## FOREWORD

The Population of Towns, Villages and Associated Localities is the second (the first was the Preliminary Results released in September 2011) report to be released in the series of reports based on the 2011 Population and Housing Census. This publication marks Statistics Botswana's responsiveness to user demands since census data cleaning is a very elaborate exercise, which is still in progress.

Presented in this report are population figures for all localities identified in Botswana during the census cartographic listing exercise and census enumeration. It is possible that some very small and informal settlements may not appear separately but users are assured that such would have been listed and counted alongside their villages of allegiance or other more formal localities. Some precautions need to be exercised with population of small localities since they are susceptible to seasonal and climatic conditions as well as agricultural activities, thus resulting with pendulum swings in the figures between censuses or times of the year.

Efforts have been made to ensure that correct place names are used. However, some places have many names, which make it difficult to determine the most acceptable one. Further compounding the issue is the fact that the names of some villages or localities are subjects of legal disputes hence the choice of names used was guided by advice from district authorities.

Users are further advised that detailed census figures shall be available by September 2012.

Anna Majelatlé  
Acting Statistician General

GABORONE  
3 June 2012

**Table of Contents**

Technical Notes	i – ii
Population of Districts, Villages and Localities	1 – 250
Alphabetical Index of District	A1
Alphabetical Index of Villages	B1 – B9
Alphabetical Index of Localities	C1 – C144

## TECHNICAL NOTES

### 1. CENSUS DISTRICT

For census operational convenience, the country was divided into census districts. A census district can either be a whole or a sub-division of an administrative district or township.

All the five towns (Lobatse, Selibe-Phikwe, Orapa, Jwaneng and Sowa) and the cities of Gaborone and Francistown were each designated as a census district.

The rural districts were organised as follows: Southern District was sub-divided into Ngwaketse, Barolong and Mabutsane census districts. Efforts to physically divide Ngwaketse into Kanye and Moshupa administrative authorities could not succeed since there were no physical boundaries between these entities. North West District was sub-divided into Ngamiland East (includes the Okavango Delta); Ngamiland West and Chobe census districts.

Ghanzi District was sub-divided into Ghanzi, Charleshill and Central Kgalagadi Game Reserve census districts.

Kgalagadi District was sub-divided into Kgalagadi South and Kgalagadi North census districts and each of them corresponds to the administrative sub-district.

Central district was sub-divided into Serowe/Palapye, Central Mahalapye, Central Bobonong, Central Boteti and Central Tutume census districts and each of them directly corresponds to the administrative sub-district. Efforts to physically divide Serowe/Palapye and Tutume/Tonota into administrative authorities could not succeed since there were no physical boundaries between the entities.

Kweneng District was sub-divided into Kweneng East and Kweneng West census districts and each of them corresponds to the administrative sub-district. For the same reasons cited above, Molepolole/Lentsweletau and Mogoditshane/Thamaga could not be divided in accordance with the respective administrative authorities.

Kgatleng, South-East and North-East administrative districts were each designated a census district.

### 2. VILLAGE

Although there is no official definition of a village, the Census Office retained the status of village for all settlements officially designated as such jointly by the Tribal Administration, the District Administration and the District Council.

Population size alone is not sufficient criterion to classify a settlement as a village. However, a village is usually typified by the presence of a tribal authority (a Chief, a Tribal Authority,

Chief's Representative or Headman) and availability of certain facilities such as schools, clinics or health centres, tribal administration offices, Botswana Police offices, water reticulation, etc.

### **3. LOCALITY**

For census purposes, a locality is defined as any human settlement with a name and identifiable boundaries.

Any locality:- lands areas, cattle-post or freehold farms whose residents pay allegiance (settlements of disputes, provision of social functions etc.) to a named village is regarded as an associated locality to that village.

### **4. LOCALITY CODE**

Each locality has been assigned a 3-digit code. The first digit of this number gives an ecological definition of the locality as follows:

- 0 -Urban Area
- 1 -Village
- 2 or 7 -Lands Area
- 3 or 8 -Cattle Post
- 4 or 9 -Freehold Farm
- 5 - Mixture of Lands Area and Cattle Post
- 6 - Camp or Other Locality type not mentioned above

The last two digits sequentially numbers the localities of an ecological type associated to a named village from 01 to a maximum of 99.

Note: Some freehold farms in Ghanzi have 5 as the first digit.

### **5. TOTAL POPULATION**

Total population is the number of persons who were reported and recorded to have spent the night with the household prior to the enumeration of the household. This population is technically referred to as the "de facto" population.
