PREFACE

This publication is the fourteenth in the series of Tourism Statistics. It is an annual publication of the Central Statistics Office (CSO). The information contained in this publication is compiled from arrival/departure forms, obtained from the Department of Immigration.

Travelers leaving or entering Botswana are required to complete arrival and departure forms at all boarder posts in Botswana. In case of those immigration posts handling heavy passenger traffic, recording more than 400 arrivals/departures a month, a ten percent sample of forms is selected for analysis and the resulting figures are grossed up accordingly to give national estimates. Forms from Boarders with low passenger traffic are not sampled but a 100 percent analysis is done. However, Botswana citizens are not required to complete immigration forms. The figures on arrivals and departures contained in this publication therefore cover only non-citizens, both visitors and temporary residents of Botswana.

It is important for the Immigration Department to ensure that the arrival/departure forms are completed properly and by all non-citizens as this will help to improve the quality of data. Also, the Tourism Department should continue to encourage hotels to submit their monthly returns.

Users who require more information can contact the Demography Unit of CSO at the address on the copyright page. This publication is a result of cooperative efforts by the Immigration Department and Central Statistics Office.

1.0 Introduction

Tourism Statistics Report is an annual publication containing statistics of residents and non-residents entering and leaving the country. It also contains information on country of residence, nationality, purpose of entry, mode of travel, point of entry/departure, age and sex of travellers. This information is collected through the border posts from the departure/entry forms, which are completed by persons crossing the border. It is worth noting that only non-citizens are required to complete this form.

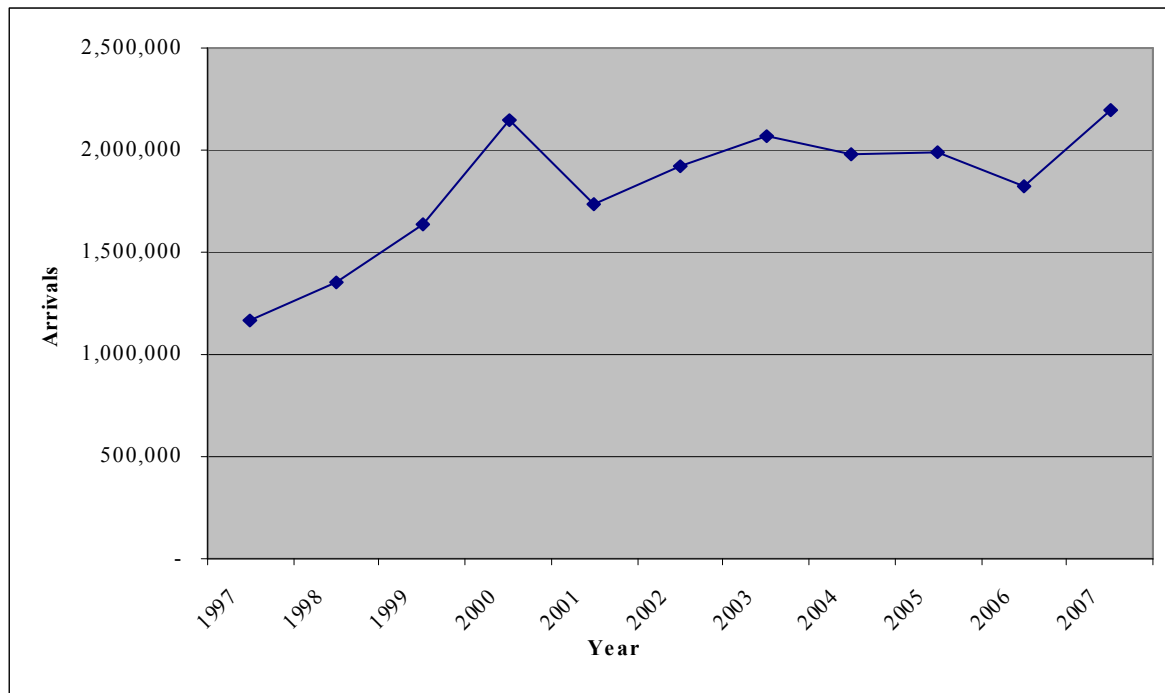

2.0 Arrangement of Tables

Tables in this publication are categorized into arrivals and departures. Tables 1 to 15 give information on arrivals, while information on departure is through Tables 16 to 21.

3.0 Total Arrivals

A total of 2,200,953 arrivals were recorded in 2007 (Table 1). This shows an increase of 20.9 percent from 1,820,057 in 2006. The Chart below shows trends in arrivals from 1997 to 2007. The arrival pattern indicates that, from 1997 to 2000 there was an increase except in 2001, 2004 and 2006.

Chart 1: Total Arrivals 1997 - 2007

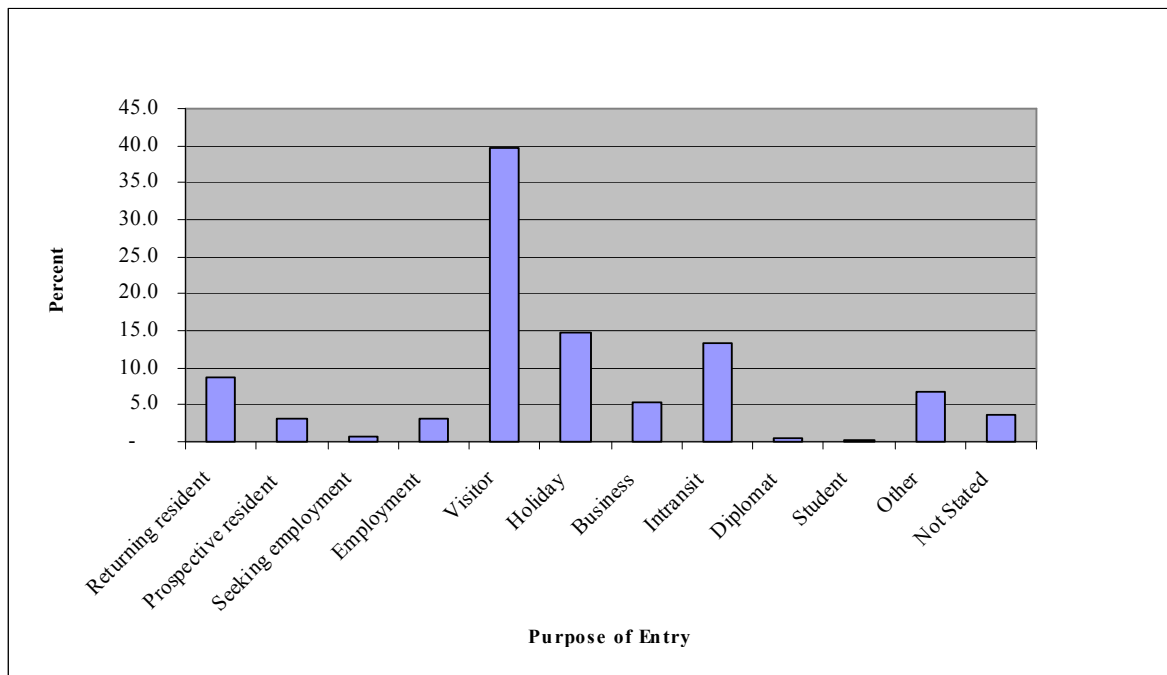

3.1 Arrivals by Country of Residence

The highest proportion of arrivals was from Africa, followed by Europe, America, Asia in that order. Oceania had the least number of people coming to Botswana. In Africa, Zimbabwe constituted the highest proportion (36.4 percent) of all persons who came to Botswana as compared to 2006 where South Africa had the highest proportion (31.2 percent).

3.2 Arrivals by Purpose of Entry

Table 2 and Chart 2 indicate that most of the arrivals came as visitors (39.6 percent) followed by those on holiday (14.7 percent). Those who came as students constituted the least proportion. More males entered the country for different reasons than their female counterparts, except for visiting reasons where females dominated males. Table 4 indicates that the highest number of people entering for visiting purpose came from Zimbabwe, while South Africa recorded the highest percent of those who entered for holiday purpose. The figure below shows that visiting was the main purpose for entering the country.

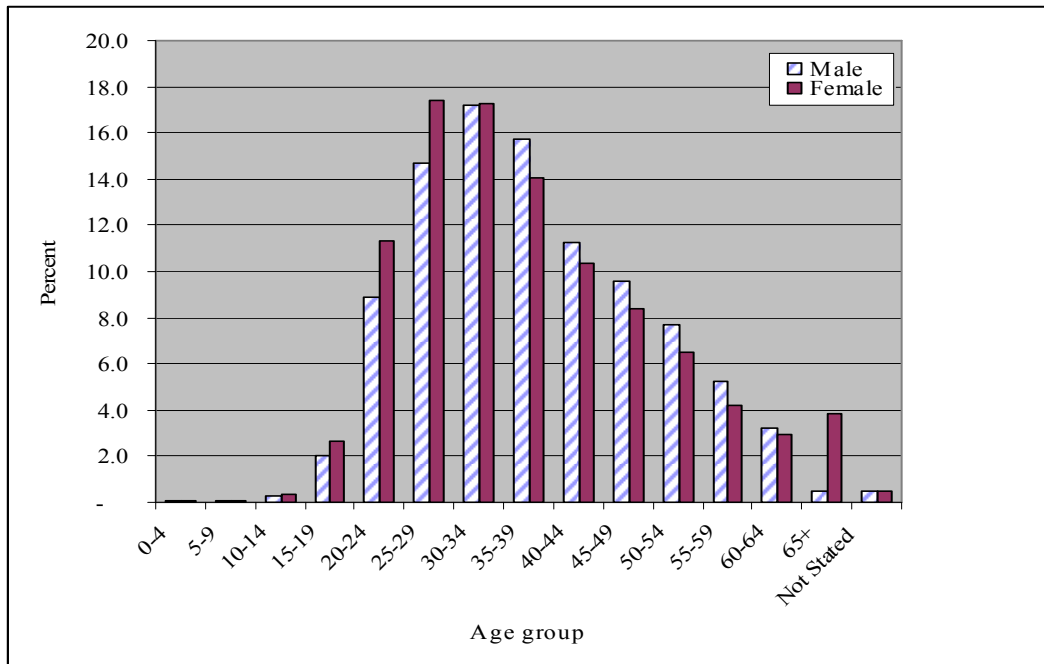

Chart 2: Percentage of Totals by Purpose of Entry - 2007

3.3 Arrivals by Sex and Age Group

The report shows that males constituted the highest proportion of arrivals than females. There were about 1.3 million males and about 0.9 million female arrivals (Table 9). Most of persons who came were aged between 20- 49. The highest proportion was in age group 30–34 with 17.2 percent, followed by age group 25-29 with 15.8 percent and 15.0 percent of age group 35-39 (Chart 3). The lowest number of arrivals was recorded in the age group 5-9 years (0.1 percent) followed by 0-4 years (0.1 percent).

Chart 3: Percentage of Total Arrivals by Age Group and Sex – 2007

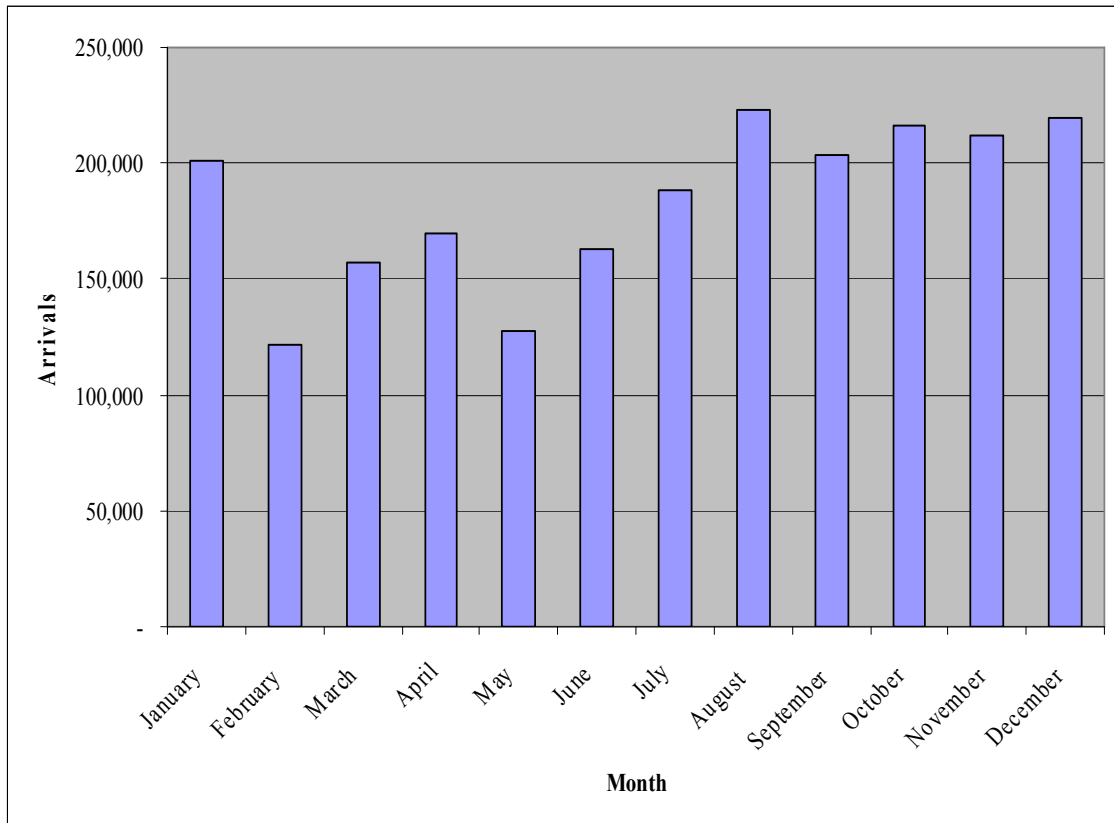

3.4 Arrivals by Border Post

Of all the arrivals, 33.1 percent used Ramokgwebana road as the point of entry (Table 7), followed by Tlokweng gate and Kazungula Ferry at 11.7 percent and 7.5 percent respectively. The lowest proportion of entrants used Boshhoek as their point of entry (0.01 percent). Among those who used airport as their entry point, Sir Seretse Khama had the highest proportion (3.6 percent) followed by Maun Airport (1.3 percent). Ramokgwebana Rail as the only rail that operates, has the lowest proportion of arrivals compared to other modes of travel (road and air).

3.5 Month of Arrival

Chart 4 shows that August was the busiest month of arrival with 222,798 persons entering the country, followed by December (219,179) and October (215,857). According to Table 7, the least number of arrivals occurred in February (121,972).

Chart 4: Total Arrivals by Month of Arrivals – 2007

3.6 Mode of Travel

The most common mode of travel was road, which accounted for 90.8 percent of all persons who entered the country (Table 8). This is attributable to the fact that most of the entry borders are through the road. Those who used air and rail were 5.5 percent and 3.7 percent respectively.

4.0 Total Departures

A total of 2,126,902 departures were recorded in 2007 (Table 16). There was a slight increase of 7.1 percent from 2006 departures figure of 1,985,858. In 2007 there were more arrivals than departures, however in 2006 there were more departures than arrivals. Of all the departures, males constituted a higher percentage (60 percent) than females.

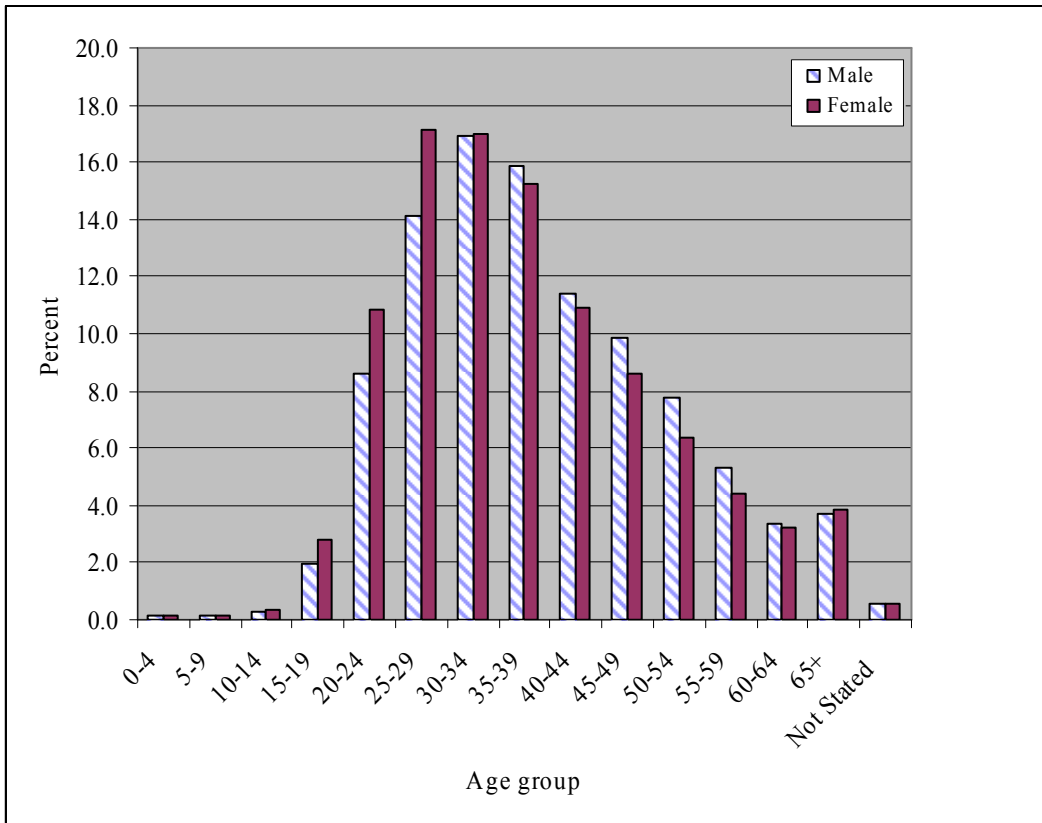

4.1 Departures by Country of Residence

People departing from Botswana were mostly from Southern Africa, with Zimbabwe constituting the highest percentage (34.3 percent) followed by Republic of South Africa (29.5 percent), (see Table 16). Most of departures from the continent of America were residents of United States of America. From European countries, most departures were residents of the United Kingdom while for Asia, majority were residing in Japan.

4.2 Departures by Sex and Age

Chart 5: shows that age group 30-34 recorded the highest proportion of total departure, which accounted for 17.0 percent, followed by age group 25-29 with 15.3 percent and 35-39 respectively with 15.2 percent. Of all the departures aged 65 and above, 38.3 percent are from South Africa (Table 17).

Chart 5: Percentage of Total Departure by Sex and Age Group - 2007

4.3 Distribution of Departure by Month, Mode of Travel and Border

Most of the departures in 2007 left during December (13.6 percent) followed by August (9.7 percent) and September (9.6 percent) and then October and July (8.8 percent and 8.6 percent respectively) as shown in Table 20. The highest proportion left through Ramokgwebana road (31.7 percent) followed by Tlokwen (12.8 percent) and then Kazungula ferry (8.1 percent), see Table 20. Majority of monthly departures were by road (91.8 percent) followed by those who used air with 5.6 percent while rail was 2.6 percent (Table 21). Among those using air as their mode of travel 63.7 percent used Sir Seretse Khama airport and Shakawe airport was the least with 0.0 percent. Of all the departures 2.5 percent used Ramokgwebana Rail as their mode of travel.
