## Preface

This International Merchandise Trade Statistics (IMTS) Monthly Digest presents statistics on Botswana's total imports and exports of goods at the end of June 2016. This digest follows the May 2016 Digest published at the end of July 2016. Data is complete up to May 2016. Figures for June 2016 are from automated borders only, constituting 98 percent of total expected monthly trade in value terms.

Changes in data for corresponding months when comparing the current digest and the previous ones may be attributed to data from transactions which had deferred customs duty assessments. The data for these transactions would only become available at a later stage after customs duty assessments have been completed.

This Monthly Digest presents summaries of Total Merchandise Trade from January 2012 to June 2016 as presented on **Table 1**. Trade by Principal Commodity groups is presented on **Table 2.1** for imports and **Table 2.2** for exports. **Table 2.3** gives trade on diamonds only. Direction of trade is given for the most recent twelve months and this appears on **Tables 3.1A** and **3.2A** for imports and exports respectively. **Table 3.1B** (imports) and **Table 3.2B** (total exports) present Principal Commodity groups by partner and region for June 2016 only.

Five graphical presentations appear in this digest. **Chart 1.1** shows imports, total exports and trade balance from January 2012 to June 2016. **Charts 2.1** and **2.2** show Principal Commodity groups for imports and exports respectively, for June 2016 only. **Charts 3.1** and **3.2** show imports and exports by major trading partners for the month under review.

**Tables 4.1; A & B** present statistics on commodities which were mostly imported during May 2016 and June 2016 respectively, while exports are given on **Tables 4.2; A & B** for the same months. Trade at Chapter Level (2 digits of the Harmonized Commodity Description & Coding System) appears on **Table 5**, giving data for May 2016 and June 2016.

**Table 1** distinguishes domestic exports from re-exports while other tables show total exports only, which is the sum of the two (domestic exports and re-exports).

For more information contact the Directorate of Stakeholder Relations at 3671300. All Statistics Botswana outputs/publications are available on the website at [www.cso.gov.bw](http://www.cso.gov.bw), and at the Statistics Botswana Library (Head-Office, Gaborone).

I sincerely thank all stakeholders involved in the formulation of this monthly digest, for their continued support and feedback, as we strive to better serve Botswana and all other important users of our products and services.

## 1.0 TOTAL TRADE

Total merchandise trade as presented in this section refers to imports, domestic exports, re-exports and trade balance.

### 1.1 Data Revision

**Table A** presents revised data for March 2016 to May 2016. Imports for April 2016 increased by 2.9 percent (P187.7 million) from P6, 403.2 million as at May 2016 to P6, 590.9 million as at June 2016, due to data from transactions that had deferred customs duty assessment as well as data from manual border posts. Imports for May 2016 decreased by 0.2 percent (P9.2 million), mainly because of data editing.

Total Exports for May 2016 shows a slight decrease of 0.1 percent (P10.0 million) when comparing figures from the May 2016 and June 2016 digests, mainly due to data editing.

Discussions on Sub-Sections 1.2 to 1.4 are based on Table 1.

### 1.2 Imports

Discussions on imports are based on cost, insurance and freight (CIF) value and associated figures are presented on **Table 1**. June 2016 total imports were valued at P5, 833.5 million, showing an increase of 24.0 percent (P1, 129.0 million) from the revised May 2016 value of P4, 704.6 million. This is attributable mainly to an increase in imports of Diamonds which rose by more than 100 percent (P904.4 million) from P638.4 million during May 2016 to P1, 542.8 million during June 2016.

Comparison of import figures for June 2016 and June 2015 shows a decrease of 23.4 percent (P1, 782.3 million), from P7, 615.8 million recorded during June 2015 to P5, 833.5 million recorded during the reference month. The decrease in import value in this case is mainly due to the low value of diamond imports for aggregation during the current period, having decreased by 54.6 percent (P1, 856.8 million) from P3, 399.6 million during June 2015 to P1, 542.8 million during June 2016 (**Table 2.1**).

The other commodity groups that contributed to the decline in total imports during June 2016 as compared to June 2015 were Machinery & Electrical Equipment which fell by 20.6 percent (P194.6 million) from P945.2 million during June 2015 to P750.6 million in June 2016 and Chemicals & Rubber Products, having decreased by 13.0 percent (P81.6 million) from P632.3 million during June 2015 to P550.4 million during the month under review (**Table 2.1**).

### 1.3 Total Exports

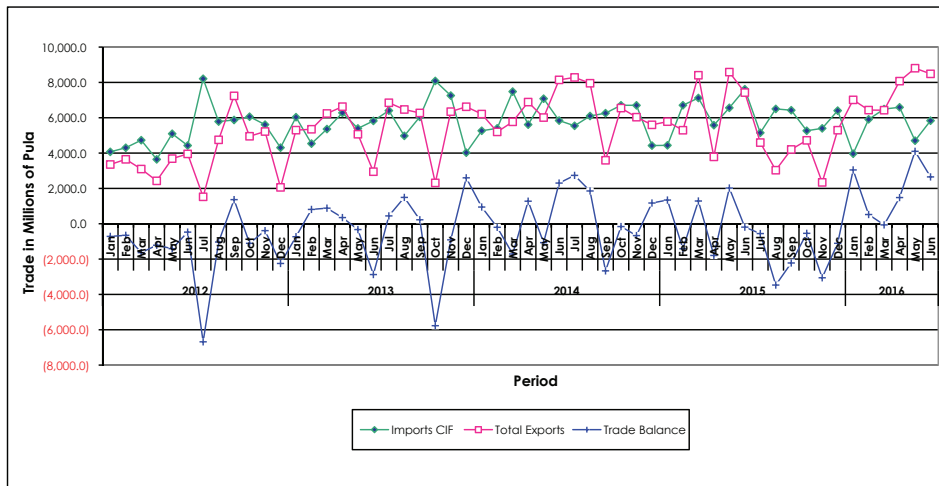

In June 2016, total exports were valued at P8, 484.9 million, showing a decrease of 3.6 percent (P319.6 million) from the May 2016 revised value of P8, 804.4 million. This is attributable to the decrease in exports of Diamonds which recorded a drop of 5.3 percent (P420.3 million) from P7, 950.4 million recorded during May 2016 to P7, 530.1 million during the month under review. Salt & Soda Ash and Textiles also contributed to the decrease in total exports. Salt & Soda Ash declined by 40.5 percent (P21.4 million) from P52.8 million to P31.4 million while Textiles dropped by 40.3 percent (P11.9 million) from P29.6 million during May 2016 to P17.6 million during the current period (**Table 2.2**).

Comparison of June 2016 total exports value to that of June 2015 shows an increase of 14.3 percent (P1, 060.0 million) from P7, 424.9 million recorded during June 2015 to P8, 484.9 million recorded during June 2016. This is mainly attributable to exports of Diamonds, which increased by 18.3 percent from P6, 365.0 million during June 2015 to P7, 530.1 million during June 2016 (**Table 2.2**).

## 1.4 Trade Balance

June 2016 shows a trade surplus of P2, 651.4 million, which was influenced by the high value of diamond exports while imports of the same commodity recorded a low value.

**Chart 1.1: Total International Merchandise Trade - January 2012 to June 2016 (Million PULA)**

## 2.0 TRADE BY PRINCIPAL COMMODITIES

Principal commodity groups refer to selections of related commodities grouped together to form major groups. Commodities forming a group may be of related chapters, for example; “*Machinery & Electrical Equipment*” which combines machines and electrical appliances; “*Vehicles & Transport Equipment*” which combines vehicles and other equipment used for transport purposes.

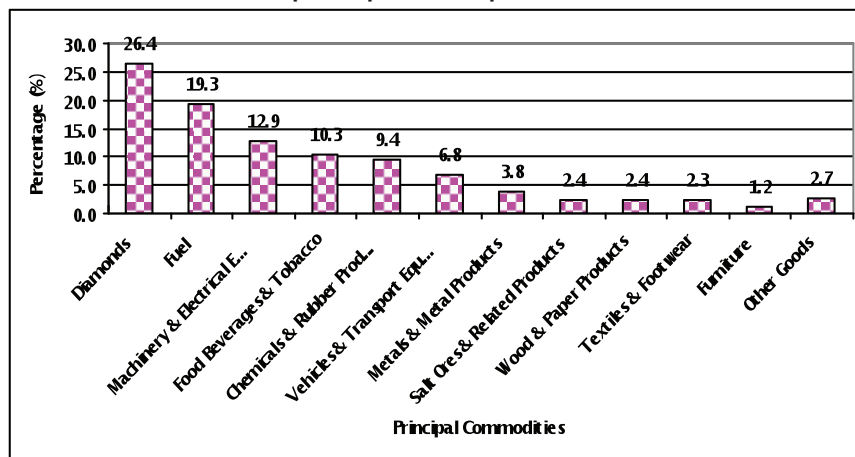

In some cases it becomes challenging to come up with further groups of related chapters or commodities. This occurs when commodity groups’ contributions to the total remain minimal. In such cases, the commodities are grouped together under the general category called “*Other*”.

### 2.1 Principal Imports

Imports by Principal Commodity Groups together with associated percentage distributions, appear on Table 2.1, covering January 2012 to June 2016. Percentage distributions are however only shown for totals of 2014, 2015 as well as for May and June 2016. Chart 2.1 gives graphical presentation of Principal Import Commodity groups for June 2016 only.

Composition of imports by principal commodities for June 2016 shows that *Diamonds* contributed the most to total imports (P5, 833.5 million), with 26.4 percent (P1, 542.8 million), followed by *Fuel* with 19.3 percent (P1, 125.8 million) and *Machinery & Electrical Equipment* with 12.9 percent (P750.6 million). *Food Beverages & Tobacco* contributed 10.3 percent (P600.9 million) while *Chemicals & Rubber Products* made a contribution of 9.4 percent (P550.4 million) to total imports during the month under review. Percentage distributions for other commodity groups during June 2016 can be viewed on **Table 2.1** and **Chart 2.1**.

**Chart 2.1: Principal Imports Composition – June 2016**

Note: Other Goods include all Other Goods not specified as in Table 2.1

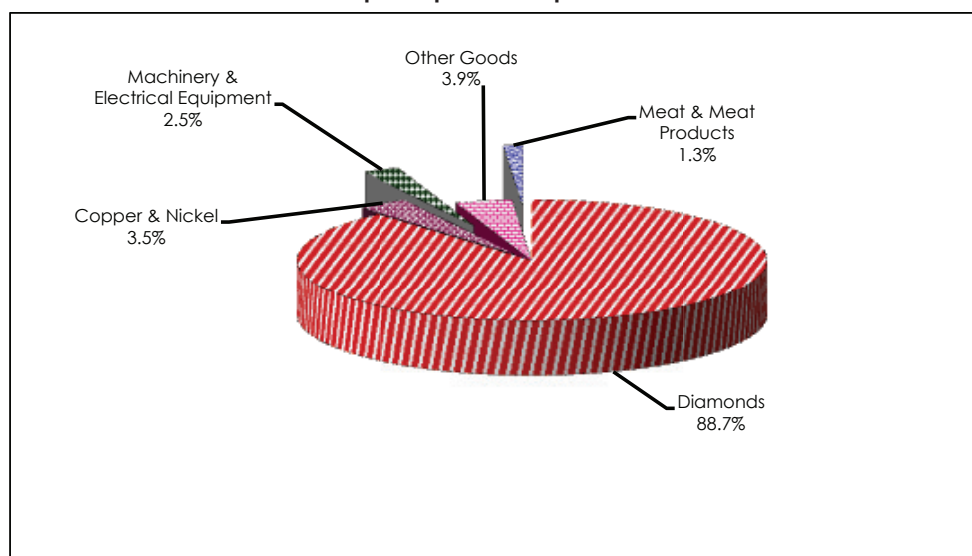

## 2.2 Principal Exports

June 2016 total exports were valued at P8, 484.9 million, with 88.7 percent (P7, 530.1 million) attributed to exports of *Diamonds*. These exports consist of diamonds from diamond polishing companies as well as those from the aggregation process.

*Copper Nickel* and *Machinery & Electrical Equipment* contributed 3.5 percent (P299.6 million) and 2.5 percent (P214.1 million) respectively, to total exports during the month under review.

Percentage distributions for major export groups can be observed on **Table 2.2**, while **Chart 2.2** gives graphical presentation for June 2016 only. Total exports discussed here are the sum of domestic exports and re-exports.

**Chart 2.2: Principal Exports Composition–June 2016**

Note: Other Goods: include all Other Goods not specified as in Table 2.2

### 3.0 TRADE BY REGION AND MAJOR PARTNERS

Direction of trade gives imports by source while exports are presented by last known destination. Only major trading partners are considered individually, while smaller trading partners are grouped together under a general category. Data for the most recent twelve months appear on **Table 3.1A** for imports while exports are presented on **Table 3.2A**. Data by region, major trading partners and principal commodities for imports and exports, during June 2016 only, appear on **Table 3.1B** & **Table 3.2B** respectively.

#### 3.1 Imports by Region and Major Trading Partners

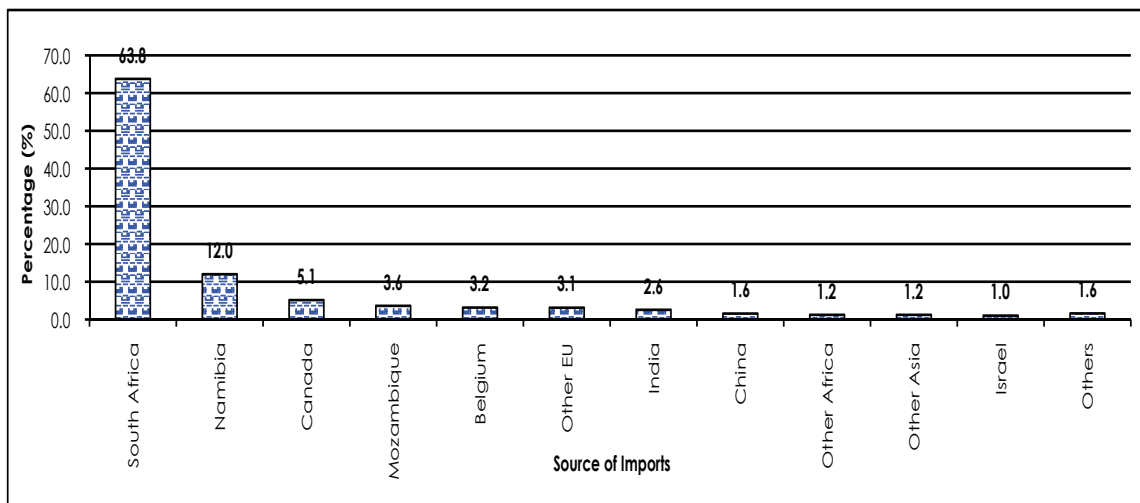

Imports for June 2016 were valued at P5, 833.5 million, with South Africa contributing 63.8 percent (P3, 719.4 million), while Namibia and Mozambique contributed 12.0 percent (P699.7 million) and 3.6 percent (P210.9 million) respectively to the monthly total.

Imports from Asia were valued at P482.7 million, representing 8.3 percent of total imports during June 2016, with India alone supplying 2.6 percent (P149.6 million) while China and Israel supplied 1.6 percent (P91.6 million) and 1.0 percent (P59.6 million) respectively of total imports during the month under review.

The European Union (**EU**) supplied imports valued at P322.3 million, accounting for 5.5 percent of total imports during the month under review. The main supplier of imports from this region was Belgium with 3.2 percent (P184.0 million) of total imports during the same period.

Canada supplied 5.1 percent (P299.6 million) of total imports during the same period. Imports at regional and country level (for major trading partners) are presented on **Table 3.1A**. **Chart 3.1** gives the graphical presentation of major trading partners during June 2016.

**Chart 3.1: Imports by Major Trading Partners-June 2016**

#### 3.2 Exports by Region and Major Trading Partners

Total exports for June 2016 were valued at P8, 484.9 million, with 28.0 percent (P2, 373.0 million) destined to Africa. South Africa and Namibia respectively, received 15.7 percent (P1, 334.5 million) and 11.4 percent (P966.4 million) of total exports during the month under review.

Asia received exports valued at P3, 265.5 million, representing 38.5 percent of total exports (P8, 484.9 million) during June 2016. India and the United Arab Emirates (**UAE**) received 14.9 percent (P1, 261.7 million) and 11.1 percent (P941.4 million) respectively of total exports during the month under review. Israel, Singapore and Hong Kong respectively received 5.4 percent (P457.6 million), 4.5 percent (P385.2 million) and 1.3 percent (P112.7 million) of total exports during the same period.

Exports destined to the **EU** were valued at P2, 159.8 million, representing 25.5 percent of total exports during the period under review. Belgium received most exports destined to **EU**, having received 19.5 percent (P1, 657.1 million) while the United Kingdom (**UK**) got 5.4 percent (P460.0 million) of total exports during June 2016.

Other countries that received significant exports from Botswana during the month under review include Canada, the United States of America (**USA**) and Switzerland, having received 4.5 percent (P381.1 million), 1.5 percent (P128.9 million) and 1.2 percent (P103.0 million) respectively of total exports.

Other destinations for exports can be observed on **Table 3.2A**. **Chart 3.2** gives the graphical presentation of major trading partners for June 2016 only.

Data is complete up to May 2016 only. Data for June 2016 is from automated borders only, representing about 98 percent of total expected monthly trade in value terms.

## 5.0 TECHNICAL NOTES

IMTS are compiled by the International Merchandise Trade Statistics Section of Statistics Botswana. International Merchandise Trade refers to external trade in goods only. International Service Trade Statistics (ISTS) are however not compiled by this section. The primary source of international merchandise trade data is the Customs & Excise Division at the Botswana Unified Revenue Service (BURS). The Customs & Excise Division is responsible for data capture for both computerized and manual borders, and the monthly raw data files are transferred to Statistics Botswana for data processing.

Until the April 2009 Monthly Digest, Botswana was practicing Relaxed Special Trade Type. The Relaxed Special Trade Type takes into account goods that are exported or imported for inward or outward customs processing while the Strict Special Trade Type does not include the same. Strict Special Trade Type comprises imports for home consumption, permanent exports, re-exports and goods cleared out of warehouse (ex-warehouse) only.

In June 2009, the Botswana External Trade Database was revised to cater for General Trade Type as per the United Nations Statistics Division (UNSD) recommendations. The General Trade Type gives complete coverage of external trade as compared to the Special Trade Type. As a result of this, trade reported in the monthly digests for May 2009 onwards is based on the General Trade Type.

Imports are valued CIF (cost, insurance & freight) while exports are valued FOB (free on board). The value of imports includes transport and insurance costs to the importing country. The Exports value consists only of the value of goods as they leave the exporting country.

### 5.1 Time of Recording of Trade

IMTS is compiled using date of recording of trade as opposed to date of assessment of goods by customs. This means that as goods cross the border, trade is recorded and this is the reference month for compilation of IMTS. Some of these goods may however be held by customs for some time pending final assessment for tax or duty purposes.

If the final assessment is done later, for example two or three months, or even more, after the goods had crossed the border, the affected trade will then update trade for the particular month when the goods crossed the border, therefore it does not form part of trade for the month during which the final assessment was done. This is mostly common with imports. Revision of data for the month preceding the one under review will normally show high values as compared to revisions for other months due to more goods (from the previous month) being released after final assessment.

### 5.2 Concepts and Definitions

**Domestic Exports:** These are goods originating from the compiling country, being permanently exported out of the country for consumption in the outside world. This includes products from customs inwards processing; for example, if a country imports wheat, processes the wheat into bread flour and exports the bread flour and bye products from the milling process, these will all leave the country as domestic exports.

**Re - Exports:** These are exports of foreign goods that were initially recorded as imports into the compiling country. These goods are exported in the same state that they came in except for wear and tear. An example will be re-exportation of a motor vehicle that was initially imported into the compiling country and after being used it is now being exported to a foreign country.

**Total exports:** This is the sum of domestic exports and re-exports

**Imports:** These are goods imported from the outside world, into the compiling country, for local consumption. This includes re-importation of locally produced goods that were initially exported and are now being imported back into the country.

**Trade Balance (Net Export):** This refers to the total value of goods exported minus the total value of goods imported by a given economy in a given period of time. A positive trade balance (trade surplus) indicates that a country is exporting more in value terms than it is importing. A negative trade balance (trade deficit) indicates that the country is importing more than it is exporting.

### 5.3 Treatment of Diamonds from Aggregation Process

In July 2012, the Diamond Trading Company International which was undertaking aggregation of diamonds relocated from the United Kingdom to Botswana. This meant that the process of aggregation of diamonds was now to be done in Botswana. Following the relocation, initially it was not clear how this trade was to be recorded as there was no prior common understanding of the processes involved between all the relevant parties. After thorough discussions with key stakeholders, Statistics Botswana decided to record this trade as imports for processing and that export of the same after aggregation be recorded as direct permanent exports. This was based on **IMTS 2010 Compilers' Manual (Page 225)** and **IMTS 2010 Concepts & Definitions; Page 16; Paragraph 1.20** concept that mixing of goods of different qualities to produce goods of a new quality is part of processing in compilation of IMTS.

#### 5.3.1 Sorting out Diamonds imports

These imports will mainly be from Canada, Namibia and South Africa. Some of these may include diamonds that were originally bought from Botswana and are now being sold back to Botswana. The original declaration will not indicate whether the consignment is a mixture of diamonds from various countries. However, a follow-up document, referred to as **"attached document"** will show a disaggregation of these imports according to the various countries that contributed to the consignment.

- I. In case the consignment was from one country, this will be recorded as imports into Botswana from that particular country
- II. In case the consignment was from various countries, the recording of these imports will be according to the various countries that contributed to the consignment
- III. If part of the consignment was originally from Botswana, that part is recorded as re-import and will form part of total imports.

#### 5.3.2 Sorting out Diamonds exports

These exports will be from the aggregation process and will consist of exports of Botswana origin and exports of diamonds that were originally imported. The original declaration will give an aggregated export which will be a consignment bought by an individual trader. This consignment will consist of diamonds of the same colour, shape and size but originating from various countries. The **"attached document"**, giving a disaggregation of the consignment in value and carats by countries that contributed, will be used to record trade accordingly. As per IMTS 2010 Concepts & Definitions, goods resulting from processing are to be included in merchandise trade at their full value and as direct permanent exports (Domestic exports) in case they are exported (**IMTS Concepts & Definitions; page 16, paragraph 1.20**). As a result of this, diamonds that originated from outside Botswana as well as those originating from Botswana are recorded as direct permanent exports or domestic exports.

Both diamonds originating from Botswana and those that originated from elsewhere have always been recorded under Domestic Exports.

Values for diamonds that originated from elsewhere can be provided separately if needed.

### 5.4 Exclusions from IMTS

- **Goods in Transit**

This is trade that is simply passing through the compiling country solely for the purpose of being transported to another country

- **Goods temporarily admitted or dispatched**

These are goods that at the time of admission/dispatch, are intended to stay in the receiving country temporarily and that after their stay they will be returned in the same state. These goods include display equipment for trade fairs and exhibitions, commercial samples, means of transport, containers, equipment for working etc.

- **Monetary Gold**

This is gold to which the monetary authorities have title and is held as reserve assets.

- **Issued banknotes and securities and coins in circulation**

These goods represent evidence of financial claims and are excluded from IMTS

The above list of exclusions from IMTS is however not exhaustive and only a few that are common, simple, straightforward and easy to understand have been picked as examples.
