ANNUAL EDUCATION REPORT

2013

Preface

This report gives highlights on education and training in Botswana for the year 2013.

The publication provides statistics users with comprehensive education statistics and information on the number of education institutions, enrolments, performance, teachers and facilities at pre-primary, primary, secondary, and tertiary education levels. The statistics is of good quality, policy-relevant, and reliable to serve the purpose of monitoring the existing education policies including the 1994 Revised National Policy on Education (RNPE). This report also provides statistics for evidence on the country's progress towards meeting national and international obligations. The information provided by this report also serves to monitor education related policies and compacts including the ten year basic education for all with emphasis on inclusive education and improved equity, increasing access in secondary and higher education, National Development Plans (NDP), Vision 2016, Education For All (EFA) and Millennium Development Goals (MDG) to mention among a few. The information will also be used as a basis for assessing equitable allocation of resources in the various districts, regions and other denominations.

For more information and further enquiries, contact the Directorate of Stakeholder Relations at 3671300. All Statistics Botswana outputs/publications are available on the website at www.statsbots.org.bw, Statistics Botswana Library (Head-Office, Gaborone) and at the Ministry of Education and its strategic centres.

We sincerely thank all those who provide information for their significant contribution towards production of this report. It would not have been possible to produce this report without the contribution from all Heads of Institutions through availing the data required.

Dr. Burton Mguni
Statistician General
June 2019

1.0 Introduction

The data used in this report is sourced from annual school census conducted in educational institutions in Botswana. The data is collected from Government and privately owned pre-primary, primary and secondary schools. Data from Human Resource Development Council (HRDC) and Botswana Examination Council (BEC) have been sourced to update the tertiary education and quality indicators respectively.

It should be noted that this publication covers mainly data for the year 2013. However, some data for previous years have been used for comparative analysis. It is worth noting that non-response by institutions is a major challenge and has led to gaps in statistics especially for post primary education level. The gaps have also led to discrepancies in a number of indicators such as enrolment trends, and number of teachers, just to mention a few. Due to high rate of non-response among the vocational, technical and tertiary institutions, the report has partial to no statistics on the two sub-sectors.

Indicators reported in this report are, among others; number of schools and institutions, enrolment rates and trends over the years, teachers by their qualifications, pupil-teacher ratio, re-entrants, dropouts, repetition, transition, progression, pass rates, proportion of learners with special education needs, streams and classroom, pupil-classroom ratio, to mention just a few. The reported indicators are aggregated by level, region, district, school ownership, citizenship and sex.

1.1 National Policy on Education

The 1994-2020 Revised National Policy on Education (RNPE) is the main policy framework for the provision of education in Botswana (Ministry of Education, 1994). The main goal of the current education policy is to improve access, ensure equity and inclusiveness for all, improve and maintain quality and effective management in the education system. Ministry of of basic Education (MoBE) through RNPE (1994) is committed towards an inclusive education system and provision of special education. This in turn facilitates increase in access to education by all including orphans, vulnerable children, children in difficult circumstances, children with special education needs and disability.

While RNPE is the main education policy in place there are other national bench marks such as Vision 2016 with pillars focused on education. These include;

- a. Informed and educated nation
- b. Innovative, productive and prosperous nation

The National Development Plan (NDP) 10 (April 2009 – 2016) equally commits to ensuring implementation of the above mentioned policies and other bench marks. The plan embraces, among others, provision of adequate supply of qualified, productive and competitive human resource, education for all and universal primary education by 2016. Furthermore, the plan focuses on increasing access and equity in education, provision of quality and relevant education.

2.0 Pre-Primary Education

Provision of Early Childhood Care and Education (ECCE) programme to all children is essential as a foundation for primary education. Its benefits to a child among others include helping to boost cognitive and motor development as well as enhancing social skills. A pre-school education helps build a foundation of learning that will follow the child into their school years. The pre-school classroom also gives the child lots of interaction with peers that build its skills to share, as well as negotiate and listen. Revised National Policy on Education (RNPE) emphasizes the need for provision of enabling environment for pre-primary education and increasing access to all children before enrolling at primary. Pre-primary education in Botswana is mainly coordinated by district councils and provided by individuals, communities, private companies, Non-Government Organisations and Councils.

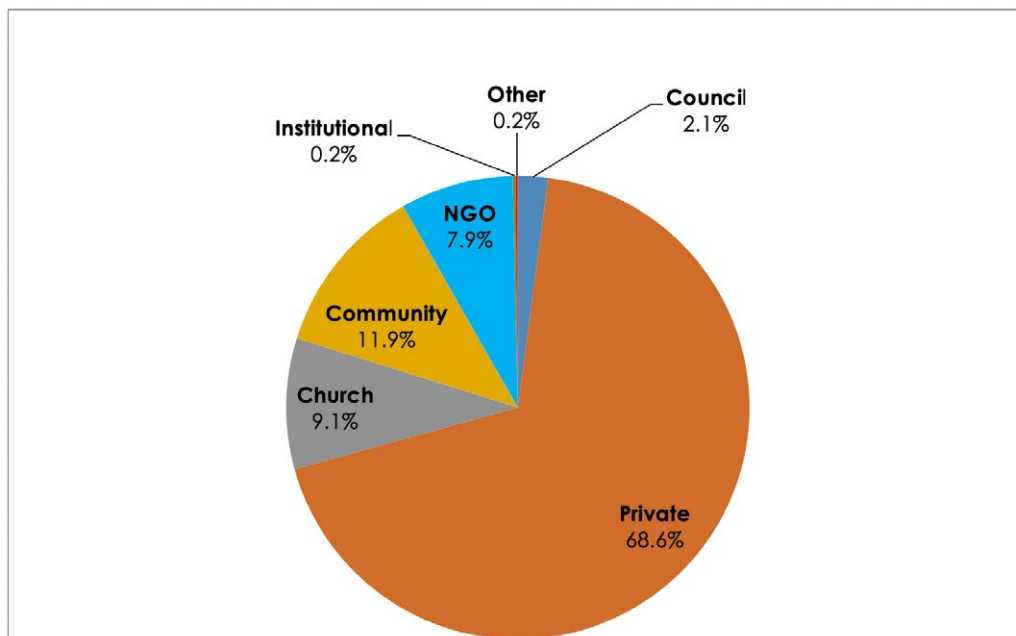

2.1 Number of Pre-Primary Schools by School Ownership

Table 2.1: Number of Pre-Primary Schools Ownership -2013

School Ownership	No. of Schools	Percentage
Council	12	2.1
Private	391	68.6
Church	52	9.1
Community	68	11.9
NGO	45	7.9
Institutional	1	0.2
Other	1	0.2
Total	570	100

The 2013 pre- primary data was collected from 570 pre-primary schools. Out of these, 391 (68.6%) schools are owned by private companies and individuals, 68 (11.9%) schools belong to the community, 52 (9.1%) are owned by churches, 45 (7.9%) by NGOs, 12 (2.1%) are owned by council while one pre-school was owned by an institutional. This information is represented by figure 2.1 below.

Figure 2.1: Percentage of Pre-Primary Schools by School Ownership – 2013

The number of pre-primary schools fluctuates between the years as a result of closure and opening of new ones. This contributes negatively on the reported statistics for pre-primary education hence trend data tend to be inconsistent at times.

Table 2.2: Number of Pre-Primary Schools by School Ownership - 2005-2013

Year	Council	%	Community	%	Church	%	Private	%	NGO	%	Institution	%	Other	%	Total
2005	14	3.1	96	21.2	51	11.3	225	49.7	65	14.3	2	0.4	-	-	453
2006	14	2.9	95	19.5	60	12.3	239	49.2	74	15.2	4	0.8	-	-	486
2007	14	3	82	17.5	61	13	246	52.5	62	13.2	4	0.9	-	-	469
2008	11	2.1	95	18.4	68	13.2	274	53.2	63	12.2	4	0.8	-	-	515
2010	13	2.5	85	16.5	64	12.5	290	56.4	57	11.1	2	0.4	3	0.6	514
2012	14	2.9	62	12.6	43	8.8	314	64	51	10.4	4	0.8	3	0.6	491
2013	12	2.1	68	11.9	52	9.1	391	68.6	45	7.9	1	0.2	1	0.2	570

Table 2.2 shows trend of pre-primary schools by school ownership from 2005 to 2013. It should be noted that data for 2009 and 2010 is not available.

The number of pre-primary schools increased by 25.8 percent between 2005 and 2013 from 453 to 570 in 2013. While there has been a general increase in the number of pre-primary schools over the years, there was a decrease of 3.5 between 2006 and 2007 and 4.5 percent between 2010 and 2012. The decrease in the number of pre-primary schools could be due to the closure of unregistered pre schools for quality control of basic education and safety of children. However, pre- schools owned by private individuals continue to increase. The above observation is further presented in figure 2.2 below.

Figure 2.2: Total Number of Pre-Primary Schools-2005-2013

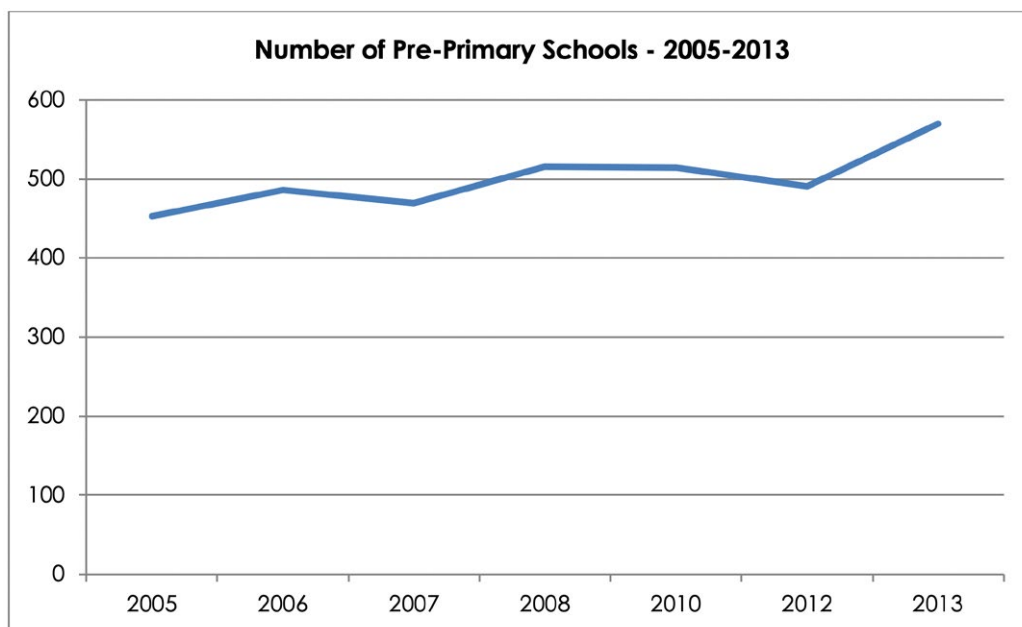

Table 2.3: Number of Pre-Primary Schools by District and Terms of Operation - 2013

District	Half Day	Full Day	Total
Gaborone	11	73	84
F/town	5	39	44
Lobatse	1	14	15
S/Phikwe	2	19	21
Orapa	1	2	3
Jwaneng	1	10	11
Sowa	-	3	3
Southern	-	21	21
Borolong	1	12	13
South East	3	10	13
Kweneng	6	82	88
Kgatleng	1	19	20
Serowe/Palapye	2	41	43
Mahalapye	4	26	30
Bobirwa	-	11	11

Tutume	4	25	29
North East	11	21	32
Maun East	5	28	33
Maun West	4	5	9
Chobe	1	4	5
Gantsi	6	9	15
Kgalagadi South	-	8	8
Kgalagadi North	9	7	16
Total	78	492	570

Table 2.3 shows that 492 pre-primary schools (86.3 %) operated full day while 78 schools operate only half a day. Kweneng and Gaborone had the highest number of schools with 88 and 84 schools respectively. On the other hand, Orapa and Chobe had the lowest total number of schools with 3 and 5 schools respectively. North East district and Gaborone city had the highest (11 schools each) number of schools which operated half day only while Kweneng and Gaborone had the higher number; 82 and 73 schools respectively operating full-day.

Table 2.4 shows that majority of pre-schools charge in the region of P1001 and 1500. The table further shows that pre-schools are relatively expensive in the urban districts of Gaborone and Francistwon. For example, in Gaborone, 57.1 percent of the pre-schools charged from 2500 to P4000. This compares with the rural districts of North East where majority (78%) are either free or charge up to P1000.

Table 2.4: Number of Pre-Primary Schools by District and Fees Paid per Term - 2013

Total	570	14,837	14,313	29,150	50.9	49.1	100

There is no gender disparity at pre-school. Table 2.5 shows that 50.9 percent of total enrolment in pre-primary education in 2013 was male while 49.1 percent were female. The Gender Parity Index (GPI) for participation in pre-primary education is 0.96 indicating almost equal access to pre-primary education by both boys and girls.

Figure 2.3: Percentage of Pre-Primary Enrolment by School Ownership-2013

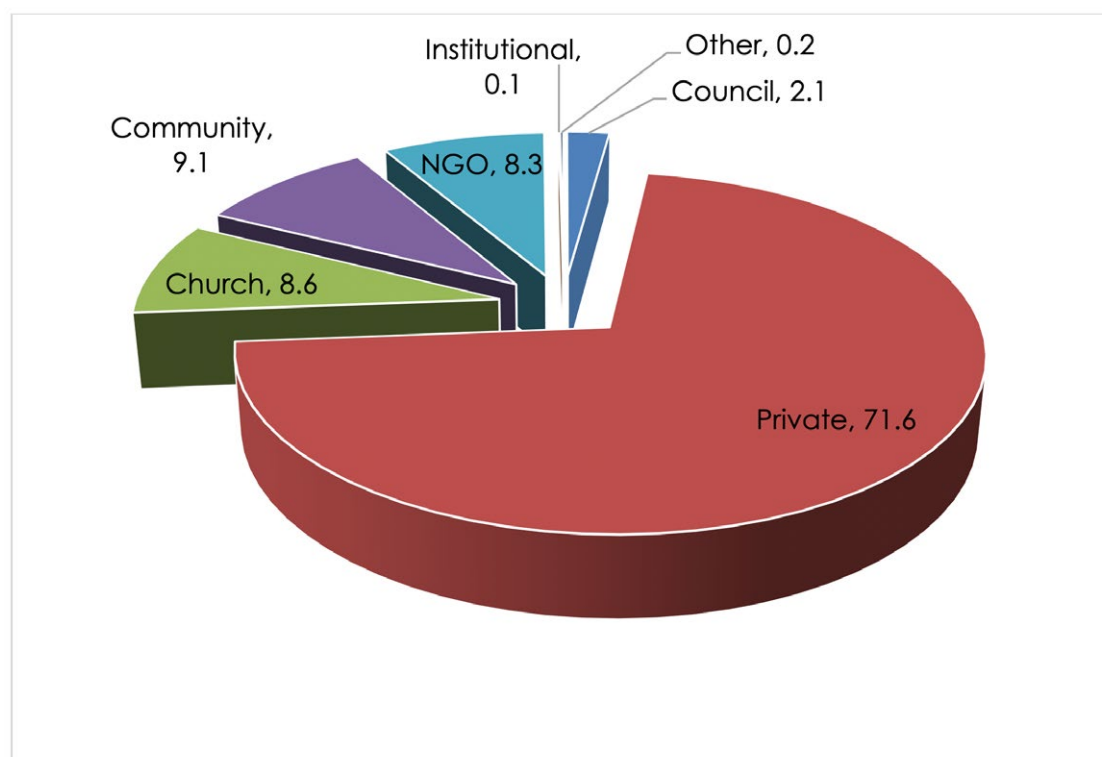

Figure 2.3 shows the proportion of pre-primary enrolment by school ownership. Private schools had 71.6 percent of total enrolment, community schools had 9.1 percent, 8.6 percent for schools owned by churches, 8.3 percent for NGO schools, 2.1 percent for schools owned by councils while institutional and other schools had 0.1 percent and 0.2 percent respectively.

The private sector provides majority of pre-school services. Table 2.6 below shows that private sector enrolled 71.6 percent of all pre-school children, followed by those who enrolled in schools owned by community and churches. 76226148

Table 2.6: Pre-Primary Enrolment by School Ownership, Age and Sex – 2013

Table 2.6 shows that the highest proportion (84.7 percent) of pre-primary attendants were aged between three and five years with the highest enrolment found among children aged 5 years with an enrolment of 9,404 pupils followed by those aged 4 years with 8,926 pupils. This distribution was found to apply for all the districts except for the 'other' category where the attendance was concentrated at 6 years and above. While the official age for primary school enrolment is six years, and 0.3 percent of preschool attendants were aged above six years.

Pre-primary Enrolment by Region, Age and Sex

Table 2.7 shows that majority of pre-primary school attendants were found in the South East with 7,415 followed by Central region with 7,356. An interesting feature is that majority of the pupils who were beyond six years were recorded in the Central region with 41 followed by North East with 23. In most of the regions, except South East and Kgatleng most pre-school attendants were found in age 5.

Table 2.7: Pre-Primary Enrolment by Region, Sex and Age -2013

2.2 Special Education Needs and Disability in Pre-Primary Schools

Provision of special education is specifically designed to meet the educational and developmental needs of children with disabilities, or those who are experiencing developmental delays. The early detection of children's special needs enables parents to contact the appropriate agency to have the child screened and/or evaluated to assess prevalence of any underlying problem or delay that might need to be addressed. Such screenings should cover a range of skill areas—vision and hearing, gross and fine motor skills, speech and language use, social and emotional behaviour, and more.

Table 2.8: Pre-Primary Enrolment with Special Education Needs by Region – 2013

Region	Visual	Physical	Hearing	Speech	Mental Retardation	Multiple Disability	Intellectual	Other	Total
South East	8	3	1	30	-	10	7	5	64
North East	1	2	9	14	-	2	1	-	29
Southern	2	4	1	4	1	-	1	3	16
Kweneng	2	1	-	15	1	4	3	-	26
Kgatleng	-	2	-	4	-	-	-	4	10
North West	3	1	-	1	-	1	-	-	6
Chobe	1	1	-	-	-	-	-	-	2
Gantsi	-	-	-	-	1	-	-	-	1
Kgalagadi	-	-	-	1	1	-	-	-	2
Central	2	8	-	35	5	12	1	10	73
Total	19	22	11	104	9	29	13	22	229

Table 2.8 shows that there were 229 children with special education needs enrolled in pre-primary school across the country in 2013. Out of these, 73 were in Central region, followed by 64 in South East region. The number of pupils with speech impairment was highest at 104 followed by those with multiple disabilities, physical and other impairment with 29 and 22 pupils respectively.

Figure 2.4: Pre-Primary Enrolment with Impairments as a Percentage of Total Enrolment with Special Education Needs– 2013

Figure 2.4 further shows that 45.4 percent of pre-primary pupils with special education needs had speech impairment followed by 12.7 percent who had multiple disability while students with physical disability and other impairments not specified constituted 9.6 percent each. Children with mental retardation constituted the lowest percentage of pre-primary children with disability.

Table 2.9: Age Specific Enrolment Ratio (ASER) for Pre-Primary -2013

Single Age	2013 Population	Pre-Primary Enrolment	ASER (%)
≤1	104,956	256	0.2
2	46,999	2,121	4.5
3	47,109	6,358	13.5
4	47,258	8,926	18.9
5	48,491	9,404	19.4
6	44,879	1,995	4.4
7	44,761	90	0.2

*2013 Population Estimates are proxies derived from the 2011 Population & Housing Census Data

Table 2.9 shows that Age Specific Enrolment Ratio (ASER) was highest for the 5 year olds at 19.4 percent, followed by the 4 year old at 18.9 percent. ASER was less than one percent for pupils aged one year or younger and those aged 7 years. This shows that majority of pre-scholars are aged between 4 and 5 years suggesting that parents prefer to enrol children a year or two before they are due for primary school enrolment.

Table 2.10: Pre-Primary Enrolment Ratios by Age and Year – 2012-2013

Year	Population 3-5 years	Total Enrolment	Enrolment 3-5 Years	3-5 Years GER (%)	3-5 Years NER (%)
2012	119,239	23,650	19,847	19.8	16.6
2013	142,858	29,150	24,688	20.4	17.2

2012 Population is drawn from CSO (2001). Population Projections for Botswana: 2001-2031 while the 2013 Population Estimates are proxies derived using the 2011 Population & Housing Census Data

Enrolment at pre-school continues to increase, perhaps suggesting that parents are increasingly acknowledging the value of pre-school for eventual enrolment at primary school. Table 2.10 shows that the national Gross Enrolment Rate (GER) for population 3-5 years in pre-primary schools was 19.8 percent in 2012 and 20.4 percent in 2013. There was an increase of 0.6 percentage point in GER between 2012 and 2013. On the other hand, national Net Enrolment Rate (NER) for population 3-5 years in pre-primary school was 16.6 percent in 2012 and 17.2 percent in 2013. There was 0.6 percentage point increase in NER (3-5) between 2012 and 2013.

2.3 Pre-Primary Teachers

Despite the increasing value attached to pre-school education and its recognition by the revised National Education Policy, a significant proportion of teachers at pre-school level remain untrained, which is likely to compromise the quality of education at that level.

Research has linked early learning and development to the educational qualifications of teachers. The most effective preschool teachers – those with at least a four-year college degree and specialized training in early childhood – have more responsive interactions with children, provide richer language and cognitive experiences, and are less authoritarian. High-quality preschool education depends on effective, high-quality teachers (W. Steven Barnett NIEER Policy Brief (Issue 2, revised December 2004).

Table 2.11: Trend on Teachers by School Ownership

Ownership	2012 Pre-Primary Teachers						2013 Pre-Primary Teachers					
	Trained			Untrained			Trained			Untrained		
	M	F	Total	M	F	Total	M	F	Total	M	F	Total

Other	-	5	5	-	2	2	3	-	3	-	2	2
Total	18	1,049	1,067	15	871	886	26	1,349	1,375	18	1,104	1,122

Table 2.11 shows that preschool teaching has been dominated by females. It further shows that there were 44 male and 2,453 female pre-primary teachers in 2013 compared to 33 male and 1,920 female in 2012. Of all teachers in 2013, 1,375 were trained constituting 55.1 percent while 44.9 percent (1,122 teachers) were untrained.

Nationality and qualification of Pre-school teachers

Table 2.12 shows that preschool teaching is dominated by females who constituted 98 percent of the teaching staff. An interesting feature is that majority of preschool teachers are Batswana. Out of a total 2,497 teachers, 2,079 or 83.2 percent were Batswana while the remainder were foreigners. Like Batswana, most foreign teachers were females.

Table 2.12: Number of Pre-Primary Teachers by Qualification, Sex, Nationality and District – 2013

	Total	975	324	63	11	2	1,375	1,122	2,497

Note: Cert- certificate, Dip- Diploma, Deg- Degree, Mas- Masters, Unq- Unqualified

Table 2.13 shows that in 2013 there were 2,497 pre-primary school teachers; with 44 males and 2,453 females. A total of 2,079 teachers were citizens while 418 were non-citizens. Further, citizens constituted the bulk of the unqualified teachers. More than half or 52.5 percent of citizen teachers were unqualified compared to only 7 percent for foreign teachers. Most teachers were qualified at certificate level with a sizeable number holding a diploma.

Figure 2.5: Percentage of Pre-Primary Teachers by Qualification – 2013

Figure 2.5 indicates that about 45 percent of pre-primary teachers are untrained, 39 percent are certificate holders, and only 13 percent had diploma. The degree holders constitute 2.5 percent while master's degree and other unclassified qualifications constitute 0.4 and 0.1 percent respectively.

3.0 Primary Education

3.1 Introduction

The government of Botswana has for a very long time recognised education as a priority area for development. Besides education attracting the highest allocation of development, primary education is offered to all with minimal household contribution; basically through contribution towards Parents Teachers' Association (PTA) levy. This is in a way to increase access to primary education.

3.2 Primary Education School Ownership

Table 3.1: School Ownership by Region -2013

Region	Public	%	Private	%	Total	%
Central	250	33.2	15	22.1	265	32.3
Chobe	10	1.3	1	1.5	11	1.3
Ghanzi	22	2.9	1	1.5	23	2.8
Kgalagadi	42	5.6	-	-	42	5.1
Kgatleng	37	4.9	2	2.9	39	4.8
Kweneng	91	12.1	10	14.7	101	12.3
North East	63	8.4	6	8.8	69	8.4
North West	67	8.9	6	8.8	73	8.9
South East	48	6.4	22	32.4	70	8.5
Southern	123	16.3	5	7.4	128	15.6
TOTAL	753	100	68	100	821	100

Table 3.1 shows that there were 821 registered primary schools country wide in 2013 of which 753 (91.7 percent) were government owned schools and 68 (8.3 percent) were privately owned. This is an indication that government is the main provider of primary education. There was an increase of 0.9 percent on the number of schools from 814 schools in 2012 to 821 schools in 2013. The number of government owned primary schools remained unchanged while privately owned schools increased by 7 schools (11.5% increase).

Figure 3.1: Proportion of Primary Schools by School Ownership per region-2013

Figure 3.1 shows that public schools constituted above 90.0 percent across all the regions except for South East where public schools constituted 68.6 percent. South East region had the highest number of private schools constituting 32.4 percent of all private primary schools in the country. Kgalagadi region is the only region with no private schools.

3.3 Streams and Classrooms

The government of Botswana has over decades been striving to resource schools. Some remarkable progress has been made in policy formulation, reforms strategies and goals settings toward the improvement of resources in schools. Noticeable progress has also been made in the implementation of such policies.

Ministry of Local Government and Rural Development is responsible for provision of resources in primary schools such as classrooms and other physical infrastructure, school furniture. Teaching and learning materials and stationery are the responsibility of Ministry of Education and Skills Development.

Table 3.2: Number of Students, Streams and classrooms by district for all schools - 2013

Enrolment excludes Pre-Primary

Table 3.3 shows that the total enrolment in all primary schools stood at 340,065 in 2013. Government schools enrolled 93.2 percent of the pupils while only 6.8 percent were enrolled in private schools. There was an increase of 1.3 percent on enrolment between 2012 and 2013 from 335,830 to 340,065. Regions which enrolled high proportions of pupils were Central region accounting for 34.8 percent followed by Kweneng region with 14.3 percent and South region with 12.6 percent.

Table 3.4: Enrolment by Boarding Status, standard and Sex -2013

****The Data for 2009-2011 is derived from the Stats Briefs while 2007, 2008, 2012 and 2013 is derived from the annual school census. Note as well that reception students are excluded.**

Primary school enrolment has been increasing over the past five years. The enrolment increased from 330,745 in 2009 to 340,065 in 2013

Figure 3.2: Primary School Enrolment by Sex – 2009-2013

Figure 3.2 further illustrates primary school enrolment by gender from 2009 to 2013. Male enrolment was realized to be higher than female enrolment across the referenced years.

Table 3.7 shows that total enrolment was 340,065 in 2013 of which 174,015 were boys and 166,050 girls. Central region had the highest number of pupils enrolled in primary schools with 118,530 pupils followed by Kweneng and South regions with 48,519, and 42,891 pupils respectively. Chobe had the least number of primary school pupils with 3,456. Male enrolment was also higher than female enrolment across the regions.

Figure 3.3: Enrolment by Region and Sex -2013

Figure 3.3 further illustrates enrolment by gender in primary schools. This shows that Central region had the highest male enrolment of 60,846 and female enrolment of 57,684 in 2013. Central region constituted 34.9 percent of total enrolment, followed by Kweneng region at 14.3 percent and South region at 12.6 percent. Chobe region had the lowest enrolment (1,748 male and 1,708 female) constituting 1.02 percent of total primary school enrolment in 2013.

3.4 Special Education Needs and Disability in Primary Schools

To implement RNPE (1994) recommendations on special education, the Government continues to build special education units in existing schools, integrate and mainstream children with special education needs and disability into the mainstream school system. Furthermore, the Government through grants supports the NGOs which provide special education.

In 2012 there were 33 Government owned primary schools with special education units for children with mental and physical disability, 2 primary schools with a unit for the visually impaired and 2 schools with a unit for the hearing impaired.

Figure 3.4: Enrolment in SPED Units as Percentage of Total Enrolment- 2008 -2013

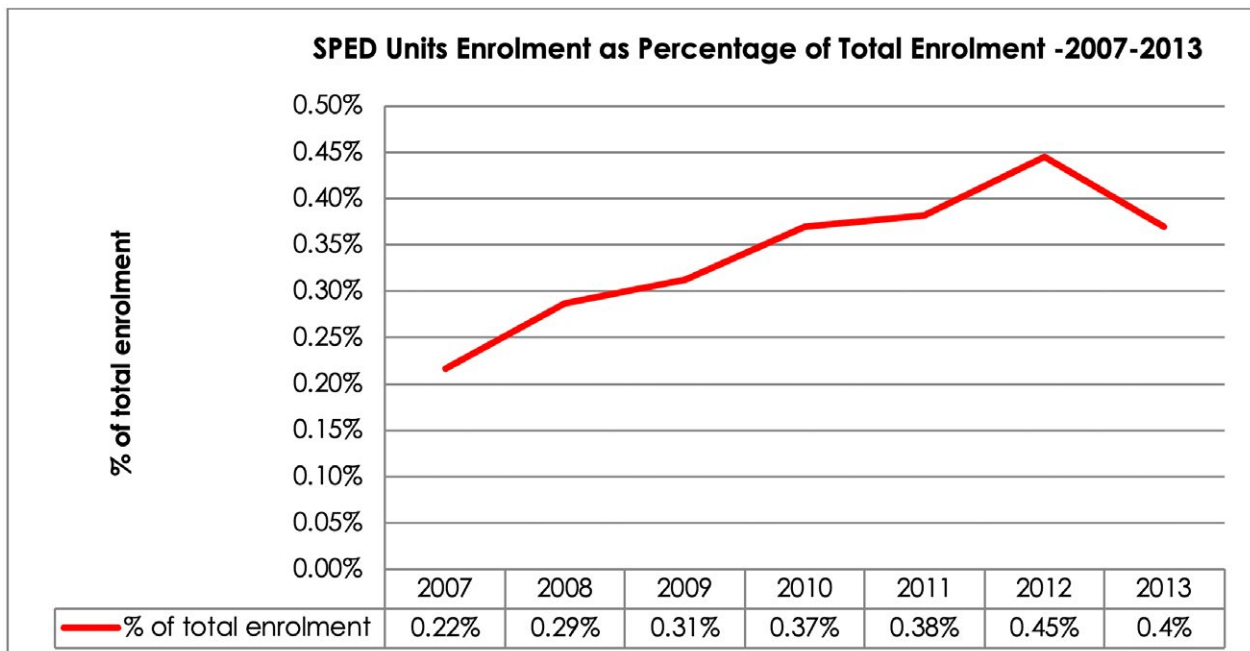

Figure 3.4 shows that enrolment of children in Special Education Units constituted a minimal percentage since 2007 that is less than 1.0 percent of total enrolment. Although this being the case, the percentage SPED unit enrolment has been increasing since 2007; from 0.22 percent to 0.45 percent in 2012 with a slight decline to 0.4 percent in 2013. The lower percentage of children in SPED unit could be viewed as an indication that there is still a lot that has to be done regarding provision of education to children with special education needs.

Total	1658	470	734	715	3,661	621	711	8,570

Table 3.8 shows that there were 8,570 children with disability and special education needs in primary schools in 2013. This total includes children in Special Education Units and those with special education needs and disability in the main stream. Most of the special education needs children were those with intellectual disability 3,661 pupils followed by those with visual and hearing impairment with 1,658 and 734 pupils respectively.

It should be noted that in previous reports, pupils wearing spectacles were not considered as children with special education needs which is still the case in this report. The 2013 data also include children with intellectual disability which is inclusive of severe slow learners and mentally challenged children while previously the data was collected only on the mentally retarded children. The above in part explains the increase in special education enrolment from 3,413 in 2008 to 7,305 in 2012 and 8570 in 2013.

Figure 3.5: Primary School Enrolment with Special Education Needs by Types of Impairment – 2013

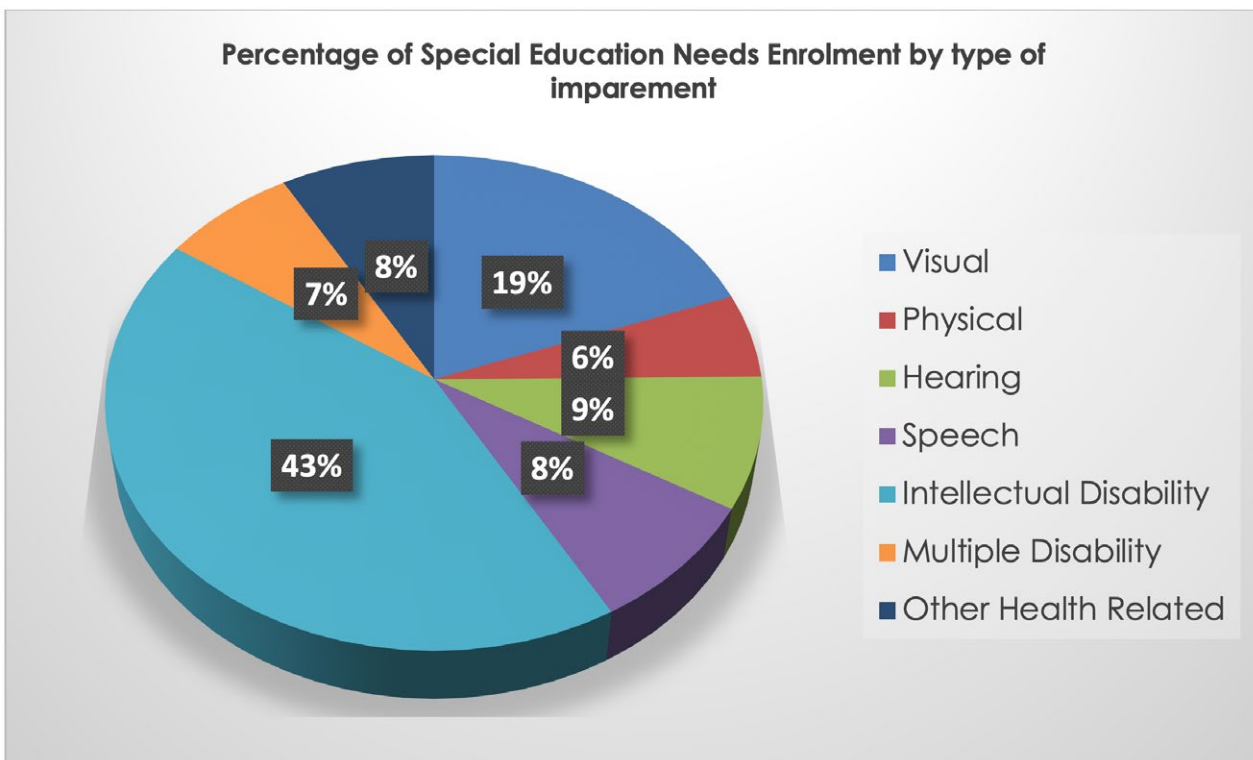

Figure 3.5 indicates that a higher percentage of primary school students with special education needs in 2013 were those with intellectual disability; constituting 43 percent, followed by those who are visually impaired at 19 percent while students with physical disabilities constitute the lowest percentage of 6 percent.

3.5 Standard 1 Enrolment

Figure 3.6: Standard 1 Enrolment - 2009-2013

21+	-	-	-	-	-	-
Total	29,329	27,053	56,382	29,322	26,589	55,911

Table 3.9 shows that majority of standard one pupils in 2013 were aged 6 -7 years with enrolment of 25,696 pupils and 20,837 pupils aged 6 and 7 years respectively. On the other hand 3,680 pupils were aged less than 6 years while only 211 were aged 11-16 years.

3.6 Apparent Intake Rate

Apparent Intake Rate (AIR) is the rate at which children are enrolled in standard 1 for the first time irrespective of their ages, and it is expressed as a percentage of the population at the official primary school entrance age.

AIR indicates the general level of access to primary education. The rate also determines the capacity of the education system to provide access to Standard 1 for the official school entrance age population. The 2013 AIR for 6 and 7 year olds was 112.0 percent and 112.3 percent respectively. In theory, the Net Intake Rate (NIR) is preferable to the AIR since it gives an indication of 6 and 7 year olds new entrants in standard one as a percentage of the 6 and 7 year olds population.

Table 3.10: New Enrolment at Standard 1 and Apparent Intake Rate (2005-2013).

Year	2005	2006	2007	2008	2009/2011	2012	2013
STD 1 New Entrants	49,199	49,095	47,922	46,316	-	48,569	50,284
Projected Pop 6 years old	43,799	45,123	46,541	45,563	-	44,051	44,879
Projected Pop 7 years old	42,419	43,735	45,007	46,421	-	43,935	44,761
AIR 6 Years old	112.3	108.8	103	101.7	-	110.3	112
AIR 7 Years old	116.-	112.3	106.5	99.8	-	110.5	112.3

Projected population for 2005 – 2008 is derived from 2001 Housing and Population Census while the 2012 and 2013 population is derived from preliminary projections from 2011 Population and Housing Census

3.7 Age Specific Enrolment Ratio

Age-specific enrolment ratio is the ratio of pupils of a particular age to the corresponding single age population. This indicator is used to monitor the degree of participation of pupils in the educational system for specific ages.

Table 3.11: Primary Education Age Specific Enrolment Ratio (ASER), (2012-2013).

Age	2012			2013		
	Population by Age	Enrolment	ASER	Population by Age	Enrolment	ASER
5	47,596	5,532	11.6	48,491	3,680	7.6
6	44,051	31,026	70.4	44,879	28,321	63.1
7	43,935	44,153	100.5	44,761	45,266	101.1
8	42,540	42,461	99.8	43,340	46,726	107.8
9	41,085	41,190	100.3	41,858	42,678	102
10	43,566	40,436	92.8	44,385	41,907	94.4
11	45,432	41,011	90.3	46,286	40,472	87.4
12	40,623	40,199	99	41,386	39,721	96
13	41,068	28,821	70.2	41,840	30,479	72.8
14	40,502	13,210	32.6	41,264	13,356	32.4
15	43,691	4,337	9.9	44,513	4,307	9.7
16	43,948	1,327	3	44,774	1,268	2.8
17	43,250	434	1	44,063	415	0.9
18+	41,507	121	0.43	42,287	129	0.46

Population by Age is derived from preliminary projections from 2011 Population and Housing Census.

Table 3.11 shows that the ASER for pupils aged 6 years was 63.1 percent. The ASER was very high, being around 100.0 percent for the age group 7 to 9 years, while it was very low: less than 10.0 percent for ages 15 years and above. This shows that only 63.1 percent of children aged 6 years had enrolled for primary school. This indicates a substantial number of children enroll at age 7 and 8.

Theoretically, ASER value of 100 percent for any age indicates that all children belonging to that particular age were in primary schools. On the other hand, ASER of more than one hundred could be attributed to inconsistencies in reporting age both at schools and during census or it can also be attributed to the use of projected population when enrolments are the actual numbers.

3.8 Gross and Net Enrolment Ratios

Gross and Net Enrolment Ratios are used to measure the extent of coverage of an educational program. It gives a comparison of the children in school with the total size of the school-aged population. It can also be used for assessing how far a country has succeeded in bringing to school all those who are eligible to attend.

Table 3.12: Primary School GER and NER (Both Sex) – (2003 – 2013).

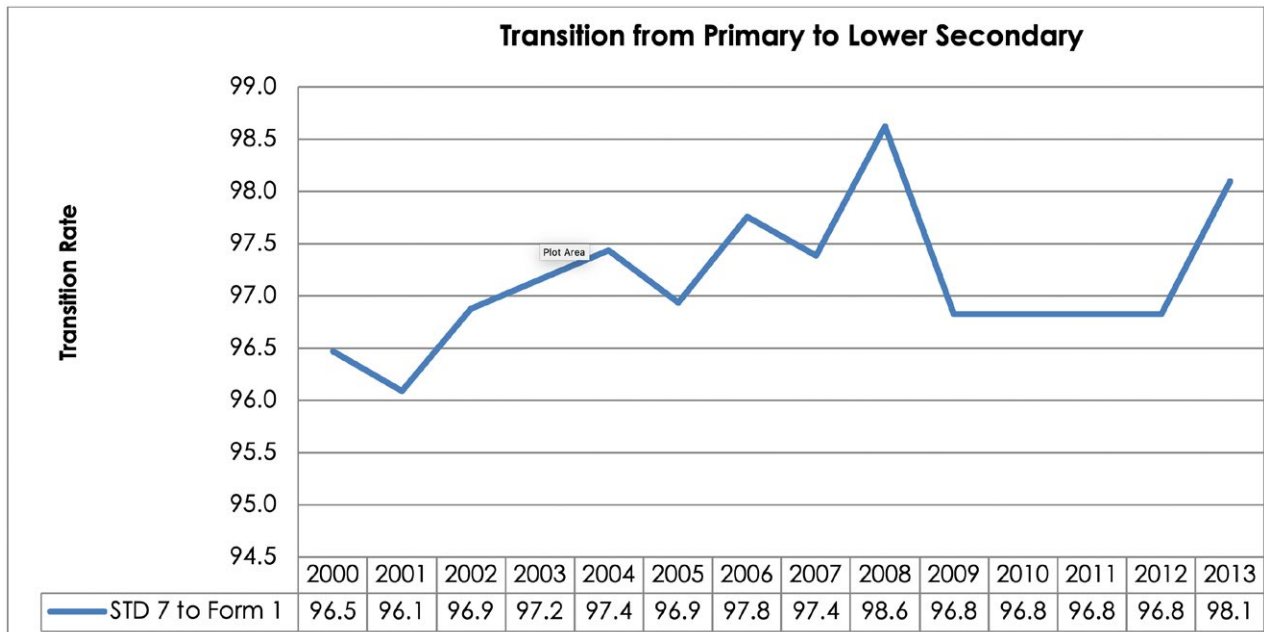

Year	GER (6-12 Year) %	NER (6-12 Years) %	GER (7-13 Years) %	NER (7-13 Years) %
2003	114.6	90	114.5	98.7
2004	113.8	89.5	114.1	98.5
2005	113.1	89.6	114.1	97.8
2006	112.2	89.2	113.6	96.8
2007	109.4	86.9	111.5	94.9
2008	107.7	85.4	109.8	92.9
2009	108.4	85.8	109.8	91.8
2010	109.5	87.1	108.8	90.8
2011	112.7	90.6	98.6	88.4
2012	110.98	93.1	98.69	86
2013	110.8	92.9	111.9	94.5

Note: Figures for 2003 -2008, 2012 and 2013 were generated using the annual/comprehensive data while figures for 2009 - 2011, were calculated using first term data

Gross Enrolment Ratio of 110.8 percent for population 6 to 12 years indicates that 110.8% of those enrolled in primary schools are aged below 6 years and or above 12 years. On the other hand, the NER of 92.9percent for population 6 to 12 years indicates that only 92.9 percent of the population 6 to 12 years was enrolled in primary schools in 2013(Table 3.12).

3.9 Transition Rate

Figure 3.7: Transition Rate from Standard 7 to Form 1 – 2000-2013

Source of Data: Statistics Botswana & Department of Basic Education

**Due to the unavailability of data, the rates for 2010 and 2011, primary to lower secondary have been estimated by 2009 rate.

Figure 3.7 shows that since 2000, transition rates from primary school (Standard 7) to lower secondary level (Form 1) had been above 96.0 percent. This was an indication that there was a small proportion (about 3.0 percent) of children who only went up to Standard 7. Thus although the transition rate was very high, the desired 100 percent transition from primary to lower secondary has never been achieved over the years.

3.10 Primary School Gross Progression

The Table 3.13 shows the original cohort of 52,420 pupils who started standard 1 in 2007, of which only 43,760 reached standard 7 in 2013 translating to 83.5 percent progression from standard 1 to standard 7. Male progression rate for the same cohort was 79.7 percent while the rate for female was 87.6 percent.

Table 3.13: Primary School Gross Progression Rate from Standard 1 to Standard 7 (2003 – 2013)

Boys	Year	Enroll	Prog. Rate (%)	Year	Enroll	Prog. (%)	Year	Enroll	Prog. Rate (%)	Year	Enroll	Prog. Rate (%)

3.11 Pupil-Teacher Ratio

The Pupil Teacher Ratio is one of key indicators used as proxy for assessing the quality of education. It is believed that a low number of pupils per teacher translates into pupils having better chance of contact with the teachers and hence a better teaching/learning process. However, it should be noted that there are many other factors that affect the pupil's learning process; qualified trained teachers, adequate teaching resources and small class sizes are generally more effective.

Table 3.14: Pupil Teacher Ratio and Teachers by Training Status – 2005-2013

	2005	2006	2007	2008	2009	2010	2011	2012	2013
Trained Teachers									
Male	2,552	2,796	2,971	3,075	3,132	3,083	3,125	3,610	3,804
Female	9,156	9,494	9,808	9,914	9,832	9,615	9,675	10,752	11,006
Total	11,708	12,290	12,779	12,989	12,964	12,698	12,800	14,362	14,810

Total Teachers	26	26	25	25	25	25	25	23.3	22.6

Table 3.14 shows that the percentage of untrained primary school teachers reduced from 7.4 percent in 2005 to 0.2 percent in 2011, thereafter increased to 0.5 and 1.5 percents in 2012 and 2013 respectively. The pupil teacher ratio for the trained teachers decreased from 28 pupils per trained teacher in 2005 to 23 pupils per trained teacher in 2013.

Total	5,236	2,778	2,152	2,585	1,247	815	65	63	14,952

In 2013 there were 14,952 repeaters of which 9,549 were boys and 5,403 were girls. Central had the highest number of repeaters (4,935) followed by Kweneng region with 2,297 and Southern region with 2,006. On the other hand, standard one pupils had the highest number (5,236) of repeaters followed by standard 2 and standard 4 with 2,778 and 2,585 respectively. Standard 7 had the lowest number of pupils repeating and standard.

3.12 Primary School Drop Out

Statistics on dropouts shows the extent at which the pupils abandon school at different standards before they could complete the full course of primary education.

Table 3.16: Primary School Drop Out Rate by Sex- 2008-2013

Years	School Enrolment			Drop Outs			Drop Out Rates		
	Boys	Girls	Total	Boy	Girl	Total	Boy	Girl	Total
2007	166,987	160,631	327,618						
2008	167,058	160,175	327,233	2,309	1,318	3,627	1.4	0.8	1.1
2009	169,483	161,262	330,745	2,207	1,218	3,425	1.3	0.8	1
2010	169,556	161,640	331,196	2,071	1,124	3,195	1.2	0.7	1
2011	170,221	162,751	332,972	1,942	1,084	3,026	1.1	0.7	0.9
2012	171,323	164,507	335,830	2,109	1,130	3,239	1.2	0.7	1
2013				1,251	710	1,961	0.7	0.4	0.6

Table 3.16 shows that drop out rate reduced from 1.1 percent in 2008 to 0.6 in 2013. The rate for boys reduced by half from 1.4 percent in 2008 to 0.7 percent in 2013 while the rate for girls reduced from 0.8 percent to 0.4 percent during the same period. Furthermore, the analysis shows that boys dropped at a higher rate than girls across the years.

Figure 3.8 Primary School Drop Out Rate by Sex – 2008-2013

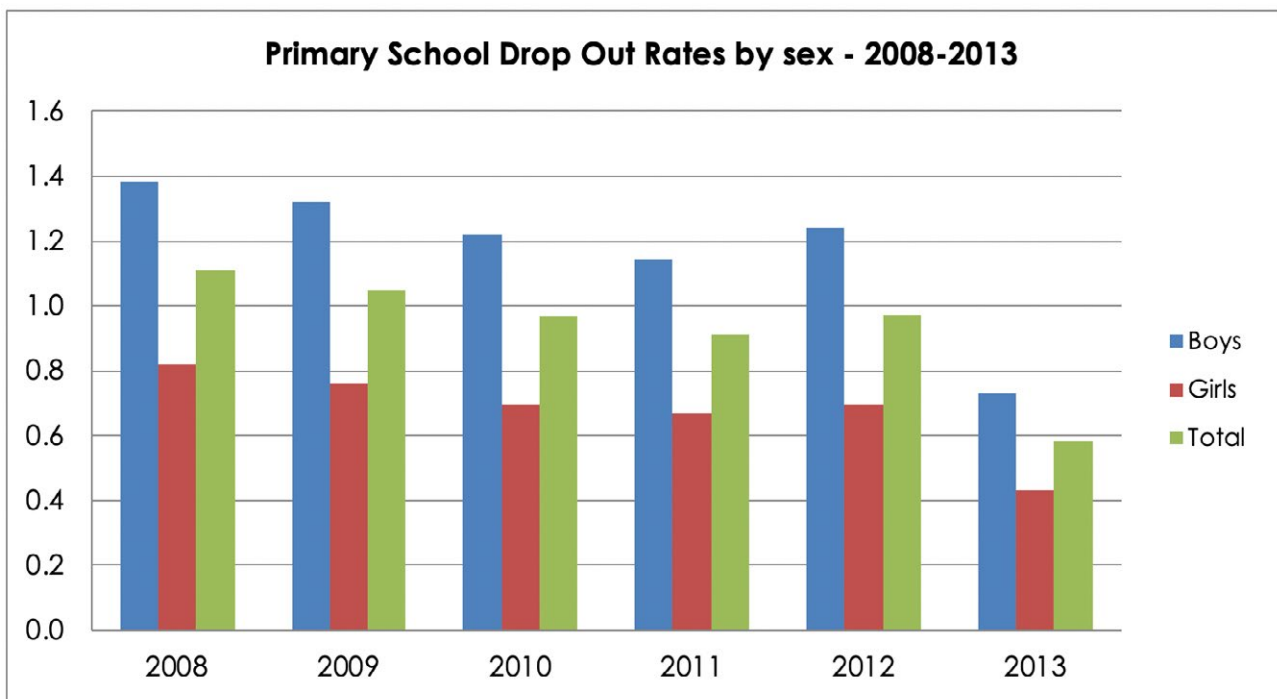

Figure 3.8 further illustrate drop out rates by sex from 2008 to 2013. The girls drop out rate is observed to be lower than the total drop out rate across the years while the reverse is true for the boys.

Table 3.17: Primary School Drop Out Rates by Region 2011-2013

Regions	Enrolment			Drop Outs			Total Drop Out Rates		
	2010	2011	2012	2011	2012	2013	2011	2012	2013
South East	37,581	36,862	38,001	51	141	107	0.1	0.4	0.3

Table 3.20 shows that in 2013 there were 1,961 dropouts. When compared to the statistics for the previous year this shows that there has been a significant decrease from 3,350 in 2012 to 1,916 in 2013. Even though Standard 1 dropouts had reduced from 747 in 2012 to 416 in 2013, standard 1 dropouts remained highest when compared to other standards. The common reason for school dropout at primary school level across all the standards was Truancy.

Table 3.21: Standard 1 Drop Out as a Percentage of Previous Standard 1 Enrolment (2007 – 2013).

Year	STD1 Enrolment	STD1 Drop Out	Drop Out as % of STD 1 Enrolment for the Previous Year
2006	53,483	938	--
2007	52,420	952	1.8
2008	50,754	814	1.6
2009	51,830	650	1.3
2010	51,968	696	1.3
2011	53,974	653	1.3
2012	56,382	747	1.4
2013	55,911	416	-0.7

The standard 1 drop outs as percentage of standard 1 enrolment for the previous year has declined from 1.8 percent in 2007 to -0.74 percent in 2013, this is displayed by table 3.21.

Figure 3.9: Standard 1 Drop Outs as Percentage of Standard 1 Enrolment in the Previous Year –2007 - 2013

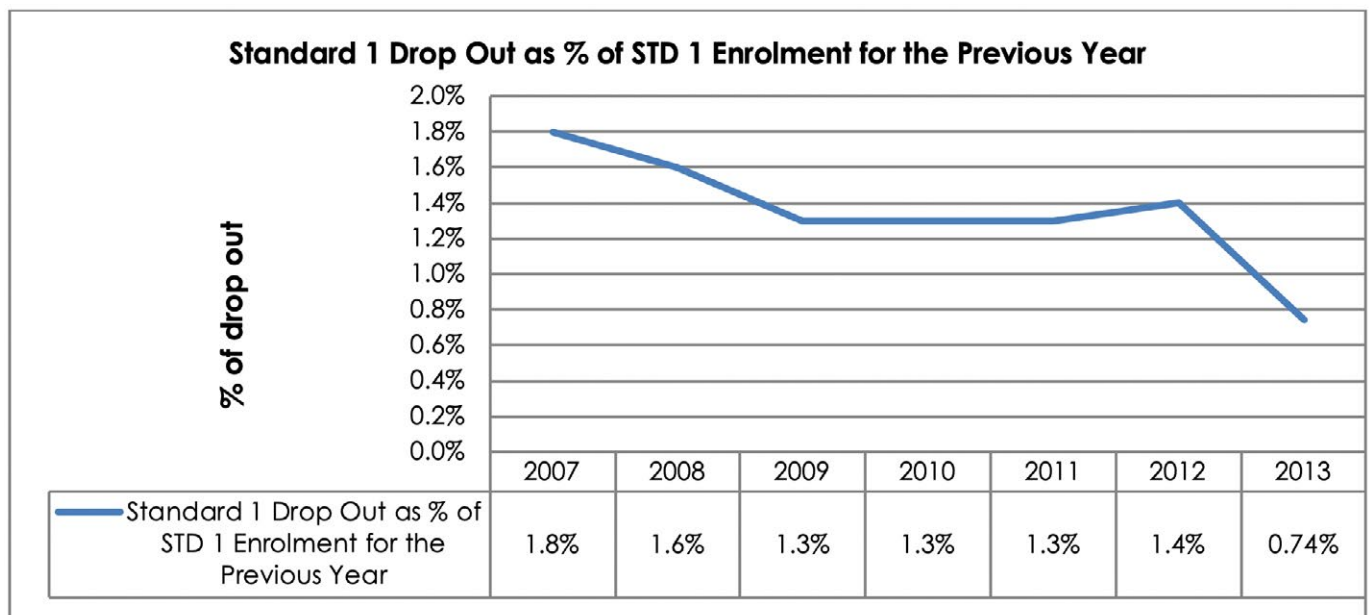

Figure 3.9 further illustrate the standard one drop out rate from 2007 to 2013. Between 2012 and 2013 the standard one drop out rate reduced by 0.7 percentage points.

3.13 Primary School Re-Entrants

Table 3.23 shows that 1,493 primary school children who had previously dropped out of school rejoined the school in 2013. Boys re-entrants were 1,027 compared to 466 girls. The highest re-entrants were standard 1s for both boys and girls.

3.14 Primary School Teachers

Teachers are among the most important resources in the education system. Their teaching qualifications, teaching and learning resources provided have a significant influence on the overall quality of performance of learners. Currently the ideal teaching qualification for primary school teachers is a minimum of Diploma in Primary Education.

Table 3.25 Summary of Primary School Teachers by Employment Status per Region – 2013

***Excluding Relief Teachers.

Government schools include Government aided schools.

Table 3.26 shows that in 2013 there were 15,035 primary school teachers, excluding relief teachers. A higher number of teachers (9,842 comprising 65.5 percent) held Diploma in primary education, followed by (1,833 comprising 12.2 percent) those with qualification not specified and (1,307 comprising 8.7 percent) for those with bachelor of Education in Primary. About 75 teachers had primary higher teaching qualification, while 11 had primary lower teaching qualification and 225 were unqualified.

Figure 3.10: Percentage of Unqualified Primary School Teachers 2003-2013

The percentage of primary school teachers without any teaching qualification has been declining over the years. Figure 3.10 shows that 10.3 percent of primary school teachers were untrained in 2003 and this declined to 1.5 percent in 2013.

Primary School Leaving Examination

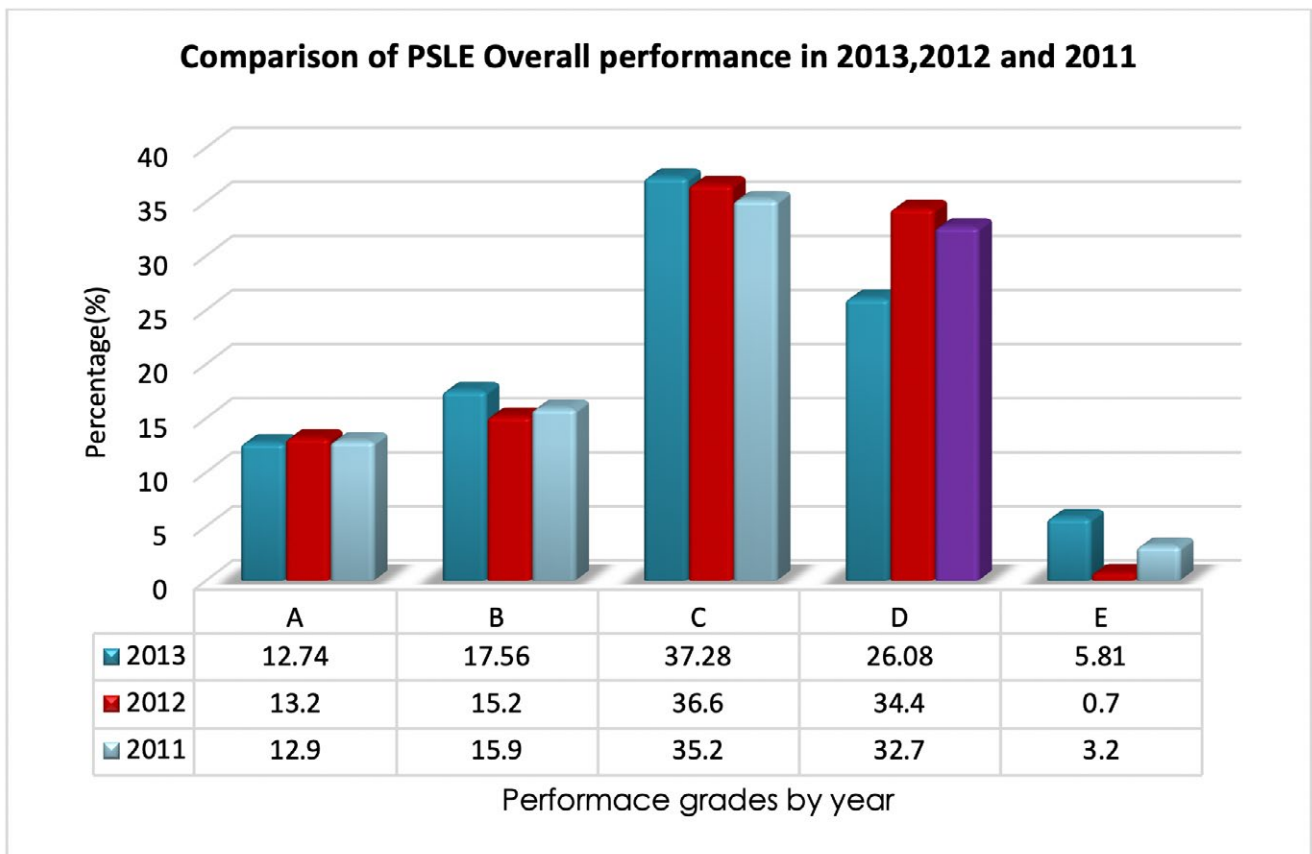

Figure 3.11: Number of PSLE Candidates 2008-2013

Data source: BEC 2013: PSLE Summary Results 2013

The candidature for PSLE has been increasing over the years from 41,471 in 2008 to 43,788 in 2013. A minimal decline occurred between 42,217 in 2009 to 41,524 in 2010.

Figure 3.12: PSLE Overall Performance 2008-2013

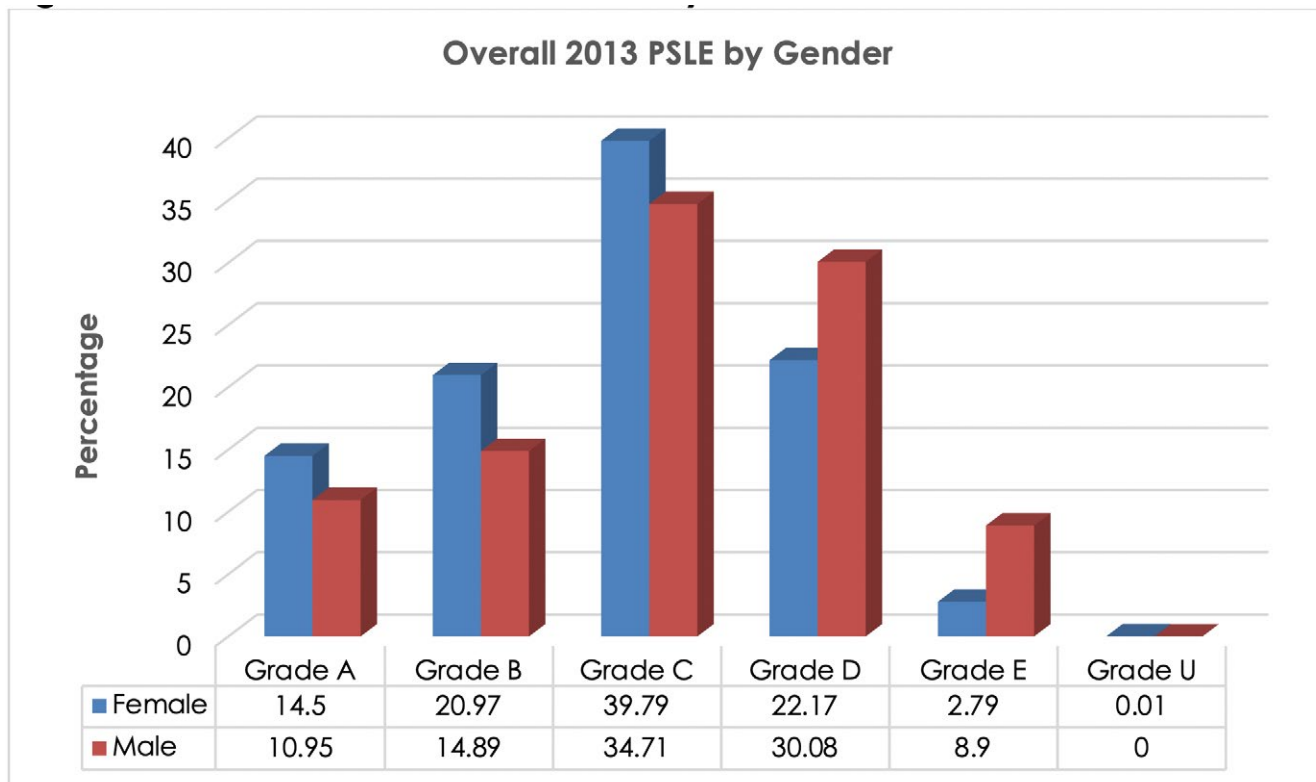

Data source: BEC 2013: PSLE Summary Results 2013

Performance in the 2013 PSLE decreased slightly by 0.46% from 13.2% in 2012 to 12.74% for grade A, but increased by 2.36% from 15.20% in 2012 to 17.56% in 2013 for those who obtained grade B. Candidates who obtained grade C increased slightly by 0.68% to 37.28% in 2013 from 36.6% in 2012. Overall, the proportion of children who obtained grade C or better increased slightly from 65.0 percent in 2012 to 67.58 in 2013.

The proportion of candidates at grade D has decreased by 8.32% from 34.4% (2012) to 26.08% (2013) while at grade E there was an increase to 5.81%(2013) from 0.7%(2012)

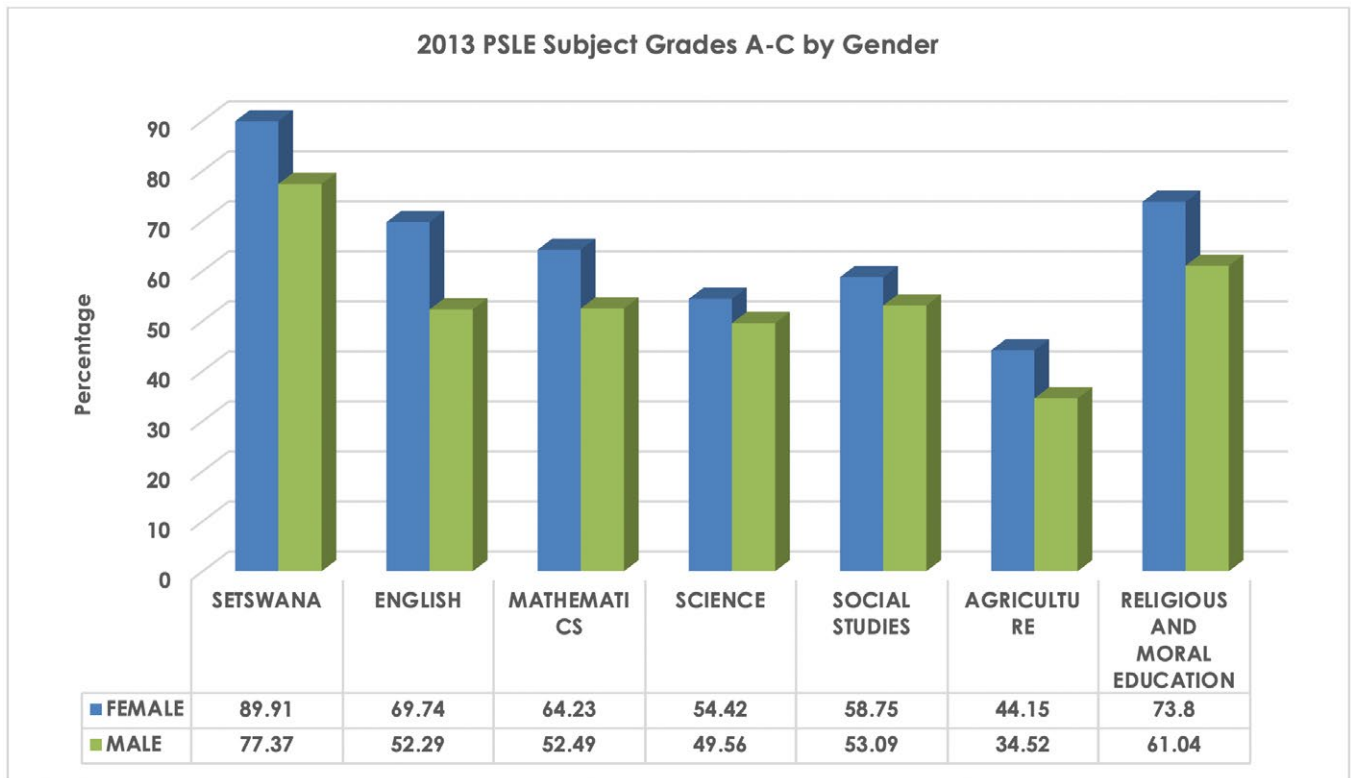

Figure 3.13: Overall PSLE Performance by Gender – 2013

Data source: BEC 2013: PSLE Summary Results 2013

The percentage of girls awarded overall grades A, B, C was higher than that of boys in 2013. Figure 3.13 shows that 14.5 percent of females were awarded overall grade A compared to 10.95 percent of males; 20.97 percent of female candidates were awarded grade B while 14.89 percent of males got grade B; 39.79 percent of females got grade C while the percentage for boys who got grade C stood at 34.71 percent. On the other hand, the percentages of boys awarded grade D and E were higher than that of girls. Generally, this is an indication that girls performed better than boys in PSLE in 2013. The same pattern was recorded in 2012 PSLE results.

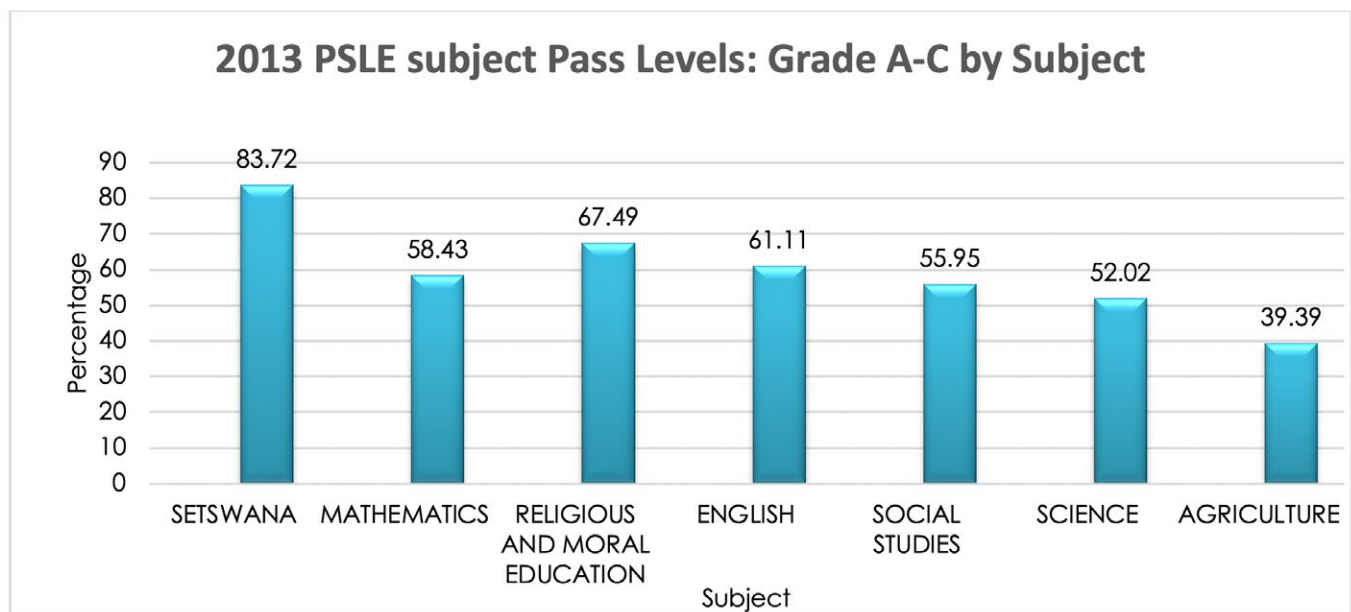

Figure 3.14: PSLE Pass Level Grade A to C by Subjects and Sex - 2013

Data source: BEC 2013: PSLE Summary Results 2013

The 2013 results show the girls performing better than the boys across all subjects at A to C. The pattern is consistent across both the 2011 and 2012 results.

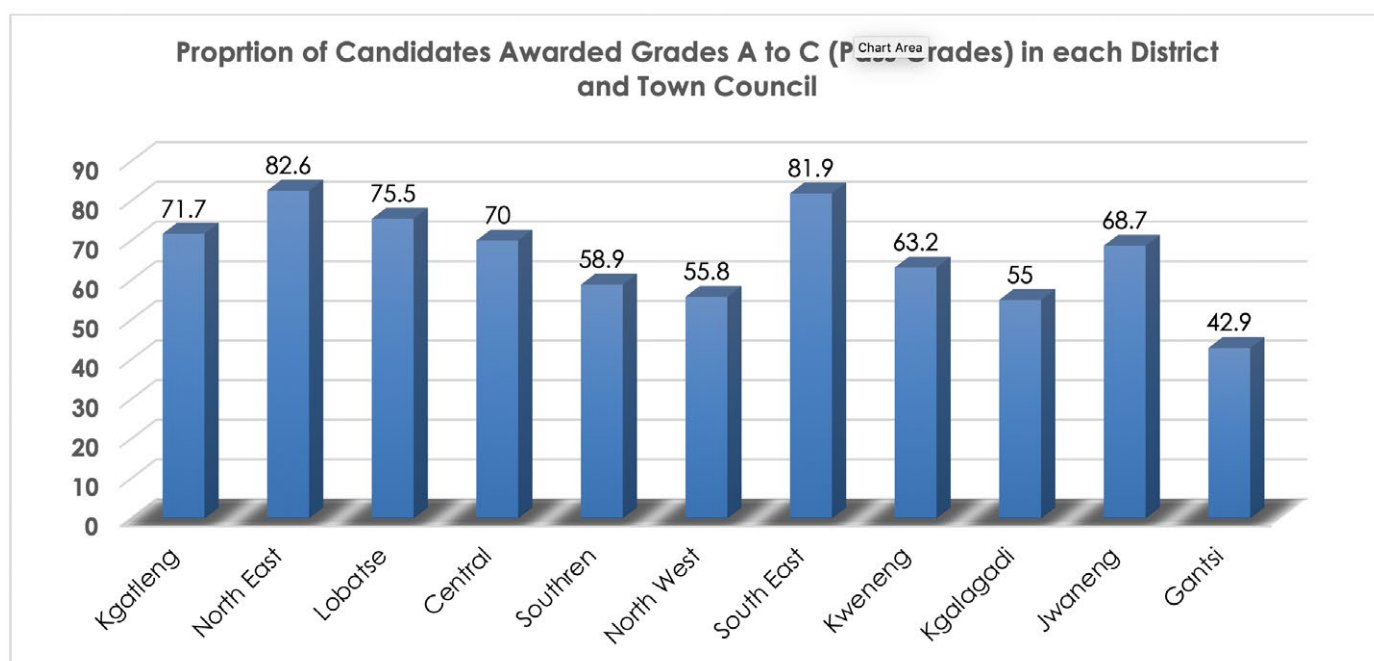

Figure 3.14: PSLE Pass Level Grade A to C by Subjects - 2013

Data source: BEC 2013: PSLE Summary Results 2013

In 2013, all subjects except Agriculture had more than 50 percent of PSLE candidates awarded grade A to C. Setswana had the highest percentage (83.72 percent) which is a decline of 13.48 percent as compared to 2012 results. Religious and Moral Education recorded the second highest percentage of 67.49. Agriculture recorded the lowest percentage (39.39) of candidates awarded grade A to C.

Proportion of candidates awarded Grades A to C by Educational Districts

Data source: BEC 2013: PSLE Summary Results 2013

North East District with 82.6% and South East District with 81.9% performed significantly higher than other districts. The least performing district is Gantsi at 42.9%.

4.0 SECONDARY EDUCATION

Secondary Education in Botswana is comprised of 5 years of which the first three years (junior secondary education; form 1 to 3) form part of the ten year basic education and the last two years are for senior secondary education (form 4 to 5). All children of school going age in Botswana have the right to the first three years of secondary as the integral part of the ten years basic education.

4.1 SECONDARY EDUCATION SCHOOL OWNERSHIP

Secondary school ownership in Botswana is mainly in three forms; Government, Government aided and privately owned schools. Government secondary schools are solely managed by BE while the private schools are entities owned by individual or companies and Government aided schools are mission schools run by religious institutions (Roman Catholic Church and UCCSA to mention a few) in partnership with MoBe

Table 4.1: Number of Secondary Schools by School Ownership 2003-2013

Years	Secondary School Ownership						Total
	Government	% Share	Government Aided	% Share	Private	% Share	
2003	230	82.7	4	1.4	44	15.8	278
2004	230	82.4	4	1.4	45	16.1	279
2005	230	82.7	4	1.4	44	15.8	278
2006	231	84.3	4	1.5	39	14.2	274
2007	231	87.2	4	1.5	30	11.3	265
2008	232	84.1	4	1.5	40	14.5	276
2009	232	84.1	4	1.5	40	14.5	276
2010	232	84.1	4	1.5	40	14.5	276
2011	234	84.2	4	1.4	40	14.4	278
2012	235	83	4	1.4	44	15.6	283
2013	234	82.4	4	1.4	46	16.2	284

Table 4.1 shows that there was an increase of 2.2 percent on the number of secondary schools, from 278 in 2003 to 284 in 2013. Government secondary schools constituted 82.4 percent of all secondary schools in the country, while government aided and private schools constituted 1.4 and 16.2 percent respectively. Private schools increased by 4.5 percent from 44 in 2012 to 46 in 2013.

Table 4.2: Number of Secondary Schools by School Ownership and Region – 2013

Region	School Ownership							
	Government Schools	%	Government aided Schools	%	Private Schools	%	Total	%
Central	91	38.9	-	-	8	17.4	99	34.9
Chobe	2	0.9	-	-	-	-	2	0.7
Kgalagadi	7	3	-	-	-	-	7	2.5
Kgatleng	11	4.7	-	-	1	2.2	12	4.2
Kweneng	26	11.1	-	-	5	10.9	31	10.9
Gantsi	5	2.1	-	-	-	-	5	1.8
Southern	34	14.5	-	-	5	10.9	39	13.7
South East	25	10.7	2	50	15	32.6	42	14.8
North East	20	8.5	1	25	6	13	27	9.5
North West	13	5.6	1	25	6	13	20	7
TOTAL	234	100	4	100	46	100	284	100

Table 4.2 shows that Central region had the highest percentage of Government secondary schools at 38.9 percent followed by Southern region with 14.5 percent. Chobe region had the lowest proportion of government secondary schools. On the other hand, South East region had the highest percentage of private schools (32.6%) followed by Central region with 17.4 percent. Chobe, Kgalagadi and Gantsi regions did not have private schools. Furthermore South east had the highest percentage of Government aided secondary schools than other regions (50%) since they were a total of 4 government Aided secondary schools country wide, followed by North East and North West which recorded the same percentage (25% each).

The higher concentration of Government secondary schools in Central region is mainly due to its vast geographical spread and high population in the region.

Table 4.3 : Number of Schools, Streams, Classrooms and Enrolment by Region and School Ownership -2013

Total	46	7,393	504	304	24	15	200

Table 4.3 shows that there was shortage of 854 classrooms in relation to streams in Government secondary schools in 2013. Central region had the highest number (320) of shortages of classrooms in relation to the streams in the region. The second region affected by high number of streams and shortage of classrooms was Kweneng region followed by South east region. Shortage of classrooms in Government aided schools was only in one region (South East). Almost all the regions with private schools had reported excess classrooms in relation to streams.

The stream/ class size in Government and Government aided schools was less 40 students per stream, with exception to Chobe region which had the highest stream size of 63 students followed by Kweneng(44), Central, North east and North West all at 40 students per stream. On the other hand the average stream size in private schools was less than 30 students per stream across all the regions.

Table 4.4: Number of Streams, Classrooms and Enrolment by District -2013

TOTAL	284	4,208	4,559	175,938	39	42	-351

There was shortage of 351 classrooms country wide in relation to number of streams/ classes. High number of streams and shortage of classrooms prevails across all the districts except for Lobatse which had an excess of 5 classrooms and these are in private schools.

4.2 Secondary School Enrolment

There was an increase of 2.3 percent in secondary school enrolments between 2009 and 2013, from 171,986 students to 175,938 students (Table 4.5). Furthermore Table 4.5 shows that female enrolment in secondary schools was higher than male enrolment.

Female students constituted 51.6 percent of the total secondary school enrolment in 2013, compared to 48.4 percent male students. Junior secondary school enrolment constituted 69.1 percent of total secondary school enrolment in 2013. Only 4.2 percent of the total students enrolled in secondary schools were in private secondary schools.

Table 4.5: Secondary School Enrolment by Form and Sex – 2006-2013

	Female	21,489	20,379	19,340	15,154	14,271	193	43	90,869
	Total	42,566	40,304	38,721	27,586	26,292	377	92	175,938

Due to unavailability of actual data for 2010 and 2011, the education enrolment projections from CSO (2005); Education Enrolment Projection 2004-2016 has been used as estimates for 2010 and 2011 enrolment.

The high rate of non-response from secondary schools in 2010 and 2011 led to unavailability of actual data by sex and hence the statistical gap for the said years.

Table 4.6: Secondary Education Enrolment by School Ownership, Sex and Form- 2013

School ownership	Sex	form						Sped	Total
		1	2	3	4	5	6		
Government	Male	20,558	19,422	18,699	10,175	9,640	-	49	78,543

All Schools	Male	21,077	19,925	19,381	12,432	12,021	184	49	85,069
	Female	21,489	20,379	19,340	15,154	14,271	193	43	90,869
	Total	42,566	40,304	38,721	27,586	26,292	377	92	175,938

The annual school census indicates that in 2013, secondary school enrolment was at 175,938, with female enrolment of 51.7 percent and 48.3 percent for males. Government schools enrolled 92.1 percent of all students while only 3.7 percent were enrolled in Government aided (mission schools) and private schools enrolled 4.2 percent (Table 4.6). This is an indication that Government was the main provider of secondary education.

Table 4.7: Secondary Education Enrolment by Boarders and Non Boarders – 2013.

Table 4.8 shows that Government Secondary school enrolment is highest in Central region with 60,470 students followed by Southern and South East regions with 21,922 and 20,099 respectively. On the other hand South East had the highest number of students (3,144) in Government aided schools. South East had the highest number of students; 4,014 in in private school. Chobe region was the smallest region in terms of number of schools and total enrolment. Figure 4.1 further illustrates enrolment in secondary schools by school ownership.

Figure 4.1: Enrolment by School Ownership per Region – 2013

Figure 4.2: Secondary Education Enrolment by Region and Sex-2013

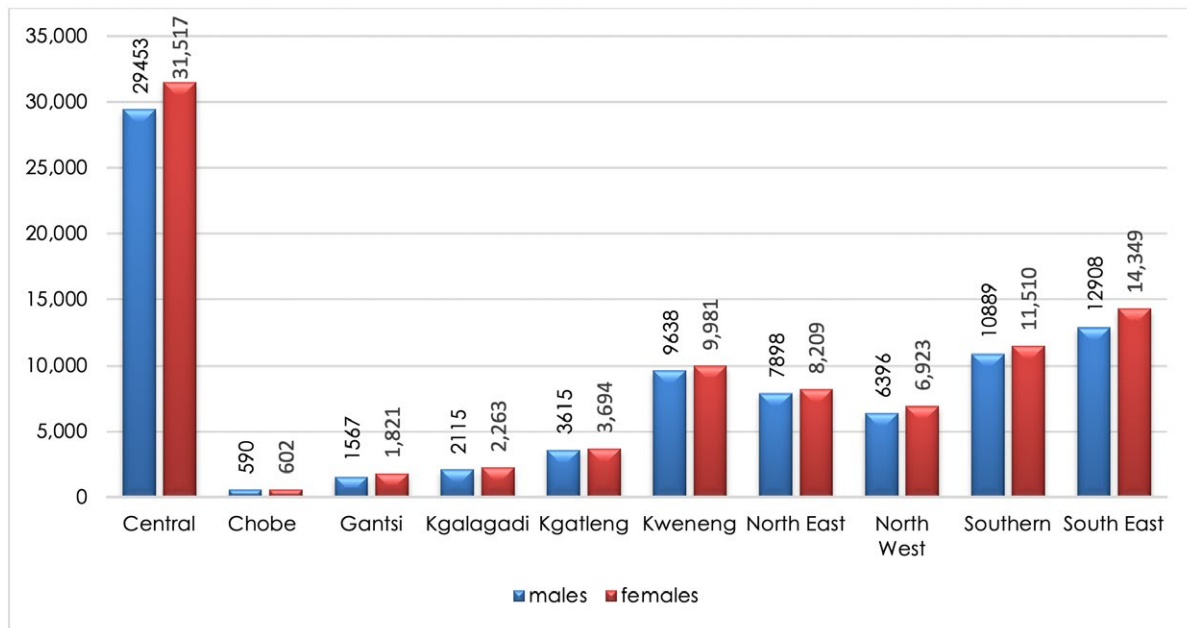

Figure 4.2 shows that female enrolment in secondary schools was slightly higher than that of their male counterparts across all the regions. Gender difference in enrolment was slightly more in Central, followed by South East and Southern. Female and male enrolment in Chobe region were almost equal. Table 4.9 below further illustrates this.

Table 4.9: Secondary Education Enrolment by Region, Sex and Form – 2013

Table 4.10 shows some secondary school students reached Form 1 before they turned 12 years, the age at which they are still expected to be at primary school. On the other hand, some students were above 19 years for the lower grade of junior secondary school, the age at which they are expected to have completed their senior secondary education.

4.3 SPECIAL EDUCATION NEEDS AND DISABILITY IN SECONDARY SCHOOLS

The Ministry of basic Education (MoBE) through the Revised National Policy on education (RNPE) of 1994, is committed to an inclusive education system and provision of special education. This in turn facilitates increase in access to education by all including orphans, vulnerable children, children in difficult circumstances, children with special education needs and disability.

Some mechanisms in place to improve access for children with special education needs to secondary education are; building of special education units in existing schools, provision of equipment and infrastructure in main stream schools to support children with disability, as well as integrating and mainstream children with special education needs and disability in to the mainstream. Currently there is one Government junior secondary school (JSS) and one senior secondary (SSS) with visual impairment special education unit, two JSS and one SSS with hearing impairment special education unit.

Table 4.11: Secondary School Enrolment with Special Education Needs by Types of Impairment, Form and Sex – 2013.

Type of impairment	Form 1		Form 2		Form 3		Form 4		Form 5		Form 6		SPED		TOTAL

intellectual disability	523	238	455	217	381	208	22	17	38	38	-	-	20	12	1,439	730
other health related illnesses	70	89	60	76	40	72	11	18	5	16	-	-	-	-	186	271
Total	1,020	783	988	809	819	768	184	230	157	232	2	1	49	43	3,219	2,866

Table 4.11 shows that the total enrolment of students with special education needs was 6,085 with 3,219 males and 2,866 females. The enrolment of students with special education needs in secondary schools have declined from 7,501 to 6,085 in 2012 and 2013 respectively. Secondary school students with intellectual disability constituted the highest number of 2,169 students with 1,439 males and 730 females followed by those with Visual disability being 2,042; 1,236 males and 806 females. The Gender Parity Index (GPI) for enrolment of children with disability was 0.89, indicating almost equal access for both male and female students with disability.

It should be noted that in previous statistics, pupils wearing spectacles and those epileptic were not considered as children with special education needs which is now the case in this report. The current data also include children with intellectual disability which is inclusive of severe slow learners and mentally challenged children while previously the data was collected only on the mentally retarded children. The above statement could then be taken as the explanation for increase in special education enrolment from 2,498 in 2008 to 6,085 in 2013.

Figure 4.3: Secondary School Enrolment with Special Education Needs by Types of Impairment – 2013

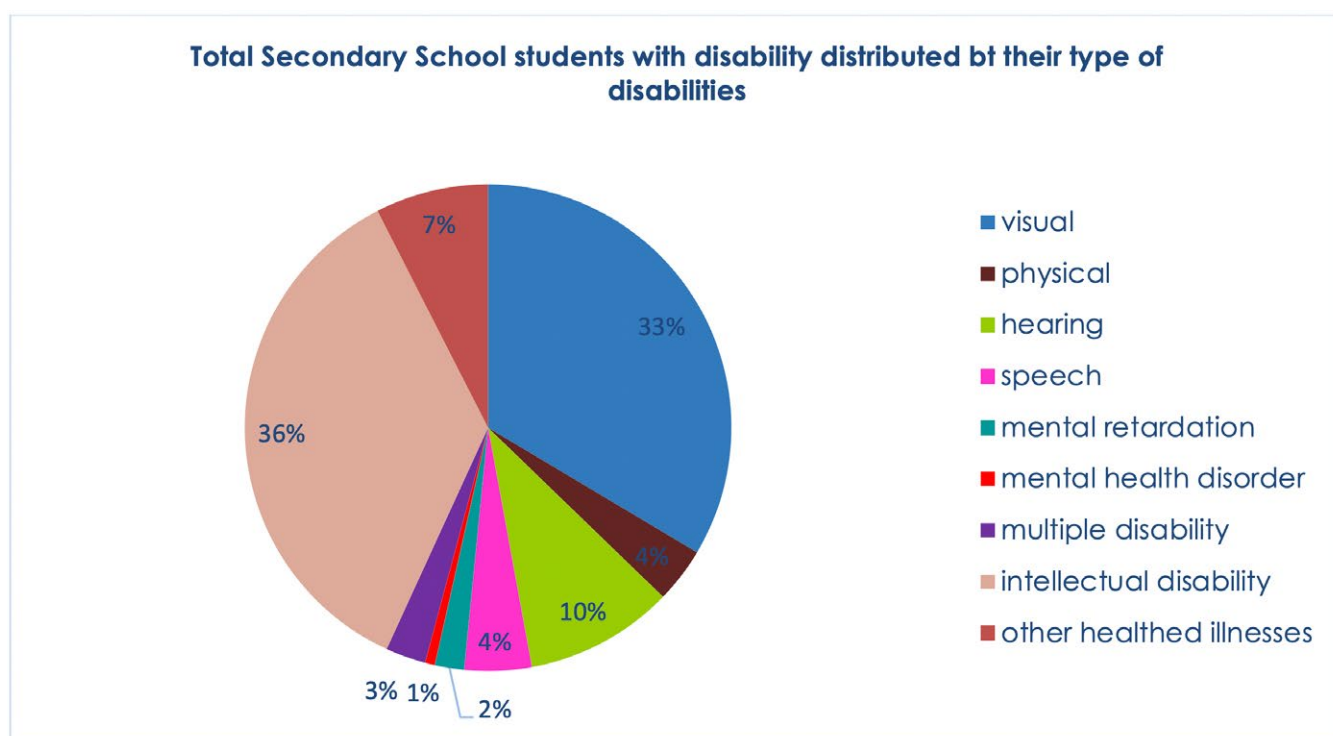

Figure 4.3 shows that majority of enrolment with disability were those with intellectual disability, constituting 36 percent followed by those with visual disability at 33 percent. Enrolment with mental health disorders constituted the smallest percentage (1 percent) of enrolment with disability.

4.4: GROSS AND NET ENROLMENT RATIOS

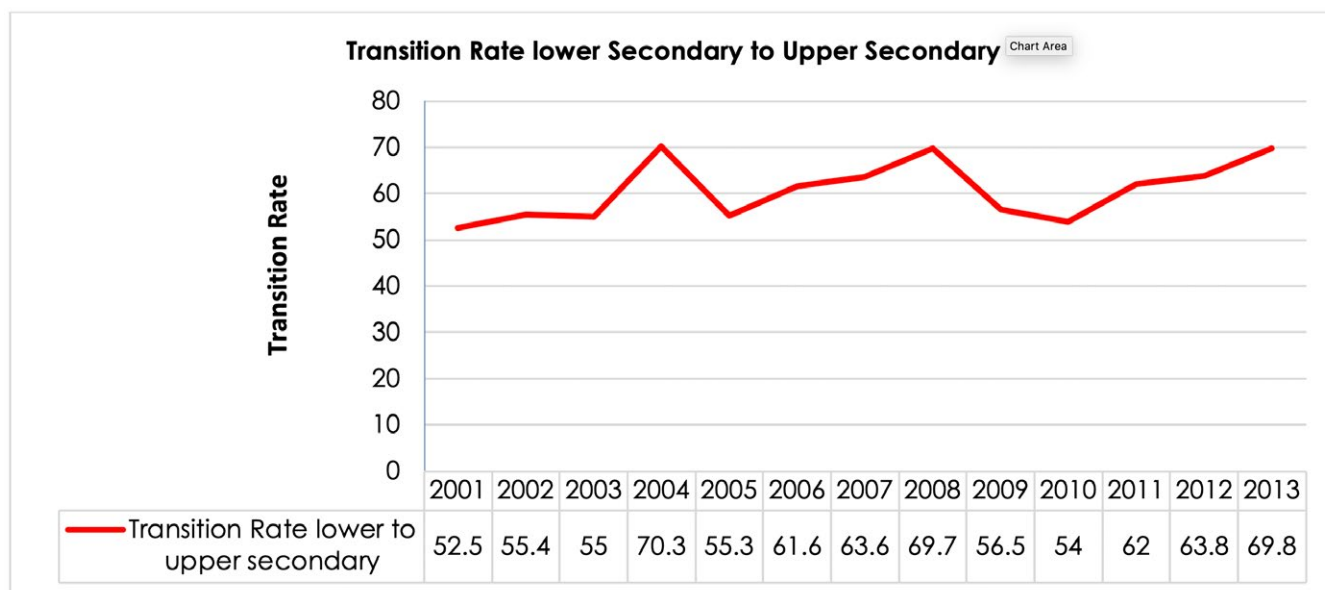

Table 4.12: Secondary School Gross and Net Enrolment Ratios – Both Sexes Aged (13-17) – 2002 – 2013.

Year	Population Aged 13-17	Enrolment aged 13-17	Total Enrolment	13-17 GER	13-17 NER
2002	200,833	118,146	155,207	77.3	58.8
2003	203,008	121,830	156,786	77.2	60
2004	204,787	123,146	158,839	77.6	60.1
2005	205,748	125,784	160,000	77.8	61.1
2006	206,208	128,183	164,201	79.6	62.2
2007	206,142	130,304	168,220	81.6	63.2
2008	205,601	134,954	172,868	84.1	65.6
2009	204,607	-	171,986	84.1	-
2010	-	-	-	-	-
2011	208,683	135,122	175,910	84.3	64.7
2012	207,396	136,560	172,669	83.3	65.8
2013	207,964	139,062	175,938	84.6	66.9

GER and NER have been increasing since 2002. This is an indication of increased access to secondary education since 2002.

4.4 Transition Rate

Figure 4.4: Transition Rates in Secondary Education - 2000 to 2013

Transition rate from lower secondary (Form 3) to upper secondary (Form 4) ranges from 52.5 percent in 2001 to 69.8 percent in 2013. According to National Development Plan (NDP 9) MFD, (2009: 95) the targeted transition rate from junior to senior secondary education was 70.0 percent. However, since 2005 MoBE has never reached the set target.

4.5 Secondary School Drop Outs

It should be noted that dropout figures reported in the current school calendar year pertains to those pupils who dropped out of the system during the previous school calendar year. Therefore dropout rates are calculated in relation to the enrolment in the previous year.

Table 4.17: Drop Out by Sex and Form – 2013

Sex	Form 1	Form 2	Form 3	Form 4	Form 5	Form 6	SPED	Total
Male	306	247	163	52	82	1	3	854
Female	274	354	364	286	327	1	7	1,613
Total	580	601	527	338	409	2	10	2,467
%	23.5	24.4	21.4	13.7	16.6	0.1	0.4	100

Table 4.17 shows that a higher percentage (24.4 percent) of secondary school students who dropped out of school in 2013 were doing Form 2, followed by those who were doing Form 1 and 3 at 23.5 percent and 21.4 percent respectively. The students who dropped out at Form 6 and in SPED units constitute lower of 0.1 and 0.4 percent respectively.

Table 4.18: Number of Secondary School Drop Outs by Region, Form and Sex – 2013.

Total		580	601	527	338	409	2	10	2,467

Table 4.18: Number of Secondary School Drop Outs by Region, Form and Sex – 2013.

Table 4.18 indicates a higher number of drop outs by female students than male across all the regions. The statistics further indicate that Form 1 male dropouts were higher than female dropouts in five regions notably in Central, Kgalagadi, Kgatleng, Southern and South East. Chobe region did not record any form 1 dropouts form 1 female dropouts in Kweneng, North East, and North West were higher than that of males.

While the major reasons for dropping out for males were truancy, fees and illness, females dropped out mainly due to pregnancy. However, there was a substantial number of females who also dropped out due to truancy. Other reasons for dropping out include abuse by parent, abuse by teacher, corporal punishment etc. Dropouts due to school fees were mainly realized in private schools. Dropouts due to marriage, bullying, substance abuse, poor performance child labour, religion constituted very small percentages (less than 1 percent each).

Figure 4.5: Number of Secondary School Drop Outs by Level per Year – 2013

****No data is available for 2010 and 2011 mainly due to non-responses by schools.**

Figure 4.5 indicates that the majority of the secondary drop outs were at junior secondary school level.

4.6 Repeaters

Repeaters are the students who are enrolled in the same grade or level as the previous year. These students would normally have not successfully passed the grade in the previous year and therefore have to re-do the grade in the current year.

Table 4.20: Secondary School Repeaters by Form and Sex – 2013

%	5.6	9.-	37.3	16.4	31.7	-	-	100

In 2013, female students who repeated a grade were more than their male counterparts. The highest number of repeaters in 2013 were doing Form 5, followed by Form 3 and Form 4. Repetition at secondary school mainly happened at private secondary schools. Therefore, it is not surprising to find majority of repeaters doing Form 5, followed by those doing Form 3. These are normally the students who would have not performed well on their JCE and BGCSE the previous years.

North East	1,365	82	1,447	94.3	5.7
North west	1,036	43	1,079	96	4
Total	14,795	717	15,512	95.4	4.6

***Relief Teachers excluded

Table 4.25 shows that in secondary schools, there were 15,512 teachers (excluding relief teachers) and these were mainly nationals; 14,795 being Batswana and 717 being non-Batswana. Furthermore the table shows that Batswana constituted 95.4 percent of the total secondary school teachers while the percentage of non- Batswana teachers were at 4.6 percent.

Figure 4.6: Secondary School Teachers by Citizenship - 2013

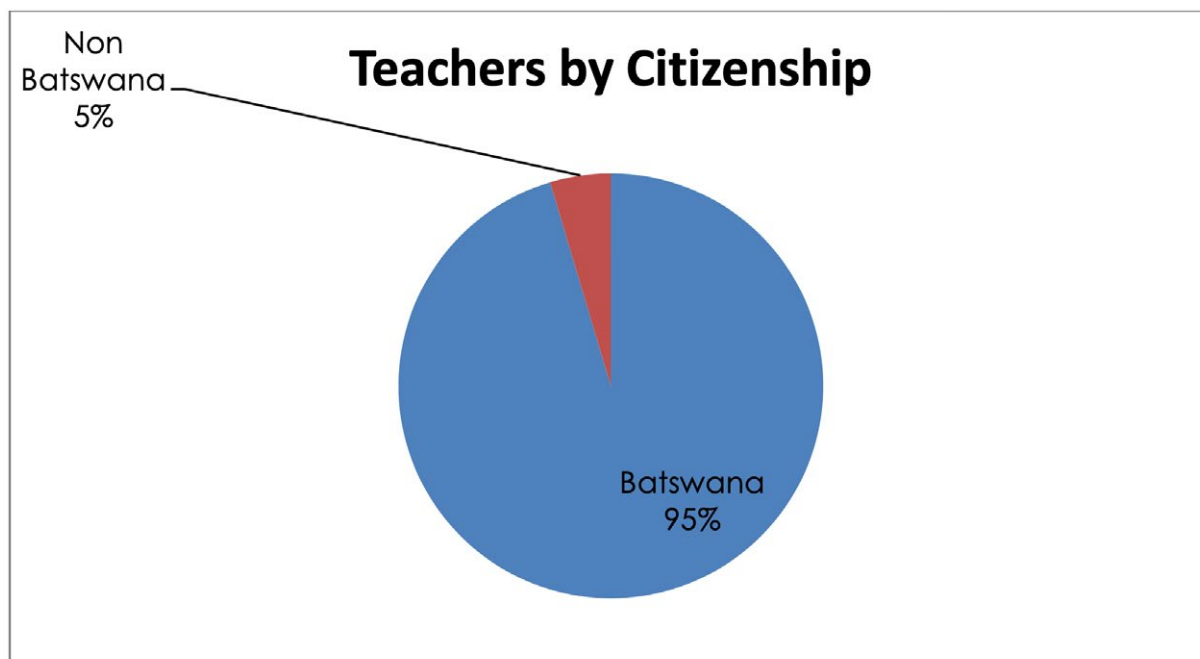

Figure 4.6 further illustrate the proportion of secondary school teachers by citizenship; citizens constituted 95.4 percent while non citizens constituted the remaining 4.6 percent. The percentage of non citizen teachers has been declining over the years. The decline over ten years was from 19.1 percent in 2002 to 4.6 percent in 2013. This could be taken as a significant achievement towards localization of teaching over the years.

Table 4.26: Secondary Education Teachers by Region and Qualification– 2013

Region	Dip. Ed	B.Ed.	B.Ed. + CCE	BA + PGDE	BA+PGDE+PGDE	M. Ed	Other	Unqualified	Total

South East	699	770	89	505	124	65	289	10	2,551
NATIONAL	7,006	3,900	314	2,230	364	261	1,380	57	15,512

***Relief Teachers Excluded

Table 4.25 shows that out of the 15,512 secondary school teachers in 2013, 7,006 had Diploma in secondary education, 3,900 held Bachelor of Education, 2,230 had Bachelor of Arts and Post Graduate Diploma in Education as their highest teaching qualification. 57 teachers were reported as unqualified.

Figure 4.7: Percentage of Secondary School Teachers by Qualification-2013

Figure 4.7 shows that in 2013 a higher proportion (45.2 percent) of secondary school teachers held Diploma in Secondary Education, followed by 25.1 percent of teachers trained in Bachelor of Education degree (B.Ed.) while only 1.7 percent had Master of Education (M.Ed.). A very small proportion of teachers were still unqualified. The small number of unqualified secondary school teachers can be taken as a sign of improved teacher qualification and quality in secondary education. The unqualified teachers were mainly reported in private schools.

4.9 Junior Certificate Examination (JCE)

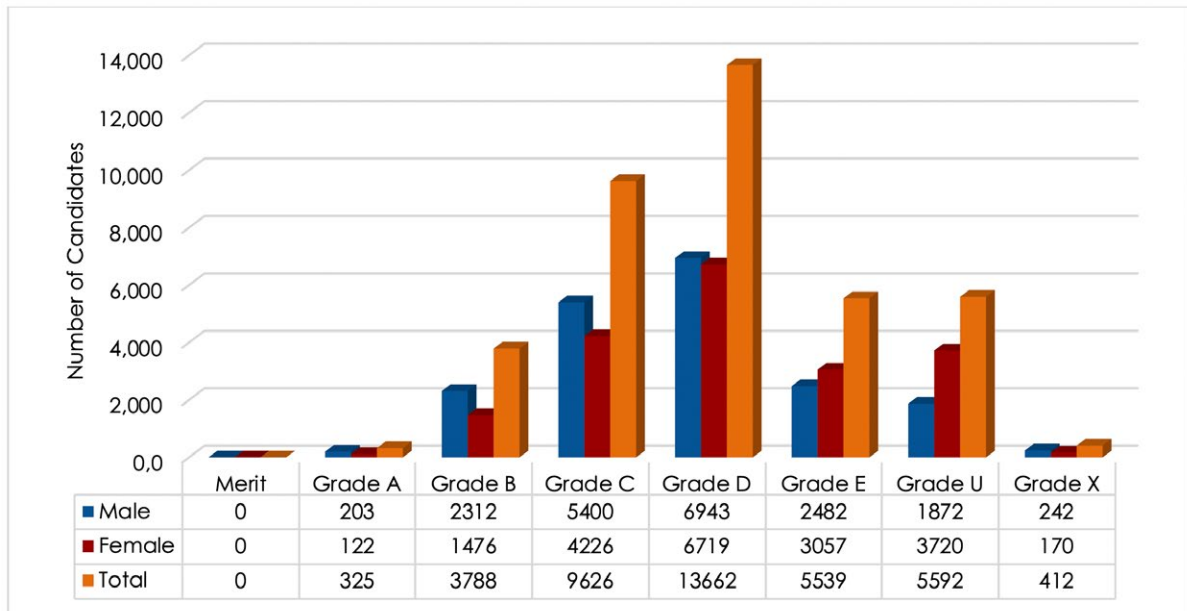

Figure 4.8: Number of JCE Candidates by Sex – 2008-2013

Data Source: BEC 2013: JCE Summary results 2009,2010,2011,2012 and 2013

Figure 4.8 shows that since 2009 to 2011 female candidates for JCE were more than the male candidate. In 2012 there were more male JCE candidates; 19,358 compared to 19,139 females. In 2013 19,454 female candidates were recorded and 19,490 males.

Figure 4.9: Overall JCE Performance by Gender and Grade – 2013

Data Source: BEC 2013: JCE Summary results 2013

Figure 4.10: JCE Overall Performance by Year and Grade 2012-2013

Data source: BEC 2013: BGCSE Summary Results 2012/2013

The percentage of JCE candidates awarded Grade A as overall grades in 2013 was very minimal, No merits were recorded and only 0.8 percent of candidates obtained grade A. There is a decline in performance at A to C and a slight increase from D to U. In 2012 no grade X was recorded, however in 2013, 1.1 percent as overall grades is accounted for by grade X.

Figure 4.12: Percentage of BGCSE Candidates Awarded 5Cs or Better by Year and Sex (2009-2013)

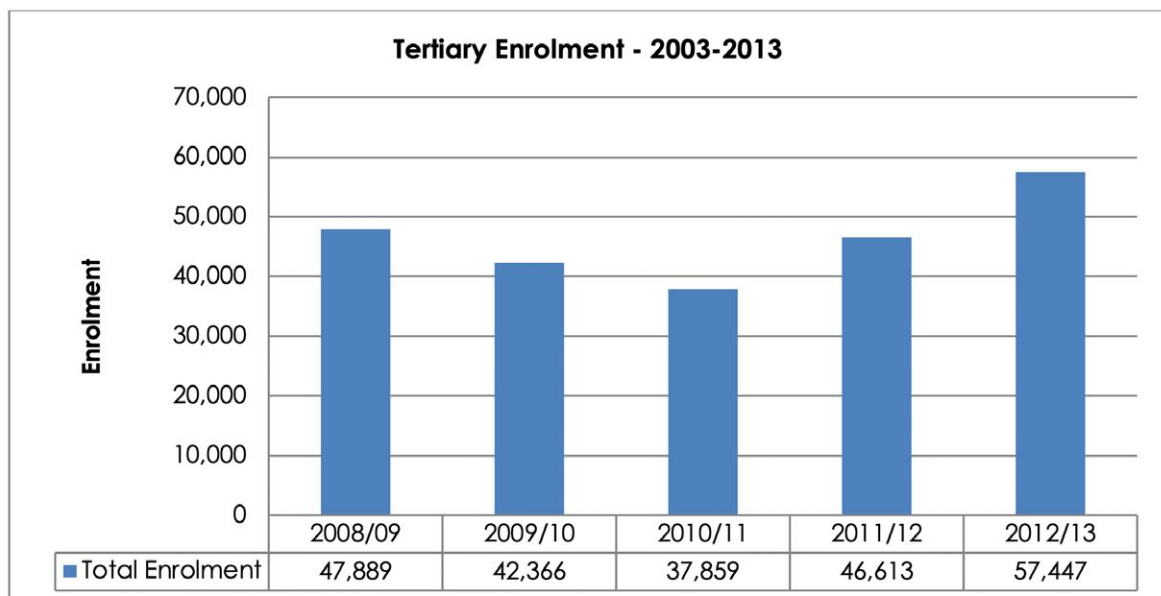

Data source: BEC 2013: BGCSE Summary Results 2009/2013

A decrease of 0.91% in Grade C or better was observed between 2013 and 2012

5.0 Tertiary Education

Figure 5.1: Tertiary Education Enrolment (2008-2013)

Data Source: TEC (2012): Tertiary Education at Glance 2012/2013

Figure 5.1 shows that tertiary education enrolment increased from 20,011 students in 2003/2004 to 47,889 in 2008/2009 then declined to 42,366 in 2009/2010 and further declined to 37,859 in 2010/2011.

Table 5.1: Percentage Share of Tertiary Education Enrolment by Public and Private Institutions (2007-2011).

6.0 Concepts and Definitions

Access

Total Enrolment: Total number of learners in the system.

Age Specific Enrolment Ratio (ASER): Enrolment of the population of a specific age / Population of that specific age)*100. Age Specific Enrolment Ratio is percentage of the population of a specific age enrolled. It shows the extent of the population of a specific age cohort in educational activity.

Gross Enrolment Ratio (GER): Number of pupils enrolled in a given level of education, regardless of age, expressed as a percentage of the population in the theoretical age group for the same level of education; Total enrolment in primary / Population of that specific age group 6-12yrs) *100.

Net Enrolment Ratio (NER): Number of pupils in the theoretical age group for a given level of education enrolled in that level expressed as a percentage of the total population in that age group.; Enrolment of specific age group 6-12 years/ Population of that specific age group 6-12yrs) *100

Net Intake Rate (NIR): Number of new entrants in the first grade of primary education who are of the theoretical primary school entrance age, expressed as a percentage of the population of the same age.

Gross Intake Rate (GIR): Total number of new entrants in the first grade of primary education regardless of age, expressed as a percentage of the population of the theoretical entrance age to primary education.

Quality

Student Teacher Ratio: Average number of pupil per teacher at the level of education specified in a given school year, based on headcounts for both pupils and teachers; Total enrolment / Total number of teachers.

Student Classroom Ratio: Average number of pupil per classroom at the level of education specified in a given school year, based on headcounts for both pupils and classrooms; Total enrolment / Total number of classrooms.

Percentage of Trained Teachers: Number of teachers who have received the minimum organised teacher training (pre-serviced or in service) required for teaching at the relevant level of education in the given country, expressed as a percentage of the total number of teachers at the given level of education.

Pass Rate: Percentage of candidates with Grade C or better as an overall percentage.

Efficiency

Transition Rate from Primary to secondary: Number of new entrants to the first grade of secondary education in a given year, expressed as a percentage of the number of pupils enrolled in the final grade of primary education in the previous year.

Dropout Rate: Is the proportion of pupils who leave the system without completing a given grade in a given year

Percentage of Repeaters: Number of pupils who are enrolled in the same grade (or level) as the previous year, expressed as a percentage of the total enrolment in the given grade or level of education.

Survival Rates: Survival rates are calculated on the basis of the reconstructed cohort method, which uses data on enrolment and repeaters for two consecutive years. It is to be interpreted as the percentage of children who start primary education who will reach a given grade.

Equity

Gender Parity Index (GPI): Ratio of the female to male values of a given indicator. A GPI 1 indicates parity between sexes
