TABLE 1.1: TRENDS IN KEY DEMOGRAPHIC INDICATORS FROM 1971, 1981, 1991, 2001 AND 2011 POPULATION AND HOUSING CENSUSES

Population Characteristics	Census 1971	Census 1981	Census 1991	Census 2001	Census 2011
Sex Ratio (Males per 100 Females)	84	89	92	93.8	95.5
Percentage Urban	9	17.7	45.7	54.2	64.1
Population Density (per km)	1	1.6	2.3	2.9	3.5
Crude Birth Rate (per 1000)	45.3	47.7	39.3	28.9	25.7
Crude Death Rate (per 1000)	13.7	13.9	11.5	12.4	6.25
Natural Rate of Increase (% per annum)	3.1	3.4	2.7	1.7	1.9
General Fertility Rate (per 1000 women aged 15-49)	189	210	161	106.9	92.2
Mean Age at Childbearing	30.5	30.6	30	30.3	20
Total Fertility Rate (births per woman)	6.5	6.6	4.2	3.27	2.7
Infant Mortality Rate	97	71	48	56	17
Child Mortality Rate	56	35	16	19	27
Under 5 Mortality	152	105	63	74	28
Life Expectancy at Birth (years)	55.5	56.5	65.3	55.6	68
Males	52.5	52.3	63.3	52.0	66
Females	58.6	59.7	67.1	57.4	70
Mean Age (years)	23.4	22.7	23	24.8	26.2
Males	22.6	22.0	22.4	24.2	25.2
Females	24.1	23.4	23.5	25.3	26.8
Median Age (Years)	15.0	15.3	16.8	20.1	23
Males	13.5	15.0	16.0	19.4	22
Females	16.7	16.5	17.4	20.8	24
Population Growth Rate		4.7	3.5	2.4	1.9

TABLE 1.2: SUMMARY INDICATORS FOR KWENENG EAST DISTRICT 2011

Demographic Indicators	Value
Total Population	256752
Total	256752
Male	125195
Female	131557
Population Change 2001-2011	35.3
Population Growth Rate 2001-2011	2.43
Sex Ratio (Males per 100 Females)	96.5
Percentage Urban	80.7
Population Density (per km)	9.8
Crude Birth Rate (per 1000)	26.5
Crude Death Rate (per 1000)	5.9
Natural Rate of Increase (% per annum)	4.4
General Fertility Rate (per 1000 women aged 15-49)	94.8
Mean Age at Childbearing	29.1
Total Fertility Rate (births per woman)	2.7
Infant Mortality Rate	18
Child Mortality Rate	9
Under 5 Mortality	28
Life Expectancy at Birth (years)	
Males	69
Females	68
Mean Age (years)	
Males	25.2
Females	26.7
Total	26
Median Age (Years)	
Males	23
Females	24
Total	24
Population Groups	
Infants (0-1)	4.9
Under-fives (0-4)	11.4
School-going (6-13)	13.6
Labour Force (15-64)	64.2
Youth (18-35)	37
Elderly (65+)	4.4
Dependency Ratio	55.4
Unemployment Rate	
Male	13.8
Female	14.2
Total	14
Defects of Speech	
Inability to Use One or Both Legs	
Inability to Use One or Both Arms	
Inability to Speak	
Moderate to Severe Mental Retardation	
Unemployment	
Total	22.1
Males	19.1
Females	25.7
Literacy Rate	
Total	82.8
Males	88
Females	85.5
Proportion with Access Improved Sanitation	90.6
Proportion with Access Improved Source of Water	93.6
Proportion with Seeing Defects in One Eye or Both Eyes	1.1
Proportion with Hearing in One Ear or Both Ears	0.5
Defects of Speech	0.3
Inability to Use Both Legs	0.4
Inability to Use One or Both Arms	0.2
Inability to Speak	0
Moderate to Severe Mental Retardation	0.2
Proportion aged 12 Years and Over and are Married	19.7
Proportion Aged 12 Years and Over who are Cohabiting	19.3
Proportion Aged 17 Years and Less with Mother Deceased	5.5
Proportion Aged 17 Years and Less with Father Deceased	13.1
Proportion Aged 17 Years and Less with Both Parents Deceased	2.5

1.0 Background and Commentary

The Population and Housing Census is the most representative form of enumeration since it covers as many people and variables as possible. It is the total enumeration of households throughout the country. The census is carried out after every ten (10) years in Botswana. This report covers indicators and counts of the 2011 census and makes comparisons, in some instances, with the previous census of 2001. There are two types of enumeration methods. One is the De Jure type and the other is the De Facto. The De Jure method refers to the enumeration of population according to usual residence. It excludes visitors but includes absent residents. The De Facto method, on the other hand, refers to the enumeration of population according to where one spent the census night. It includes visitors but excludes absent residents.

The 2011 Population and Housing Census used the De Facto enumeration. An important aspect about the 2011 census is its wide disaggregation of information by important variables of sex, gender and locality, among others. The disaggregation forms the basis of this report. The report presents information on localities that have 500 or more inhabitants.

1.1 Background to the Report

This report was necessitated by the need for disaggregated data at all levels. Statistics Botswana, with the assistance of the United Nations Population Fund (UNFPA), undertook work on producing geographically disaggregated and gender sensitive information.

1.2 Importance of the Report

Demographic and socio-demographic information is critical in the development efforts of a country. The tendency has been to produce national averages to represent the situation of all people within the country. Hence, data at the district and locality level have not been fully published and used by the localities even when available. This masked the wide disparities in demographic, health and other socio-economic indicators within the country. The outlook of these have, therefore, been overlooked hence conditions of large sections of the communities have remained largely unknown.

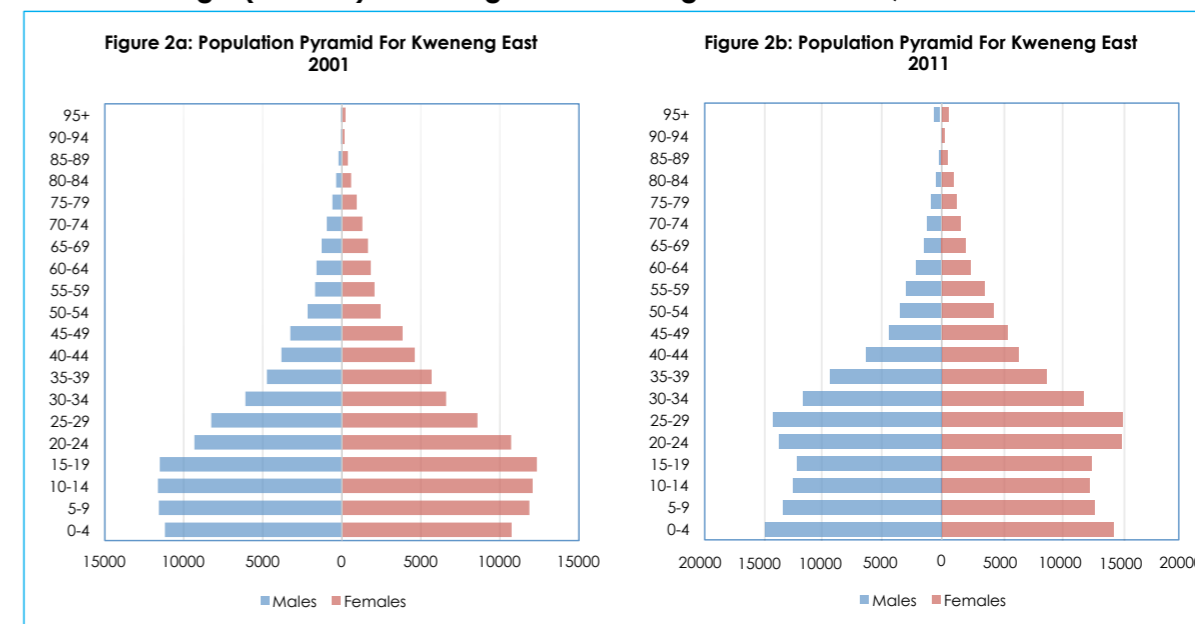

2.0 Population Distribution

Table 1 attached below shows that during the 2011 Population and Housing Census, the highest proportion (28.5 percent) of Kweneng East's population was in Molepolole village. It may be noted that this is the district's headquarters. This was followed by Mogoditshane and Thamaga at 22.8 percent and 9 percent respectively. Other villages in the district with significant population proportions include Mmopane, Gabane, Kopong, Metsimotlhabe, Mmankgodi, Lentsweletau and Kumakwane. The rest of the villages contributed less than 2 percent each to the total district population.

2.1 District Population Structure

The pyramid for Kweneng East Sub District (see Chart 1) shows the structure of a young population, broad based and gradually thinning with increasing age. Although the structure gradually decreases with age, it shows some gaps, particularly for ages 15-19. The population pyramid then shows a pronounced bulge around ages 20-29. This may be due to the fact that the enumeration was done while schools were open and Kweneng East has senior secondary schools and some tertiary institutions, which have a high number of youths.

Fig 2 (a and b): Kweneng East District Age-Sex Structure, 2001 and 2011

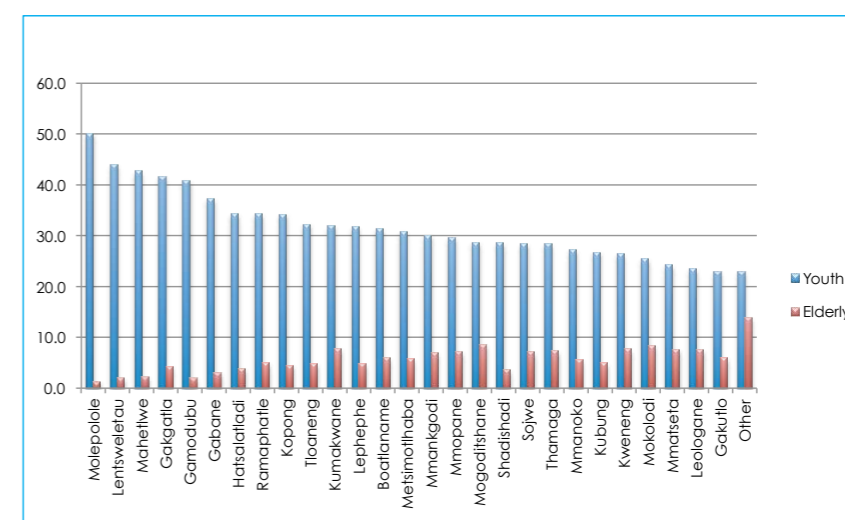

The sex ratio of Kweneng East is 95.2 percent, which is not very different from the national ratio of 95.5 percent. The majority of the population in this district are in the broad age group of 0 to 44 years. Due to its proximity to Gaborone, it does follow that most of the population will mostly be those in the working age category. The largest age group in this district is the under-five age group (0-4), at 11.4 percent of the total population, followed by age group 25-29 (11.3 percent) and age groups 20-24 and 5-9 at 11.1 percent and 10.1 percent respectively.

3.0 Youth

Youth population refers to those aged 18 to 35 years. This population contributed 37 percent to the total population. Since Kweneng East is close to the capital city of Gaborone, some villages have a high number of youths and fewer elderly people. For instance, 50.2 percent of Mogoditshane population was in the 18-35 age group while the elderly contributed less than 10 percent. A number of other villages in close proximity to the city had over 40 percent of their population in this age category.

Figure 3: Proportion of Youths/Elderly by Village

3.2 The Elderly

The elderly refers to the population aged 65 and over. The chart above shows that in Kweneng East, only villages which are a bit far from Gaborone such as Mahetlwe had more than 10 percent of their population in the elderly category. All other villages had less than 10 percent of their population in the elderly category.

3.2 Population Growth

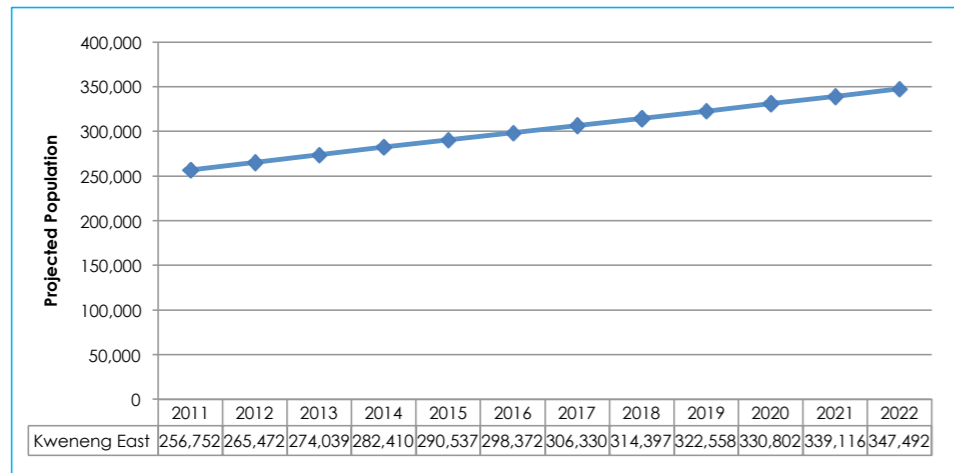

Population growth refers to the change that occurs within a population due to the effects of births, deaths and migration (natural increase).

Although the district is close to Gaborone, generally it experienced a modest growth of 3.07 percent per annum between 2001 and 2011. The highest growth rate (35.3 percent) was experienced in Gakuto. This growth may be related to the incorporation of some localities from lands into a village. However some villages experienced negative growth. These include Lentsweletau, Mahetlwe and Lephephe. A negative growth is usually due to outward migration, which is normally due to lack of employment opportunities in an area.

3.3 Population Projections

The computation of these projections is based on the component method, which takes into account the assumed future behaviour of fertility, mortality and migration.

Figure 4: Projected population for Kweneng East District 2011 - 2026

4.0 Orphan-hood

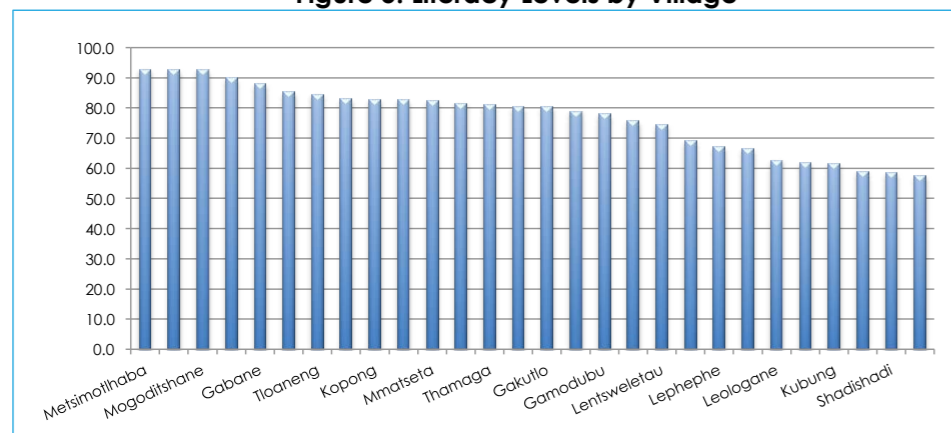

Orphan-hood refers to children aged below 18, who have either mother dead, father dead or both parents dead.

Table 19 shows that the highest number (11,207) of orphans are those who had their father deceased, followed by those with mother deceased (4,764). Furthermore, 2,159 children had both parents deceased.

6.0 Literacy Levels

Estimation of literacy rate was based on population aged 10 years and above who had completed standard four or above. Those were assumed to be literate and used to estimate literacy rate. Generally, Kweneng East had high proportions of people who are literate. This may be due to the high number of younger people who are highly educated.

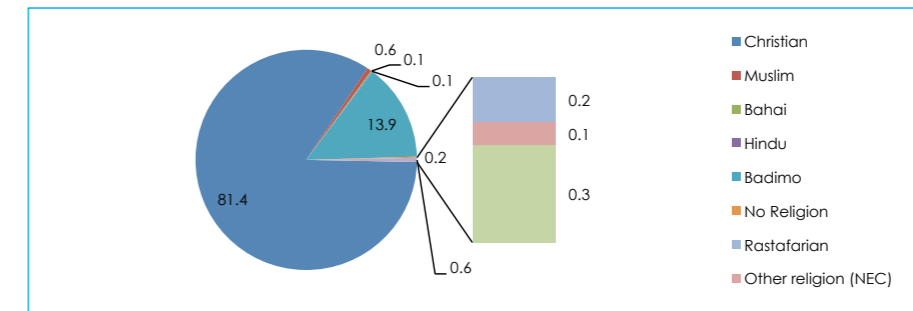

Figure 5: Literacy Levels by Village

7.0 Religion

Table 6 shows that most people (59.7 percent) in Kweneng West are affiliated to Christianity. Also, a significant proportion (29.7 percent) had no religion, followed by those who follow Badimo at 9.6 percent. All other religious affiliations contributed less than one percent each.

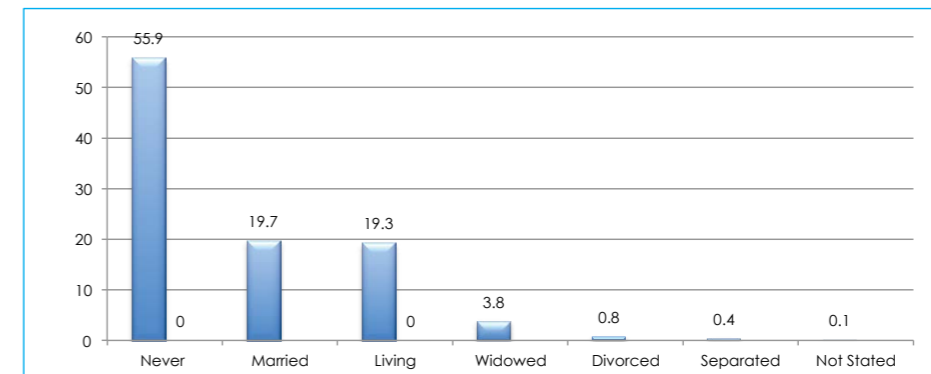

Figure 6: Distribution of the Population by Religion

8.0 Marital Status

The data on Table 7 below shows that those who were "never" married had the highest proportion of 55.9 percent, followed by those who were married at 19.7 percent. It is also worth noting that those who were living together contributed a significant proportion at 19.3 percent. Other forms of marriage such as separated and divorced contributed marginal proportions of less than 2 percent each.

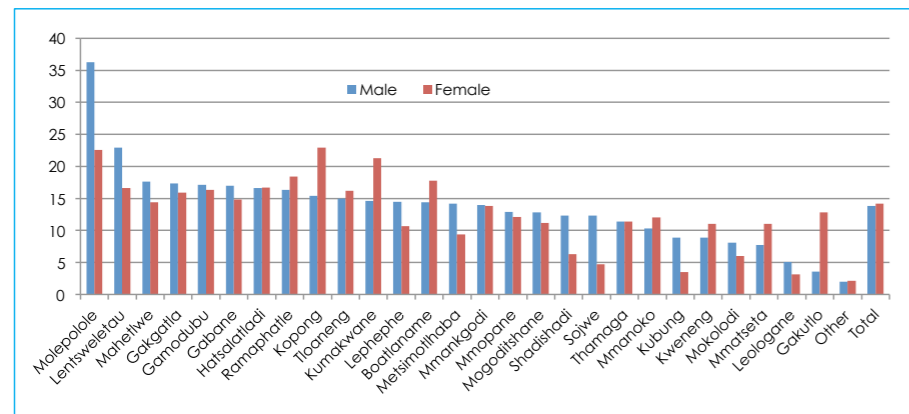

Figure 7: Distribution of the Population by Marital Status

9.0 Labour Force

Unemployment in Kweneng East, as shown through Table 10, averages 11.8 percent and 9.7 percent for males and females respectively. However, there are some localities which seem to be severely hit by unemployment. These villages include Tloaneng, which had an unemployment rate of over 22.9 percent for females, followed by Kubung at 22.6 percent and 15.9 percent for females and males respectively. However some localities in the district recorded low unemployment rates (less than 5 percent). These included Shadishadi, Ramaphatle and Gakgatla. The general rate of unemployment in the district is 13.8 percent.

Figure 8: Rate of Unemployment by Village in Kweneng East District 2011

10.0 Disability

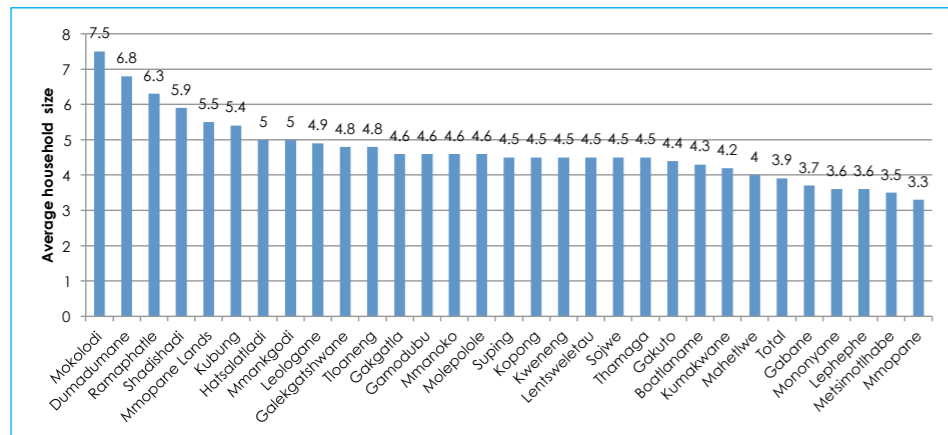

Disability refers to incapacities as a result of physical or mental deficiencies such as bodily abnormalities, defects and impairments. Impairments are defects of structure or functions of the body which give rise to personal disabilities to perform necessary activities.

Table 18, (attached), shows that the most common (1.1 percent) type of disability in Kweneng East recorded in the 2011 PHC was defect of seeing in 1 or 2 eyes. This was followed by defects of hearing in 1 or 2 ears at 0.5 percent. Also, the least common (below 0 percent) type of disability was inability to speak.

11.0 Household Size

The average household size in Kweneng East Sub District was 3.9 persons per household. Overall, the household size seems to be averaging four persons in all villages in the district except for Mokolodi and Ledumadumane, which had an average of 7.5 persons and 6.8 persons respectively.

Figure 9: Average Household Size by Village by Village in Kweneng East District 2011

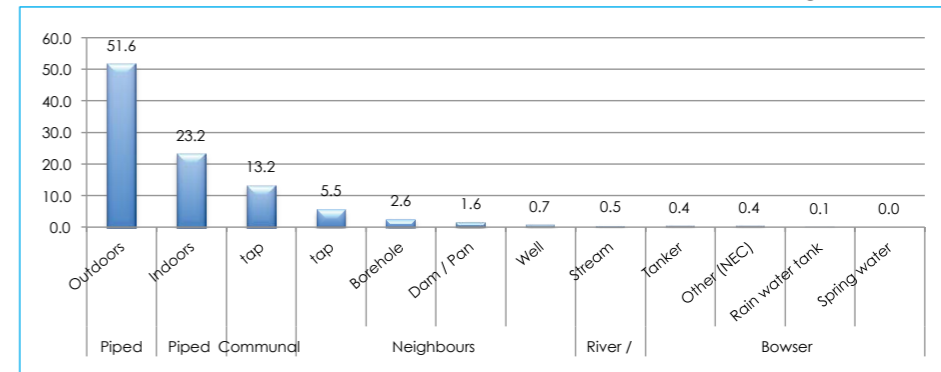

12.0 Access to Portable Water

Availability of safe drinking is an indicator of quality of life. It is therefore a priority of the government to provide all the inhabitants of the country with safe drinking water.

Figure 10 below shows that the majority of the households (51.6 percent) in Kweneng East were using piped water outdoors, while piped water indoors was used by only 23.2 percent. Moreover, 13.2 percent of the households were using communal tap. It is further indicated that there was a small proportion (less than 3 percent) of the households that were getting their water from a borehole, dam, stream tanker or well, among others. The overall access to improved water source was 93.9 percent.

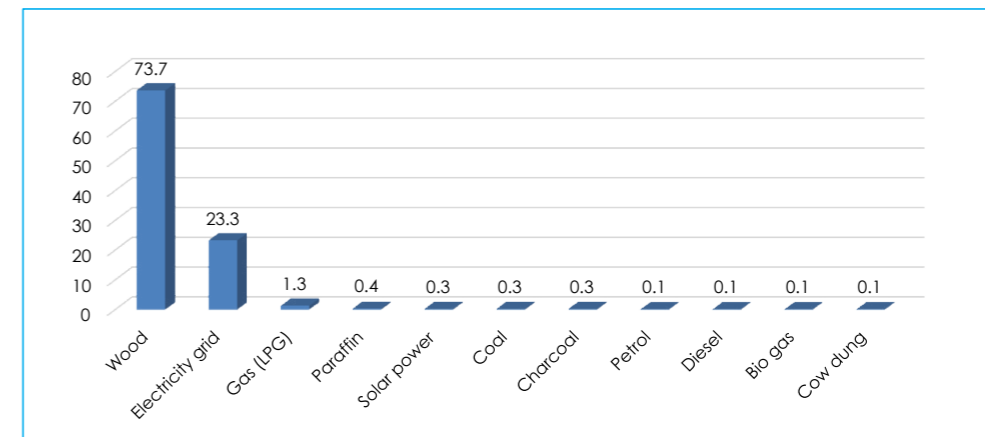

Figure 10: Distribution of Households by Access to Water in Kweneng East District 2011

13.0 Sources of Fuel for Lighting

During the 2011 PHC, the source of fuel for lighting was measured at household level. The data revealed that most households (57.7 percent) in the district were using the electricity grid for lighting. This was followed by households that used paraffin and candle at 29.8 percent and 8.5 percent respectively. A small proportion of the households used wood. All other sources of fuel contributed less than one percent each.

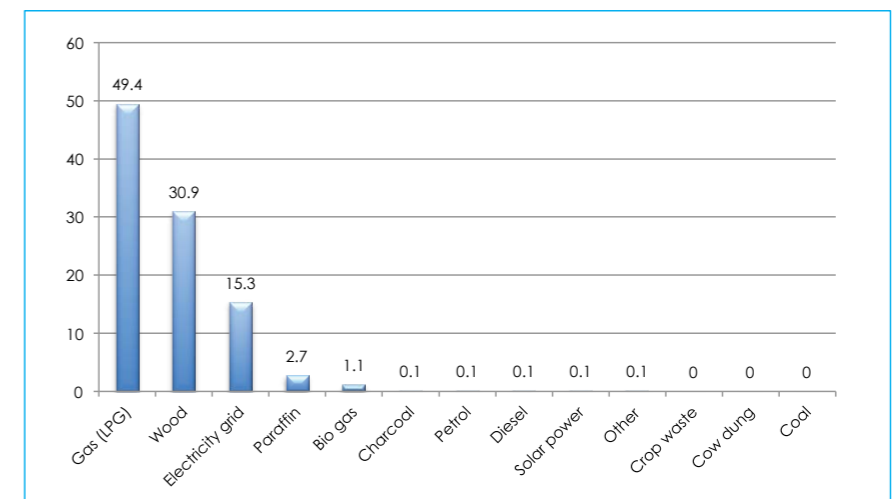

Figure 11: Distribution of Households by Source of Fuel for Lighting in Kweneng East District 2011

14.0 Sources of Fuel for Cooking

Figure 12 below shows that 49.4 percent of the households used gas (LPG) for cooking. The second highest proportion (30.9 percent) of the households used wood, followed by households which used the electricity grid and paraffin at 15.3 percent and 2.7 percent respectively. Further, usage of other sources of fuel was below one percent.

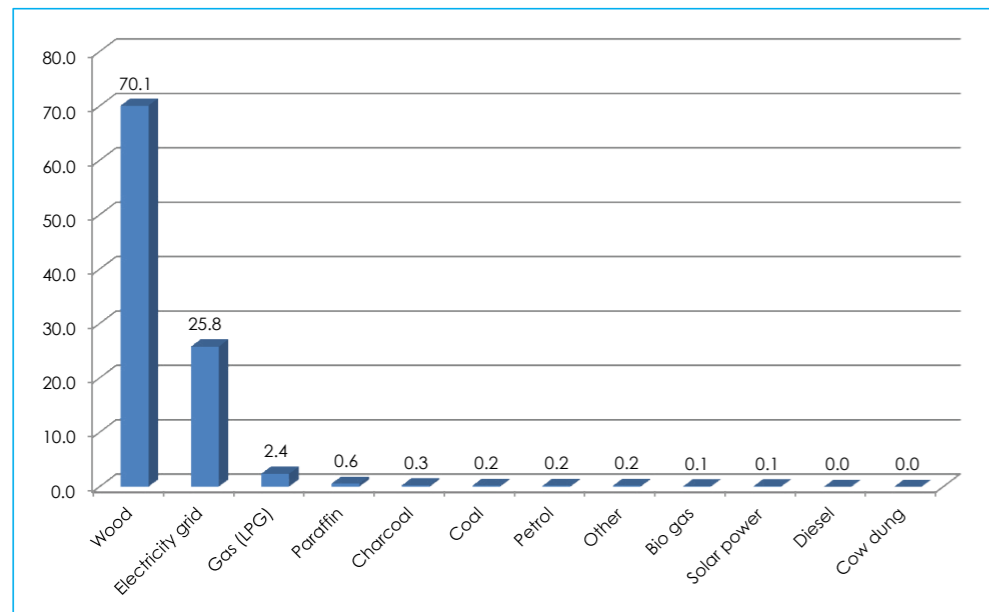

Figure 12: Distribution of Households by Source of Fuel for Cooking in Kweneng East District 2011

15.0 Sources of Fuel for Heating

Regarding the source of fuel for heating of space, the majority of the households (70.1 percent) in Kweneng East used wood, followed by the electricity grid at 25.8 percent. Furthermore, as it was the case with fuel for lighting and cooking, use of other sources of fuel was marginal.

Figure 13: Distribution of the Households by Source of Fuel for Heating in Kweneng East District 2011

Annexes

Table 1: Distribution of Population by Sex and Villages in Kweneng East District 2011

Village	Sex		Total	Percentage
