PREFACE

This is the third issue of the Vital Statistics Report produced. The report is intended to provide a quick reference to some basic population indicators as well as the performance of Vital Statistics in the country. It is organized in three parts, i) Births, ii) Marriages and iii) Deaths.

This Report gives an analysis of births, deaths and marriages registered in 2013. As part of the continuing process of improving the series of this report, an analysis of divorce cases derived from the High Court database will be added to the forthcoming reports.

This publication was produced from the administrative data obtained from the Department of Civil and National Registration of the Ministry of Labour and Home Affairs.

For more information and further enquiries, contact the Directorate of Stakeholder Relations at 3671300. All Statistics Botswana outputs/publications are available on the website at www.cso.gov.bw, Statistics Botswana Library (Head-Office, Gaborone).

INTRODUCTION

The United Nations defines Civil registration as the continuous, permanent, compulsory and universal recording of the occurrence and characteristics of vital events pertaining to the population as provided through decree or regulation in accordance with the legal requirements of a country. Civil registration is carried out primarily for the purpose of establishing the legal documents provided by the law. These records are also a main source of vital statistics. Complete coverage, accuracy and timeliness of civil registration are essential for quality vital statistics.

Civil Registration and Vital Statistics (CRVS) was identified as one of the areas that African countries need to focus on. This decision was made at the 6th African Symposium on Statistical Development held in Cairo, Egypt in 2010. The ASSD is a forum that was created to address a concern by African statisticians based on the poor performance of African countries in the previous population and housing censuses. This was then extended to other areas that needed strengthening, and CRVS was identified and scheduled to run for a five year duration from 2010.

SOURCES OF DATA

Administrative data for births and deaths are availed to Statistics Botswana in electronic format by the Department of Civil and National registration (CNR) for analysis and report writing. Marriage data is extracted manually from the marriage certificates filed with the Department of CNR and then processed by the Crime, Civil and Vital Statistics Unit of Statistics Botswana. Divorce data is captured by the Administration of Justice (AOJ) but to this end no report has been produced on divorces because all demographic variables needed for statistical purposes are not captured in the AOJ system. However plans are underway to capture the missing variables in the system.

COVERAGE OF THE REPORT

Births and deaths analysed in this report are events that occurred both in 2013 and prior to 2013 and were registered in 2013. However, the data for marriage covers only marriages that occurred and were registered in 2013. These marriages were solemnized in Botswana for each calendar year by either the District Commissioner or church minister appointed by the Minister of Home Affairs as a marriage officer. The report includes births, deaths and marriages occurring to citizens and non-citizens within the borders of the country.

Table 1: Selected Indicators on births 2011 - 2013

		2011	2012	2013
Births (registered)				
Male	number	19,748	20,738	22,732
Female	number	19,620	20,118	22,062
Total	number	39,368	40,856	44,794
Sex ratio	ratio	100.7	103.1	103.03
Nuptial births	Percent	23.2	23.0	22.47
Ex-nuptial births	Percent	76.8	77.0	77.53
Mean age of mother at birth	years	27.3	27.3	27.36
Birth registration	Percent		76.9	85.0
Health facility deliveries	Percent	99.3	99.7	99.2

NB: The figures in the table above refer to currently registered births
Ex-nuptial birth includes births to never married, widows and the divorced.
Births sourced from 2011 population projections using low variant scenario

2.1. BIRTH REGISTRATION

The scope of the statistics on birth registration includes both live and still births, births that occurred in 2013 and earlier years that were not previously registered (late registration), all births that occurred within the country borders and births to non-citizens.

The total number of births that were registered in 2013 is 69 809 as shown in Table 2.1 below. This number comprises of live births and still births that occurred during or prior to 2013 and registered in 2013. Out of this number around 65.0 percent were births that occurred and were registered in 2013, which for purposes of this analysis will be referred to as current births, and most part of the report will be based on these current births.

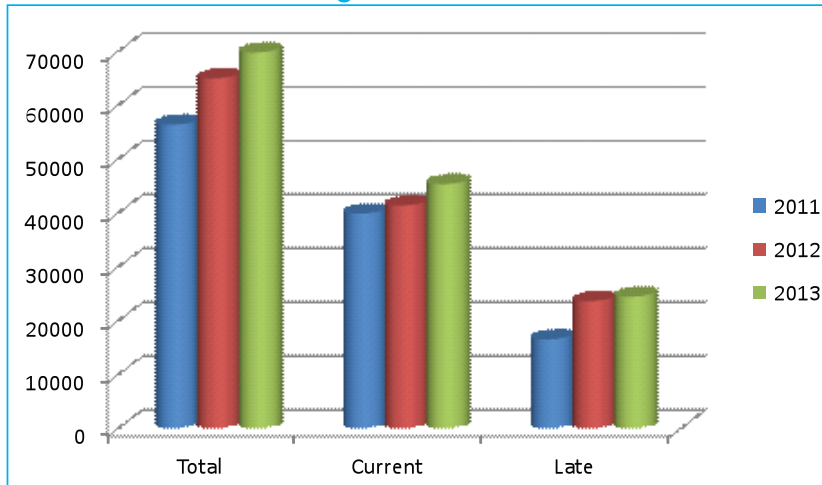

Table 2.1: Registered births by type of birth and status of registration-2013

TYPE OF BIRTH						
		Live Births		Still Births		Total
Status	Number	Number	Percentage	Number	Percentage	
Current	Number	44 794	98.77	558	1.23	45 352
	Percentage	64.69		97.89		64.97
Late	Number	24 445	99.95	12	0.05	24 457
	Percentage	35.31		2.11		35.03
	Total	69 239		570		69 809

TRENDS IN BIRTHS REGISTRATION

Chart 1 below shows that the number of births registered increases every year. There were 69 809 births registered in 2013, an increase from 64,999 in 2012 and 56,404 in 2011. This significant increase might be due to the on the spot registration that started at the end of 2011 and the continuous campaigns for registration of births and deaths by the department of CNR and development partners.

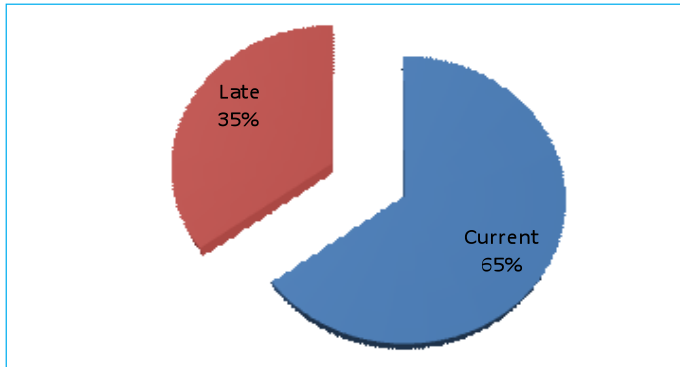

Chart 1: Trends in births registration 2011-2013

2.2 RECORDED LIVE BIRTHS

The total live births registered in 2013 were 69,239 across the country. The total consists of current registrations and late registrations. For the purpose of discussion in this report, current registration refers to births that occurred and were registered in the reference year, while late registrations refer to births that occurred in earlier years to 2013 but were registered in 2013. Chart 2 below shows that 65.0 percent of the births that were registered in 2013 were current registrations while the remaining were late registrations.

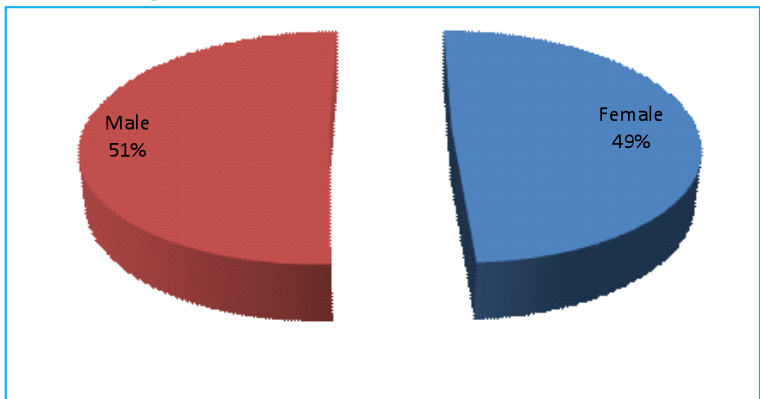

Chart 2: Total Registered births by status of Registration-2013

2.3 SEX OF THE CHILD

Chart 3 shows that for all the births that occurred and were registered in 2013, slightly over half (51 percent) of them were male babies, resulting in a sex ratio at birth of 103 male births per 100 female births.

Chart 3: Registered births by sex-2013

2.4 REGISTERED LIVE BIRTHS BY DISTRICT

Chart 4 shows the distribution of registered births by the district of birth and the district of usual residence of the mother at the time of birth. Around 19 percent of births that were registered in 2013 occurred in Gaborone and the least number of births occurred in Ngamiland Delta. This could be attributed to the fact that Gaborone district has the highest population amongst all the districts, and Ngamiland Delta has the lowest population. It should also be noted that for all cities and towns, the number of births registered given by the birth district is more than births registered given by the residence district. This shows that people move from their usual place of residence to give birth in towns and cities where there are better health facilities.

Chart 4: Registered live births by districts of birth and residence-2013

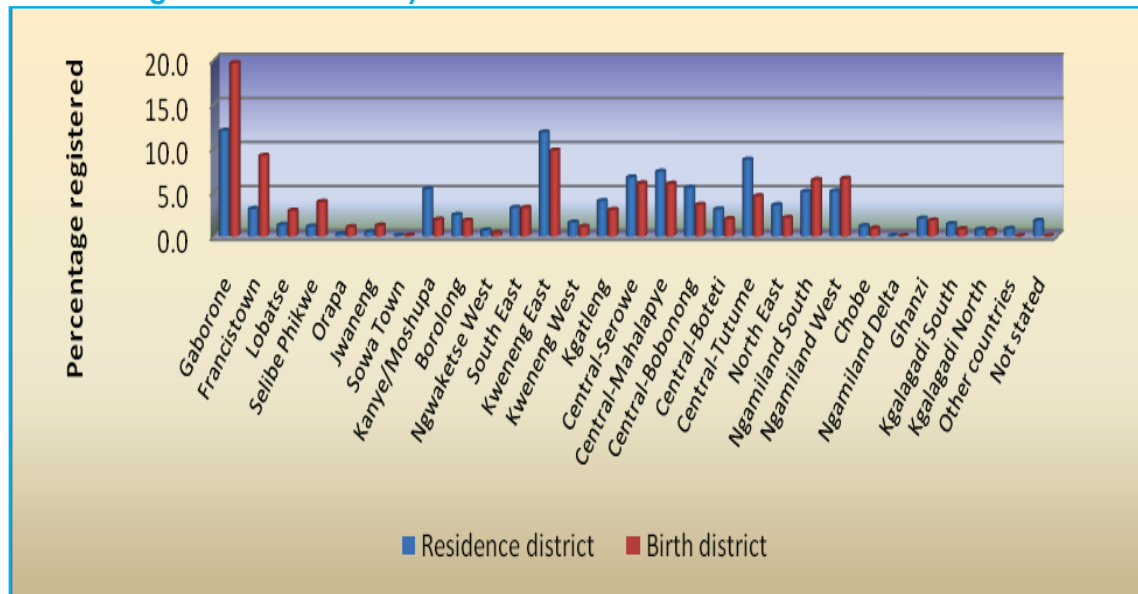

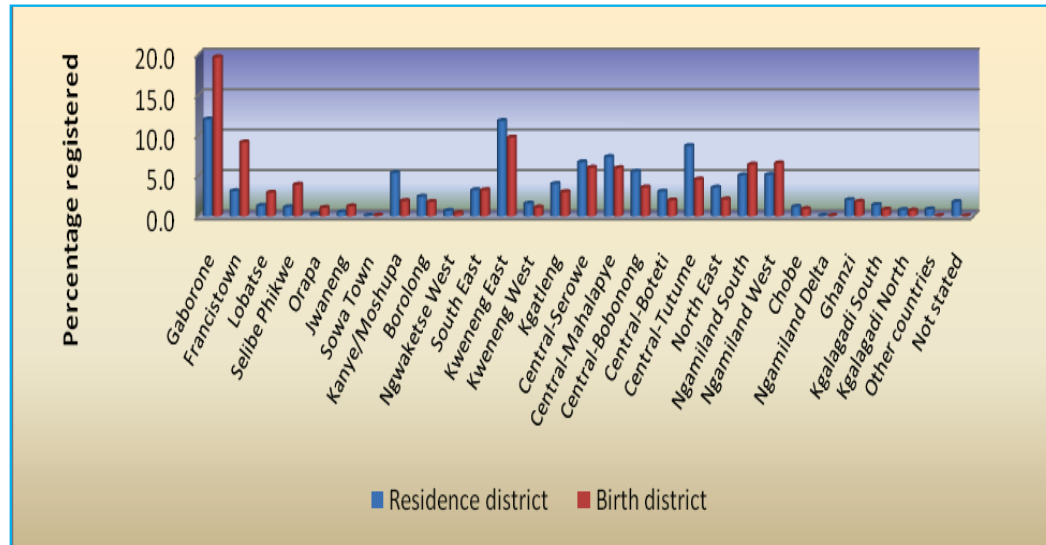

Chart 5 gives a distribution of registered births by registration centres. The table shows that Princess Marina Hospital registration centre registered the highest number of births. Though Princess Marina registered the highest number of births, the number of late registrations is very low as compared to other registration centres.

Chart 5: Registered live births by registration centres and status of registration-2013

2.5 AGE OF MOTHER

Table 2.2 shows the distribution of the registered live births by age of the mother. The highest percentage of live births occurred among women in the age groups 20-24 followed by age group 25-29 and 30-34 accounting for

74.3 percent of all births registered in 2013. About 99 percent of the mothers who gave birth in this year fall within the reproductive ages of 15-49. Only 0.1 percent of the mothers that gave birth in 2013 were aged 13 and 14 years and less than 1 percent were 50 years and above.

Table 2.2: Registered births (current) by age and result of delivery-2013

Age of mother	DELIVERY DATE			Percentage
	1 baby	2 babies	Total	
13	6	-	6	0
14	29	-	29	0.1
13-14	35	-	35	0.1
15	94	-	94	0.2
16	302	2	304	0.7
17	708	1	709	1.6
18	1 231	15	1 246	2.8
19	1 992	14	2 006	4.5
15-19	4 327	32	4 359	9.7
20-24	12 145	90	12 235	27.3
25-29	11 575	169	11 744	26.2
30-34	9 144	171	9 315	20.8
35-39	4 813	109	4 922	11
40-44	1 495	20	1 515	3.4
45-49	143	6	149	0.3
50+	13	-	13	0
Not stated	499	8	507	1.1
Total	44 189	605	44 794	100

Chart 6 shows the age group of mother and status of registration. In the age groups 15-19 there are more late registrations than current registrations whilst in the age groups 20-24, 25-29, and 30-34 a contrary situation is observed.

Chart 6: Registered births by age group of mother-2013

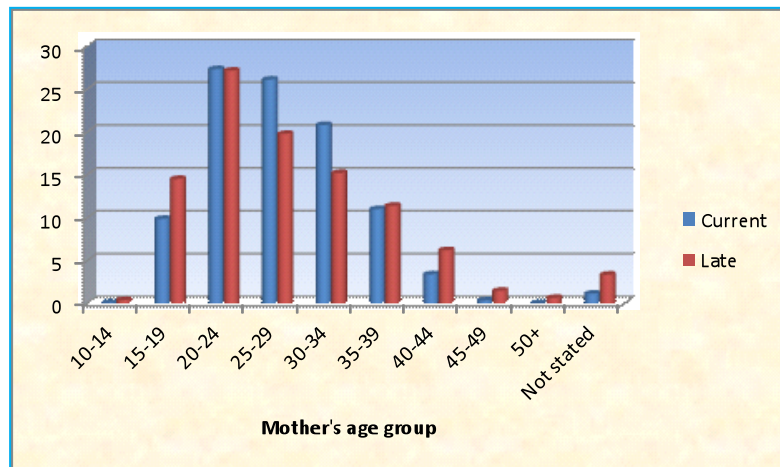

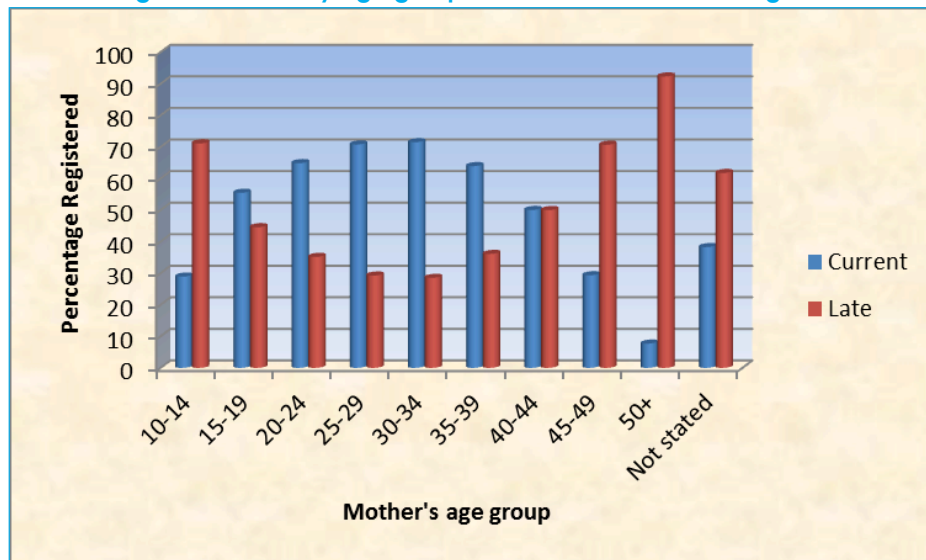

Chart 7 below shows registration of births by age group. A higher percentage of women in the age group 15-44 had registered their children on time as compared to those in age groups 10-14 years and 45 years and above.

Chart 7: Registered births by age group of mother and status of registration-2013

2.6 BIRTHS OCCURRED AND REGISTERED IN 2013

Chart 8 shows that the highest proportion of births (10 percent) occurred during the month of March followed by January, February and April with 9 percent each. The lowest proportion of births occurred during the month of November with 7 percent.

Chart 8: Births occurred and Registered in 2013 by month of birth

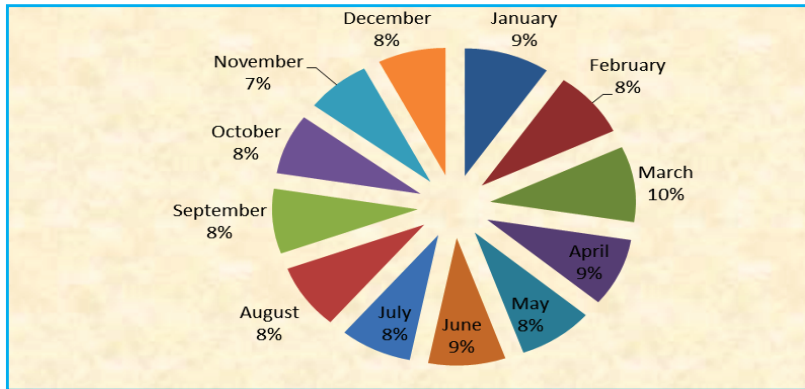

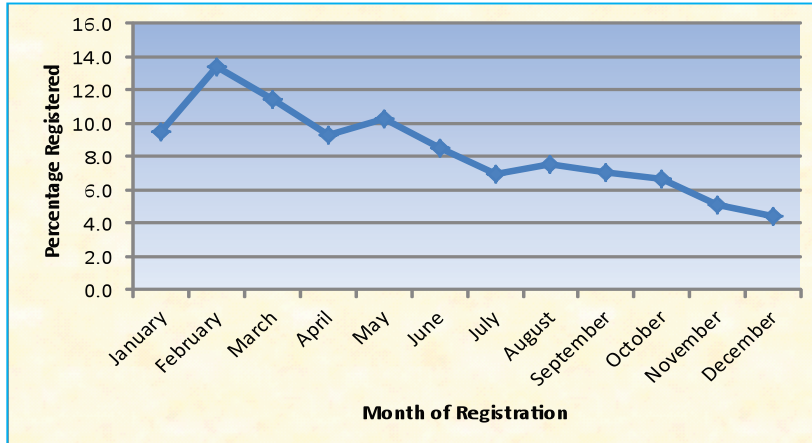

Chart 9 shows a peak of late registrations in the month of February and starts to decline in the month of March and continues the downward trend recording the lowest in December.

Chart 9: Late registration by month of registration-2013

2.7 PERIOD OF REGISTRATION

The table below gives an insight of the period taken from the date of birth to the date of registration. Timely registrations are those registrations that occurred within 60 days as stipulated by the births and deaths act. Any other registration occurring after that is regarded as late registration. In the year 2013, about 62.9 percent of the births were registered within two month from the date of birth and 37.1percent were late registrations of all the registered births 29.6 percent of them were registered after 5 years.

The highest percentage of timely registrations are for mothers who have secondary school as their highest level of education accounting for 58.1 percent of all timely registrations.

Table 2.3: Period taken to register by Level of education

	Period of Registration	LEVEL OF EDUCATION							Total	Percentage
		None	Primary	Secondary	Post-Secondary	Higher	Not stated			
	0-60 days	900	7 817	25 309	4 694	4 861	-	43 581	62.94	
Timely Registration	Percentage	2.07	17.94	58.07	10.77	11.15	-	100		
	2-12 months	75	600	1 794	334	175	-	2 978	4.3	
	1-2 years	31	196	466	80	37	-	810	1.17	
	2-5 years	94	309	761	103	81	-	1 348	1.95	
	5years+	5 328	7 920	6 466	498	293	17	20 522	29.64	
	Total	5 528	9 025	9 487	1 015	586	17	25 658	37.06	
Late Registration	Percentage	21.54	35.17	36.97	3.96	2.28	0.07	100		
Total Registration	Total	6 428	16 842	34 796	5 709	5 447	17	69 239	100	

Table 2.4 below shows the timeliness of birth registration by age group of the mother. The highest number of timely registrations is from the age group 20-24, which turns to be the age group with the highest number of births.

Table 2.4: Period taken to register by age of mother

Age of mother	Period of Registration					Total
	0-60 days	2-12 months	1-2 years	2-5 years	5years+	
10-14	36	4	-	-	88	128
15-19	4 343	239	82	124	3 172	7 960
20-24	11 883	826	241	406	5 511	18 867
25-29	11 375	771	193	380	3 801	16 520
30-34	9 057	601	144	220	3 009	13 031
35-39	4 786	337	87	119	2 373	7 702
40-44	1 471	122	34	53	1 349	3 029
45-49	140	17	6	10	335	508
50+	9	4	-	1	155	169
Not stated	481	57	23	35	729	1 325
Total	43 581	2 978	810	1 348	20 522	69 239

2.8 PLACE OF BIRTH

Of all the live births that were registered in 2013, only 0.8 percent occurred at home and the rest (99.2 percent) in health facilities. This shows that access to maternity health facilities is high in the country.

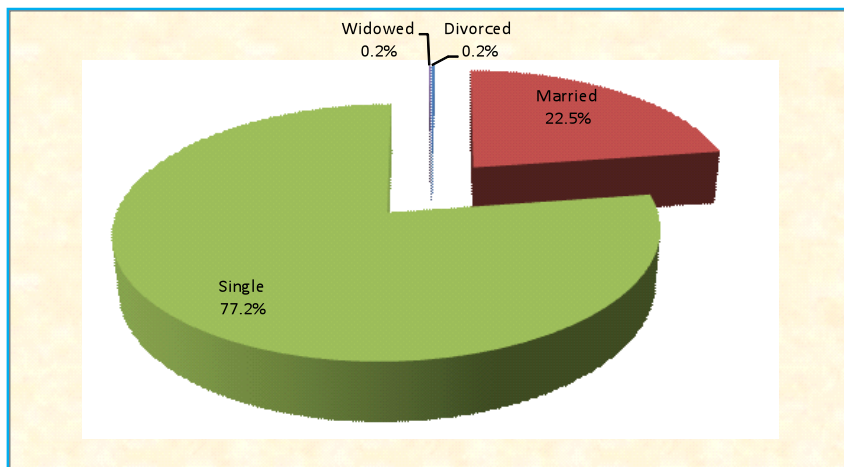

Table 2.5: Place of birth by age group-2013

Age of mother	Place of birth		
	Health Facility	Home	Total
13	6	-	6
14	29	-	29
10-14	35	-	35
15	92	2	94
16	304	-	304
17	709	-	709
18	1 240	6	1 246
19	1 997	9	2 006
15-19	4 342	17	4 359

40-44	1 502	13	1 515
45-49	147	2	149
50+	12	1	13
Not stated	504	3	507
Total	44 441	353	44 794

2.9 MARITAL STATUS OF THE MOTHER

Chart 10 below shows that 77.2 percent of mothers who registered births in 2013 were single, accounting for the largest percentage of all the births, followed by married mothers with 22.5 percent. The lowest percent was for the divorced who accounted for less than one percent of all the births that were registered in 2013.

Chart 10: Marital status of the mother

3.0 MARRIAGES

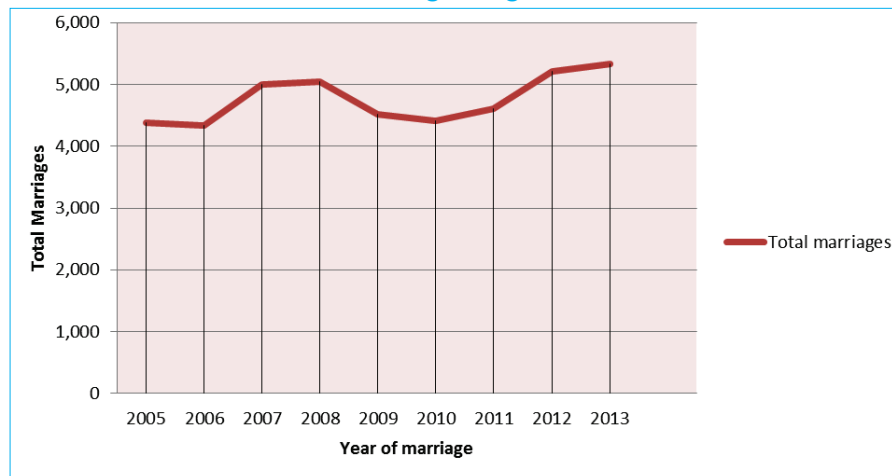

Marriage is an event which is regulated by statute and about which information is collected for legal and statistical purposes. The Department of Civil and National Registration (CNR) is responsible for data collection through the registration service of vital events.

This section includes time series table of marriages that occurred from 2005 to 2013. It also includes tables on age at marriage, previous marital status and the district of marriage.

3.1 TRENDS IN MARRIAGES (2005-2013)

Chart 11 shows that marriages were increasing steadily from 2005 to 2008 and began to decrease in 2009 to 2011. This coincides with the economic downturn that was experienced from 2009 to 2011. From 2011 the number of marriages registered began to steadily increase from 4,601 to 5,333 in 2013.

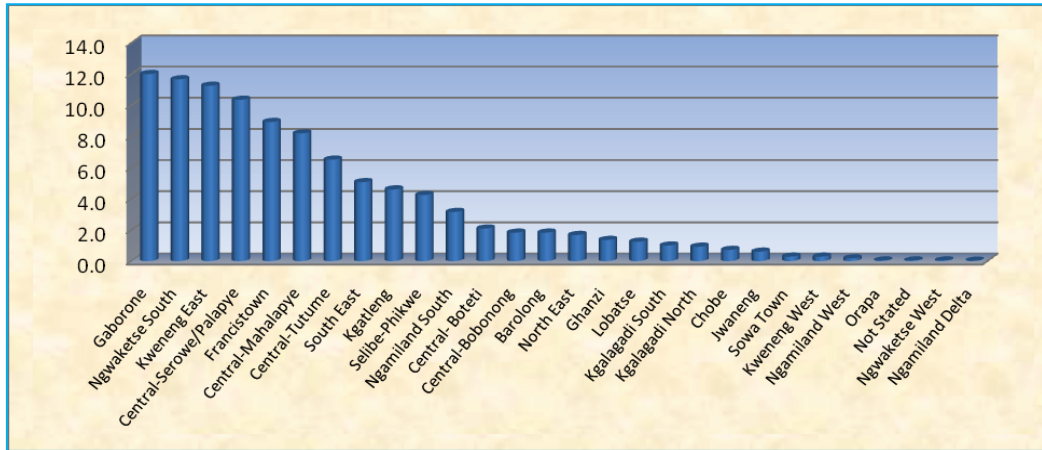

Chart 11: Total number of marriages registered-2005-2013

3.2 DISTRICT OF REGISTRATION

Chart 12 shows that the highest proportion of marriages was registered in Gaborone, followed by Ngwaketse South, and then Kweneng East. Ngamiland Delta registered the least number of marriages in 2013

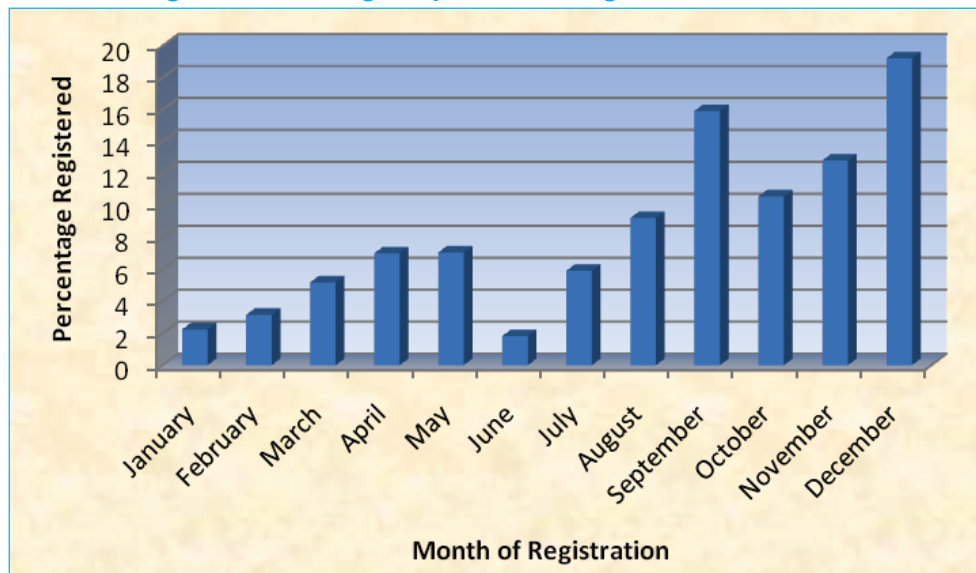

Chart 12: Percentage distribution of registered marriages by registration district-2013

3.3 MONTH OF REGISTRATION

Chart 13 shows percentage of marriages registered in 2013 by month of registration. The number of registered marriages kept increasing from January to April and started fluctuating between May and November. The highest percentage (19 percent) of registered marriages occurred in the month of December and lowest (1.6 percent) was registered in the month of June.

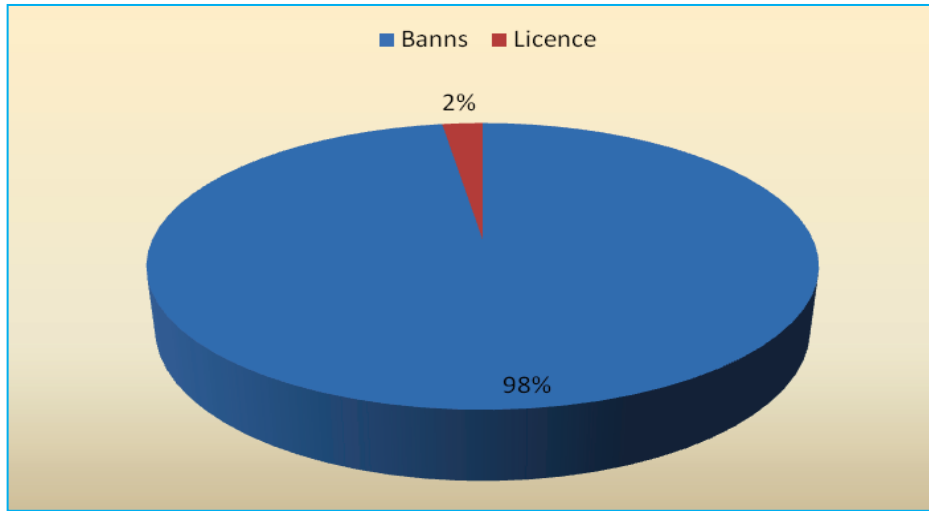

Chart 13: Registered marriages by month of registration-2013

3.4 TYPE OF MARRIAGE

There are two types of marriages, those announced through Court Bans (the usual practice of proclaiming the names of the candidates for a period of 21 days before formalizing the marriage) and those done through a Special License that expedites the marriage process. As depicted by Chart 14, the court bans were the most popular type of marriage, constituting about 98 percent of all the marriages registered in 2013 while the Special License marriages constituted the remaining 2 percent.

Chart 14: Percentage registered marriages by type of marriage-2013

3.5 AGE AT THE TIME OF MARRIAGE

Table 3.1 below shows that the mean age at first marriage for bachelors was 39.1 years in 2013, while the comparable figure for spinsters was 34.1 years. The mean age at first marriage has been generally increasing gradually over the years.

Table 3.1: Mean age at first marriage-2002-2013

Year	Bachelor	Spinster
2013	39.1	34.1
2012	38.2	33.2
2011	37.6	32.6
2010	38.4	32.6
2009	37.9	32.1
2008	37.6	31.9
2007	36.8	31.5
2006	36.9	31.4
2005	37.3	31.7
2004	37.3	31.8
2003	37.2	31.6
2002	37.2	31.1

Table 3.2 shows that Marriage for people under the age of 20 accounted for 0.2 percent of all marriages in 2013 a percentage point drop of 0.4 from 0.6 percent in 2012. The 0.2 percent is wholly accounted for by females of all the 5,333 males that got married in 2013 only 11.6 percent married before the age of 30 while the comparable figure for females is 33.6 percent.

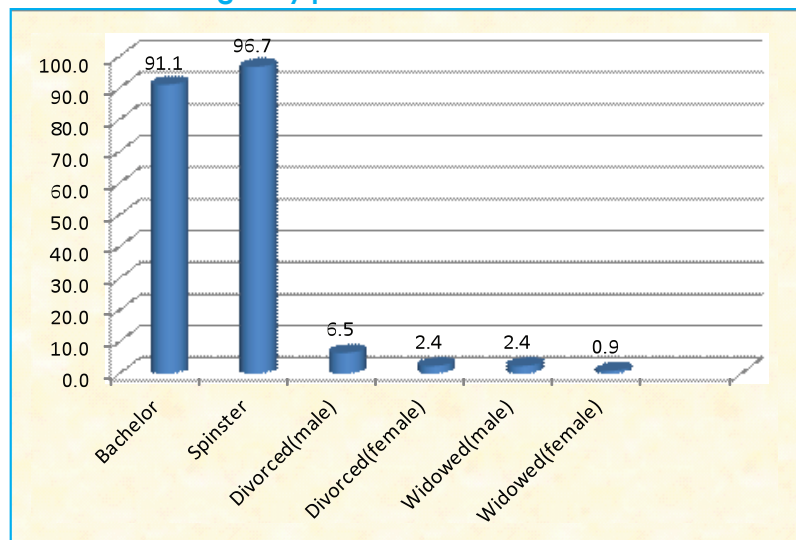

Table 3.2: Registered marriages by age of husband and wife at marriage time-2013

Age	Female	Percent	Male	Percent
18	4	0.1	-	-
19	4	0.1	-	-
15-19	8	0.2	-	-
20	20	0.4	-	-
21	37	0.7	2	0
22	72	1.4	4	0.1
23	101	1.9	16	0.3
24	126	2.4	28	0.5
20-24	356	6.7	50	0.9
25	235	4.4	42	0.8
26	244	4.6	54	1
27	266	5	92	1.7
28	342	6.4	156	2.9
29	340	6.4	225	4.2
25-29	1 426	26.7	569	10.7
30-34	1 535	28.8	1 348	25.3
35-39	892	16.7	1 217	22.8
40-44	397	7.4	764	14.3
45-49	308	5.8	462	8.7
50-54	189	3.5	332	6.2
55-59	98	1.8	244	4.6
60-64	60	1.1	136	2.6
65+	64	1.2	211	4
Total	5 333	100	5 333	100

3.7 PREVIOUS MARITAL STATUS

In 2013 about 97.0 percent of the people getting married were spinsters and 91.1 were bachelors or marrying for the first time. The percentage of males getting married and were previously divorced is more than that of their female counterparts with 6.5 and 2.4 respectively.

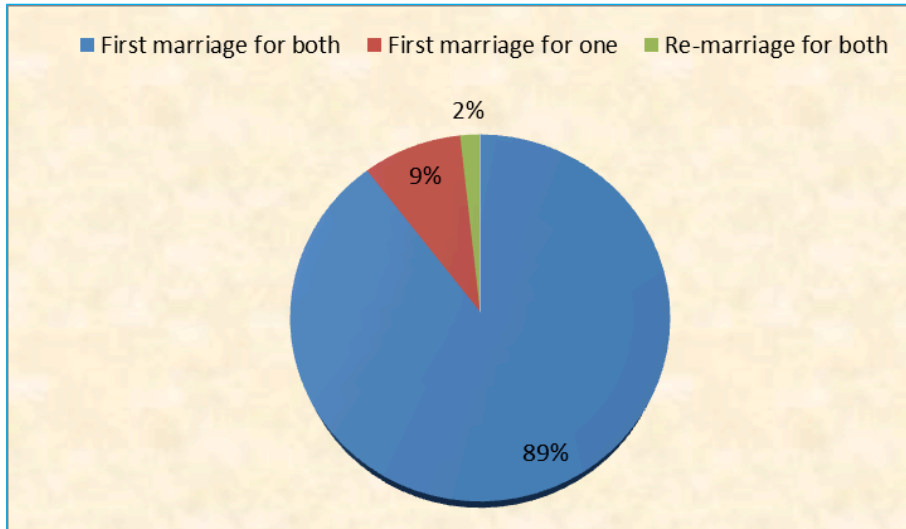

Chart 15: Marriages by previous marital status-2013

3.8 FIRST MARRIAGES AND RE-MARRIAGES

Chart 16 clearly shows that, marriages between spinsters and bachelors account for 89.0 percent of all the marriages registered in 2013, while a further 9 percent were first marriages for one partner. The remaining 2 percent of marriages was re-marriages for both partners.

Chart 16: Marriages and re-marriages-2013

3.9 CRUDE MARRIAGE RATE

The crude marriage rate gives the number of persons marrying within a specified time period per 1,000 population of all ages. The population that is used as the denominator for the calculation of the crude marriage rate is the projected population from the 2011 Population and Housing Census with an exception of the year 2011 where population from 2011 Population and Housing Census was used. Table 3.4 shows that the crude marriage rate for Botswana is just around 5 marriages per 1,000 people through all the years. The crude marriage rate was highest in 2007 and 2008 with around 6 per 1,000 population.

Table 3.4: Crude Marriage Rate by Year of Marriage

Year	Population	Marriages	Married persons	Crude Marriage Rate
2002	1,667,487	4,192	8,384	5.03
2003	1,691,390	4,016	8,032	4.75
2004	1,711,334	4,325	8,650	5.05
2005	1,727,372	4,379	8,758	5.07
2006	1,739,556	4,335	8,670	4.98
2007	1,756,651	4,997	9,994	5.69
2008	1,776,283	5,037	10,074	5.67
2009	1,798,372	4,521	9,042	5.03
2010	1,822,858	4,416	8,832	4.85
2011	2,024,904	4,601	9,202	4.54
2012	2,070,984	5,214	10,428	5.04
2013	2,128,597	5,333	10,666	5.01

4.0 DEATHS

4.1 DEATH REGISTRATION

The Death Registrations includes all deaths that occurred and were registered in the country during the reference year (current registrations), and deaths that occurred in earlier years that have not previously been registered (late registrations)

4.2 TRENDS IN DEATHS REGISTRATION

Chart 17: Trends on deaths registration-2013

4.2 REGISTERED DEATHS BY AGE AND SEX

There were 6,301 male deaths compared to 5,666 female deaths that occurred and were registered in 2013 resulting in a sex ratio of 111.2 male deaths for every 100 female deaths. This is an increase from 107.3 that was recorded in 2012. Chart 18 below shows a low percentage of deaths for lower age groups (1-19) for both sexes. The proportion of deaths registered increased steadily from age group 20-24 to 35-39 for both sexes with females on the higher side until the age-bracket 35-39. From ages 40 -79 there were more male than female deaths.

Chart 18: Percent distribution of registered deaths by age and sex, 2013

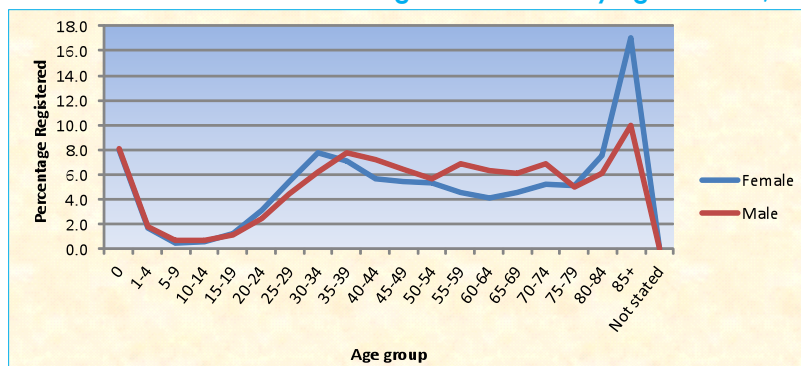

Chart 19 shows the distribution of deaths by age group and sex. This is to establish the proportion of male and female deaths within age groups. For the age groups 1-4 to 15-19 there were more male than female deaths. For the age groups 20-24 to 35-39 there were more female than male deaths, and the chart follows that pattern to the end.

Chart 19: Percent distribution of registered deaths within age groups by sex, 2013

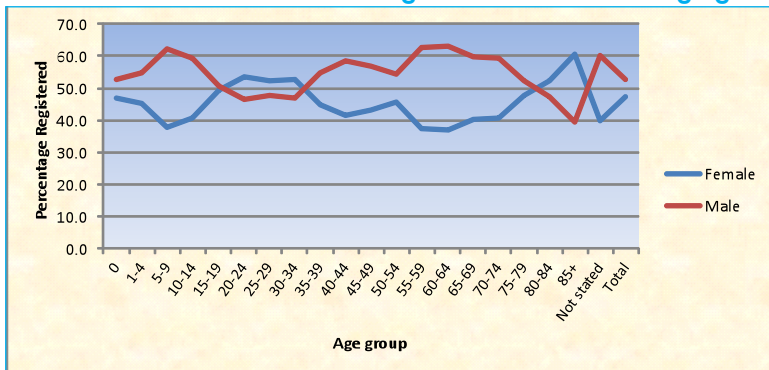

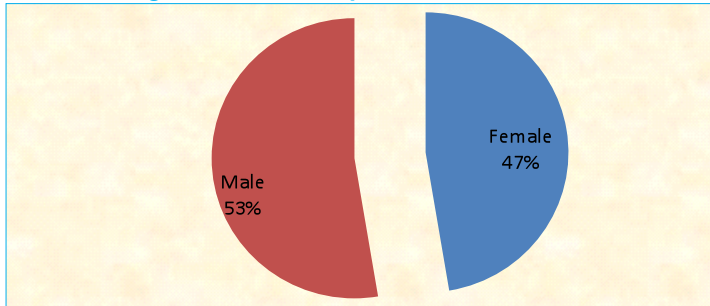

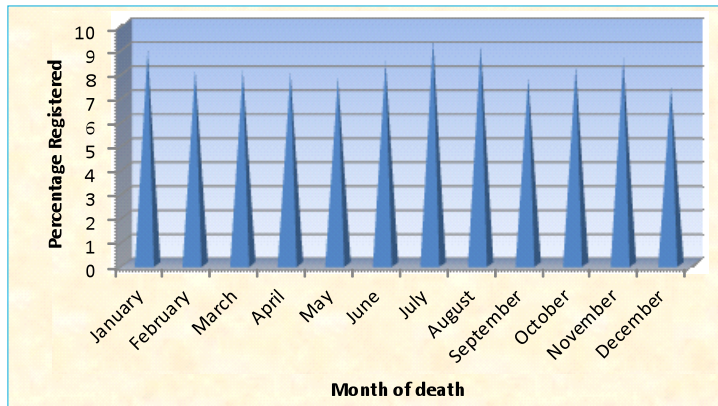

Chart 20: Registered deaths by sex of deceased-2013

4.4 DEATHS BY MONTH OF OCCURRENCE

Chart 21 below shows the percentage of deaths that occurred in 2013 by month of occurrence. The month of July recorded the highest proportion of deaths registered (9.3 percent). This is followed by a sharp decrease in September (7.7 percent).

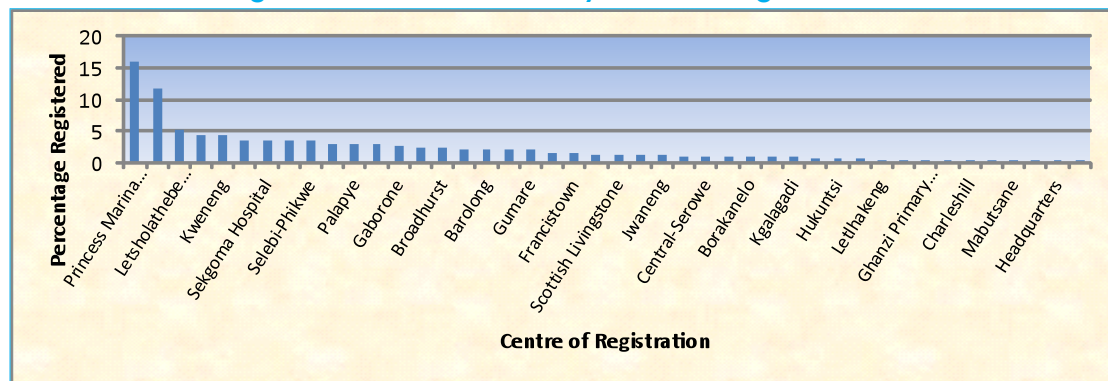

Chart 21: Registered deaths by month of Occurrence-2013

4.5 CENTRE OF REGISTRATION

Chart 22 shows that the highest proportion of deaths was registered at the country's two (2) referral hospitals. Princess Marina Hospital registered 16.1 percent of the deaths, while Nyangabgwe registered 11.6 percent. This may be attributed to the fact that difficult cases which are likely to result in death are referred to these two hospitals from the entire country.

Chart 22: Percentage distribution of deaths by district of registration-2013

4.6 PLACE OF DEATH OCCURRENCE

Table 4.1 shows that 57.4 percent of all registered deaths occurred in health facilities. More than 50 percent were reported to have been single at the time of death (children included). Forty percent had primary education as their highest level of education.

Registered deaths by place of death, marital status, educational level of the deceased-2013

Place of death

	Deaths	Percentage
Health Facility	6 875	57.4
Home	5 092	42.6
Total	11 967	100

Marital status

Divorced	213	1.8
Married	3 451	28.8
Single	6 784	56.7
Widowed	1 519	12.7
Total	11 967	100

Level of education

Higher	417	3.5
None	4 238	35.4
Post-Secondary	295	2.5
Primary	4 957	41.4
Secondary	2 060	17.2
