COMMENTARY

Section 1: Headline Inflation

Section 2: Core Inflation

CHARTS

1. National Rates of Inflation, October 2013 – October 2016
2. Monthly Changes in the Cost-of-Living Index, October 2013 – October 2016
3. Non-Tradable Inflation Rates, October 2013 – October 2016
4. Tradable Inflation Rates, October 2013 – October 2016

TABLES

1. Cost-of-Living Index Series (January 2014 – October 2016)
2. National Cost-of-Living Group and Section Indices
3. Cost-of-Living Index by Tradability (January 2014 – October 2016)
4. Core Inflation Rates
5. Annual Average Inflation Rates 2008-2015

GLOSSARY

COMMENTARY

Section 1: Headline Inflation

The Botswana Consumer Price Index (CPI) has been rebased to September 2016 from the previous base period of September 2006. Details about the CPI rebasing are given in Appendices 1 to 4.

The annual inflation rate in October 2016 was 2.7 percent, a drop of 0.1 of a percentage point on the September 2016 rate of 2.8 percent. The inflation rates for regions between September 2016 and October 2016 indicated that Rural Villages' went up to 3.1 percent from 2.9 percent, Cities & Towns decreased to 2.5 percent from 2.8 percent, and Urban Villages' remained unchanged at 2.7 percent.

The October national Consumer Price index moved from 100.0 in September to 100.2 in October 2016, an increase of 0.2 percent. The Rural Villages index realized a rise of 0.2 percent, moving from 100.0 to 100.2. The Cities & Towns' index' rose by 0.2 percent, advancing from 100.0 in September to 100.2 in October, while Urban Villages' index registered an increase of 0.2 percent, moving from 100.0 to 100.2 between the two months.

Group indices were generally stable between September and October 2016, recording changes of less than 1.0 percent.

The Alcoholic Beverages, Tobacco & Narcotics group index recorded an increase of 0.7 percent, from 100.0 in September to 100.7 in October. This was due to an increase in the constituent section indices especially *Alcoholic Beverages (0.8 percent)*.

The Food & Non-Alcoholic Beverages index group went up to 100.4 in October from 100.0 in September, recording a rise of 0.4 percent. The rise was attributed to the general increase in the section indices, notably; *Fruit (1.0 percent)*, *Oils & Fats (0.9 percent)*, *Vegetables (0.9 percent)* and *Sugar, Jam, Honey, Chocolate & Confectionery (0.7 percent)*.

The Miscellaneous Goods & Services index group went up from 100.0 in September to 100.4 in October, registering an increase of 0.4 percent. The rise was owed to the increase in the section indices of *Insurance (0.7 percent)* and *Personal care (0.3 percent)*.

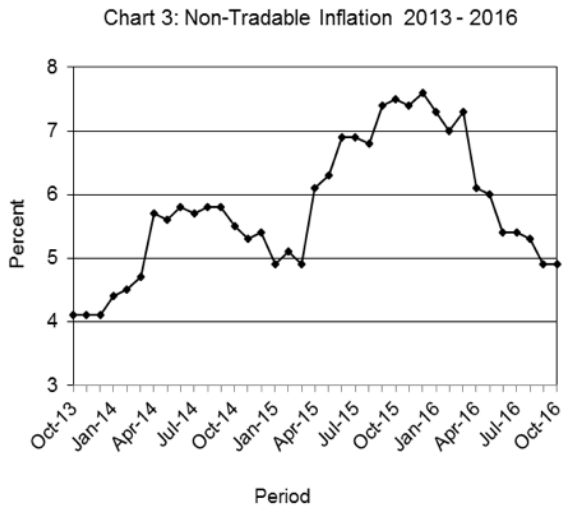

All-Tradable inflation rate was 1.9 percent in October, the same rate as in September 2016. The *Domestic Tradable inflation rate* declined from 3.5 percent in September to 3.1 percent in October. The *Imported Tradable inflation rate* remained unchanged at 0.9 percent between the two periods. The *Non-Tradable inflation rate* remained unchanged at 4.9 percent between September and October 2016.

The *All-Tradable index* moved from 100.0 in September to 100.2 in October recording a rise of 0.2 percent. The *Domestic Tradable index* advanced from 100.0 in September to 100.3 in October, registering an increase of 0.3 percent. The *Imported Tradable index* went up by 0.2 percent moving from 100.0 to 100.2 between the two periods, while the *Non-Tradable index* advanced from 100.0 in September to 100.1 in October.

Section 2: Core Inflation

The Trimmed Mean Core Inflation rate registered a drop of 0.4 of a percentage point, from 2.6 percent in September to 2.2 percent in October. The Core Inflation rate by exclusion registered a decline of 0.2 of a percentage point, moving from 3.6 percent to 3.4 percent in October 2016.

CPI AREA COVERAGE

Compiled and Prepared by Statistics Botswana, 2016

GLOSSARY

Consumer Price Index (CPI) is an index which measures price changes in goods and services with reference to a base period.

Inflation is a measurement of prices movement of goods and services in a particular country.

Domestic Tradable refers to the goods and services which a country (Botswana) can export to other countries.

Imported Tradable represents the goods and services which a country (Botswana) imports from other countries (trading partners).

Non-Tradable refers to the goods and services which a country cannot either export or import to other countries.

All –Tradable refers to the total of **Domestic** and **Imported tradable**.

Trimmed Mean Core Inflation- attempts to remove 8 percent (by weight) of the commodity sub-groups with the largest price changes at each of the ends of an ordered series of price changes in any given month.

Core inflation by Exclusion is a measure used to remove the volatility inherent in prices that are only adjusted periodically and not always in response to currently prevailing market forces.

APPENDIX

APPENDIX 1

Brief summary on the Rebasing of the Consumer Price Index (CPI) to September 2016.

Introduction

In order to effectively meet numerous needs of our wider users, Statistics Botswana has rebased the Consumer Price Index from September 2006 to September 2016. The CPI rebasing covers a number of issues which includes the new basket and weights, area coverage as well as the methodology.

It should be noted that the index series that has been released earlier to the rebasing exercise had September 2006 as base year and the weights were obtained from the 2002/3 Household Income and Expenditure (HIES) results. The current index has September 2016 as its base and the weights were derived from the 2009/10 Botswana Core Welfare Indicator Survey (BCWIS) results.

Why Rebase the CPI

CPI rebasing is a process of relating item prices in the CPI basket to the current consumption pattern i.e. to derive CPI weights which represent the new consumption patterns. The accuracy of weights to represent current expenditure patterns decreases as the length of time increases from the weight reference period. There is a general shift in relative prices due to changes in supply and demand of goods and services in the economy and hence changes in the household consumption patterns. In order to ensure that relative values and weighted average changes, approximate the current structure of the economy as closely as possible or current consumption patterns, base periods and weights need to be changed from time to time. The best international practice is to rebase CPI after every five years.

The Basket

The new basket has a total of 393 items which are categorised into 51 sections and 12 groups while the previous basket had 384 items but still classified as stated. The number of basket items has been increased and modified to cater for the changes in the consumption patterns as per 2009/10 BCWIS results. Each item/product in the basket is representative of all other similar items, hence the weights reflect the relative importance of an item to other items in the entire basket. It is therefore based on the fact that the behaviour of the price of an item will be similar to that of the items it represents.

Statistics Botswana has adopted the Classification of Individual Consumption by Purpose (COICOP) for all items in the new basket. COICOP is an international classification system that categorises consumption goods and services according to their primary purpose. It has benefits of regional and international comparability as well as providing an integrated set of household expenditure and consumption statistics.

Appendix 2 presents a comparison of the old and new basket at group level and the entire basket is presented in Appendix 3.

APPENDIX 2

Appendix 2: Comparison of Group weights for Consumer Price Index between 2006 and 2016 in Botswana

Group	September 2006 Weights	September 2016 Weights
Food & Non-Alcoholic Beverages	21,84	16,51
Alcoholic Beverages, Tobacco & Narcotics	9,29	7,83
Clothing & Footwear	7,52	6,27
Housing, Water, Electricity, Gas & Other Fuels	11,46	14,90
Furnishing, Household Equipment & Routine Maintenance	6,76	6,39
Health	2,71	3,62
Transport	18,98	20,65
Communications	3,01	4,27
Recreation & Culture	2,22	2,92
Education	3,37	3,34
Restaurants & Hotels	3,27	2,76
Miscellaneous Goods & Services	9,57	10,55
All Item Index	100,00	100,00

Area Coverage

Prices collection from retail outlets is conducted every month within first two weeks of the month. Prices collection covers the towns/cities, urban villages and rural villages.

On geographical coverage, all cities/towns are included in the sample; sampling was done in urban and rural villages within each district using the 2011 Population and Housing Census data; ensuring that where possible within each district an urban and rural village is selected. Proportional to size sampling technique was used to select urban villages while purposive sampling was used to select rural villages. Area coverage was largely extended to areas in the western side of the country i.e. Shakawe, Gumare, Charleshill and Hukunsi. Other areas were removed due to proximity to other areas where prices were already collected.

Table A presents a summary of the areas covered for the two baskets; more details are given in Appendix 4.

Table A: Summary of CPI area coverage

Strata	Old CPI Area Coverage	New CPI Area Coverage
	Number of Areas	Number of Areas
Cities/towns	5	5
Urban Villages	15	23
Rural Villages	26	21
Number of areas	46	49
Number of Outlets	1235	2174
Average number of price quotes	41758	43038

Methodology

Statistics Botswana is currently using the Modified Laspeyres method to compute Consumer Price Index (CPI) which is in line with regional and international recommendations. Its main advantage is that it uses chaining and as a result is more amenable to the introduction of new items and substitution of discontinued products.
