STATISTICS BOTSWANA

PREFACE

This report provides an in-depth analysis of Botswana's monthly inflation rate, as measured by the Consumer Price Index (CPI). The CPI serves as a fundamental economic indicator, essential for tracking fluctuations in the cost of living, and offers a comprehensive overview of price movements across the national economy. The report systematically examines both month-on-month and year-on-year changes in the CPI, thereby offering critical insights into the inflationary trends within the country. This analysis is undertaken by Statistics Botswana, whose objective is to furnish a thorough understanding of the inflationary forces at play.

Precise and timely price data is indispensable for the formulation of socio-economic and monetary policies. By equipping policymakers with a clear understanding of prevailing inflationary pressures, such data plays a pivotal role in guiding the development of appropriate policy interventions. Statistics Botswana recognises the importance of this information and, as such, compiles and publishes the Consumer Price Index on a monthly basis to address the informational needs of a wide array of stakeholders.

In July 2025, Botswana's annual inflation rate was 1.1 percent, a drop of 0.9 of a percentage point from the 2.0 percent recorded in June 2025.

Statistics Botswana expresses its sincere gratitude to all stakeholders whose invaluable contributions and data have significantly enhanced the compilation of this publication.

For more information and further enquiries, contact the Directorate of Stakeholder Relations at **+267 367 1300**. This publication and all other Statistics Botswana outputs/publications are available on the website at <http://www.statsbots.org.bw> and at the Statistics Botswana Information Resource Centre (Head-Office, Gaborone).

CONSUMER PRICE INDEX

SECTION 1: HEADLINE INFLATION

In July 2025, Botswana's annual inflation rate stood at 1.1 percent, a drop of 0.9 of a percentage point, from the 2.0 percent recorded in June 2025. The primary contributors to the annual inflation rate were the Miscellaneous Goods & Services and Food and Non-Alcoholic Beverages groups, which accounted for 0.7 and 0.6 of a percentage point respectively. In contrast, the Housing, Water, Electricity Gas & Other Fuels and Transport groups applied a downward pressure of negative 0.7 and 0.5 of a percentage point respectively, on the overall inflation rate. [Refer to Table 1 and Chart 5.](#)

Inflation rates indicated disparity across regions between June and July 2025. The Urban Villages inflation rate was 1.0 percent in July 2025, compared to 2.0 percent registered in June, a decline of 1.0 percentage point. The Cities & Towns inflation rate was 0.8 percent in July 2025, a decrease of 0.9 of a percentage point, from 1.7 percent recorded in June. The Rural Villages inflation rate also went down by 0.7 of a percentage point, from 2.5 percent in June to 1.8 percent in July 2025. [Refer to Table 2](#)

The national Consumer Price Index (CPI) went down by 0.7 percent, from 136.9 in June to 136.0 in July 2025. The Urban Villages index was 136.2 in July 2025, a decrease of 0.8 percent from the June 2025 level of 137.2. The Cities & Towns index dropped by 0.7 percent, from 136.5 in June to 135.5 in July 2025, while the Rural Villages index registered a decline of 0.4 percent from 137.2 to 136.6, during the period under review. [See Table 2.](#)

The group indices were mostly moving at a stable pace between June and July 2025, recording changes of less than 1.0 percent, except for the Housing, Water, Electricity, Gas & Other Fuels group, which went down by 4.0 percent. [Refer to Table 2.](#)

The Housing, Water, Electricity Gas & Other Fuels index was 120.0 in July 2025, a decrease of 4.0 percent, from 124.9 recorded in June. This was due to the decrease of 16.5 percent in the constituent section index of Electricity, Gas & Other Fuels. The decline in Electricity, Gas & Other Fuels section index was attributed to the revised domestic Electricity tariffs, which were effected on 1st July 2025. [See Table 3.](#)

The Food & Non-Alcoholic Beverages Index recorded a decrease of 0.5 percent, from 153.2 in June to 152.3 in July 2025. This downward movement was primarily influenced by a notable price decrease within several constituent sections, specifically; Vegetables, which dropped by 3.9 percent, Fruits by 1.2 percent, Bread & Cereals with a decrease of 0.6 percent, and Food Not Elsewhere Classified, a drop of 0.5 percent. [See Table 3.](#)

The Recreation & Culture index was 115.0 in July 2025, a drop of 0.4 percent, from 115.5 recorded in June. This was due to the decrease in the constituent section index of Audio Visual, Photographic & Information Processing Equipment by 0.6 percent. [See Table 3.](#)

The Alcoholic Beverages & Tobacco group index grew by 0.4 percent from 145.5 in June to 146.1 in July 2025. The increase was attributed to a general rise in the constituent section index of Alcoholic Beverages by 0.5 percent. [Refer to Table 3.](#)

The All-Tradeables index went down by 0.1 percent, from 143.4 in June 2025 to 143.3 in July 2025. The Non-Tradeables Index declined by 1.6 percent, from 128.0 in June to 126.0 in July 2025. The Imported Tradeables Index realised a drop of 0.2 percent, during the period under review, while the Domestic Tradeables Index rose by 0.1 percent, from 145.1 in June to 145.3 in July 2025. [See Table 4.](#)

The All-Tradeables inflation rate was 1.6 percent in July 2025, down by 0.4 of a percentage point from the June 2025 rate of 2.0 percent. The Non-Tradeables inflation rate realised a drop of 1.7 percentage points from 2.0 percent recorded in June 2025 to 0.3 percent in July 2025. The Imported Tradeables inflation rate decreased by 0.4 of a percentage point, from 1.1 percent in June to 0.7 percent in July 2025. The Domestic Tradeables inflation rate also went down by 0.3 of a percentage point over the two periods. [Refer to Table 4.](#)

SECTION 2: CORE INFLATION

The Trimmed Mean Core inflation rate went down by 0.6 of a percentage point, from 2.0 percent in June to 1.4 percent in July 2025. The Core Inflation rate, excluding administered prices, was 3.5 percent in July 2025, a drop of 0.4 of a percentage point from the June 2025 rate of 3.9 percent. **Refer to Table 5.**

GLOSSARY

Consumer Price Index (CPI) is an index which measures price changes in goods and services with reference to a base period.

Inflation is a measurement of prices movement of goods and services in a particular country.

Contributions: These are percentage points that add up to the overall inflation rate. The contribution of a **group** to overall annual inflation depends on its weight in the consumption basket and its own annual inflation rate.

Domestic Tradeables refers to the goods and services which a country (Botswana) can export to other countries.

Imported Tradeables represents the goods and services which a country (Botswana) imports from other countries (trading partners).

Non-Tradeables refers to the goods and services which a country cannot either export to or import from other countries.

All -Tradeables refers to the total of **Domestic** and **Imported Tradeables**.

Trimmed Mean Core Inflation- attempts to remove 8 percent (by weight) of the commodity sub-groups price changes at each of the ends of an ordered series of price changes in any given month.

Core inflation by Exclusion is a measure used to remove the volatility inherent in prices that are only adjusted periodically and not always in response to currently prevailing market forces.
