.3 Trends in Inpatient Morbidity among Infants, Children and All Ages (including infants, children and adults but excluding neonatal), Botswana, 2001-2005

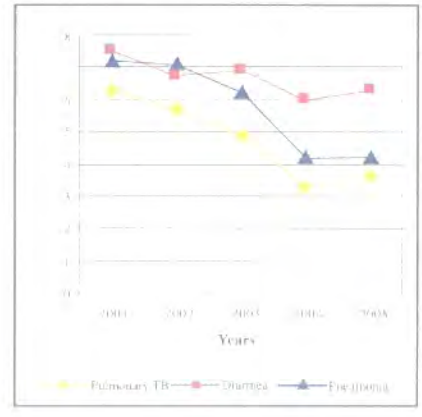
Infants



Children



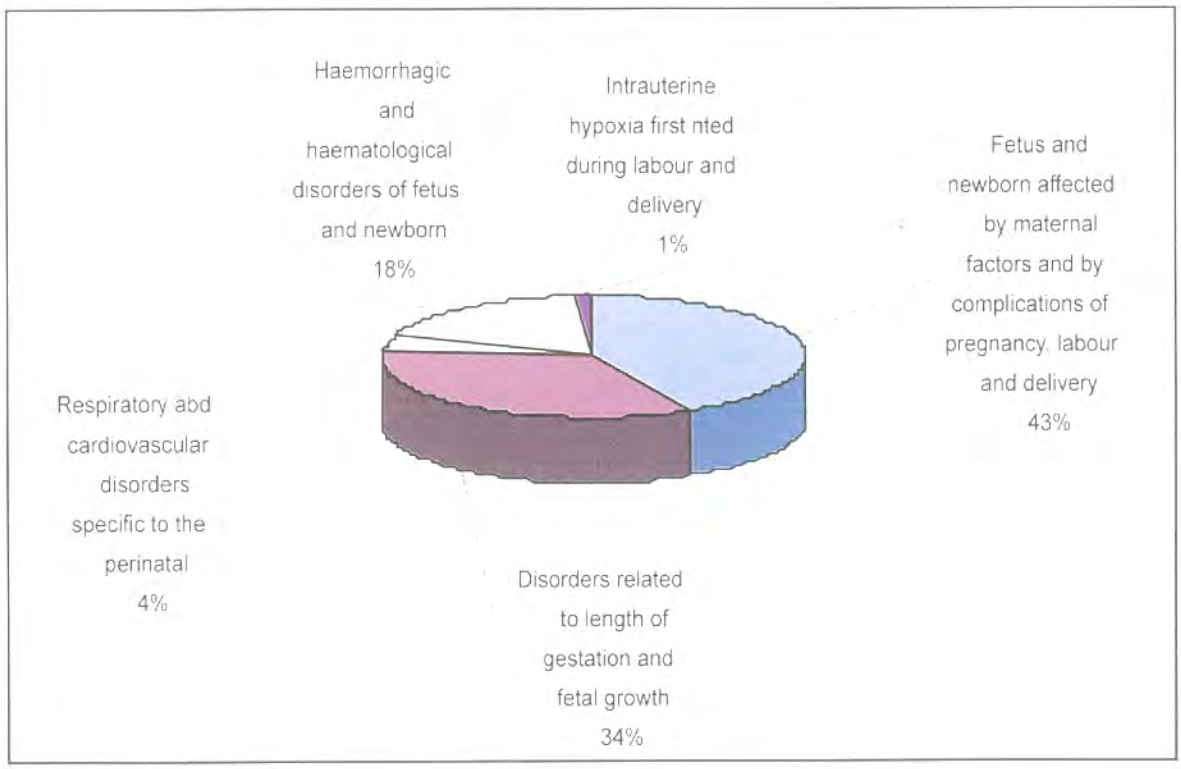
All Ages (excluding neonatal)



3.4 Neonatal Morbidity

There were 8,301 inpatient attendances of neonatal (aged less than 28 days) morbidity in 2005. The most frequent cause of neonatal morbidity in 2005 was fetus and newborn affected by maternal factors and complications of pregnancy, labor and delivery, accounting for 43 percent of inpatient attendances among neonatal patients, followed by disorders related to length of gestation and fetal growth accounting for 34 percent. (Figure 3.4).

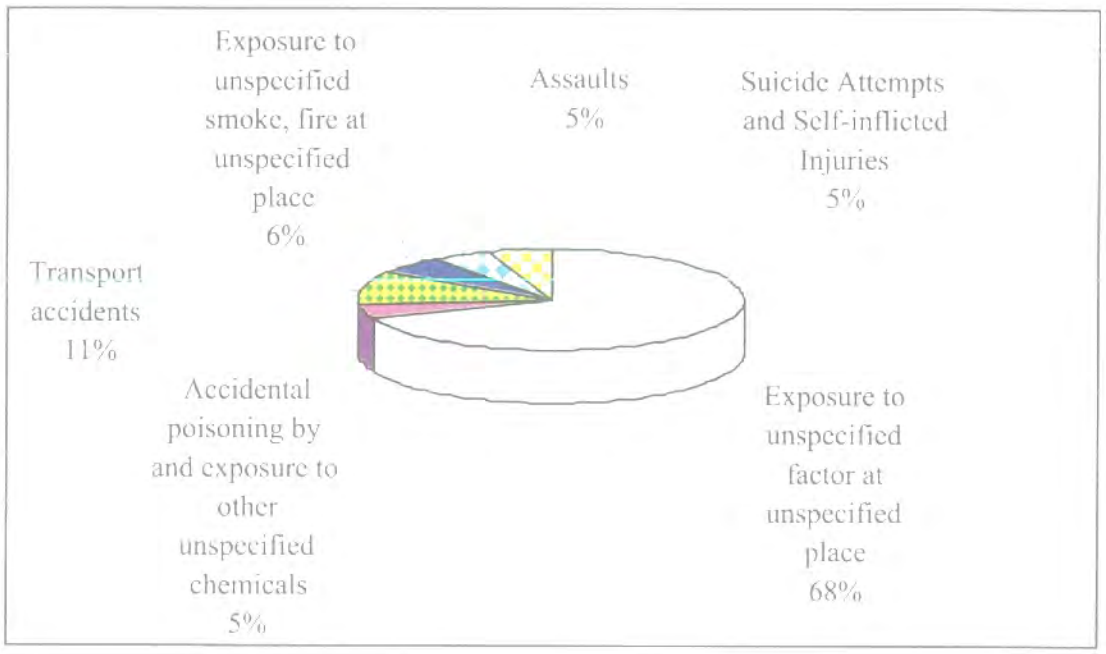
Figure 3.4 Major Causes of Neonatal Inpatient Morbidity by Age in Days, Botswana - 2005



3.5 External Causes of Morbidity

In 2005 there were a total of 11,371 external causes of injuries resulting in inpatient attendance in Botswana. This represents a decrease from 2004 when there were 11,414 attendances attributed to external causes. Males accounted for 7,050 (62 percent) in 2005 while females accounted for 4,321 (38 percent) of these attendances. Among men, the age group with the highest frequency of injuries by external causes was men in the 25 - 34 year old age range with 1,625 number of attendances. The greatest frequency of inpatient external injuries was caused by accidental exposure to unspecified factors (including accidents and fractures not otherwise specified.) (Figure 3.5).

Figure 3.5 Inpatient External Causes of Injuries (all ages excluding neonatal), Botswana 2005



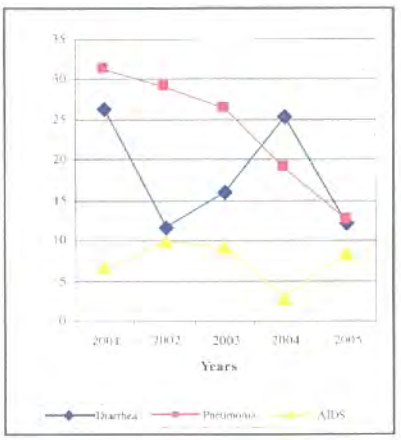
3.6 Mortality of Infant, children and all ages

Mortality over time differs by age category. Between 2004 and 2005, the overall number of inpatient infant, childhood and all age deaths (excluding neonatal) was 10,958. The number of infant deaths increased from 932 in 2004 to 944 in 2005. The proportion of infants dying of diarrhea and pneumonia decreased over the same time period from 25.2 percent and 18.9 percent in 2004 to 12.1 percent and 12.5 percent in 2005 respectively (Figure 3.6). The number of inpatient deaths decreased from 11,041 in 2004 to 10,958 in 2005. Pulmonary tuberculosis was not a major cause of mortality among infants and children under 5 years old and therefore is not presented in the corresponding figures.

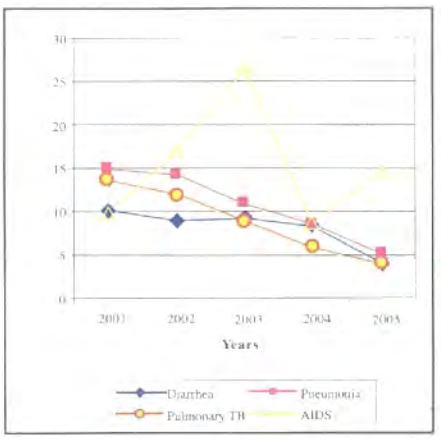
Figure 3.6 Trends in Inpatient Mortality among Infants, Children and All Ages (including infants, children and adults but excluding neonatal), Botswana: 2001-2005

Infants

Children (including infants)



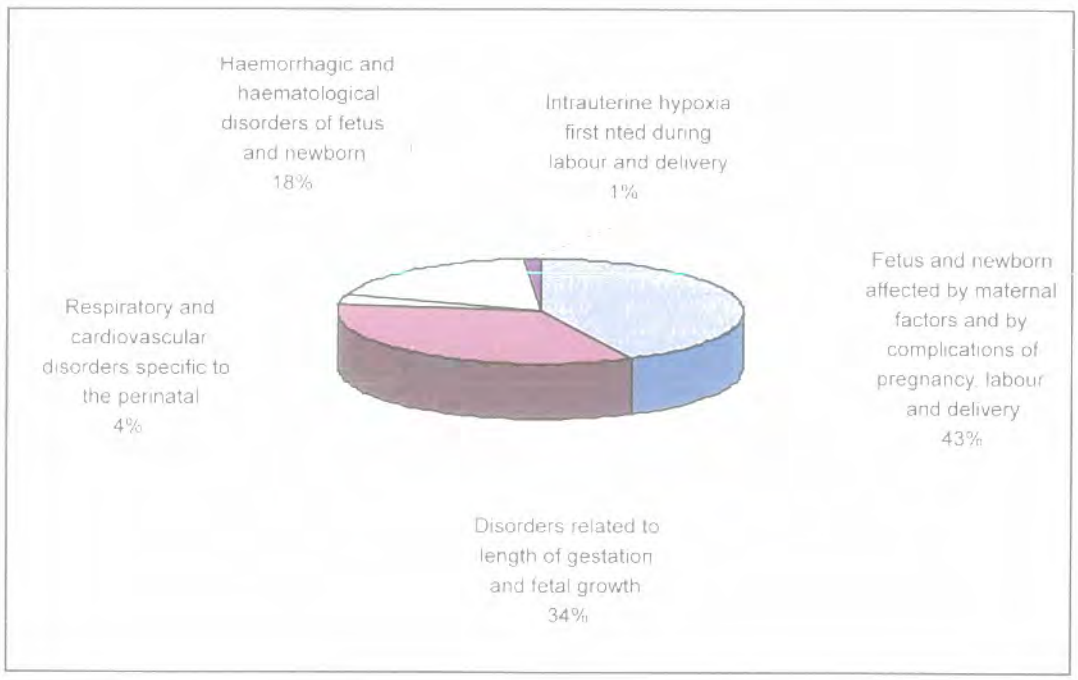
All Ages (excluding neonatal)



3.7 Neonatal Mortality

In 2005 there were 511 deaths among neonatal (aged less than 28 days) inpatients in Botswana. Males accounted for 275 (53.8 percent) of institutional neonatal deaths nationwide. Data collected on neonatal mortality shows that the greatest proportion of deaths among neonates occurred at under one day old (97.3 percent).The second most frequent age of neonatal deaths was among neonates two days old (2.0 percent). The majority of inpatient neonatal mortality was caused by fetus and newborn affected by maternal factors and complications of pregnancy, labor and delivery with 43%.

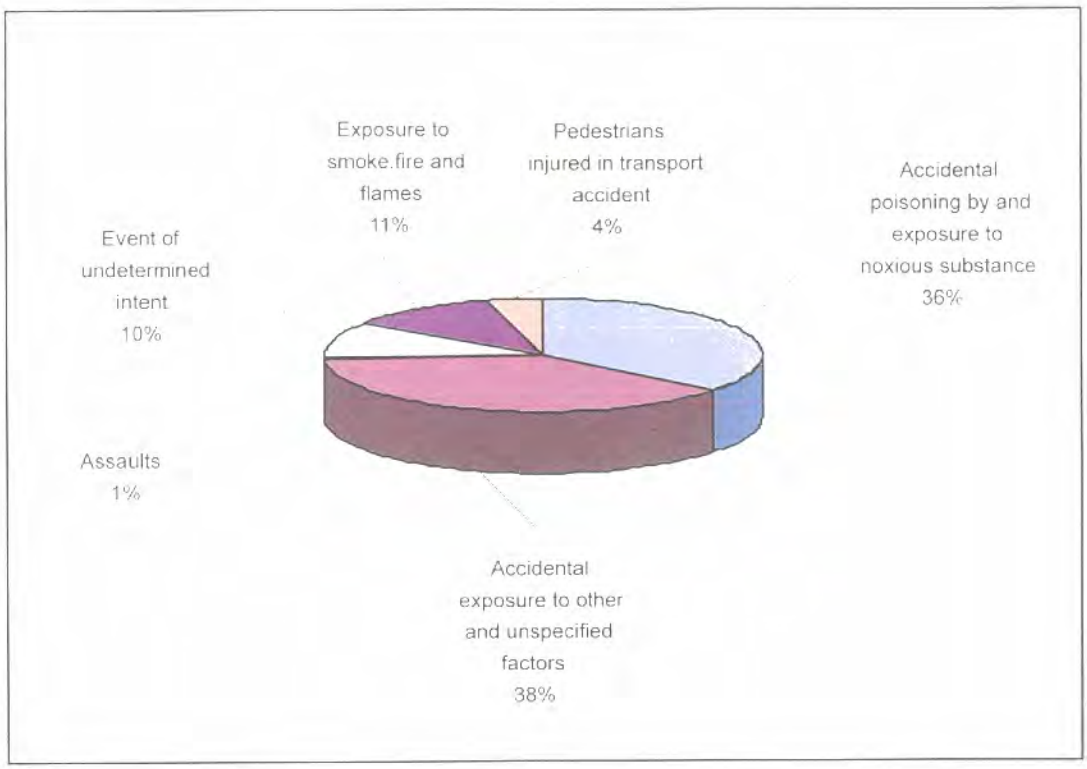
Figure 3.7 Major Causes of Inpatient Neonatal Mortality, Botswana - 2005



3.8 External Causes of Death

In 2005 there were 343 deaths by external causes resulting in inpatients attendances. This represents an increase from 2004 where there were 232 deaths attributed to external causes. Males accounted for 199 (58.0 percent) while females accounted for 144 (42.0 percent) of deaths. The age group with the most frequent mortality due to external causes was among under one year olds, accounting for 66 (18.1 percent). The most frequently occurring underlying cause of external death was due to accidental exposure to other and unspecified factors at 38 percent followed by accidental poisoning by and exposure to noxious substances at 36 percent (Figure 3.9).

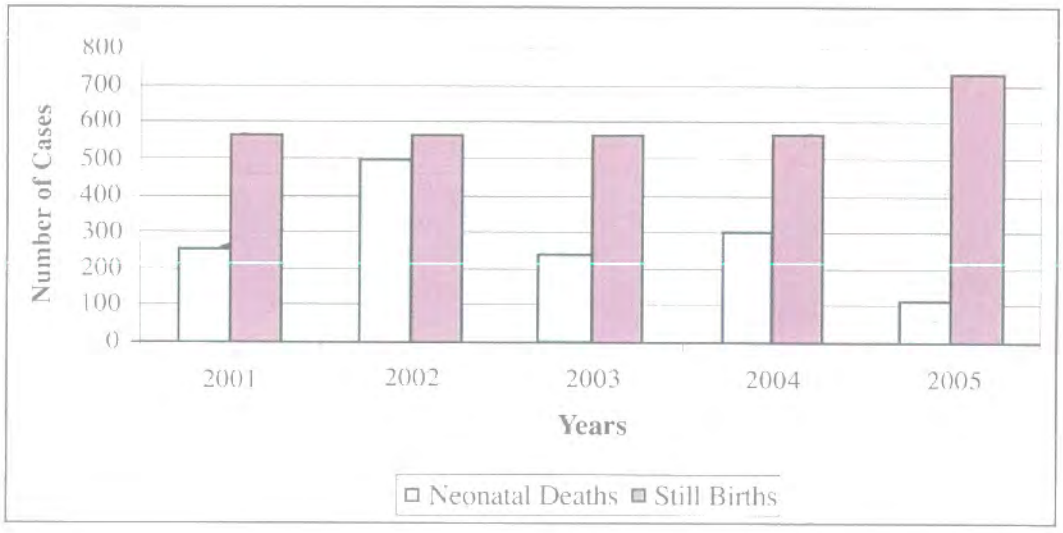
Figure 3.8 External Causes of Death among Inpatients (all ages excluding neonatal), Botswana 2005



3.9 Births

In 2005 there were 46,945 inpatient births, 24,475 (52.1 percent) of which were male and 22,470 (47.9 percent) females. 42,688 (90.9 percent of all inpatient births were through a normal mode of delivery, and 3,270 (7.5 percent) were through caesarian. The most frequent age of an inpatient mother giving birth was 20-24 years old, accounting for 16,070 (34.2 percent) of all mothers. Out of all births, 731 were stillborn of which 35 were born before arrival and 114 were born alive and died later (LBD) of which 9 died before arrival. Figure 3.9 shows the trend over time in stillborn and LBD among inpatient births. Nationally in 2005, 6,346 of all inpatient live births had a birth-weight under 2500g.

Figure 3.9 Inpatient Stillborn and Born Alive but Died Later (LBD), Botswana 2001-2005



3.10 Maternal Mortality

This section provides for the first time, information on Maternal Mortality Ratio (MMR) in Botswana. As part of a collaborative effort to enable and improve the availability and quality of maternal mortality information, Central Statistics Office though its Health Statistics Unit and Ministry of health, are jointly ensuring the availability of number of live births and maternal deaths data respectively.

The 2005 data show that there were 71 cases of maternal deaths recorded in Botswana resulting in the Maternal Mortality Ratio (MMR) of 157.9. The most affected age group was 30-34 years. The most frequently occurring underlying cause of maternal mortality cases were due to HIV/AIDS with 30 percent followed by shock during or following pregnancy with 12.7 percent. The World Health Organisation's International Classification of Diseases – Volume 10 (ICD 10) was used for the purpose.

		F	1	1	-	-	2

1.1 Method of data processing

The Unit introduced Cs-Pro (Census & Survey Processing System) package for analysis of 2004 In-/Out patient data for the first time. In the old data collection IMPS (Inter Microcomputers Processing System was used to analyse data that was collected using old forms.

Health facilities are grouped into health districts that coincide with selected census and administration boundaries. Each facility is assigned a unique 5-digit identification number. The first two digits designate the district; the third digit designates the type of facility, that is hospital, primary hospital, clinic and health post; and the last two digits represent each specific facility within a district. These codes are used for data processing.

Health personnel data are collected in the last month (December) of the reporting year. Previous year health personnel printouts for all units of the Ministry of Health are sent to the respective units to update to the current year. When we get back the printouts, we also update our database. This is actually the snapshot of the health staff at a particular point in time and as such, it does not show the staffing situation for the earlier months of the reporting year.

Outpatient data received from the periphery units are checked for missing information, that is, diagnosis entry and additions. Reporting facilities are also monitored to ensure they reported on monthly basis and if not, necessary follow-ups are made.

Inpatient data are first checked for missing variables such as diagnosis, age and sex. Facilities reporting are closely monitored and follow-ups are made where necessary. The data are coded according to the ICD-10th Edition (see Appendix 2) and then captured and analysed using microcomputers in the unit.

Mental health data are coded according to the ICD-10th Edition and then captured using microcomputers. Tabulation is done in SPSS.

1.2 Output

In general, information presented in this report gives data on national aggregates by age, region, facility; type of services rendered and reasons of visiting a Health facility (Diagnosis). Basic ratios and rates are calculated for certain variables.
Data capturing and analysis are done using microcomputers in the unit by CsPro program and exported to SPSS for tabulation.

Table 1.1 1971, 1981, 1991 and 2001 Census Demographic Indicators

Population Characteristics	Census 1971	Census 1981	Census 1991	Census 2001
Enumerated Population	574,094	941,027	1,326,796	1,680,863
Male	262,121	443,104	634,400	813,488
Female	311,973	497,923	692,396	867,375
Non-Botswana	10,861	15,677	29,557	60,716
Botswana Nationals Abroad	45,735	42,069	38,606	28,210
Male (000's)	36,7	32,6	27,9	16,8
Female (000's)	9,1	9,4	10,7	11,5
Population Distribution (%)				
0-4	17.6	18.8	14.6	11.7
5-14	29.9	28.8	28.6	25
15-64	46.9	47.6	51.8	58.3
65 and older	5.6	5.1	4.9	5
Percentage of Females aged 15-49 (out of total females)	42.8	42.9	46.5	52.4
Dependency Ratio (per 1000)	113	110	93	71.5
Child-woman Ratio (per 1000)	759	819	602	430.1
Sex Ratio (Males per 100 Females)	84	89	92	93.8
Percentage Urban	9	17.7	45.7	54.2
Population Density (per km)	1	1.6	2.3	2.9
Crude Birth Rate (per 1000)	45.3	47.7	39.3	28.9
Crude Death Rate (per 1000)	13.7	13.9	11.5	12.4
Natural Rate of Increase (% per annum)	3.1	3.4	2.7	1.7
General Fertility Rate (per 1000 women aged 15-49)	189	210	161	106.9
Mean Age (years) at childbearing	30.5	30.6	30	30.3
Total Fertility Rate(births per woman)	6.5	6.6	4.2	3.3
Infant Mortality Rate	-	-	-	56
Child Mortality Rate	-	-	-	19
Under 5 Mortality	-	-	-	74
Life Expectancy at Birth (years)	55.5	56.5	65.3	55.6
Males	52.5	52.3	63.3	52
Females	58.6	59.7	67.1	57.4
Mean Age (years)	23.4	22.7	23	24.8
Males	22.6	22	22.4	24.2
Females	24.1	23.4	23.5	25.3
Median Age(years)	*15*	*15.3*	*16.8*	20.1
Males	*13.5*	*15*	*16*	19.4
Females	*16.7*	*16.5*	*17.4*	20.8

Article I. ICD 10 Chapters

In tabulating in-patient statistics, Botswana adheres to the Tenth International Classification of Diseases [ICD 10](see World Health Organisation, Manual of the International Statistical Classification of Diseases, and Causes of Death, Tenth Revision, Volume 1 and 2, Geneva, 2004)

The Basic Tabulation List containing 2 038 three - and four - digit rubrics is used to code and classify diagnoses.

A "rubric" is a term under which conditions, descriptions, diseases or disorders are classified. To help readers, each three-digit rubric from the List is cross referenced below to one of the 21 major chapters of ICD.

ICD10 Chapter	Basic tabulation list code	
I. Infectious and Parasitic		
	A00-A09	Intestinal infection disease
	A15-A19	Tuberculosis
	A20-A28	Certain zoonotic bacterial diseases
	A30-A49	Other bacterial diseases
	A50-A64	Venereal diseases
	A65-A69	Other spirochaetal disease
	A70-A74	Other diseases caused by chlamydiae
	A75-A79	Rickettsiosis
	A80-A89	Viral infections of the central nervous system
	A90-A99	Arthropod-borne viral fevers and viral haemorrhagic fevers
	B00-B09	Viral infections characterized by skin and mucous membrane lesions
	B15-B19	Viral hepatitis
	B20-B24	Human immunodeficiency virus (HIV) diseases
	B25-B34	Other viral diseases
	B35-B49	Mycoses
	B50-B64	Protozoal diseases
	B65-B83	Helminthiases
	B85-B89	Pediculosis, acariasis and other infestations
	B90-B94	Sequelae of infectious and parasitic diseases
	B95-B97	Bacterial, viral and other infectious agents
	B99	Other infectious diseases

II. Neoplasms

C00-C14 Malignant neoplasm of lip, oral cavity and pharynx

C15-C26 Malignant neoplasm of digestive organs of peritoneum

C30-C39 Malignant neoplasm of respiratory and intrathoracic organs

C40-C41 Malignant neoplasm of bones and articular cartilage

C43-C44 Malignant neoplasm of skin

C45-C49 Malignant neoplasm of mesothelial and soft tissue

C50 Malignant neoplasm of breast

C51-C58 Malignant neoplasm of female genital organs

C60-C63 Malignant neoplasm of male genital organs

C64-C68 Malignant neoplasm of urinary tract

C69-C72 Malignant neoplasm of eye, brain and other parts of central nervous system

C73-C75 Malignant neoplasm of thyroid and other endocrine glands

C76-C80 Malignant neoplasm of ill-defined, secondary and unspecified sites

C81-C96 Malignant neoplasm, stated or presumed to be primary, of lymphoid, haematopoietic and related tissue

C97 Malignant neoplasms of independent (primary) multiple sites

D00-D09 In situ neoplasms

D10-D36 Benign neoplasms

D37-D48 Neoplasms of uncertain or unknown behaviour

III. Diseases of the blood and blood-forming organs and certain disorders involving the immune mechanism.

D50-D53 Nutritional anaemias

D55-D59 Haemolytic anaemias

D60-D64 Aplastic and other anaemias

D65-D69 Coagulation defects, purpura and other haemorrhagic conditions

D70-D77 Other diseases of blood and blood-forming organs
D80-D89 Certain disorders involving the immune mechanism

IV. Endocrine, nutritional and metabolic diseases.

E00-E07 Disorders of thyroid glands

E10-E14 Diabetes mellitus

E15-E16 Other disorders of glucose regulation and pancreatic internal secretion

E20-E35 Disorders of other endocrine glands

E40-E46 Malnutrition

E50-E64 Other nutritional deficiencies

E65-E68 Obesity and other hyperalimentation

E70-E90 Metabolic disorders

V. Mental and behavioural disorders

F00-F09 Organic, including symptomatic, mental disorders

F10-F19 Mental and behavioural disorders due to psychoactive substance use

F20-F29 Schizophrenia, schizotypal and delusional disorders

F30-F39 Mood (affective) disorders

F40-F48 Neurotic, stress-related and somatoform disorders

F50-F59 Behavioural syndromes associated with physiological disturbances and physical factors

F60-F69 Disorders of adult personality and behaviour

F70-F79 Mental disorders

F80-F89 Disorders of psychological development

F90-F98 Behavioural and emotional disorders with onset usually occurring in childhood and adolescence

F99 Unspecified mental disorders

VI. Diseases of the Nervous system

G00-G09 Inflammatory diseases of the central nervous system

G10-G13 Systemic atrophies primarily affecting the central nervous system

G20-G26 Extrapyramidal and movement disorders

G30-G32 Other degenerative diseases of the nervous system

G35-G37 Demyelinating diseases of the central nervous system

G40-G47 Episodic and paroxysmal disorders

G50-G59 Nerve, nerve root and plexus disorders

G60-G64 Polyneuropathies and other disorders of the peripheral nervous system

G70-G73 Diseases of myoneural junction and muscle

G80-G83 Cerebral palsy and other paralytic syndromes

G90-G99 Other disorders of the nervous system

VII. Diseases of the eye and adnexa

H00-H06 Disorders of eyelid, lacrimal system and orbit

H10-H13 Disorders of conjunctiva

H15-H22 Disorders of sclera, cornea, iris and ciliary body

H25-H28 Disorders of lens

H30-H36 Disorders of choroids and retina

H40-H42 Glaucoma

H43-H45 Disorders of vitreous body and globe

H46-H48 Disorders of optic nerve and visual pathways

H48-H52 Disorders of ocular muscles, binocular movement, accommodation and refraction

H53-H54 Visual disturbances and blindness

H55-H59 Other disorders of eye and adnexa

VIII. Diseases of the ear and mastoid process

H60-H62 Diseases of external ear

H65-H75 Diseases of middle ear and mastoid

H80-H83 Diseases of inner ear

H90-H95 Other disorders of ear

IX. Diseases of the circulatory system

I00-I02 Acute rheumatic fever

I05-I09 Chronic rheumatic heart diseases

I10-I15 Hypertensive diseases

I20-I25 Ischaemic heart diseases

I26-I28 Pulmonary heart disease and diseases of pulmonary circulation

I30-I52 Other forms of heart diseases

I60-I69 Cerebrovascular diseases

I70-I79 Diseases of arteries, arterioles and capillaries

I80-I89 Diseases of veins, lymphatic vessels and lymph nodes, not elsewhere classified

I95-I99 Other and unspecified disorders of the circulatory system

X. Diseases of the respiratory system

J00-J06 Acute upper respiratory infections

J10-J18 Influenza and pneumonia

J20-J22 Other acute lower respiratory infections

J30-J39 Other diseases of upper respiratory infection

J40-J47 Chronic lower respiratory diseases

J60-J70 Lung diseases due to external agents

J80-J84 Other respiratory diseases principally affecting the interstitium

J85-J86 Suppurative and necrotic conditions of lower respiratory tract

J90-J94 Other diseases of pleura

J95-J99 Other diseases of the respiratory sys

XI. Diseases of the digestive system

K00-K14 Diseases of oral cavity, salivary glands and jaws

K20-K31 Diseases of oesophagus, stomach and duodenum

K35-K38 Diseases of appendix

K40-K46 Hernia

K50-K52 Noninfective enteritis and colitis

K55-K63 Other diseases of intestines

K65-K67 Diseases of peritoneum

K70-K77 Diseases of liver

K80-K87 Disorders of gallbladder, biliary tract and pancreas

K90-K93 Other diseases of the digestive system

XII. Diseases of the skin and subcutaneous tissue

L00-L08 Infection of the skin and subcutaneous tissue

L10-L14 Bullous disorders

L20-L30 Dermatitis and eczema

L40-L45 Papulosquamous disorders

L50-L54 Urticaria and eczema

L55-L59 Radiation-related disorders of the skin and subcutaneous tissue

L60-L75 Disorders of skin appendages

L80-L99 Other disorders of the skin and subcutaneous tissue

XIII. Diseases of the musculoskeletal system and connective tissue

M00-M25 Arthropathies

M30-M36 Systemic connective tissue disorders

M40-M54 Dorsopathies

M60-M79 Soft tissue disorders

M80-M94 Osteopathies and chondropathies

M95-M99 Other disorders of the musculoskeletal system and connective tissue

XIV. Diseases of the genitourinary system

N00-N08 Glomerular diseases

N10-N16 Renal tubulo-interstitial diseases

N17-N19 Renal failure

N20-N23 Urolithiasis

N25-N29 Other disorders of kidney and ureter

N30-N39 Other diseases Of urinary system

N40-N51 Diseases of male genital organs

N60-N64 Disorders of breast

N70-N77 Inflammatory diseases of female pelvic organs

N80-N98 Non-inflammatory disorders of female genital organs

N99 Other disorders of genitourinary tract

XV. Pregnancy, childbirth and the puerperium

O00-O08 Pregnancy with abortive outcome

O10-O16 Oedema, proteinuria and hypertensive disorders in pregnancy, childbirth and the puerperium

O20-O29 Other maternal disorders predominantly related to pregnancy

O30-048 Maternal care related to the fetus and amniotic cavity and possible delivery problems

O60-O75 Complications of labour and delivery

O80-O84 Delivery

O85-O92 Complications predominantly related to the puerperium

O95-O99 Other obstetric conditions, not elsewhere classified

XVI. Certain conditions origination in the perinatal period

P00-P04 Fetus and newborn affected by maternal factors and by complication of pregnancy, labour and delivery

P05-P08 Disorders related to length of gestation and fetal growth

P10-P15 Birth trauma

P20-P29 Respiratory and cardiovascular disorders specific to the perinatal period

P35-P39 Infections specific to the perinatal period

P50-P61 Haemorrhagic and haematological disorders of fetus and newborn

P70-P74 Transitory endocrine and metabolic disorders specific to fetus and newborn

P75-P78 Digestive system disorders of fetus and newborn

P80-P83 Conditions involving the integument and temperature regulation of fetus and newborn

P90-P96 Other disorders originating in the perinatal period

XVII. Congenital malformations, deformations and chromosomal abnormalities

Q00-Q07 Congenital malformations of the nervous system

Q10-Q18 Congenital malformations of eye, ear, face and neck

Q20-Q28 Congenital malformations of the circulatory system

Q30-Q34 Congenital malformations of the respiratory system

Q35-Q37 Cleft lip and cleft palate

Q38- Q45 Other congenital malformations of the digestive system

Q50-Q56 Congenital malformations of genital organs

Q60-Q64 Congenital malformations the urinary system

Q65-Q79 Congenital malformation and deformations of the musculoskeletal system

Q80-Q89 Other congenital malformations

Q90-Q99 Chromosomal abnormalities, not elsewhere classified

XVIII. Symptoms, signs and abnormal clinical and laboratory findings, not elsewhere classified

R00-R09 Symptoms and signs involving the circulatory and respiratory system

R10-R19 Symptoms and signs involving the digestive system and abdomen

R20-R23 Symptoms and signs involving the skin and subcutaneous tissue

R25-R29 Symptoms and signs involving the nervous and musculoskeletal system

R30-R39 Symptoms and signs involving the urinary system

R40-R46 Symptoms and signs involving cognition, perception, emotional state and behaviour

R47-R49 Symptoms and signs involving speech and voice

R50-R69 General symptoms and signs

R70-R79 Abnormal findings on examination of blood, without diagnosis

R80-R82 Abnormal findings on examination of urine, without diagnosis

R83-R89 Abnormal findings on examination of other body fluids, substances and tissues, without diagnosis

R90-R94 Abnormal findings on diagnostic imaging and in function studies, without diagnosis

R95-R99 Ill-defined and unknown causes of mortality

XIX. Injury, poisoning and certain other consequences of external causes

S00-S09 Injuries to the head

S10-S10 Injuries to the neck

S20-S29 Injuries to the thorax

S30-S39 Injuries to the abdomen, lower back, lumbar spine and pelvis

S40-S49 Injuries to the shoulder and upper arm

S50-S59 Injuries to the elbow and forearm

S60-S69 Injuries to the wrist and hand

S70-S79 Injuries to the hip and thigh

S80-S89 Injuries to the knee and lower leg

S90-S99 Injuries to the ankle and foot

T00-T07 Injuries involving multiple regions

T08-T14 Injuries to unspecified parts of trunk, limb or body region

T15-T19 Effects of foreign body entering through natural orifice

T20-T32 Burns and corrosions

T33-T35 Frostbite

T36-T50 Poisoning by drugs, medicaments and biological substances

T51-T65 Toxic effects of substances chiefly nonmedicinal as to source

T66-T78 Other and unspecified effects of external causes

T79 Certain early complications of trauma

T80-T88 Complications of surgical and medical care, not elsewhere classified

T90-T98 Sequelae of injuries, of poisoning and of other consequences of external causes

XX. Eternal causes of morbidity and mortality

V01-V09 Pedestrian injured in transport accident

V10-V19 Pedal cyclist injured in transport accident

V20 –V29 Motorcycle rider injured in transport accident

V30-V39 Occupant of three-wheeled motor vehicle injured in transport accident

V40-V49 Car occupant injured in transport accident

V50-V59 Occupant of pick-up truck or van injured in transport accident

V60-V69 Occupant of heavy transport vehicle injured in transport accident

V70-V79 Bus occupant injured in transport accident

V80-V89 Other land transport accidents

V90-V94 Water transport accidents

V95-V97 Air and space transport accidents

V98-V99 Other and unspecified transport accidents

W00-W19 Falls

W20-W49 Exposure to inmate mechanical forces

W50-W64 Exposure to animate mechanical forces

W65-W74 Accidental drowning and submersion

W75-W84 Other accidental threats to breathing

W85-W99 Exposure to electric current, radiation and extreme ambient air temperature and pressure

X00-X09 Exposure to smoke, fire and flames

X10-X19 Contact with heat and hot substances

X20-X29 Contact with venomous animals and plants

X30-39 Exposure to forces of nature

X40-X49 Accidental poisoning by and exposure to noxious substances

X50-X57 Overexertion, travel and privation

X58-X59 Accidental exposure to other and unspecified factors

X60-X84 Intentional self–harm

X85-Y09 Assault

Y10-Y34 Event of undetermined intent

Y35-Y36 Legal intervention and operations of war

Y40-Y84 Complications of medical and surgical care

Y85-Y89 Sequelae of external causes of morbidity and mortality

Y90-Y98 Supplementary factors related to causes of morbidity and mortality classified elsewhere

XXI. Factors influencing health status and contact with health services

Z00-Z13 Persons encountering services for examination and investigation

Z20-Z29 Persons with potential health hazards related to communicable diseases

Z30-Z39 Persons encountering health services in circumstances related to reproduction

Z40-Z54 Persons encountering health services for specific procedures and health care

Z55-Z65 Persons with potential health hazards related to socio-economic and psychosocial circumstances

Z70-Z76 Persons encountering health services in other circumstances

Z80-Z99 Persons with potential health hazards related to family and personal history and certain conditions influencing health status

Morbidity, Mortality and Obstetric In-Patient Form

This form is to be used for in-patients in all health facilities regarding information on diagnosis/injuries, causes of death and obstetrics. Section (1) is used at admission, Section (2) at time of discharge and section (3) for obstetrics. See instruction on the back

Facility:	Medical record number:
District:	Serial no.:

Section 1 Admission

Date of admission:	Ward/Doctor:	
Patients Surname:	Re-admission: Yes ☐ No ☐	
Forenames:	Date of birth:	Sex:
Nationality:	Occupation:	
Patients address:	Chief:	Headman:
Next of kin:	Next of kin (tel./address/relationship):	

Section 2 Discharge

Discharge: Date:	Alive: ☐	Referral: ☐	Death: ☐
Treatment/operation:			

MORBIDITY	Diagnostic information
Main condition:	
Other conditions:	

MORTALITY	Cause of death		Approximate interval between onset and death
I Disease or condition directly leading to death*	(a)		
Antecedent causes Morbid conditions, if any, giving rise to the above cause, stating the underlying condition last	(b)	due to (or as a consequence of)	
	(c)	due to (or as a consequence of)	
	(d)	due to (or as a consequence of)	
II Other significant conditions contributing to the death, but not related to the disease or condition causing it.			

*This does not mean the mode of dying, e.g. heart failure, it means the disease, external causes of fatal injury, or complications that caused death

Section 3 Obstetric

Date of delivery:	Gestation (duration of pregnancy):			weeks
Result of delivery: Single ☐	Multiple (number):	Sex (number):	M	F
Weight live birth (grams):	(if more than one)			
Number delivered:	Alive:	Still birth:	Premature:	Full term:
Method of delivery:				

Completed by Block letter	Designation	Telephone	Address, health facility	Date completed	Signature
