## 1. Introduction

This statistical release contains preliminary Gross Domestic Product estimates at current and constant prices for the third quarter of 2015, as well as 2014 annual estimates. Botswana's national accounts are compiled according to the 1993 System of National Accounts (1993 SNA). The accounts presented in this brief adhere to the General Data Dissemination System (GDDS) of the International Monetary Fund (IMF), which sets out standards on coverage, periodicity and timeliness of data.

The estimates are provisional and subject to change. First estimates are normally based on limited data and hence cannot be precise and absolute. The figures are revised after receiving finalized or audited data from companies in which some differences and inconsistencies in the previously published data may be observed.

These estimates are not seasonally adjusted hence the variations may differ depending on the quarters.

Statistics Botswana acknowledges and appreciates contribution of all stakeholders in the production of this quarterly report.

## 3. Third quarter GDP

The estimated GDP at current prices for the third quarter of 2015 was P37 800.7 million compared to a revised level of P37 757.5 million registered in the second quarter of 2015.

The estimated GDP at constant 2006 prices for the third quarter of 2015 was P20 670.8 million compared to P21 472.0 million registered in the second quarter of 2015, amounting to a decrease of 3.7 percent (see table 3).

Real Gross Domestic Product (GDP) decreased by 3.5 percent in the third quarter of 2015 compared to an increase of 4.0 percent accrued in the same quarter in 2014.

At industry level, most of the decline was attributed to Mining, Water & Electricity and Agriculture sectors which decreased by 40.6, 114.9 and 0.7 percent respectively. All other industries recorded a positive growth of at least 2.2 percent over the period.

The decline in GDP growth rate was attributed to a decline in diamond production by 33.4 percent compared to an increase of 14.1 percent registered in 2014. Total Copper production decreased by 75.6 percent compared to a decrease of 17.3 percent in the same quarter last year.

There was a significant decrease in the value added by the Water and Electricity sector of 114.9 percent realized in the third quarter of the year under review. The decline is largely by the Electricity sector which has been contributing negatively to the economy since the first quarter of 2012 due to a substantial increase in intermediate consumption. Local production of Electricity decreased by 27.5 percent while imports increased by 61.2 percent. Imported Electricity is included in the intermediate consumption.

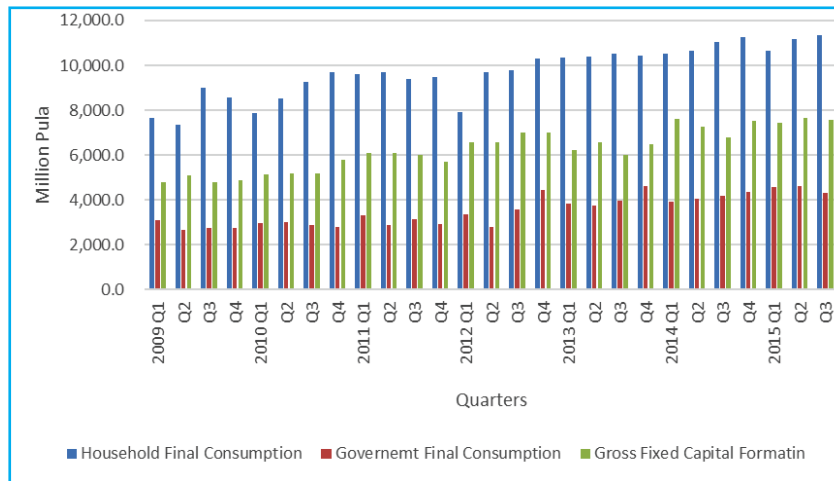

**Figure 1: Real GDP growth rates (over four quarters)**

Total final consumption expenditure recorded an increase of 2.7 percent in the third quarter of 2015, whereas in the same quarter of the previous year it increased by 5.0 percent. Household final consumption increased by 2.7 percent in the third quarter of 2015 while Government final consumption rose by 2.8 percent in the same quarter. Fixed capital formation recorded an increase of 11.7 percent in the quarter under review compared to an increase of 12.4 percent in the same period in 2014.

Real exports of goods and services decreased by 37.6 percent in the third quarter of 2015 compared to a decrease of 2.4 percent recorded in the same quarter of 2014, while imports of goods and services registered a decrease of 17.2 percent in the third quarter of 2015 compared to a 12.4 percent increase registered in the same quarter of 2014.

## 4. Annual National Accounts

### 4.1 Annual Gross Domestic Product

**Key figures at constant 2006 prices (Annual Percentage Changes)**

	2011	2012	2013	2014
Total final consumption	7.2	2.9	11.5	0.5
Gross fixed capital formation	12.2	13.6	-6.8	15.3
Exports	27.5	17.8	29.8	12.1
Imports	19.2	32.1	11.6	6.9
Gross domestic product	6	4.5	9.9	3.2
GDP per Capita	4.1	2.5	7.8	1.3

GDP at current prices increased to P142, 466.1 million in 2014 compared to a revised level of P124 310.7 million in 2013, recording an increase of 14.6 percent.

GDP at constant prices was P85 619.4 million in 2014 compared to a revised level of P82 960.5 million in 2013, recording an increase of 3.2 percent. The increase in real GDP was mainly due to Transport & Communications and Trade, Hotels & Restaurants which recorded an increase in value added of 7.4 and 7.1 percent respectively. The slow growth rate of 0.5 percent in the Mining sector is attributed to 6.6 percent increase in diamond production compared to a high increase of 12.2 percent in the previous year.

Contribution to GDP by industry is shown in table 2. Mining remains a major contributor to GDP, its contribution went up to 24.0 percent in 2014 compared to 21.0 percent recorded in 2013.
