## Preface

The International Merchandise Trade Statistics (IMTS) are used extensively in the compilation of national accounts and Balance of Payments (BOP). Furthermore, these statistics are used by government institutions and other stakeholders for trade negotiations and other various purposes.

This publication outlines Botswana's annual International Merchandise Trade Statistics (IMTS) for the years 2023 and 2024. The report provides summaries of international trade in goods, as shown in **Table 1.2**. **Tables 2.1A** and **2.2B** show trade by Principal commodity groupings for imports and exports, respectively. The direction of trade appears in **Table 3.1A** (imports) and **Table 3.2A** (total exports). Major trading partner countries by commodity groups, as a percentage of trade at regional or country level, for the current period are presented in **Table 3.1B** for imports and **Table 3.2B** for exports. Major import and export groups at country or regional level as a percentage of the total are presented in **Table 3.1C** for imports and **Table 3.2C** for exports. The top traded import and export commodities excluding diamonds for the month under review are presented in **Tables 5.1** & **5.2** respectively. This is to guide users on opportunities to produce commodities for import substitution or possible exportation.

International trade statistics by mode of transport are collected for the active modes of transport (road, rail, air) through which goods are presumed to enter or leave the statistical territory of the country. Such data may be used to formulate transport policy, monitor international transport routes or assess the impact of international trade on the environment.

This publication also reflects the value of Goods in Transit. Transit trade is vital in facilitating economic transformation and regional trade, while contributing to the growth of employment, incomes, tax revenues, and directly to improving the balance of payments through export of services.

## Executive Summary

This section gives only key highlights, major findings and important insights of the results to enable readers to quickly understand the overall performance and outcomes during the period under review. More detailed results are shown in the respective sections.

Botswana received imports amounting to P97, 880.5 million in 2024, having increased by 11.0 percent from the value of P88, 212.2 million in 2023. The top three imported commodity groups were Diamonds at 18.7 percent, Fuel at 17.2 percent and Food, Beverages & Tobacco at 15.3 percent. The major sources of imports into Botswana were South Africa at 59.2 percent followed by Namibia and China at 14.0 percent and 4.6 percent respectively during 2024.

Exports amounted to P63, 344.5 million in 2024, showing a decrease of 18.9 percent from the value of P78, 113.2 million recorded in 2023. The top exported commodity groups were Diamonds at 69.4 percent, Copper at 15.9 percent and Machinery & Electrical Equipment at 4.6 percent. During the period under review, the main destinations for exports were United Arab Emirates (**UAE**) at 28.6 percent, India at 15.0 percent and the South Africa at 13.6 percent of total exports. As a result, the country registered a trade deficit of P34, 536.0 million.

Imports by Standard International Trade Classification (SITC) shows that Section 6, consisting of "Manufactured Goods classified chiefly by material" contributed the most to total imports during 2024, at 29.4 percent. Section 7, "Machinery & Transport Equipment followed with 22.8 percent of total imports during the same year. On the exports side, Section 6, constituted 70.5 percent of total exports during the same period.

Trade by Broad Economic Categories (BEC Rev4)) classification indicates that during 2024, Section 2, "Industrial Supplies not elsewhere specified" contributed 37.7 percent to total imports. During the same year, the same section accounted for 91.3 percent of total exports.

During the period under review, imports representing 68.4 percent were transported into the country by Road whereas those imported by Air and Rail accounted for 19.1 percent and 12.5 percent of total imports, respectively. Goods exported by Air accounted for 71.0 percent of total exports, while those exported by Road and Rail represented 28.3 percent and 0.7 percent respectively (**Table 6**).

Merchandise worth P266, 203.9 million transited through the country to various destinations. Goods accounting for 56.4 percent transited through Martins Drift border post. Kazungula Bridge border post followed with 28.6 percent (**Table 8.1**). The top transiting goods were Chapter 74 (Copper and articles thereof) at 31.4 percent. Chapter 28 (Inorganic chemicals; organic and inorganic compounds of precious metals; of rare earth metals, of radio-active elements and of isotopes) followed at 20.0 percent of all goods on transit (**Table 8.2**).

## Introduction

This report presents the International Merchandise Trade Statistics (IMTS) between Botswana and the rest of the world for the years 2023 and 2024. The 2023 - 2024 Annual report follows the 2017-2018 IMTS Annual Report which was published in June 2021. It provides a comprehensive analysis of the country's external trade in goods, covering the value of exports and imports, major trading partners, and principal commodity groups.

The statistics contained in this publication are compiled in accordance with the United Nations International Merchandise Trade Statistics concepts and definitions, ensuring international comparability and methodological consistency. The data are primarily sourced from customs declarations and administrative records.

The compilation of international merchandise trade Statistics is based on the General Trade System and coded according to Harmonized Commodity Description and Coding System 2022 (HS2022), the Standard International Trade Classification (SITC Rev4) and the Broad Economic Categories (BEC Rev4) commodity nomenclatures as prescribed in the International Merchandise Trade Statistics manual 2010 (IMTS 2010).

The report highlights trends in trade performance during the years under review, including changes in export earnings, imports, trade balance, Country and regional trade patterns. Particular emphasis is placed on key export commodities such as rough diamonds, which continue to be the mainstay of the country's economy and a key source of foreign exchange earnings.

This publication serves as an important reference for policymakers, researchers, investors in understanding the market for purposes of identifying viable products, and the general public by providing reliable information to support evidence-based decision-making and economic planning. IMTS is also used as a basis for trade negotiations by various government institutions.

This report is divided into two parts, the first part carries discussions on IMTS during the years 2023 and 2024 while the second part presents tables on which these discussions are based. The discussions are further divided into chapters and sections. Tables presented in part two are linked to the chapters and sections through table numbers.

# CHAPTER 1: TOTAL TRADE

This section deals with the components of total trade, namely; imports, total exports and trade balance. Total exports refer to the sum of domestic exports (exports of Botswana origin) and re-exports (goods which were exported in the same condition as imported or after undergoing minor transformation which leaves them not substantially changed). Imports are based on Cost, Insurance and Freight (CIF) value. Trade balance is the difference between total exports and imports for a given period of time. The components of IMTS are presented on **Table 1.1**, which gives annual data for the period covering 2020 to 2024. **Table 1.2** gives monthly, quarterly and yearly figures for 2023 and 2024.

## 1.1 Yearly Total Trade

Yearly Total Trade presents total exports, imports and trade balance. Discussions on yearly total trade are based on **Table 1.1**. The discussions in the sub-sections below focus on 2024 total trade, comparison is also made with 2023 trade.

### 1.1.1 Imports

Imports are valued **CIF**, this includes the cost of the commodity plus insurance and freight charges, but excludes customs or any other duty paid. During 2024, total Imports were valued at P97, 880.5 million showing an increase of 11.0 percent (P9, 668.3 million) from the revised 2023 import value of P88, 212.2 million. This increase was mainly attributed to increases in commodities such as Diamonds, Machinery & Electrical Equipment and Vehicles & Transport Equipment. Among the major commodity groups, Diamonds recorded the largest increase in import value, rising by 37.8 percent (P5, 010.5 million), from P13, 252.7 million in 2023 to P18, 263.2 million in 2024. Machinery and Electrical Equipment also posted notable growth, increasing by 17.3 percent (P2, 122.1 million) from P12, 300.0 million in 2023 to P14, 422.2 million in 2024. Similarly, Vehicles and Transport Equipment registered a 20.9 percent increase (P1, 366.1 million), with values rising from P6, 549.6 million in 2023 to P7, 915.7 million in 2024. These increases underscore the significant contribution of these commodity groups to the overall growth in trade during the period (**Table 2.1A**).

### 1.1.2 Total Exports

Exports are valued on a Free On Board (**FOB**) basis, meaning the seller bears no charges for goods placed on board, onto a carrier at the point of shipment (Consignment). Total exports were valued at P63, 344.5 million during 2024, compared to P78, 113.2 million of 2023. This shows a decrease of 18.9 percent (P14, 768.7 million). The contraction was mainly due to the decrease in Diamonds exports, which dropped by 29.0 percent (P17, 947.6 million) from P61, 903.1 million during 2023 to P43, 955.5 million during 2024. An increase in Copper exports of 44.6 percent (P3, 105.1 million) had a slight influence in reducing the overall decline in total exports.

### 1.1.3 Trade balance

During 2024, Botswana recorded a trade deficit of P34, 536.0 million, continuing the trend of trade deficits observed since 2020.

## 1.2 Monthly and Quarterly Trade

This section presents components of total trade by month, quarter and year for 2024 and 2023 only. The associated data is carried in **Table 1.2**. The graphical presentation of these components of total trade is given in **Chart 1.2**, which is based on this table.

### 1.2.1 Imports

**Table 1.2** shows that year-on-year comparisons between 2024 and 2023, indicate increase in imports across all quarters of 2024 relative to the corresponding quarters of 2023.

#### 1.2.1.1 Year on Year Comparison of Imports (2023 – 2024)

Year-on-year analysis of quarterly import values shows that the first quarter of 2024 recorded a notable increase of 10.6 percent (P2, 144.7 million) compared with the same quarter in 2023. Import values rose from P20, 306.9 million in the first quarter of 2023 to P22, 451.6 million in the corresponding quarter of 2024, reflecting stronger import activity during the period.

The second quarter of 2024, recorded total imports valued at P25, 083.2 million, representing an increase of 25.4 percent (P5, 076.5 million) compared to P20, 006.7 million recorded in the same quarter of 2023.

During the third quarter of 2024, total imports were valued at P24, 174.5 million, showing an increase of 5.7 percent (P1, 307.3 million) compared to the value of P22, 867.2 million registered during the corresponding quarter of 2023.

In the fourth quarter of 2024, total imports were valued at P26, 171.2 million, reflecting an increase of 4.6 percent (P1, 139.8 million) compared to P25, 031.4 million recorded during fourth quarter of 2023.

### 1.2.1.2 Quarter on Quarter Comparison of Imports (2024)

During the first quarter of 2024, imports were valued at P22, 451.6 million, representing a decrease of 10.3 percent (P2, 579.8 million) compared to P25, 031.4 million recorded during the fourth quarter of 2023.

The second quarter of 2024 recorded an increase of 11.7 percent (P2, 631.6 million) in total imports, rising from P22, 451.6 million in the first quarter to P25, 083.2 million in the second quarter of the same year.

A comparison of the second and third quarters of 2024 shows a decrease of 3.6 percent (P908.7 million), from P25, 083.2 million recorded during the second quarter to P24, 174.5 million registered during the third quarter.

The fourth quarter of 2024 recorded an increase of 8.3 percent (P1, 996.6 million) in total imports value, from P24, 174.5 million recorded during the third quarter to P26, 171.2 million recorded during the fourth quarter of the same year.

## 1.2.2 Total Exports

A comparison of quarterly data for 2024 and 2023, examining year on year differences shows that the first three quarters of 2024 recorded decreases relative to the corresponding quarters in 2023. In contrast, the fourth quarter of 2024 registered an increase compared to its 2023 counterpart. All discussions carried on this sub-section are based on **Table 1.2**.

### 1.2.2.1 Year on Year Comparison of Exports (2023 – 2024)

A comparison of total exports between the first quarters of 2024 and 2023 shows a decline of 17.6 percent (P3, 777.0 million), from P21, 502.2 million in the first quarter of 2023 to P17, 725.2 million during the same quarter in 2024.

During the second quarter of 2024, total exports registered a decrease of 15.9 percent (P3, 685.7 million) from P23, 171.3 million recorded during the second quarter of 2023 to P19, 485.6 million during the same quarter of the year under review.
A comparison of the third quarters of 2024 and 2023 shows a decrease of 42.2 percent (P8, 943.0 million) from P21, 170.1 million recorded in the third quarter of 2023 to P12, 227.1 million registered during the same quarter of 2024.

Total exports recorded during the fourth quarter of 2024 shows an increase of 13.3 percent (P1, 637.0 million) when compared to the value of P12, 269.6 million registered during the fourth quarter of 2023.

### 1.2.2.2 Quarter on Quarter Comparison of Exports (2024)

A comparison of total export values between the first quarter of 2024 and the fourth quarter of 2023 reveals a substantial increase of 44.5 percent (P5, 455.5 million). Export earnings rose from P12, 269.6 million in the fourth quarter of 2023 to P17, 725.2 million in the first quarter of 2024, indicating a strong rebound in export performance at the beginning of the year.

Total exports increased by 9.9 percent (P1, 760.4 million) between the first and second quarters of 2024, rising from P17, 725.2 million in the first quarter to P19, 485.6 million in the second quarter.

During the third quarter of 2024, total exports were valued at P12, 227.1 million, reflecting a decrease of 37.3 percent (P7, 258.5 million) from P19, 485.6 million recorded in the second quarter of the same year.

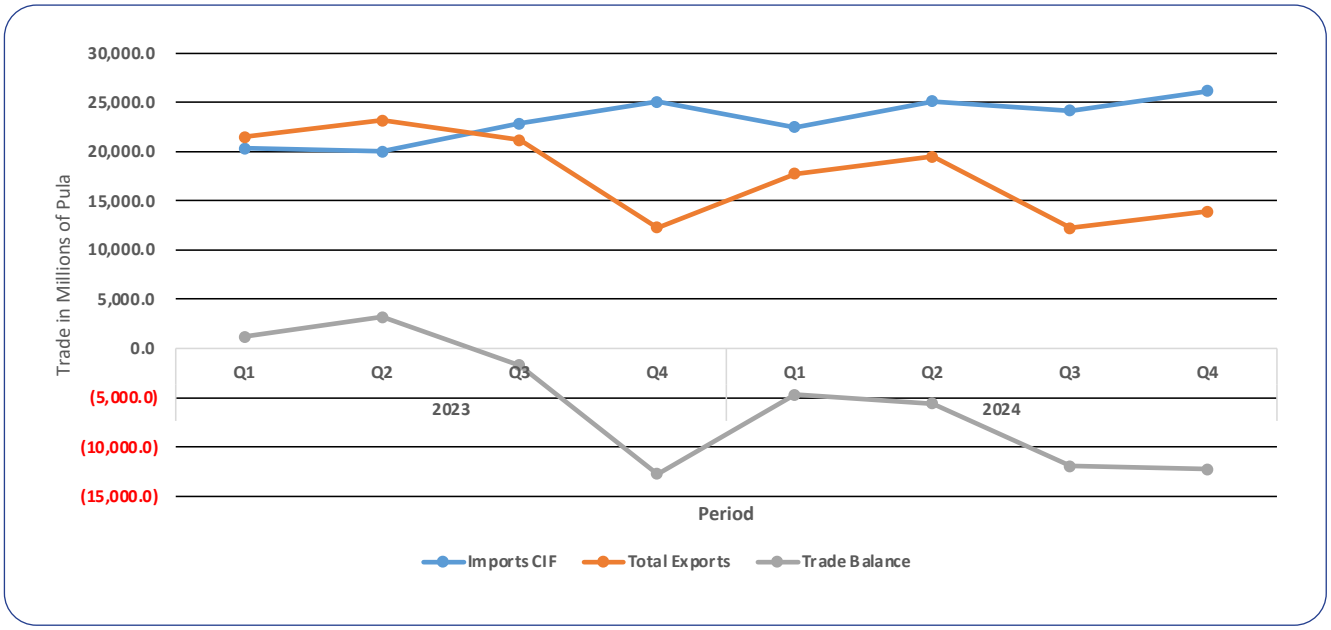

In the fourth quarter of 2024, total exports increased by 13.7 percent (P1, 679.5 million) from the value of P12, 227.1 million in the third quarter to P13, 906.6 million during the fourth quarter of the same year.

### 1.2.3 Trade Balance

During 2024, trade deficits were recorded in all quarters of the year. Movements in trade balance are depicted in **Chart 1.2** which is based on **Table 1.2**.

**Table 1.2** shows that the largest quarterly trade deficits in 2024 were recorded in the fourth and third quarters, at of P12, 264.6 million and P11, 947.4 million respectively.

**Chart 1.2: Total Trade, 2023 and 2024 (Millions of Pula)**

# CHAPTER 2: TRADE BY PRINCIPAL COMMODITIES

Principal commodity groups refer to commodities grouped together to form major groups of related commodities. Commodities forming a group may be of related chapters, for example; "Machinery & Electrical Equipment" which combines machines and electrical appliances; "Vehicles & Transport Equipment" which combines vehicles and other equipment used for transport purposes.

In some cases it becomes a challenge to come up with further groups of related chapters or commodities. This is in the case when commodity groupings' contributions to the total remain minimal. In such cases, the commodities are grouped together under one category called "Other".

## 2.1 Composition of Principal Imports

The discussion on principal imports is based on **Table 2.1A** and **Table 2.1B** which present values on principal imports and percentage distributions to total imports in a given period, for these groups, respectively.

During 2024, total Imports were valued at P97, 880.5 million showing an increase of 11.0 percent (P9, 668.3 million) from the revised 2023 import value of P88, 212.2 million. This increase was mainly attributed to increases in commodities; Diamonds, Machinery & Electrical Equipment and Vehicles & Transport Equipment. Diamonds had the highest increase of 37.8 percent (P5, 010.5 million) from P13, 252.7 million in 2023 to P18, 263.2 million in 2024. Machinery & Electrical Equipment registered a rise of 17.3 percent (P2, 122.1 million) from P12, 300.0 million in 2023 to P14, 422.2 million in 2024 while Vehicles & Transport Equipment increased by 20.9 percent (P1, 366.1 million) from the value of P6, 549.6 million registered during 2023 to P7, 915.7 million in 2024.

### 2.1.1 Year on Year Comparison of Principal Imports (2023 – 2024)

Imports were valued at P22, 451.6 million in the first quarter of 2024, compared to P20, 306.9 million recorded during the same quarter in 2023. Fuel remained the largest contributor to total imports in both periods, accounting for 19.2 percent (P4, 320.6 million) in the first quarter of 2024 and 20.4 percent (P4, 138.0 million) in the first quarter of 2023. Diamonds contributed 17.2 percent (P3, 857.5 million) to total imports during the first quarter of 2024, up from 15.7 percent (P3, 179.2 million) in the same quarter in 2023. Food, Beverages & Tobacco contributed 15.1 percent (P3, 393.4 million) in the first quarter of 2024, compared with 16.7 percent (P3, 388.7 million) in the corresponding quarter of 2023. Machinery & Electrical Equipment contributed 14.0 percent (P3, 141.6 million) to total imports in the first quarter of 2024, slightly higher than the 14.1 percent (P2, 858.0 million) recorded in the first quarter of 2023. A comparison of contributions from other import commodity groups to total imports for the first quarter of 2024 and 2023 is presented in **Table 2.1A** and **Table 2.1B**.

During the second quarter of 2024, imports were valued at P25, 083.2 million compared to P20, 006.7 million recorded during the same quarter in 2023. Diamond was the leading contributor to total imports in both periods, accounting for 21.2 percent (P5, 324.9 million) in 2024 and 12.1 percent (P2, 419.9 million) in 2023. Fuel accounted for 16.1 percent (P4, 047.0 million) in the second quarter of 2024, compared to a contribution of 20.0 percent (P4, 000.1 million) during the corresponding quarter of 2023. Machinery & Electrical Equipment represented 15.7 percent (P3, 928.0 million) of total imports in 2024, compared with 15.0 percent (P2, 996.0 million) in the corresponding quarter of 2023. Meanwhile, the Food, Beverages & Tobacco commodity group accounted for 14.4 percent (P3, 608.4 million) of the country's total imports compared to a contribution of 16.3 percent (P3, 260.1 million) in the same quarter of 2023.

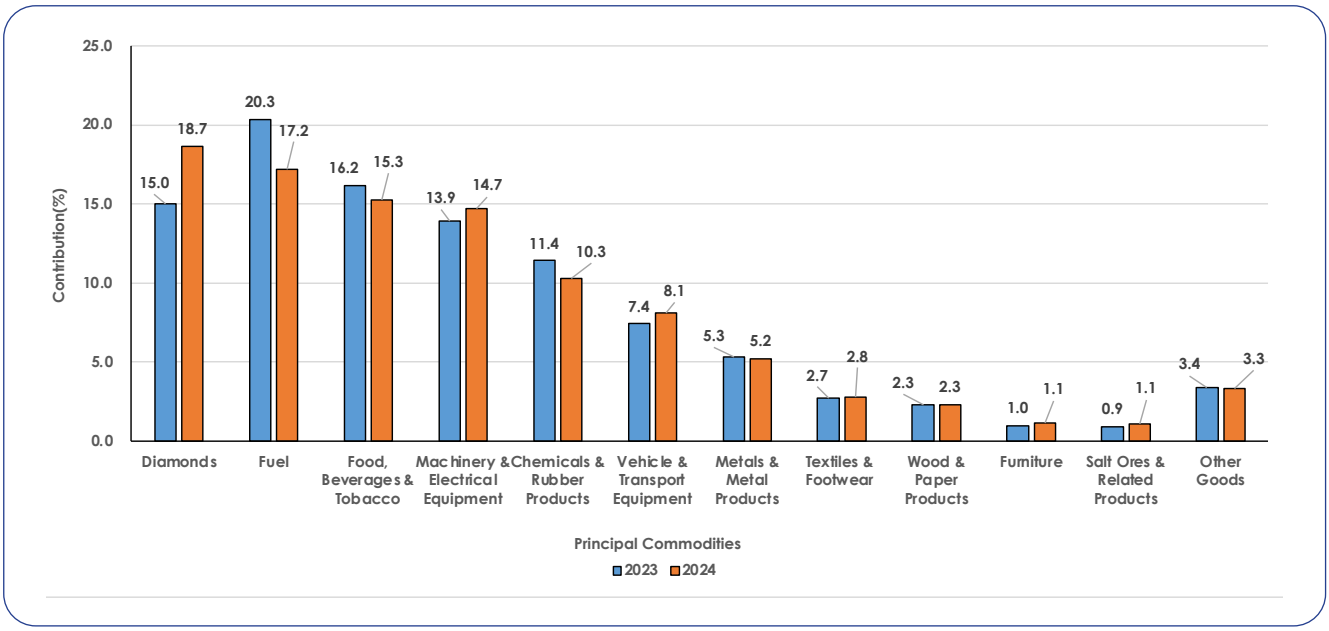

A comparison of the third quarter of 2024 with the same quarter in 2023 shows that imports increased to P24, 174.5 million from P22, 867.2 million. Fuel constituted 18.4 percent (P4, 460.1 million) to total imports during the third quarter of 2024 compared to 20.8 percent (P4, 746.5 million) recorded in the corresponding quarter of 2023. Food, Beverages & Tobacco followed, contributing 15.7 percent (P3, 803.0 million) in 2024 compared with 16.1 percent (P3, 673.1 million) during third quarter of 2023. Diamonds ranked third, with a share of 15.5 percent (P3, 749.0 million) during the third quarter of 2024, compared with 12.4 percent (P2, 844.0 million) in the same quarter of 2023. Machinery & Electrical

Equipment accounted for 14.5 percent (P3, 493.8 million) of total imports in the third quarter of 2024, compared to 14.6 percent (P3, 337.3 million) recorded in the third quarter of 2023.

In the fourth quarter of 2024, the country's total imports amounted to P26, 171.2 million, reflecting an increase from the P25, 031.4 million recorded during the corresponding quarter of 2023. Diamonds registered a contribution of 20.4 percent (P5, 331.8 million) in the fourth quarter of 2024, compared to 19.2 percent (P4, 809.5 million) during the same quarter of 2023. Food, Beverages & Tobacco followed with contribution of 15.9 percent (P4, 153.6 million) to total imports in 2024 compared to a contribution of 15.8 percent (P3, 956.8 million) recorded in the fourth quarter of 2023. Fuel accounted for 15.2 percent (P3, 979.4 million) of total imports in the fourth quarter of 2024, compared to 20.2 percent (P5, 057.7 million) during the same quarter of 2023. Machinery & Electrical Equipment contributed 14.7 percent (P3, 858.7 million) in 2024, compared with 12.4 percent (P3, 108.8 million) in the corresponding quarter of 2023.

Percentage distributions for other Principal Import Commodity Groups can be observed on **Table 2.1B** which is based on **Table 2.1A**. The graphical presentation of Principal Import Commodity Groups depicting both 2024 and 2023 is displayed on **Chart 2.1**.

**Chart 2.1: Comparison of Principal Import Commodity Groups – 2023 and 2024 (Percentage Distributions)**

## 2.1.2 Quarter on Quarter Comparison of Principal Imports (2024)

This subsection compares Principal Import Commodity Groups for 2024 quarters, each quarter compared to the preceding quarter and the discussion is based on **Table 2.1 A**.

A comparison between the first quarter of 2024 and the fourth quarter of 2023 shows an overall decrease of 10.3 percent. The decrease was mainly attributed to decrease in Diamonds, Fuel and Food, Beverages & Tobacco. Diamonds decreased by 19.8 percent (P952.0 million), from P4, 809.5 million recorded during the fourth quarter of 2023 to P3, 857.5 million in the first quarter of 2024. Fuel decreased by 14.6 percent (P737.1 million) from P5, 057.7 million to P4, 320.6 million between the two quarters. Food, Beverages & Tobacco registered a decrease of 14.2 percent (P563.4 million) over the same period.

A comparison between the second quarter of 2024 and the first quarter of 2023 shows an 11.7 percent increase (P2, 631.6 million) in total imports, from P22, 451.6 million to P25, 083.2 million. The increase is attributable to Diamonds, which registered a growth of 38.0 percent (P1, 467.4 million) over the period.

During the third quarter of 2024, imports were valued at P24, 174.5 million, compared to P25, 083.2 million recorded during the second quarter of the same year, representing a decrease of 3.6 percent (P2, 631.6 million). The decrease was attributed to Diamonds, which recorded the value of P3, 749.0 million, reflecting a decrease of 29.6 percent (P1, 576.0 million) from P5, 324.9 million in the previous quarter. Machinery & Electrical Equipment also registered a decline of 11.1 percent (P434.2 million) from P3, 928.0 million during second quarter 2024 to P3, 493.8 million registered during the third quarter of the same year.

A comparison of values recorded during the fourth of 2024 with those of the third quarter of the same year shows that the Diamonds commodity group increased by 42.2 percent (P1, 582.8 million), from P3, 749.0 million in the third quarter to P5, 331.8 million recorded during the fourth quarter of the same year. Machinery & Electrical Equipment and Food, Beverages & Tobacco registered increases of 10.4 percent (P364.9 million) and 9.2 percent (P350.6 million), respectively, when comparing the fourth and the third quarters of 2024.

## 2.2 Composition of Principal Exports

During 2024, total exports were valued at P63, 344.5 million. Botswana's principal exports consisted mainly of two (2) major commodity groups; these being Diamonds and Copper during 2024. Discussions on major export groups are based on **Tables 2.2A** and **2.2B**.

Diamonds registered the highest contribution of 69.4 percent (P43, 955.5 million), followed by Copper with a contribution of 15.9 percent (P10, 064.3 million). Machinery & Electrical Equipment contributed 4.6 percent (P2, 928.6 million),

### 2.2.1 Year on Year Comparison of Principal Exports (2023 - 2024)

A comparison between the first quarter of 2024 and the same quarter in 2023 shows a decline of 17.6 percent. The decrease was mainly attributed to Diamonds, which registered a decrease of 25.8 percent (P4, 598.5 million) from P17, 851.1 million recorded during first quarter in 2023 to P13, 252.6 million in the same quarter of 2024.

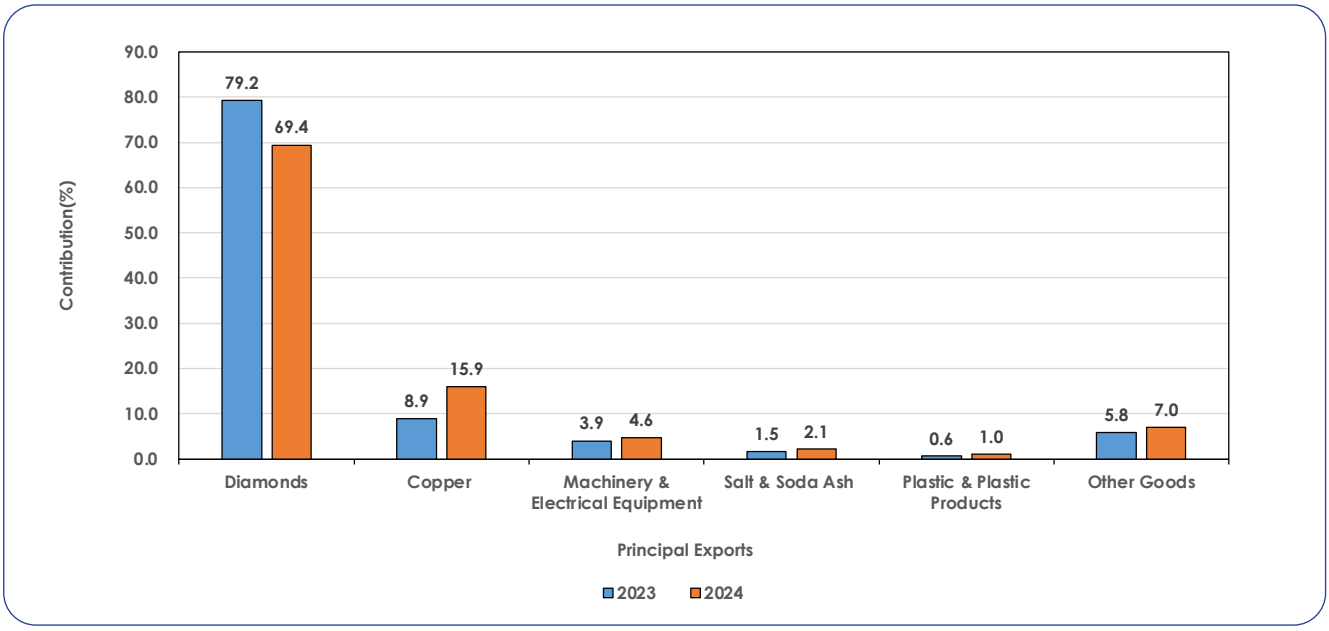

During the second quarter of 2024, diamond exports declined by 26.6 percent (P5, 200.0 million) compared to the corresponding period in 2023, contributing significantly to the overall decrease in total exports during the same period.

The Diamonds commodity group contributed 79.4 percent (P16, 803.9 million) during third quarter of 2023, compared to 59.8 percent (P7, 317.1 million) recorded in the third quarter of 2024. This represents a decrease of 42.2 percent (P8, 943.0 million).

A comparison between the fourth quarter of 2024 and the same quarter in 2023 shows an increase of 13.3 percent. The Diamonds commodity group registered an increase of 17.3 percent (P1, 337.8 million), from P7, 713.7 million recorded during fourth quarter of 2023 to P9, 051.5 million registered in the corresponding quarter of 2024.

Percentage distributions of other commodity groups can be observed on **Table 2.2B** while **Chart 2.2** displays percentage distributions for the year 2024.

**Chart 2.2: Principal Export Commodity Groups – 2023 and 2024 (Percentage Distributions)**

*Note: Other Goods, include All Other Goods not specified in Table 2.2 B*

## 2.2.2 Quarter on Quarter Comparison of Principal Exports (2024)

This subsection compares Principal Export Commodity Groups for 2024 quarters, with each quarter compared against the preceding quarter. The discussion is based on **Table 2.2A**.

Total exports were valued at P17, 725.5 million in the first quarter of 2024, compared to P12, 269.6 million recorded in the fourth quarter of 2023. This shows an increase of 44.5 percent (P5, 455.5 million). Diamonds exports were valued at P13, 252.6 million in the first quarter of 2024, reflecting a significant increase of 71.8 percent (P5, 538.9 million) from P7, 713.7 million recorded in the fourth quarter of 2023.

A comparison between the second and first quarters of 2024 shows a rise of 9.9 percent (P1, 760.4 million) in total exports. Total exports rose from P17, 725.5 million during first quarter of 2024 to P19, 485.6 million in the second quarter of the same year. Diamonds registered an increase of 8.2 percent (P1, 081.9 million), from P13, 252.6 million during first quarter to P14, 334.5 million during the second quarter of 2024.

The third quarter of 2024 shows a decrease of 37.3 percent (P7, 258.5 million) in total exports compared to P19, 485.6 million registered in the second quarter of the same year. The decline was mainly attributed to a reduction in the Diamond exports, which fell by 49.0 percent (P7, 017.4 million) from P14, 334.5 million during the second quarter to P12, 227.1 million during the third quarter of 2024.
A comparison between the fourth and third quarters of 2024 displays an increase of 13.7 percent in total exports. Diamonds recorded a notable rise of 23.7 percent (P1, 734.4 million) from P7, 317.1 million in the third quarter to P9, 051.5 million in the fourth quarter of 2024.

# CHAPTER 3: DIRECTION OF TRADE

Direction of trade presents trade by major trading partners for principal commodity groups. Section 3.1 discusses principal imports by source at region and country level while Section 3.2 deals with destination of principal exports at region and country level. At country level, only those countries that had significant trade with Botswana during 2024 are shown separately while those with insignificant trade are grouped together under one category referred to as “Other”.

## 3.1. Principal Imports by Source

Principal Import Commodity Groups at Region and Country level, in value terms, are presented on **Table 3.1,** while **tables 3.1B** & **3.1C** display percentage distributions based on **Table 3.1A**.

### 3.1.1. Principal Imports Commodity Groups as a Percentage of Total Imports at Country or Regional Level - 2024

This Sub-Section discusses import groups presented as percentages of total imports at region and major trading partner countries. The associated percentage distributions are presented in **Table 3.1B** which is based on **Table 3.1A**. The column totals of **Table 3.1B** give import groups as a percentage of total yearly imports, the same information that is presented in **Chart 2.1**.

Total imports were valued at P97, 880.5 million during 2024. Southern African Customs Union (SACU) was the major source of imports into Botswana, accounting for 73.8 percent (P72, 222.7 million). South Africa was the main source of imports within the Union with a contribution of 59.2 percent (P57, 935.0 million), followed by Namibia, with 14.0 percent (P13, 694.9 million) to total imports during the year.

The top most imported commodity groups from South Africa were; Food, Beverages & Tobacco; Fuel; Machinery & Electrical Equipment and Chemicals & Rubber Products. Food, Beverages & Tobacco contributed the highest to total imports from South Africa during 2024, at 22.9 percent (P13, 243.6 million), followed by Fuel with 16.9 percent (P9, 799.3 million). Machinery & Electrical Equipment and Chemicals & Rubber Products contributed 12.9 percent (P7, 487.8 million) and 12.1 percent (P7, 001.7 million) respectively.

Asia supplied imports valued at P10, 856.7 million, accounting for 11.1 percent of total imports during 2024 (Table 3.1C). The commodities imported from Asia were mainly composed of Machinery & Electrical Equipment and Diamonds, which accounted for 32.0 percent (P3, 474.3 million) and 23.0 percent (P2, 496.9 million), respectively. Vehicles & Transport Equipment and Chemicals & Rubber Products followed, contributing 14.5 percent (P1, 569.9 million) and 12.2 percent (P1, 321.7 million), respectively.

Total imports from the European Union (EU) were valued at P4, 287.1 million during the year under review, accounting for 4.4 percent of total imports in 2024 (Table 3.1 C). The imported goods from the EU consisted mainly of Machinery & Electrical Equipment at 42.6 percent (P1, 824.3 million) and Chemicals & Rubber Products with 22.6 percent (P969.2 million) of total imports from the region during 2024 (Refer to **Tables 3.1A** & **3.1B**).

During 2024, Canada supplied imports valued at P2, 904.9 million, representing 3.0 percent of total imports. These imports were mainly composed of Diamonds, which accounted for 93.3 percent (P2, 711.7 million) of total imports from that country. A graphical representation of the percentage distributions of import commodity groups by major trading partners during 2024 is given in **Chart 3.1.**

### 3.1.2. Principal Imports Commodity Groups by Region and Partner as a Percentage of Total Import Group - 2024

**Table 3.1C** presents percentage distributions for principal import groups by country and region as a percentage of total import groups during 2024. This table is also based on **Table 3.1A**.

Diamonds amounting to P18, 263.2 million were imported during the year 2024 and were mostly from Namibia at 51.9 percent (P9, 476.1 million). South Africa supplied 15.7 percent (P2, 858.7 million) of Diamonds. Canada and India followed with 14.8 percent (P2, 711.7 million) and 6.8 percent (P1, 235.2 million) during the year under review, (**Table 3.1 C**).

Fuel imports amounted to P16, 807.0 million during 2024. The majority of these imports originated from South Africa, which accounted for 58.3 percent (P9. 799.3 million) of total fuel imports during

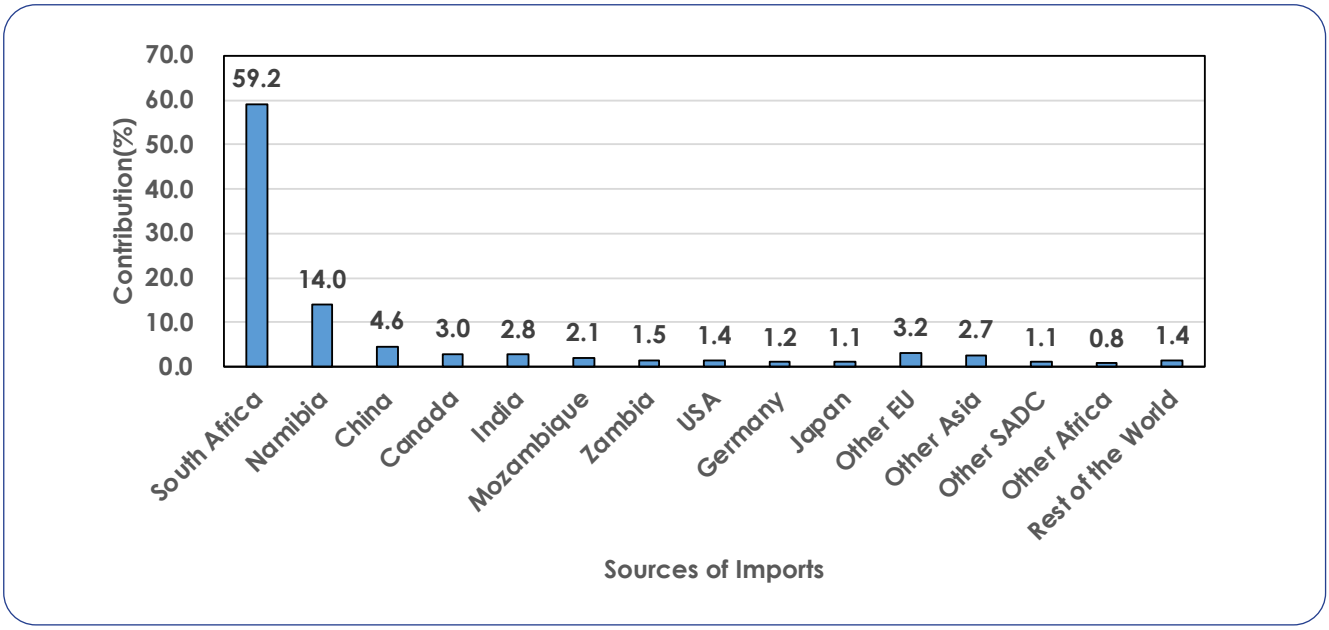

the year under review. Namibia and Mozambique followed, supplying 22.4 percent (P3, 771.6 million) and 11.9 percent (P2, 003.0 million), respectively, of the commodity group.

During 2024, Food, Beverages & Tobacco were valued at P14, 958.4 million. South Africa was main source at 88.5 percent (P13, 243.6 million).

Total Imports of Machinery & Electrical Equipment were valued at P14, 422.2 million during 2024. Of this amount, 51.9 percent (P7, 487.8 million) came from South Africa, while 17.1 percent (P2, 460.6 million) was sourced from China, as shown on **Table 3.1 C**.

During 2024, imports of Chemicals & Rubber Products were valued at P5, 727.9 million. South Africa remained the principal supplier, accounting for 81.1 percent (P4, 644.4 million) of total imports in this commodity group. India and China supplied 6.9 percent (P395.2 million) and 1.9 percent (P108.2 million), respectively.

**Chart 3.1: Total Imports by Region and Partner – 2024 (Percentage Distributions)**

## 3.2. Principal Exports by Destination

Discussions on major exports by destination for 2024 are based on **tables 3.2A**, **B** and **C**, with **Table 3.2A** presenting values while percentage distributions appear on **Table 3.2B** and **Table 3.2C**.

### 3.2.1. Principal Exports Commodity Groups as a Percentage of Total Exports at Country or Region level - 2024

**Tables 3.2A** and **Table 3.2B** show that during 2024, total exports destined to Asia were valued at P35, 964.0 million, representing 56.8 percent of the total exports. UAE received 28.6 percent (P18, 093.9 million), followed by India with 15.0 percent (P9, 482.2 million) of total exports during the year under review.

The Southern African Customs Union (SACU) remained a key destination for Botswana's exports in 2024, with exports to the region valued at P10, 974.7 million, representing 17.3 percent of total exports. South Africa continued to be the dominant export market within SACU, accounting for exports worth P8, 601.7 million, or 13.6 percent of the country's total exports. Namibia ranked as the second-largest destination, receiving exports valued at P2, 253.0 million, which constituted 3.6 percent of total exports during the year under review.

The European Union (EU) received exports valued at P7, 754.5 million, representing 12.2 percent of total exports during the year under review. Belgium was the main destination of exports to the EU, having received 12.0 percent (P7, 627.7 million) of the total exports during the same period.

Some of the top export destinations for 2024 were Australia and USA, which accounted for 7.7 percent (P4, 849.7 million) and 1.3 percent (P830.7 million) of total exports, respectively, during the period under review.

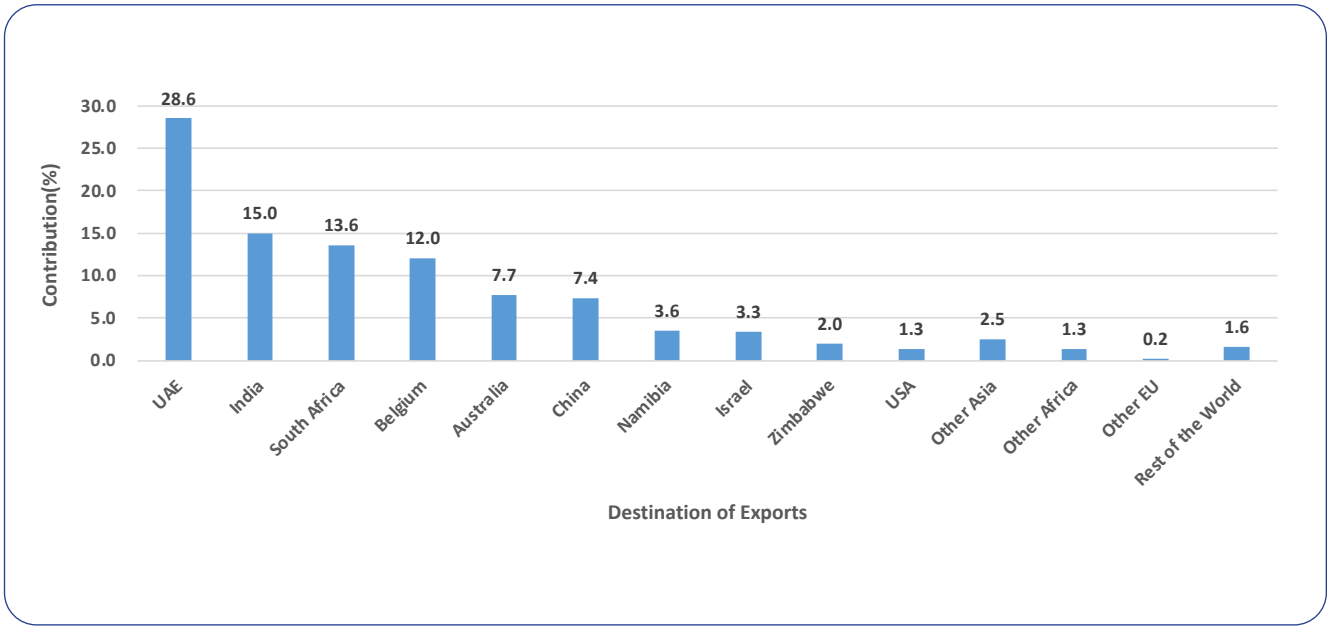

## 3.2.2. Principal Exports Commodity Groups by Region and Partner as a Percentage of Total Export Group - 2024

**Table 3.2C** gives major export groups at country or regional level as a percentage of the total for a particular major export group. Discussions that follow are based on this table together with **Table 3.2A**. During 2024, the major commodity groups which were exported were Diamonds and Copper.

Diamonds constituted 69.4 percent (P43, 955.5 million) of total exports during the period under review. The UAE, India, Belgium and South Africa received 41.1 percent (P18, 050.6 million), 21.2 percent (P9, 338.2 million), 17.3 percent (P7, 623.2 million) and 5.4 percent (P2, 376.4 million) of Diamond exports, respectively.

Copper exports accounted for 15.9 percent (P10, 064.3 million) of the country's total exports during 2024. Australia and China received 48.1 percent (P4, 845.5 million) and 46.2 percent (P4, 647.0 million) of Copper exports.

**Chart 3.2: Total Exports by Region and Partner –2024 (Percentage Distributions)**

# CHAPTER 4: TRADE AT CHAPTER LEVEL

Trade at Chapter level presents international merchandise trade at the 2-digit level of the Harmonized Commodity Description and Coding System (HS Codes). This trade classification appears on this section for both imports and exports during 2024. Table 4 presents trade values together with the associated percentage distributions for the 99 chapters of the HS Codes, excluding Chapter 77 which is reserved for future customs use and Chapter 98 which was in the past utilized by Botswana for importation of vehicle parts for vehicle assembly, during the time when there were vehicle assembly plants in the country.

## 4.1 Total Imports by Chapter

Botswana imports almost all commodities found in all the chapters of the HS Codes. The discussion will be centered on chapters that contributed not less than 5.0 percent of total imports during 2024, and statistics associated with other chapters, can be viewed in **Table 4**.

During 2024, Chapter 71, consisting of "Natural or Cultured Pearls, Precious or Semi-Precious Stones and Precious Metals" registered the value of P18, 298.3 million, representing 18.7 percent of total imports during the year. Chapter 27 which consists of "Mineral Fuels & Associated Products" followed with 17.2 percent (P16, 807.0 million). Chapter 84, consisting of "Boilers, Machinery, Mechanical Appliances & parts thereof" contributed 8.8 percent (P8, 613.5 million), while Chapter 87, "Vehicles & Parts" contributed 7.3 percent (P7, 188.6 million) to total imports during the year under review. Chapter 85 "Machinery & Electrical Equipment, which comprises Sound Recorders & Reproducers, Television image & Parts" amassed 5.9 percent (P5, 808.6 million) to 2024 total imports.

## 4.2 Total Exports by Chapter

A few chapters contributed significantly to the total exports, with contributions in excess of one percent, while most chapters contributed less than 1.0 percent of the yearly total. Discussions on total exports at chapter level are confined to chapters that contributed not less than 3.0 percent of the yearly total during 2024 while others can be viewed in **Table 4**.

Total exports consisted mainly of minerals, especially rough diamonds. During 2024, Chapter 71 which comprises "Natural or Cultured Pearls, Precious or Semi-Precious Stones and Precious Metals" contributed 69.5 percent (P43, 996.2 million) of the total exports value of total exports. Chapter 26, "Ores, slag and ash" accounted for 15.9 percent (P10, 084.0 million) while Chapter 85, comprising "Electrical Machinery & Equipment and parts" constituted 3.7 percent (P2, 372.0 million) of 2024 total exports.

Other Chapters together with associated percentage distributions can be viewed on **Table 4**.

# CHAPTER 5: MOST TRADED COMMODITIES EXCLUDING DIAMONDS

This section presents the most traded commodities (excluding Diamonds) during 2024, for both imports and total exports. As imports into Botswana are of a wide variety, the top 100 imported commodities during 2024 are presented in this report, while with regard to exports, only the top 50 are given since the top 50 exported commodities contribute over 90 percent of total exports. The top 100 imported commodities together with associated percentage distributions are presented in **Table 5.1** while **Table 5.2** presents the top 50 exported commodities.

## 5.1 The Most Imported Commodities

During 2024, the top most imported commodity was Distillate fuel, with a contribution of 7.8 percent (P7, 669.3 million) to total imports, followed by Petrol with 5.9 percent (P5, 768.2 million). Electrical energy and other used vehicles with an engine capacity between 1,500 cc and 3,000 c. contributed 2.0 percent (P1, 949.9 million) and 1.2 percent (P1, 172.7 million), respectively. Other individual commodities which are among the top 100 imports can be observed in **Table 5.1**.

## 5.2 The Most Exported Commodities

In 2024, "Copper ores and concentrates" contributed 15.9 percent (P10, 064.3 million) to total exports during the year. "Ignition wiring sets and other wiring sets of a kind used in vehicles, aircraft or ships" and "Disodium carbonate" followed with 2.2 percent (P1, 387.8 million) and 1.6 percent (P1, 007.5 million), respectively. Other commodities can be viewed in **Table 5.2**.

# CHAPTER 6: TRADE BY MODE OF TRANSPORT

The mode of transport here refers to the means of transporting goods into and out of Botswana. Road, Air and Rail proved to be the most popular mode of transport for Botswana International Merchandise Trade.

## 6.0 Imports and Exports by Mode of Transport

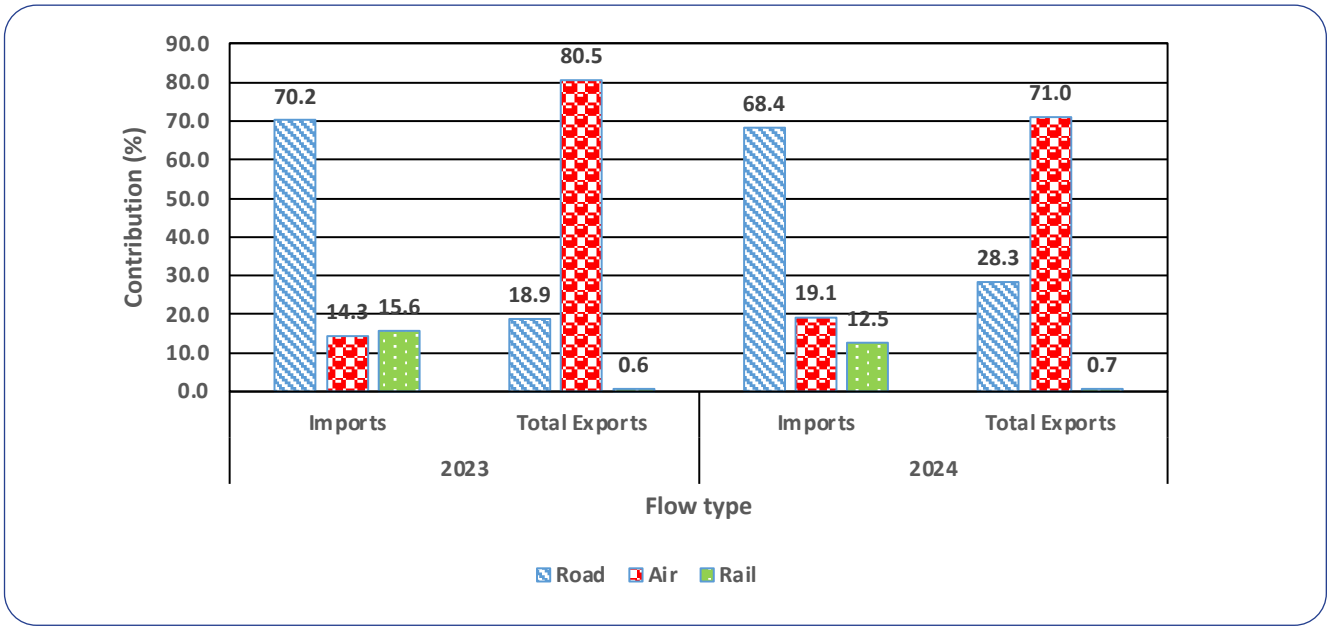

During 2024, Road transport accounted for the largest share of goods imported into Botswana in value terms. Imports valued at (P66, 975.4 million), representing 68.4 percent of total imports, entered the country by road. Air and Rail transport accounted for 19.1 percent (P18, 654.7 million) and 12.5 percent (P12, 218.4 million), respectively, of total imports during the year under review.

Air transport remained the principal mode of transport for Botswana's exports during 2024. This is because exports value is heavily dependent on high valued diamonds, which are transported by Air. Air Transport accounted for 71.0 percent (P44, 947.1 million) of total exports followed by Road transport with 28.3 percent (P17, 935.7 million) during the year under review.

**Table 6.0: Imports and Exports by Mode of Transport – 2023 and 2024 (Million Pula)**

| Year | 2023 | | | | 2024 | | | |
|---|---|---|---|---|---|---|---|---|
| ModeFlow | Imports | | Total Exports | | Imports | | Total Exports | |

# CHAPTER 7: TRADE BY OTHER COMMODITY CLASSIFICATIONS

This chapter gives trade by two other commodity classifications, which are based on the Harmonized Commodity Description & Coding System (HS Codes). The commodity classifications discussed here are the Standard International Trade Classification (SITC Revision 4) and the Broad Economic Categories (BEC Revision 4).

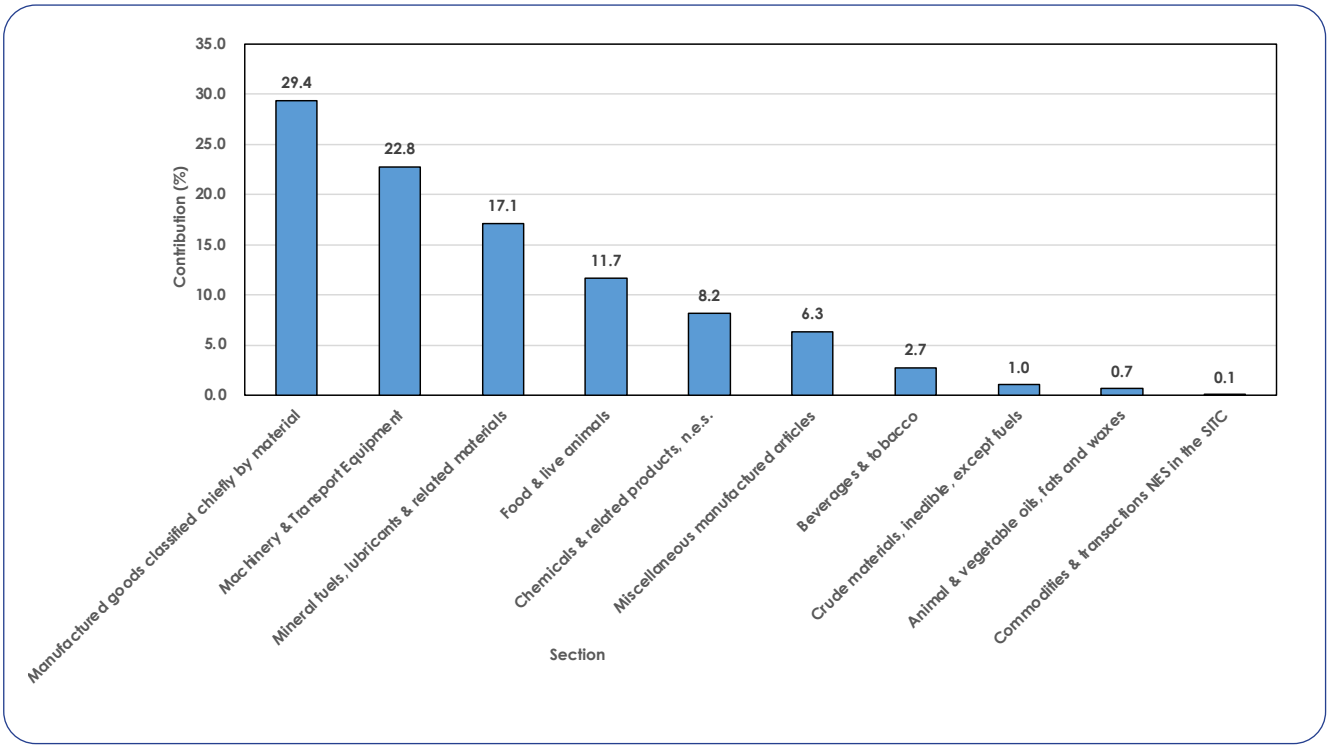

## 7.1 Standard International Trade Classification (SITC)

The Standard International Trade Classification is a statistical classification of commodities entering external trade, it is designed to provide the commodity aggregates required for purposes of economic analysis, to facilitate the international comparison of trade by commodity data. The SITC has 3,118 basic headings and sub headings which are assembled in 261 groups, 67 divisions and 10 sections. This report uses SITC Revision 4, which is based on Harmonized Commodity Description & Coding System of 2022 (HS 22). Figures presented here are for the Sections and Divisions only. Table 7.1A gives imports while Table 7.1B presents exports.

### 7.1.1 Imports by Standard International Trade Classification (SITC) – 2024

During 2024, imports were valued at P97, 880.5 million. Manufactured Goods classified chiefly by material (Section 6) accounted for the largest share, contributing 29.4 percent (P28, 775.2 million). Machinery & transport equipment (Section 7) and Mineral fuels, lubricants & related materials (Section 3) followed with 22.8 percent (P22, 280.5 million) and 17.1 percent (P16, 746.2 million), respectively.

## 7.1.2. Exports by Standard International Trade Classification (SITC) - 2024

Manufactured Goods classified chiefly by material (Section 6) and Crude materials, inedible, except fuels (Section 2) were the main contributors to exports during the year under review, with contributions of 70.4 percent (P44, 648.5 million) and 17.4 percent (P11, 027.5 million), respectively. Other sections can be viewed in Table 7.1B.

## 7.2. Broad Economic Categories (BEC)

The Broad Economic Categories classification was designed to serve as a means for converting trade data compiled in terms of SITC into end use categories that were meaningful within the framework of System of National Accounts (SNA). These categories are approximating the three basic classes of goods in SNA; namely capital goods, intermediate goods and consumption goods.

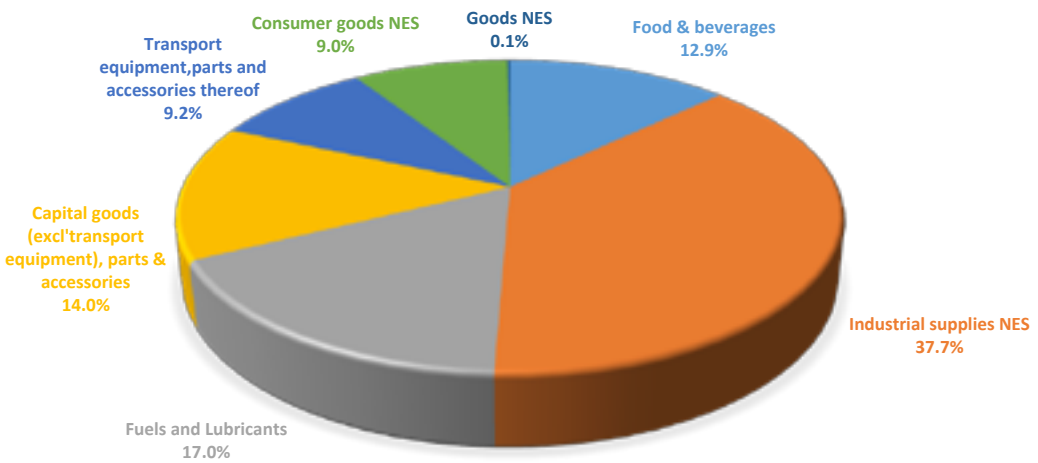

The Broad Economic Categories classification comprises 19 basic categories, which can be aggregated to approximate the three fundamental classes of goods. This structure enables trade statistics to be integrated with other broad economic datasets, such as national accounts and industrial statistics, thereby supporting coherent national, regional, and global economic analysis. The discussion in this section is, however, limited to the sections and divisions of the Broad Economic Categories framework.

## 7.2.1. Imports by Broad Economic Categories (BEC) - 2024

During 2024, imports by Broad Economic Categories were mainly dominated by "Industrial Supplies NES" (Section 2), which accounted for 37.7 percent (P36, 937.2 million) of total imports valued at P97, 880.5 million. Fuels & Lubricants (Section 3) contributed 17.0 percent (P16, 594.9 million), while Capital goods (excluding transport equipment), parts & accessories (Section 4) and Food & beverages (Section 0) accounted for 14.0 percent (P13, 740.9 million) and 12.9 percent (P12, 613.2 million), respectively, during the year under review (**Table 7.2**).

Contributions made by other Sections and Divisions of the Broad Economic Categories can be observed on **Table 7.2** and **Chart 7.2 A**.

## 7.2.2. Exports by Broad Economic Categories (BEC) - 2024

**Chart 7.2B** displays the percentage shares of different classes of goods according to BEC classification. This presentation provides insight into the extent to which goods are exported in unprocessed or primary form. Such information can assist the country in planning the development of processing industries to create employment and at the same time promote exportation of finished goods, which in turn can generate higher revenue. This data is also presented in **Table 7.2** together with the imports data.

**Table 7.2** shows that in 2024, more than 90 percent of total exports consisted of "Industrial Supplies NES"; Section 2, which contributed 91.3 percent (P57, 864.0 million) of total exports valued at P63, 344.5 million. Section 5, "Transport Equipment, Parts & Accessories thereof", contributed 3.4 percent (P2, 127.2 million) followed by Capital goods (excluding transport equipment), parts & accessories (Section 4) with 1.8 percent (P1, 124.7 million).

Contributions made by other Sections and Divisions of the Broad Economic Categories can be observed in **Table 7.2** and on **Chart 7.2B**.

# CHAPTER 8: TRANSIT TRADE

Transit trade refers to the movement of goods from one country to another through a third country, without the goods being subject to customs duties and other import restrictions in the intermediary country. Essentially, it involves the transportation of goods across a country that lies between the country of origin and that of final destination. Countries that serve as transit hubs often provide infrastructure and services to facilitate transit trade. These countries may benefit economically from transit trade through fees, tariffs, or other charges associated with transportation services or by stimulating economic activity related to trade and transportation.

Overall, the purpose of transit trade is to overcome geographical, logistical, and economic constraints to facilitate the movement of goods between countries or regions efficiently, cost-effectively and securely. It plays a crucial role in promoting international trade, economic development, and regional integration.

Countries involved in transit trade typically have agreements and protocols in place to govern the movement of goods through their territory without the imposition of customs duties and other trade barriers. This helps to streamline the transportation of goods and reduce logistical challenges for businesses engaged in international trade.

Transit trade is governed by specific regulatory and documentation requirements designed to facilitate the effective monitoring and control of goods moving through a country. Compliance with these provisions is essential to ensure the integrity and efficiency of transit operations. Any breach of the applicable regulations or misuse of transit trade arrangements may result in penalties, sanctions, or other legal consequences.

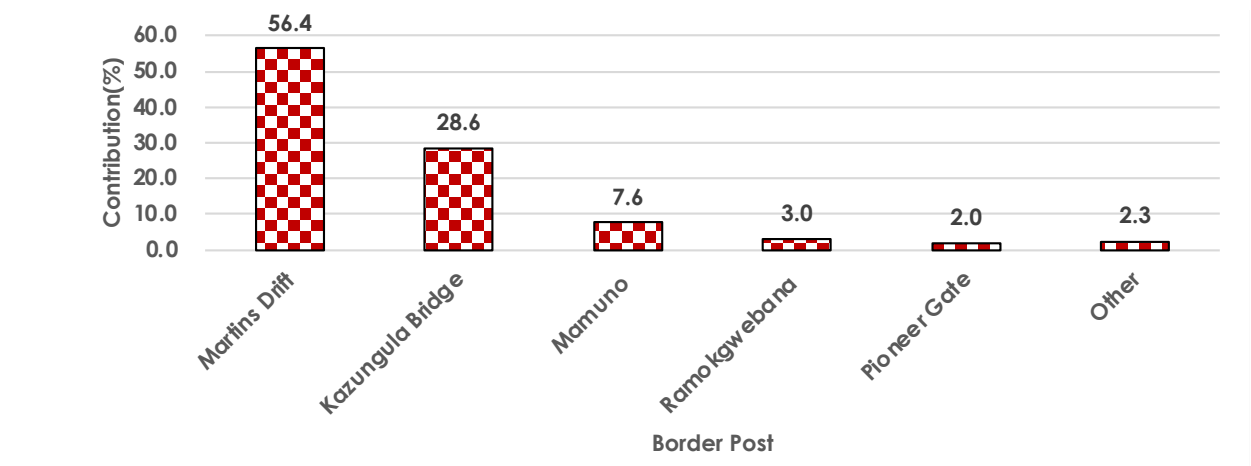

During 2024, goods amounting to P266, 214.1 million transited through Botswana destined for various countries. Martins Drift and Kazungula bridge border posts handled goods accounting for 56.4 percent (P150, 214.1 million) and 28.6 percent (P76, 084.0 million) respectively, as displayed in **Table 8.1** and **Chart 8.1**.

The top most transiting goods were chapter 74 (Copper and articles thereof) at 31.4 percent (P83, 597.9 million). Chapter 28 (Inorganic chemicals; organic and inorganic compounds of precious metals; of rare earth metals, of radio-active elements & of isotopes) at 20.0 percent (P53, 125.7 million), and Chapter 99 (Commodities not specified according to kind) followed with a contribution of 14.5 percent (P38, 728.6 million), as shown in **Table 8.2** and **Chart 8.2**.

# CHAPTER 9: CONCEPTS, SOURCES AND METHODS

IMTS are compiled by the International Merchandise Trade Statistics Section of Statistics Botswana, and uses the General Trade system. International Merchandise Trade refers to external trade in goods only. International Service Trade Statistics (ISTS) are however not compiled by this section. The primary source of international merchandise trade data is the Customs & Excise Division at the Botswana Unified Revenue Service (BURS). The Customs & Excise Division is responsible for data capture for both computerized and manual borders, and the monthly raw data files are transferred to Statistics Botswana for data processing.

Imports are valued CIF (cost, insurance & freight), while exports are valued FOB (free on board). The value of imports includes transport and insurance costs to the importing country. The Exports value consists only of the value of goods as they leave the exporting country.

## 9.1 Time of Recording of Trade

IMTS is compiled using date of recording of trade as opposed to date of assessment of goods by customs. This means that as goods cross the border, trade is recorded and this is the reference month for compilation of IMTS. Some of these goods may however be held by customs for some time pending final assessment for tax or duty purposes.

If the final assessment is done later, for example two or three months, or even more, after the goods had crossed the border, the affected trade will then update trade for the particular month when the goods crossed the border, therefore it does not form part of trade for the month during which the final assessment was done. This is mostly common with imports. Revision of data for the month preceding the one under review will normally show high values as compared to revisions for other months due to more goods (from the previous month) being released after final assessment.

## 9.2 Concepts and Definitions

i. **Domestic Exports:** These are goods originating from the compiling country, being permanently exported out of the country for consumption in the outside world. This includes products from customs inwards processing; for example, if a country imports wheat, processes the wheat into bread flour and exports the bread flour and bye products from the milling process, these will all leave the country as domestic exports.

ii. **Re - Exports:** These are exports of foreign goods that were initially recorded as imports into the compiling country. These goods are exported in the same state that they came in except for wear and tear. An example will be re-exportation of a motor vehicle that was initially imported into the compiling country and after being used it is now being exported to a foreign country.

iii. **Total exports:** This is the sum of domestic exports and re-exports

iv. **Imports:** These are goods imported from the outside world, into the compiling country, for local consumption. This includes re-importation of locally produced goods that were initially exported and are now being imported back into the country.

v. **Trade Balance (Net Export):** This refers to the total value of goods exported minus the total value of goods imported by a given economy in a given period of time. A positive trade balance (trade surplus) indicates that a country is exporting more in value terms than it is importing. A negative trade balance (trade deficit) indicates that the country is importing more than it is exporting.

## 9.3 Exclusions from IMTS

i. **Goods in Transit** - This is trade that is simply passing through the compiling country solely for the purpose of being transported to another country.

ii. **Goods temporarily admitted or dispatched** - These are goods that, at the time of admission/ dispatch, are intended to stay in the receiving country temporarily and that after their stay they will be returned in the same state. These goods include display equipment for trade fairs and exhibitions, commercial samples, means of transport, containers, equipment for working, etc.

iii. **Monetary Gold**- This is gold to which the monetary authorities have title and is held as reserve assets.

iv. **Issued banknotes and securities and coins in circulation**-These goods represent evidence of financial claims and are excluded from IMTS

The above list of exclusions from IMTS is, however, not exhaustive and only a few that are common, simple, straightforward and easy to understand have been picked as examples.
