## PREFACE

This report is a revised version of the report that was released on the 7th of July 2020. The revision is on Table 1. The revised figures are the totals of the Top Ten Overseas Countries and All other Countries (the difference between the Sub-Total and Grand Total). This in turn affects the percentage increase in the number of tourists compared to the previous year and proportion of total tourists from the top ten overseas countries (3.1 instead of 3.5 percentage increase and 12.3 instead of 12.6 percent) highlighted in the Executive Summary (1st Paragraph and 2nd paragraph respectively). The revision was necessitated by the need to correct the erroneous recording of the overall totals in Table 1, however the individual country totals are correct.

This tourism annual report provides statistics on both visitors and non-visitors during 2018.

The information contained in this publication is compiled from completed immigration embarkation forms. Non-citizen travellers entering and leaving the country are required to complete arrival/departure forms at all gazetted points of entry/departure. This covers all land borders as well as airports.

Users who require more information can contact the Directorate of Stakeholder Relations on 3671300. All Statistics Botswana outputs/publications are available on the website at [www.statsbots.org.bw](http://www.statsbots.org.bw) and at the Statistics Botswana Information Resource Centre (Head-Office, Gaborone).

I sincerely thank all stakeholders involved in the formulation of this report, particularly the Department of Immigration and Citizenship for the administrative data used to compile this Tourism Statistics Annual Report. I also thank all other stakeholders for their continued support as we strive to better serve users of our services.

## EXECUTIVE SUMMARY

Tourists refer to both same day visitors and overnight tourists. In 2018, the country received a total of 1,830,274 visitors, with 90.4 percent attributable to tourists (overnight visitors). This shows a 3.1 percent increase in the number of tourists compared to the previous year. Visitors from South Africa accounted for 35.0 percent while those from Zimbabwe represented 29.5 percent of total visitors during the year.

Tourists from the top ten overseas countries accounted for 12.3 percent of total tourists during the year. Tourists who came for "Holiday" accounted for 22.5 percent of total tourists during 2018, while those who came for "Visiting Friends & Relatives" (**VFR**) and "Business" represented 27.0 percent and 23.3 percent respectively. Tourists who entered the country by air represented 7.1 percent of total tourists during the year. Among the tourists who came by air, Sir Seretse Khama International Airport accounted for 54.3 percent while those who entered through Maun Airport represented 30.7 percent.

December was the most popular month of arrival for tourists during 2018, with 10.5 percent, followed by August and July at 9.5 percent and 9.4 percent respectively. Ages ranging from 25 to 44 years, accounted for 58.2 percent of total tourists during the year.

The figure of 2,587,511 was recorded for all arrivals while 2,626,237 was recorded for all departures during 2018. Travellers in transit accounted for 26.1 percent of all arrivals, followed by those that came for Visiting Friends and Relatives at 19.1 percent. Zimbabwe nationals accounted for 34.4 percent of all arrivals and 35.0 percent of departures during the year under review. Arrivals of South African nationality accounted for 30.2 percent while departures represented 30.4 percent of all departures from South Africa during 2018.

Ramokgwebana Border Post was the busiest during 2018, having received 20.3 percent of all arrivals while 18.9 percent of all departures went out through the same border post.

## CHAPTER 1: INTRODUCTION AND BACKGROUND

### 1.1 Introduction

This report presents the statistics on arrivals and departures during 2018. The report is categorised into two parts, the first part giving information on tourists only, while the second part presents information on all arrivals and departures during the year under review.

#### 1.1.1 Arrangement of the Report

This report categorises the travellers into two parts. The first part presents characteristics of visitors in **Chapter 2**. The second part, presented in **Chapter 3** focuses on all travellers entering and departing the country. **Chapter 4** gives Sources, Methods and Definitions of terms used in the report, while **Chapter 5** contains appendices, consisting of detailed tables on which smaller tables and graphs, included in the body of the report are based.

#### 1.1.2 Limitations of the Report

The focus of data collected is currently on non-citizens (temporary residents and foreign nationals) only. This report does not provide inbound and outbound data on citizens. As a consequence of having both automated and non-automated border posts in operation, it is not possible to calculate the actual length of stay of visitors even though data on the amount of time (days) granted is captured in the Immigration Entry/Departure forms. As people can enter the country through an automated border post but depart through a non-automated border post, this makes it difficult to calculate the actual length of stay in the country as data from automated and non-automated borders cannot be reconciled.

### 1.2 Background

The Tourism statistics report is an annual publication that depicts the statistics of non-citizens including temporary residents entering and leaving the country. The common terms used for these are Arrivals and Departures.

The statistics carried in this report include Arrivals and Departures of visitors and non-visitors by country and region of nationality, residence, purpose of entry, mode of travel used, point of entry and exit as well as gender and age distribution. The information contained in this report is derived from the Department of Immigration and Citizenship Arrival/Departure forms, which are completed by non-citizens at points of entry and exit.

The Department of Immigration and Citizenship has automated the busiest border posts which handle high volumes of traffic and is therefore able to provide Statistics Botswana with data electronically. These borders account for over 90 percent of all inbound and outbound travellers.

Forms from the non-automated borders are captured by Statistics Botswana and the information is then merged with those from the automated borders before analysis. Botswana citizens are exempt from completing the immigration Entry/Departure forms. The figures on Arrivals and Departures contained in this publication therefore only cover non-citizens, both visitors and temporary residents of Botswana. However, with the increasing demand for statistics on outbound travellers, including information on citizens, it will be necessary to collect and compile data on citizens in the future.

## CHAPTER 2: TOURISTS

This chapter gives information on inbound visitors who came into the country in 2018. These visitors are classified into same-day visitors and tourists. Same-day visitors are mostly excursionists who take a trip that does not include an overnight stay, while tourists (overnight) represents visitors who spend at least a night at the country being visited. The chapter details statistics compiled according to country and region of residence, purpose of visit, mode of travel, month of visit, point of entry as well as the demographic characteristics of the visitor.

Accordingly to World Tourism Organization guidelines for compilation of tourism statistics, half of transit travellers are regarded as visitors. This is taking into consideration the fact that some of these transit travellers end up having expenditure in the country as they are transiting. This expenditure may be incurred through having to spend a night in the country and/or any other expenditure. As a result, tourist statistics discussed here includes half of transit travellers. The country of residence as opposed to nationality, is used as reference when compiling tourist statistics.

### 2.1 Tourists by Country and Region of Residence

**Appendices 1** and **2** are dedicated to tourists only. **Appendix 1** gives both overnight tourists and same day tourists by country of residence as well as percentage distributions of total tourists at country level. **Appendix 2** presents tourists by Country of Residence as well as Purpose of Visit.

During 2018, Botswana received a total of 1,830,274 visitors, with 90.4 percent (1,654,638) accounted for by tourists. The total number of tourists shows a 3.1 percent (55,314) increase compared to 1,774,960 during the previous year. As can be seen from **Appendices 1 and 2**, most visitors came from South Africa and Zimbabwe, with the two countries contributing 35.0 percent (639,867) and 29.5 percent (539,059) respectively, of the total visitors during the year. The majority of tourists, 83.2 percent (1,522,256), reside in the SADC Region.

### 2.2 Tourists from Top Ten Overseas Countries

**Table 1** which is based on **Appendix 1**, shows that the top ten overseas countries recorded 224,360 tourists, accounting for 12.3 percent of total tourists (1,830,274) during 2018.

Of the 224,360 tourists that reside in the top ten overseas countries, more than a quarter, 28.6 percent (64,126), were residing in the United States of America followed by those residing in Germany and the United Kingdom at 18.8 percent (42,111) and 14.9 percent (33,392) respectively.

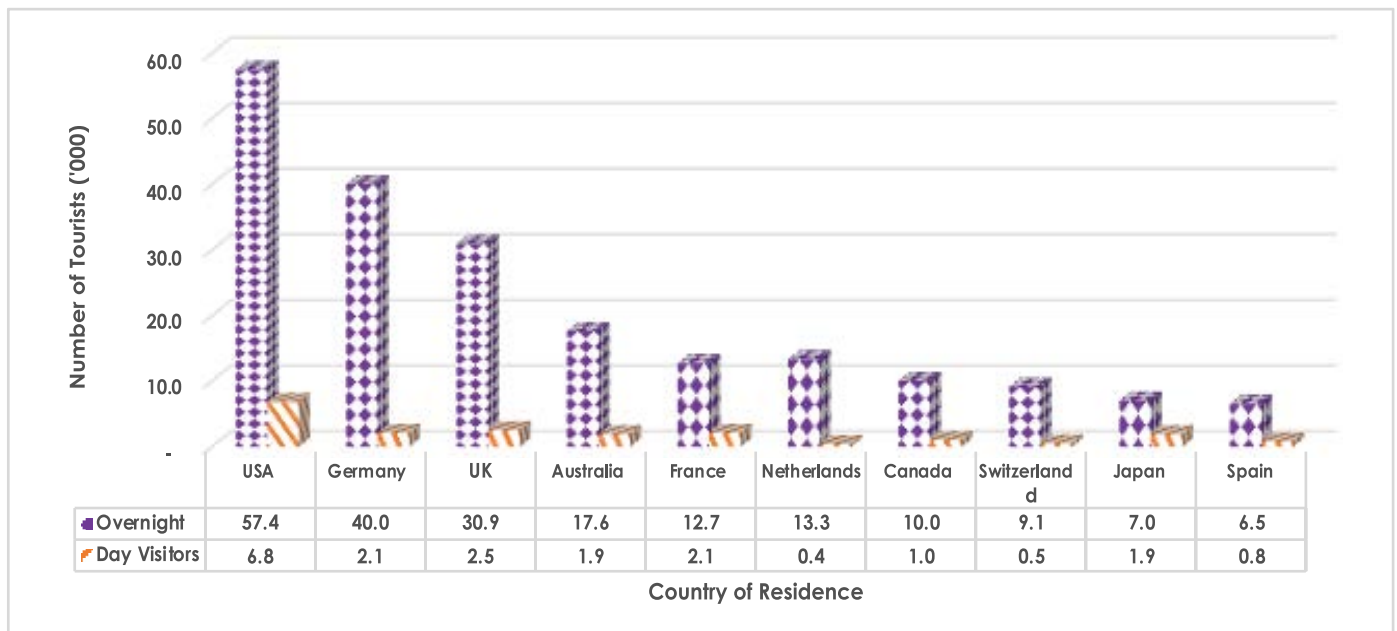

Overnight Tourists from the Top Ten Overseas Countries make more than 90 percent of the total tourists from most of those countries, with the exception of the United States of America, France, Japan and Spain where overnight tourists percentage contribution to total tourists were 89.5 percent, 85.9 percent, 78.6 percent and 88.8 percent respectively.

### 2.3 Tourists from Top Ten SADC Countries

Figure 2 and Table 2 show the top ten countries that provided tourists from the SADC Sub-continent. Tourists residing in the top ten countries of the SADC region make up 83.1 percent (1, 520,446) of the total tourists during the year under review. This shows a decrease of 1.3 percentage points compared to the region's contribution of 84.4 percent during 2017. South Africa and Zimbabwe were the major contributors at 42.1 percent (639,867) and 35.5 percent (539,059) respectively.

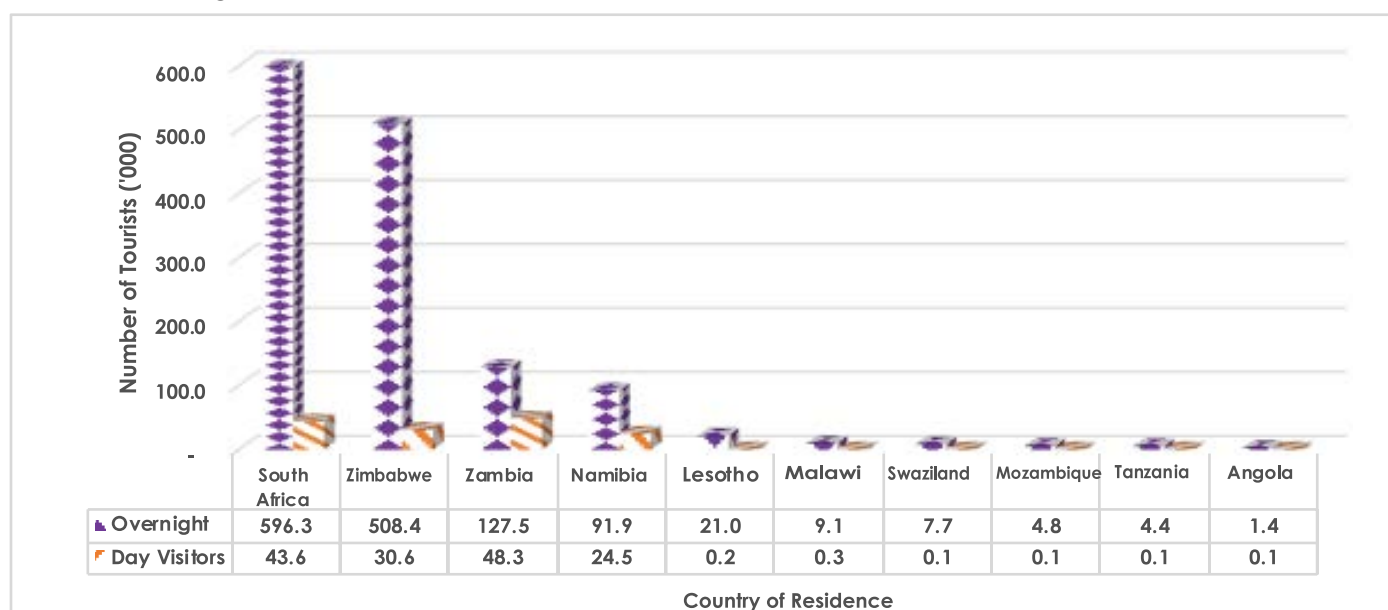

Overnight Tourists constituted at least 90 percent of total tourists at country level for the top ten SADC countries, with the exception of Zambia and Namibia. Zambia accounted for the highest number of Day trippers at 32.6 percent (48,254) followed by South Africa with 29.5 percent (43,563). Completing the top four in Day trippers

are Zimbabwe and Namibia at 20.7 percent (30,611) and 16.5 percent (24,452) of all day trippers from the ten leading SADC countries, respectively.

Compared to the previous year, 2018 recorded an increase of 3.1 percent (55,314) in the total number of tourists, from 1,774,960 during 2017 to 1,830,274. A significant decrease in purpose of entry was observed for those on 'Holiday', at 18.1 percent (91,040) from 502,309 in 2017 to 411,980 in 2018. An increase of 24.0 percent (95,560) was recorded for those who came to Visit Friends and Relatives from 411,980 in 2017 to 426,782 in 2018.

There has been an increase in the number of tourists who came for purposes of "Religious, Conferencing, Sports, Medical & Shopping activities" which are grouped together under one category called 'Other' Purposes. The number of tourists for this purpose has increased slightly from 156,756 in 2017 to 159,983 in 2018.

## 2.5 Tourists by Mode of Arrival

**Table 4** presents tourists by mode of travel. There are three modes of travel used in Botswana; these being Road, Rail and Air. Air Travel presents major Airports separately while Airstrips are grouped together under one category called "Other". Percentage distributions for type of tourist by airport are calculated as a percentage of the total for individual type of tourist by air, while percentages for type of tourist by Air, Rail and Road are calculated as a percentage of the overall tourist total.

Road accounted for the highest percentage of tourists who came into the country at 92.7 percent (1,697,544), followed by those who flew-in at 7.1 percent (129,323). Air travel shows an increase of 8.3 percent (9,914) from 119,409 recorded in 2017 to 129,323 in 2018. Rail Travel recorded 3,407 tourist arrivals which shows a significant increase compared to 62 rail travel arrivals in 2017.

Majority of tourists travelling by air, 54.3 percent (70,255), entered the country through Sir Seretse Khama International Airport (SSKIA). These were followed by those who landed in Maun Airport at 30.7 percent (39,649). Tourist arrivals through Kasane Airport accounted for 11.6 percent (15,032) of total tourist arrivals by Air.

A further analysis of tourists who came by Air by purpose of entry shows that most of the tourists who were 'Visiting Friends and Relatives' (**VFR**) came through SSKI Airport, at 85.8 percent (10,802) of visitors who came for that purpose by air. Those who came for 'Business' through SSKI Airport accounted for 92.7 percent (51,165) of all tourists arriving for that purpose by air (**Table 4**). The tourists who came for 'Holiday' purpose entered the country through Maun and Kasane airports mainly, with Maun accounting for 62.6 percent (37,057) while Kasane received 21.2 percent (12,535) of tourist arrivals who came by air for 'Holiday'.

In-transit arrivals came in mostly through Kasane Airport, with this airport constituting 79.4 percent (1,386) of all Air Tourists who were In-Transit. Sir Seretse Khama International Airport accounted for the bulk of 'Other' visitors at 88.6 percent (527).

## 2.6 Tourists by Point of Entry

**Appendix 2A**, shows the number of tourists by Point and Purpose of Entry. Ramokgwebana Border Post accounted for the majority of tourists who came into the country in 2018, at 18.3 percent (355, 567) followed by Tlokweng Border Post at 14.2 percent (259, 050). Sir Seretse Khama International Airport is the only air point of entry in the top ten busiest points of entry for tourists. Tourist arrivals through this airport accounted for 3.8 percent (70, 255) of total tourist arrivals.

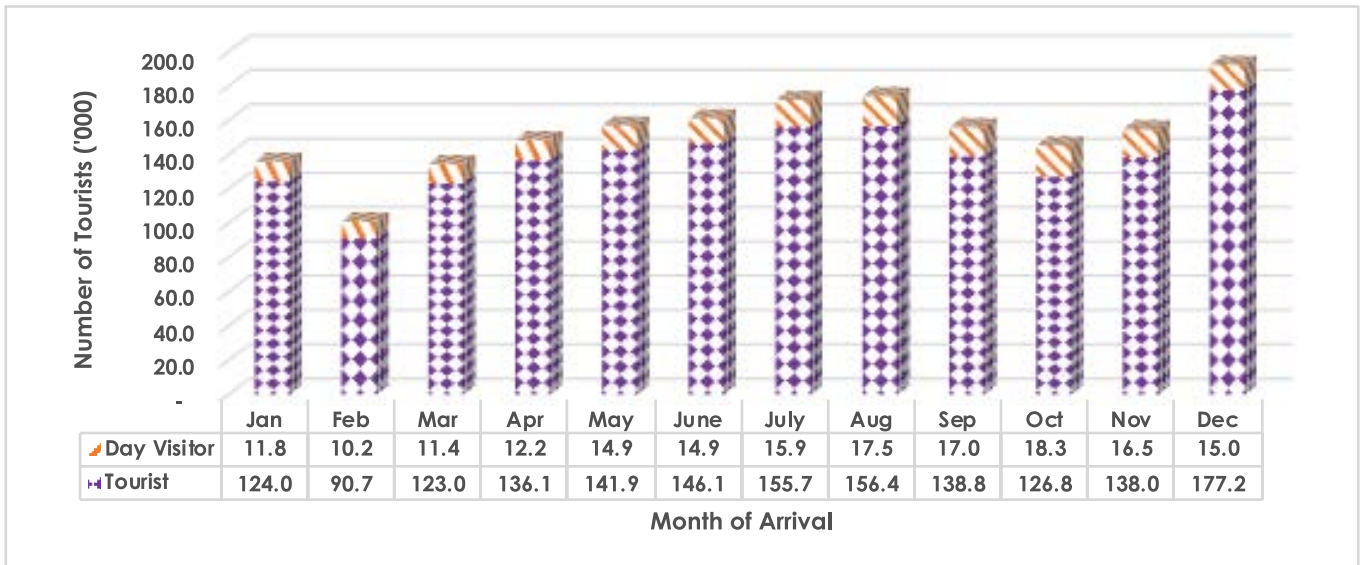

## 2.7 Tourists by Month of Arrival

**Figure 3** and **Table 5** display tourist arrivals by Month of Arrival. The figure presents stacked bar chart showing both day trippers and overnight tourists, but discussions are based on total monthly tourist arrivals. December recorded the highest number of tourists at 192,194 (10.5 percent), followed by August and July with 173,897 (9.5 percent) and 171,607 (9.4 percent) respectively. The month that recorded the least number of tourists is February at 100,855 (5.5 percent).

### 3.4 Age Group

**Figure 10**, which is based on **Appendix 8** and **Appendix 19**, shows that the age group that accounted for the highest number of arrivals was 35-39 years having recorded 396, 744 representing 15.3 percent, followed by the age group 30-34 with 374, 671 accounting for 14.5 percent of all arrivals.

The age-group 35-39 accounted for the highest number of departures at 401, 257 accounting for 15.3 percent, followed by those aged 30-34 at 370, 934 representing 14.1 percent.

### 3.5 Nationality

**Appendix 3** and **Appendix 16** show that most of the arrivals and departures are nationals of the SADC Region, making 84.8 percent (2,194,391) of all arrivals and 85.5 percent (2,246,242) of all departures. These appendices show that Zimbabweans accounted for most of the movements with 34.4 percent (889,767) of all arrivals and 35.0 percent (919,982) of all departures.

South African nationals followed at 30.2 percent (780,230) of all arrivals and 30.4 percent (799,508) of all departures. Arrivals from South Africa increased by 10.5 percent (74,236) compared to 705,994 observed in 2017 while departures for the same country recorded an increase of 14.5 percent (101,172) from 698,336 observed in 2017.

### 3.6 Border Posts

Discussion on Border Posts is based on **Appendices 13** and **20**.

Ramokgwebana Border Post was the busiest border having received 20.3 percent (525,111) of all arrivals and facilitated 18.9 percent (496,267) of all departures. This is consistent with the fact that most of the travellers came into Botswana from Zimbabwe, see Appendix 4. Tlokweng Border Post, which is used mainly by those who reside in South Africa, followed with 13.7 percent (355,616) of Arrivals and 14.6 percent (384,742) of departures. The third busiest border post was Kazungula Ferry which received 10.1 percent (260,614) of total arrivals and facilitated 9.8 percent (256,460) of total departures.

**Figure 11**, which is based on Appendices 13 and 20 shows the top ten busiest Border Posts.

Ramokgwebana Border Post which connects Botswana and Zimbabwe, shows that during 2018 there were more arrivals than departures. Tlokweng and Martin's Drift border posts, which connect Botswana and South Africa show that there were more departures than arrivals during the same period.

## CHAPTER 4: TECHNICAL NOTES

This chapter presents data sources, methodology and definitions of terms used in production of tourism statistics. This is meant to enable the users to interpret the statistics carried in the report with understanding of how the raw data is sourced, how processing and compilation of the report is done and what the various terms used in the report mean.

### 4.1 Data Source and Methodology

The data used in the production of this report is sourced from administrative records of the Department of Immigration and Citizenship.

International Tourist data is collected using Arrival and Departure forms that are filled in by non-citizens at all gazetted points of entry and exit (Land Borders and Airports). Each form asks questions on personal characteristics of the traveller which include among others, sex, age, country of nationality, country of residence and purpose of entry. By default data is also collected on month of travel, mode of transport and point of entry.

Percentages are independently rounded, therefore in some cases they may not add to the total. The results and analysis presented in the report follow the guidelines, definitions and classifications recommended by United Nations World Tourism Organization (UNWTO) and the United Nations Statistical Commission (UNSC). This publication is produced in line with internationally accepted statistical standards and guidelines.
