PREFACE

This annual report provides official statistics on the total arrivals and departures of non-citizens for the year 2022. It offers critical insights into the dynamics of inbound tourism, a key sector driving Botswana's economic growth and development.

The information used in this publication was compiled from administrative records obtained from immigration arrival and departure forms. Non-citizen travellers entering or leaving the country are required to complete these forms at all gazetted ports of entry and exit. This report is produced in accordance with international standards and definitions recommended by UN Tourism and the United Nations Statistics Division (UNSD).

Statistics Botswana extends its sincere gratitude to the Department of Immigration and Citizenship for its role in providing the core administrative data essential for compiling the report, and to all other stakeholders whose support is invaluable to its statistical work.

EXECUTIVE SUMMARY

A total of 1,294,246 non-citizens arrived in the country in 2022, representing a 138.0 percent (750,308) increase from the 543,938 recorded in 2021. The rise reflected a rebound in international travel after COVID-19 restrictions were eased.

Out of 1,294,246 total arrivals, 64.1 per cent (829,111) were international visitors (tourists). Overnight visitors made up 99.9 percent (828,054), while same-day visitors accounted for 0.1 percent (1,057) of the total visitors. This represents a 145.6 percent (491,485) increase from the 337,626 tourists recorded in the year 2021. Tourists from South Africa accounted for 36.1 percent (299,076), while those from Zimbabwe represented 20.5 percent (169,997) of total tourists.

Tourists from the top ten overseas countries accounted for 15.8 percent (130,963) of total tourists in 2022. Those who visited for holiday/leisure purposes accounted for 25.5 percent (211,449), while Business travellers and those visiting friends and relatives represented 21.1 percent (174,990) and 20.8 percent (172,782), respectively.

Tourists who entered the country by air represented 11.3 percent (93,452) of total tourists. Among these, Sir Seretse Khama International Airport received the highest share, handling 48.2 percent (45,001) of tourists who used air transport, while Maun Airport accounted for 38.0 percent (35,499).

December was the most popular month for tourist arrivals in 2022, with 13.3 percent (110,622) of the total. August and September followed with 10.6 percent (88,208) and 10.4 percent (86,320), respectively.

Tourists aged between 25 to 44 years made up 48.5 percent (402,163) of total tourists during the year. The majority of tourists were in the age range of 35 to 39 years.

Martin's Drift Border Post was the busiest entry point, receiving 13.4 percent (173,432) of total arrivals (1,294,246). Similarly, it accounted for 15.4 percent (200,379) of all departures (1,300,681).

CHAPTER 1: INTRODUCTION

1.1 Introduction

This annual publication provides statistical indicators on arrivals and departures for the year 2022. It provides detailed information on visitor and non-visitor movements, categorised by mode of travel, month of travel, point of entry and exit, as well as sex and age distribution. In addition, arrivals are further analysed by country and region of nationality, country of residence, purpose of entry, and age distribution. The data used in this report are sourced from the Department of Immigration and Citizenship (DIC) arrival and departure forms, which are completed by non-citizens at all gazetted ports of entry and exit.

1.1.1 Arrangement of the Report

The report is categorised into two parts; the first part provides information on tourists only, while the second part presents information on all arrivals and departures during the year under review. The characteristics of visitors are presented in **Chapter 2**, while **Chapter 3** focuses on all travellers entering and departing the country. **Chapter 4** presents the sources of data, methods and definitions of terms used in the report. **Chapter 5** contains the appendices, consisting of detailed tables on which the abridged tables and figures included in the body of the report are based.

1.1.2 Limitations of the Report

The focus of the collected data is on non-citizens. This report does not include inbound and outbound statistics for citizens. The coexistence of both automated and non-automated border posts presents challenges in accurately determining the precise length of stay of visitors, even though data on the number of days granted is recorded on the immigration entry and departure forms. Travellers may enter the country through an automated border post and exit through a non-automated border post, making it difficult to reconcile the data between these two systems.

CHAPTER 2: TOURISTS

This chapter presents an analysis of information on visitors to the country in 2022. These visitors are classified into two groups: overnight visitors (tourists) and same-day visitors. The chapter provides statistics classified by country and region of residence, purpose of visit, mode of travel, month of visit, port of entry and key demographic characteristics.

In compiling this report, half of the transit travellers are classified as visitors. This approach takes into consideration the fact that some of these transit travellers incur expenses within the country while in transit, whether by spending a night or other forms of expenses. Consequently, statistics presented in this chapter include 50 percent of the total number of transit travellers.

2.1 Tourists by Country and Region of Residence

Appendices 1 and **2** are dedicated to tourists only. **Appendix 1** presents both overnight tourists and same-day tourists by country of residence, as well as the associated percentage distribution of total tourists at the country level. **Appendix 2** presents tourists by country of residence as well as purpose of visit.

During 2022, Botswana received a total of 829,111 tourists, of which 99.9 percent (828,054) were overnight visitors. As shown in Appendices 1 and 2, the majority of visitors came from South Africa and Zimbabwe, contributing 36.1 percent (299,076) and 20.5 percent (169,997) of total visitors, respectively. The majority of tourists, 79.2 percent (657,058), were residents of the SADC region.

2.2 Top Ten Overseas Countries

Table 1, which is based on **Appendix 1**, shows that the top ten overseas countries of residence recorded 130,963 tourists, accounting for 15.8 percent of total tourists (829,111) in 2022.

Of the 130,963 tourists, 32.8 percent (42,951) were residents of the United States of America, followed by those from Germany and the United Kingdom at 20.0 percent (26,193) and 15.1 percent (19,715), respectively.

Table 1 and **Appendix 1**, shows that most overnight tourists from the top ten overseas countries came from the United States of America, followed by Germany and the United Kingdom.

CHAPTER 4: TECHNICAL NOTES

This section outlines the methodological framework underpinning the production of the tourism statistics presented in this report. It details the primary data sources, describes the procedures for data processing and compilation, and provides definitions of the key terms used. The information is intended to provide users with a clear understanding of the data sources, the methods used in its aggregation, and the precise meaning of the terminology applied throughout the report.

4.1 Data Source and Methodology

The data used in the production of this report are sourced from the administrative records of the Department of Immigration and Citizenship (DIC). Data on international travellers are collected through Arrivals and Departure Forms, which are completed by non-citizens at all officially designated ports of entry or exit, including land border posts and airports. These forms capture a range of the traveller's personal characteristics, including sex, age, country of nationality, country of residence, and purpose of entry. Supplementary data concerning the month of travel, mode of transport, and port of entry are also recorded by default. Departure statistics are aggregated from border summary statistics compiled by immigration personnel at all officially designated ports of exit.

The results and analysis contained in this report adhere to the guidelines, definitions, and classifications recommended by the UN Tourism and the United Nations Statistical Division (UNSD). Accordingly, this publication is produced in full compliance with internationally accepted statistical standards and best practice.
