PREFACE

This report presents statistics on non-citizen travellers who entered or exited Botswana through all authorised ports of entry and exit during 2024. It consolidates information previously published in the 2024 Quarterly International Visitors Statistics Briefs and provides annual totals for non-citizen arrivals and departures. The report presents traveller characteristics disaggregated by port of entry/exit, main mode of transport, month of travel, purpose of visit, country of residence, country of nationality, type of tourist, and demographic characteristics such as sex and age group.

The statistics are compiled from administrative records provided by the Department of Immigration and Citizenship. The data are derived from arrival and departure forms completed by non-citizens at all officially designated ports of entry and exit. Statistics Botswana extends its appreciation to the Department of Immigration and Citizenship for its continued collaboration and support in providing the data necessary for the production of these statistics.

The compilation of these statistics is guided by international standards and definitions recommended by the United Nations Tourism (UN Tourism) and the United Nations Statistical Division (UNSD), ensuring the reliability, consistency, and international comparability of the results.

For further information, please contact the Directorate of Stakeholder Relations at **+267 367 1300**. All Statistics Botswana publications are available on the Statistics Botswana website at **www.statsbots.org.bw**.

EXECUTIVE SUMMARY

This report, compiled by Statistics Botswana using administrative records from the Department of Immigration and Citizenship, provides a comprehensive overview of non-citizen travel to and from Botswana during 2024. The key findings are as follows:

Tourist arrivals reached 1,533,011 in 2024, representing an increase of 29.6 percent compared with 2023. Total non-citizen arrivals increased by 11.0 percent to 2,081,199, while departures rose by 15.3 percent to 2,199,728. Despite these increases, both tourist arrivals and overall traveller volumes remained below their pre-COVID-19 (2019) levels.

The Southern African Development Community (SADC) region remained the principal source market, accounting for 78.7 percent of all tourist arrivals. South Africa (30.2%), Zimbabwe (28.0%), and Zambia (10.6%) were the leading countries of residence among visitors. Outside the SADC region, the United States of America, Germany and the United Kingdom were the main source markets (Appendix 1).

In-transit travel was the most common purpose of visit among tourists, accounting for 24.3 percent of arrivals, followed by Holiday/Leisure (23.2%) and Visiting Friends and Relatives (VFR) (19.2%). For all non-citizen arrivals, including non-tourists, In-Transit travel accounted for 35.8 percent of arrivals.

Road transport remained the dominant mode of travel, accounting for 92.0 percent of tourist arrivals and 93.4 percent of all non-citizen arrivals. Ramokgwebana Border Post recorded the highest volume of arrivals, followed by Kazungula Bridge. Among airports, Sir Seretse Khama International Airport handled more than half of all air passenger arrivals.

Male tourists accounted for 64.2 percent of tourist arrivals, compared with 35.8 percent for females. Male tourists were relatively more likely to travel In-Transit and for Business purposes, while female tourists recorded relatively higher proportions in Holiday/Leisure and Visiting Friends and Relatives (VFR) travel. The largest proportion of tourists fell within the 40–44 years age group, while older age groups (65 years and above) were particularly prominent among leisure travellers.

CHAPTER 1: INTRODUCTION AND BACKGROUND

1.1. Introduction

This annual publication presents statistical indicators on total arrivals, tourist arrivals, and departures for the year 2024. The report provides detailed information on non-citizen arrivals and visitor arrivals by purpose of visit, mode of travel, port of entry, month of travel, sex, age group, and country or region of nationality and residence.

Arrival statistics are compiled from administrative records of the Department of Immigration and Citizenship (DIC), based on arrival forms completed by non-citizens at all officially designated ports of entry. Departure statistics are derived from administrative records collected at all officially designated ports of exit and are presented by mode of travel, month of departure and port of exit.

1.1.1. Arrangement of the Report

This report is organised into two main analytical sections. Chapter 2 presents a detailed analysis of visitor arrivals to Botswana, while Chapter 3 broadens the scope to include an analysis of all travellers entering and departing the country. The methodological framework underpinning the report, including data sources, compilation methods, and definitions of key terms, is presented in Chapter 4. Chapter 5 contains the appendices, which provide supplementary tables and detailed statistical information supporting the summary tables and figures presented in the main body of the report.

1.1.2. Limitations of the Report

The focus of the collected data is on non-citizens, encompassing temporary residents and foreign nationals. This provides insight into Botswana's inbound tourism sector. However, the unavailability of data on the arrivals and departures of Botswana citizens limits the analysis to shed lights on the nation's outbound tourism sector.

All Botswana citizen, including those who reside abroad, are not required to complete the arrivals and departure forms at all ports of entry and therefore they are not included in the arrivals and visitor statistics.

CHAPTER 2: TOURISTS

This chapter presents an analysis of visitor arrivals to Botswana during 2024. The analysis provides detailed statistics disaggregated by country and region of residence, purpose of visit, mode of travel, month of entry, port of entry, type of visitor, and key demographic characteristics.

2.1. Tourists by Country and Region of Residence

In 2024, Botswana received 1,533,011 tourists, representing an increase of 29.6 percent from 1,182,979 recorded in 2023. **Appendices 1** and 2 present a detailed analysis of tourist arrivals by type of tourist, purpose of visit, and country of residence. **Appendix 1** provides data on both overnight and same-day visitors by country of residence, together with their percentage distributions. **Appendix 2** further classifies tourists according to their country of residence and stated purpose of visit.

Of the 1,533,011 tourists recorded during 2024, 95.4 percent (1,462,552) were overnight visitors, while 4.4 percent (67,368) were same-day visitors. As shown in **Appendix 1**, South Africa was the leading country of residence, accounting for 30.2 percent (462,623) of all tourists. Zimbabwe was the second-largest source market, contributing 28.0 percent (429,980) of total tourist arrivals.

2.2. Top Ten Overseas Countries

Table 1 and **Appendix 1** show that tourists from the top ten overseas countries of residence totalled 232,472, accounting for 15.2 percent of all tourist arrivals in 2024.

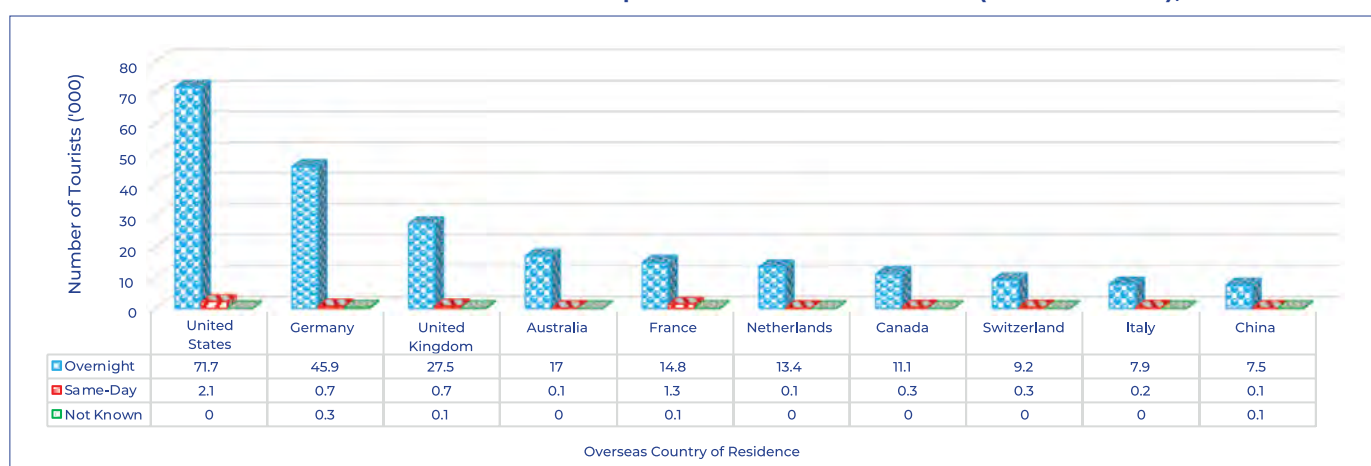

Among these countries, the United States of America accounted for the largest share at 31.8 percent (73,819), followed by Germany at 20.2 percent (46,900) and the United Kingdom at 12.1 percent (28,238).

Figure 1 further illustrates that most overnight tourists from the top ten overseas countries of residence originated from the United States of America, Germany, and the United Kingdom.

TABLE 1: Top Ten Overseas Countries Of Residence by Type of Tourist, 2024

Country of Residence	Type of Tourist			Total	
	Overnight	Same-Day	Not Known	Number	Percent
United States	71,696	2,092	31	73,819	31.8
Germany	45,873	745	282	46,900	20.2

2.3. Top Ten SADC Countries

Table 2 and **Figure 2** present the top ten countries of residence within the Southern African Development Community (SADC) region for tourist arrivals to Botswana in 2024. Collectively, these countries accounted for 78.7 percent (1,207,028) of all tourist arrivals. South Africa was the leading source market, contributing 38.3 percent (462,623) of tourist arrivals from the SADC region. This was followed by Zimbabwe, which accounted for 35.6 percent (429,980), and Zambia at 13.4 percent (162,217). Namibia also contributed

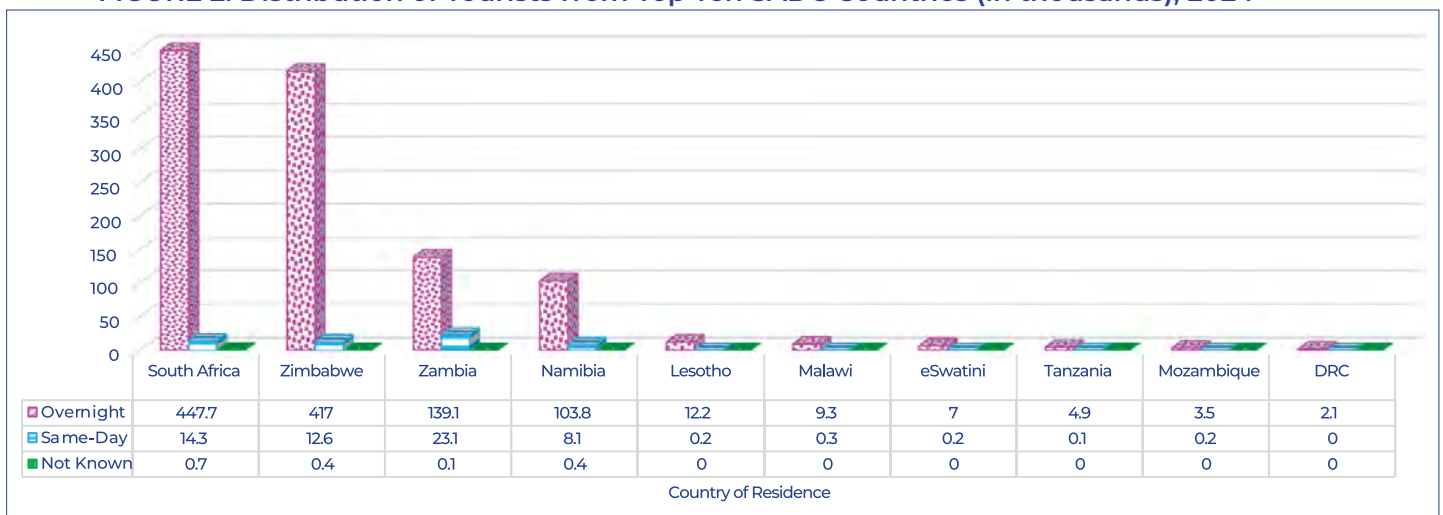

a notable share of 9.3 percent (112,224). The remaining SADC countries each accounted for less than 1.0 percent of total tourist arrivals, as shown in **Table 2** and **Figure 2**.

TABLE 2: Top Ten SADC Countries of Residence by Type Of Tourist, 2024

Country of Residence	Type of Tourist			Total	
	Overnight	Same-Day	Not Known	Number	Percent
South Africa	447,650	14,292	681	462,623	38.3

2.4. Tourists by Purpose of Visit

Table 3 presents tourist arrivals by purpose of visit and type of tourist, together with their corresponding percentage distributions. In-Transit was the leading purpose of visit, accounting for 24.3 percent (372,483) of all tourist arrivals. This was followed by Holiday/Leisure travel, which represented 23.2 percent (356,020) of tourists, and Visiting Friends and Relatives (VFR), accounting for 19.2 percent (294,591).

Business travel contributed 14.1 percent (216,028) of total tourist arrivals. The remaining 19.2 percent (293,889) travelled for other purposes, including religious, sporting, educational, medical, and shopping activities, which are grouped under the category "Other".

TABLE 3: Distribution of Tourists by Type and Purpose of Entry, 2024

Purpose of Visit	Overnight		Same-Day		Not Known		Total	
	Number	%	Number	%	Number	%	Number	%
In Transit	365,049	25.0	7,409	11.0	25	0.8	372,483	24.3
Holiday & Leisure	349,351	23.9	5,526	8.2	1,143	37.0	356,020	23.2
VFR	290,283	19.8	4,035	6.0	273	8.8	294,591	19.2
Business	196,795	13.5	19,163	28.4	70	2.3	216,028	14.1
Other	261,074	17.9	31,235	46.4	1,580	51.1	293,889	19.2
Total	1,462,552	100.0	67,368	100.0	3,091	100.0	1,533,011	100.0

2.5. Tourists by Mode of Arrival

Table 4 presents tourist arrivals by mode of travel and purpose of visit. Tourists entered Botswana through three modes of transport: road, air, and rail. Percentages for purpose of visit by airport are calculated as a proportion of total air arrivals for each purpose, while percentages by mode of travel are calculated as a proportion of total tourist arrivals.

Road transport remained the dominant mode of entry, accounting for 92.0 percent (1,410,025) of all tourist arrivals. Air transport accounted for 8.0 percent (122,642) of arrivals, while rail transport contributed only 344 arrivals, representing less than 0.1 percent of the total.

Among air arrivals, Sir Seretse Khama International Airport (SSKIA) was the principal port of entry, accounting for 52.3 percent (64,103) of all tourists arriving by air. This was followed by Maun Airport, which handled 34.3 percent (42,112), and Kasane Airport, which accounted for 11.3 percent (13,870) of air arrivals.

Further analysis by purpose of visit reveals distinct airport usage patterns. Among tourists travelling to visit friends and relatives (VFR), 93.4 percent (12,415) entered through SSKIA. Similarly, 92.0 percent (36,909) of business travellers arriving by air used SSKIA as their port of entry.

In contrast, Holiday/Leisure tourists predominantly entered through Maun Airport, which accounted for 66.7 percent (38,363) of air arrivals within this category, while Kasane Airport accounted for a further 19.6 percent (11,287). Kasane Airport was the principal entry point for In-Transit air travellers, handling 83.9 percent (1,635) of arrivals in this category.

Tourists travelling for other purposes, including religious, educational, medical, and shopping activities, also primarily entered through SSKIA, which accounted for 89.1 percent (8,688) of arrivals within this category.

TABLE 4: Distribution of Tourists by Mode of Travel and Purpose of Entry, 2024

2.6. Tourists by Port of Visit

Appendix 2A shows number of tourist arrivals by mode of travel, port of entry and purpose of visit. The data indicates that Ramokgwebana Border Post was the busiest entry port, facilitating 16.3 percent (250,137) of all tourist arrivals. It was followed by Kazungula Bridge Post, which accounted for 12.0 percent (183,371). Sir Seretse Khama International Airport was the sole airport featured among the ten busiest ports of entry as all others in the top ten were by road. Arrivals through Sir Seretse Khama International Airport constituted 4.2 percent (64,103) of the total tourist volume.

2.7. Tourists by Month of Arrival

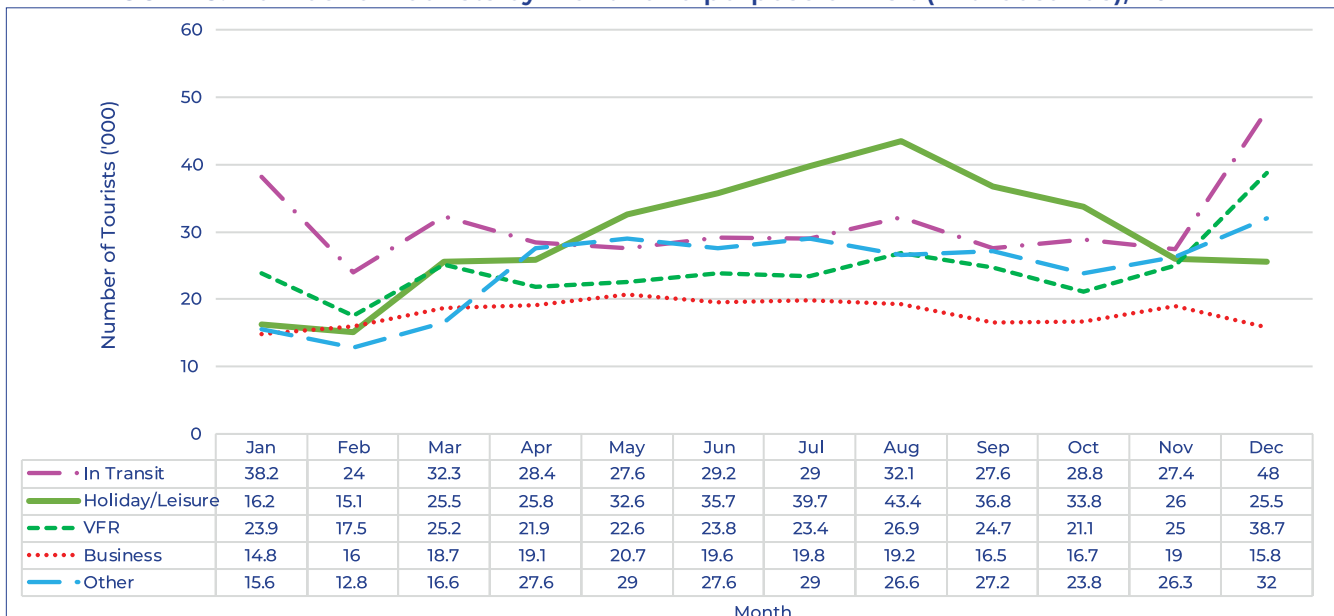

Figure 3 and **Table 5** display tourist arrivals by month of arrival and purpose of visit. December recorded the highest number of tourists at 10.4 percent (159,838), driven primarily by those In Transit (47,951) and those visiting friends and relatives (38,651). August and July followed, with 9.7 percent (148,211) and 9.2 percent (140,935) of tourists, respectively. The month with the fewest tourists was February, at 5.6 percent (85,363).

Figure 3 indicates that Holiday/Leisure tourist arrivals were highest in August (43,446), visiting friends and relatives picked in December (38,651), and business tourist arrivals were highest in May (20,736).

TABLE 5: Distribution of Tourists by Month and Purpose of Entry, 2024

	Purpose of Visit					Total	
	In Transit	Holiday/Leisure	VFR	Business	Other	Number	Percent
January	38,185	16,226	23,879	14,843	15,572	108,705	7.1

FIGURE 3: Number of Tourists by Month and purpose of Visit (in thousands), 2024

2.8. Tourists by Age Group

Table 6 and **Figure 4** present the distribution of tourist arrivals by age group, disaggregated by type of tourist and purpose of visit.

The largest proportion of tourists was recorded among those aged 40–44 years, accounting for 14.5 percent (221,697) of total tourist arrivals. This was followed by the 35–39 age group, which represented 13.7 percent (209,761) of arrivals. The 20–24 age group recorded the lowest number of tourist arrivals, accounting for 4.4 percent (66,968) of the total. A negligible number of tourists (108, representing less than 0.1 percent) had an unspecified age.

Analysis by purpose of visit shows that In-Transit travel was most common among middle-aged adults, peaking in the 40–44 age group with 66,770 arrivals. Holiday/Leisure travel exhibited a different pattern, with the highest numbers recorded among older tourists. The 65 years and above age group accounted for the largest number of Holiday/Leisure arrivals (81,117), followed by the 60–64 age group (41,979) and the 55–59 age group (35,680).

Visiting Friends and Relatives (VFR) travel was most prevalent among tourists aged 40–44 years (38,816), with substantial numbers also recorded among the 35–39 and 45–49 age groups. Business travel was concentrated within the 35–44 age range, peaking at 40,324.

TABLE 6: Number of Tourists by Age Group and Purpose of Visit, 2024

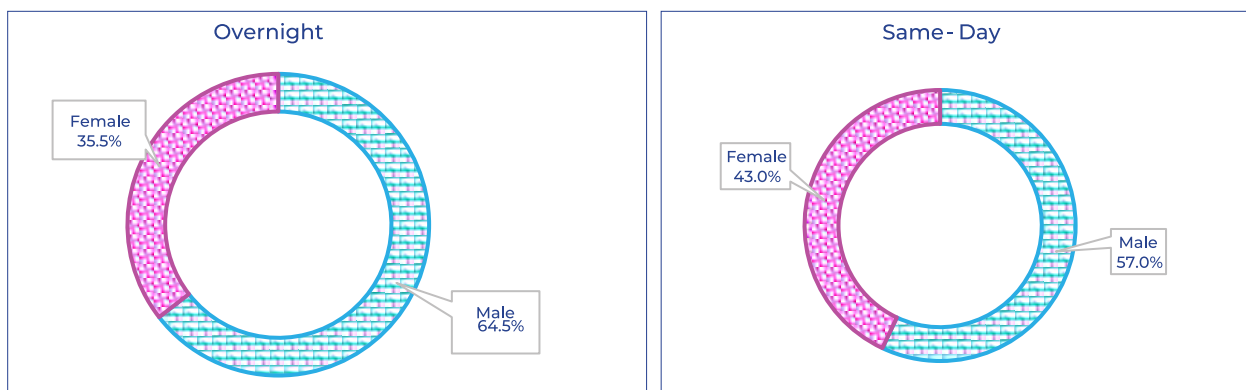

Age Group	Purpose of Visit					Total	
	In Transit	Holiday/ Leisure	VFR	Business	Other	Number	%

FIGURE 4: Distribution of Tourists by Age Group and type of Tourist (in thousands), 2024

2.9. Tourists Arrivals by Sex

Figure 5 presents the distribution of tourist arrivals by sex and type of tourist. The analysis indicates that male tourists outnumbered female tourists in both the overnight and same-day visitor categories.

Among overnight visitors, males accounted for 64.5 percent (943,335) of arrivals, while females accounted for 35.5 percent (519,217). A similar pattern was observed among same-day visitors, where males represented 57.0 percent (38,372) of arrivals.

FIGURE 5: Percentage Distribution of Tourists by Sex, 2024

2.10. Tourists Arrivals by Sex and Purpose of Visit

Table 7 presents tourist arrivals by sex and purpose of visit. Male tourists accounted for 64.2 percent (983,488) of total tourist arrivals, while females accounted for 35.8 percent (549,523).

Among male tourists, In-Transit travel was the most common purpose of visit, accounting for 30.3 percent (297,692) of male arrivals. This was followed by Holiday/Leisure travel at 18.2 percent (178,512) and Business travel at 17.9 percent (176,440).

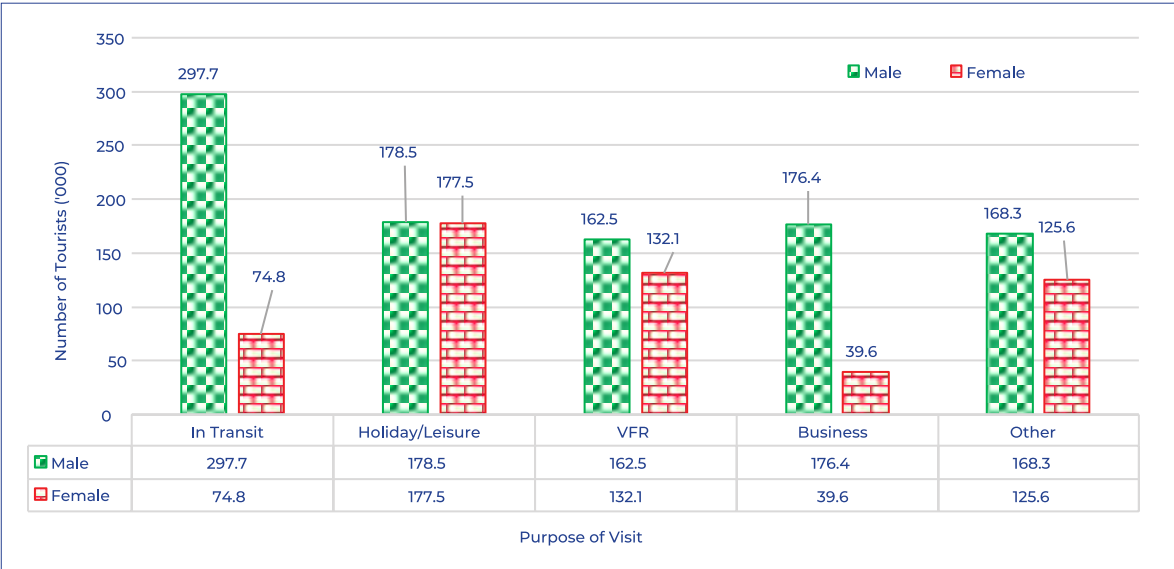

In contrast, Holiday/Leisure was the leading purpose of visit among female tourists, accounting for 32.3 percent (177,508) of female arrivals. Visiting Friends and Relatives (VFR) and "Other" purposes accounted for 24.0 percent (132,057) and 22.9 percent (125,579) of female arrivals, respectively.

Overall, Business and In-Transit travel were predominantly undertaken by male tourists, while female tourists recorded relatively higher proportions of Holiday/Leisure and VFR travel, as illustrated in **Figure 6**.

TABLE 7: Number of Tourists by Sex and Purpose of Entry, 2024

Purpose Of Visit	Male		Female		Total	
	Number	%	Number	%	Number	%
In Transit	297,692	30.3	74,791	13.6	372,483	24.3

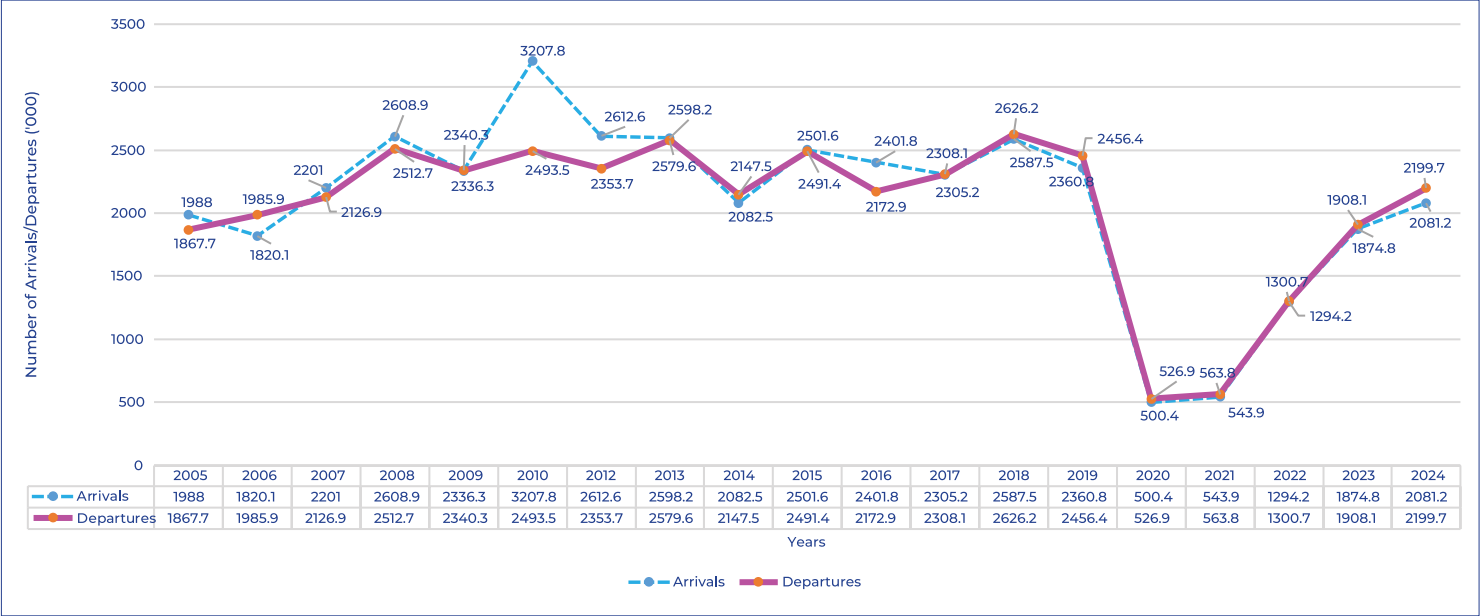

FIGURE 6: Distribution of Tourists by Sex and Purpose of Visit – 2024

CHAPTER 3: ALL TRAVELERS

This section reviews total arrivals and departures during the period. In 2024, Botswana recorded 2,081,199 arrivals and 2,199,728 departures (see Appendices 3 and 16). Arrivals grew by 11.0% from 1,874,766 in 2023, while departures rose by 15.3% from 1,908,139. Figure 7 shows the trend from 2005 to 2024 revealing that both arrivals and departures remain below the pre-COVID-19 volumes observed in 2019 and 2018.

FIGURE 7: Total Number of Arrivals and Departures from 2005 to 2024

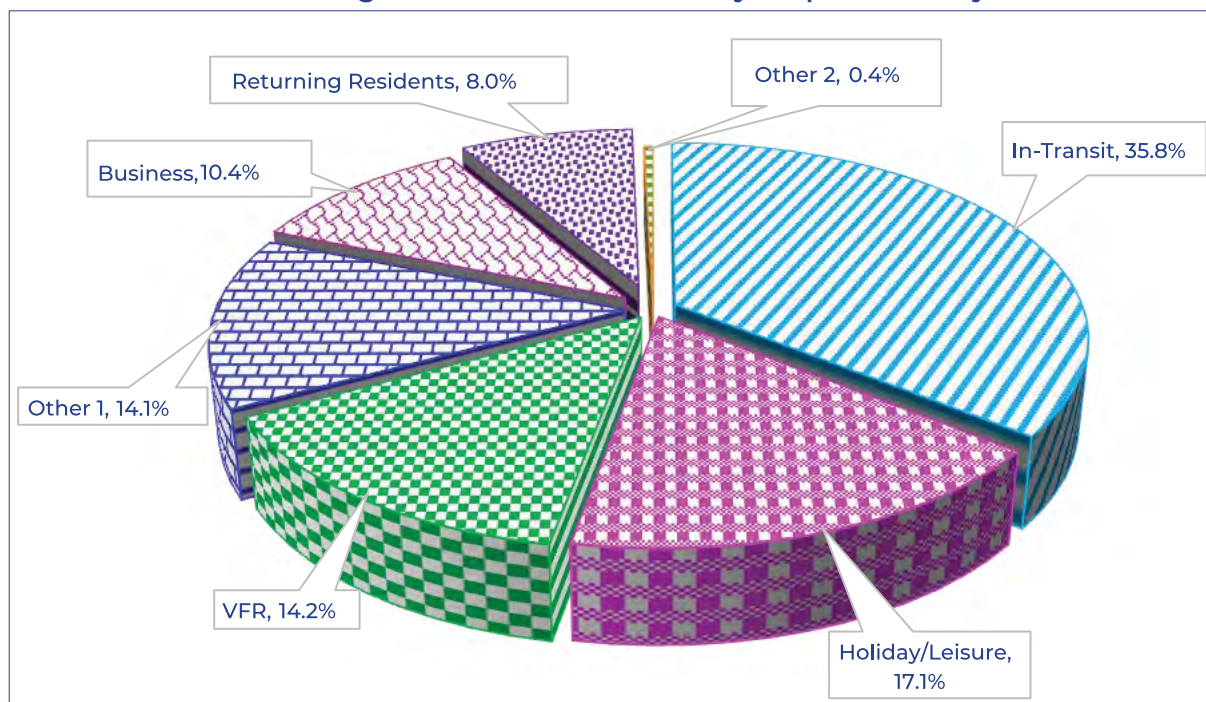

NB: The 2011 figures are not available.

3.1. Purpose of Entry

Appendix 6 shows the number of arrivals by country of residence and purpose of entry, with Figure 8 illustrating the corresponding percentage distribution of arrivals purpose of entry.

The predominant purpose of entry was In-transit, accounting for 35.8% (744,966) of total arrivals. This was followed by Holiday/leisure travellers at 17.1% (356,020) and Visiting Friends and Relatives at 14.2% (294,591).

As detailed in Figure 8, the 'Other 1' classification aggregates arrivals for shopping, religious activities, conferencing, education, sports, and medical reasons. A separate category, 'Other 2', comprises arrivals such as prospective residents, diplomats, employment seekers, and employed individuals.

FIGURE 8: Percentage Distribution of Arrivals by Purpose of Entry – 2024

Note:

Other 1 = Arrivals for Education, Shopping, Religious activities, Conferencing, Sports & Medical reasons.

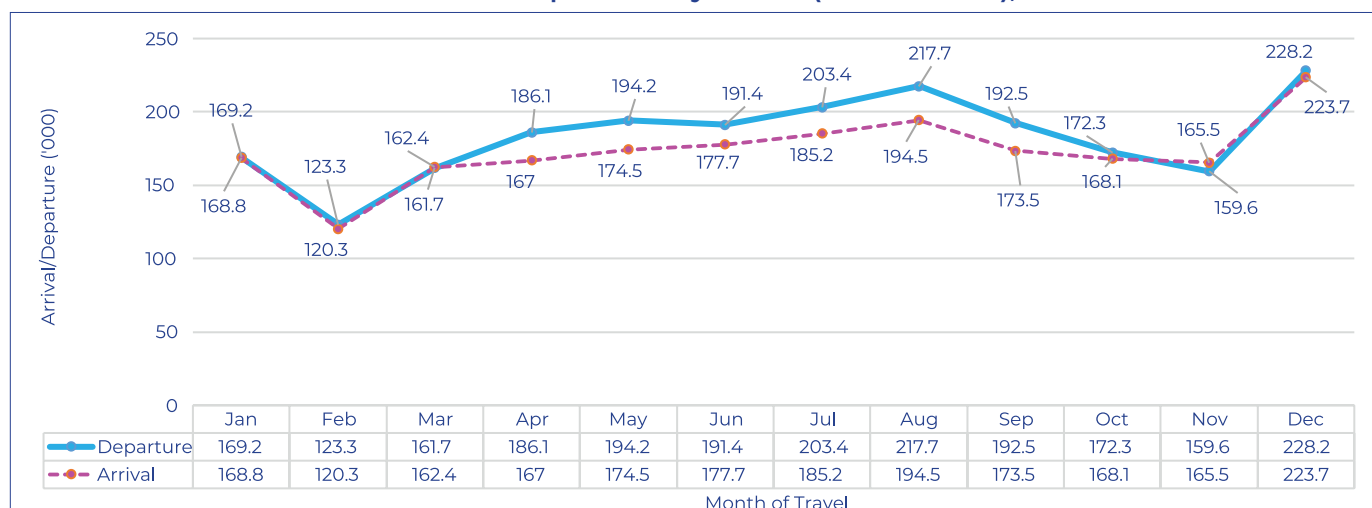

Other 2 = Arrivals for prospective residents, diplomats, employment seekers, the employed and those whose purpose of arrival was not stated and thus "Unknown".

3.2. Month of Arrival and Departure

Appendices 13 and **14** provide a monthly breakdown of arrivals and departures by border post. The data indicates a strong positive correlation in seasonal patterns between arrivals and departures, with a peak recorded in December and trough occurring in February.

The highest volume of arrivals was recorded in December, with 223,691 arrivals, constituting 10.7% of the annual total. This was followed by August (194,495 arrivals, 9.3%) and July (185,168 arrivals, 8.9%). Conversely, February registered the lowest number of arrivals at 120,261, accounting for 5.8% of the annual total arrivals.

A corresponding trend was observed for departures. December also shows the peak number of departures at 228,236, representing 10.4% of the annual total departures. Mirroring the arrival pattern, February registered the lowest number of departures (123,322), which accounted for 5.6% of the annual total departures.

FIGURE 9: Arrivals and Departures by Month (in thousands), 2024

3.3 Mode of Travel

Table 8 presents non-citizen arrivals and departures by mode of travel.

Road transport remained the dominant mode of travel, accounting for 93.4 percent (1,943,158) of all arrivals and 93.1 percent (2,047,269) of all departures. Ramokgwebana Border Post was the busiest road port of entry, accounting for 16.6 percent (345,437) of all road arrivals, while Tlokweng Border Post was the busiest road port of exit, handling 15.2 percent (335,341) of all road departures.

Air travel accounted for 6.6 percent (137,665) of total arrivals in 2024, representing a decrease of 0.1 percentage points from 6.7 percent recorded in 2023. Despite the slight decline in its share of total arrivals, the number of air arrivals increased by 12,606, from 125,059 in 2023 to 137,665 in 2024. Air travel accounted for 6.9 percent (152,204) of total departures.

Sir Seretse Khama International Airport was the busiest airport, accounting for 54.5 percent (75, 048) of all air arrivals and 50.5 percent (76, 835) of all air departures. Maun Airport was the second busiest, handling 32.3 percent (44, 457) of air arrivals and 35.6 percent (54, 238) of air departures.

TABLE 8: Distribution of Arrivals and Departures by Mode of Travel, 2024

Mode of Travel	Arrival		Departure	
	Number	Percent	Number	Percent
Road	1,943,158	93.4	2,047,269	93.1

North Rail	376	0.0	255	0.0
Total	2,081,199	100	2,199,728	100

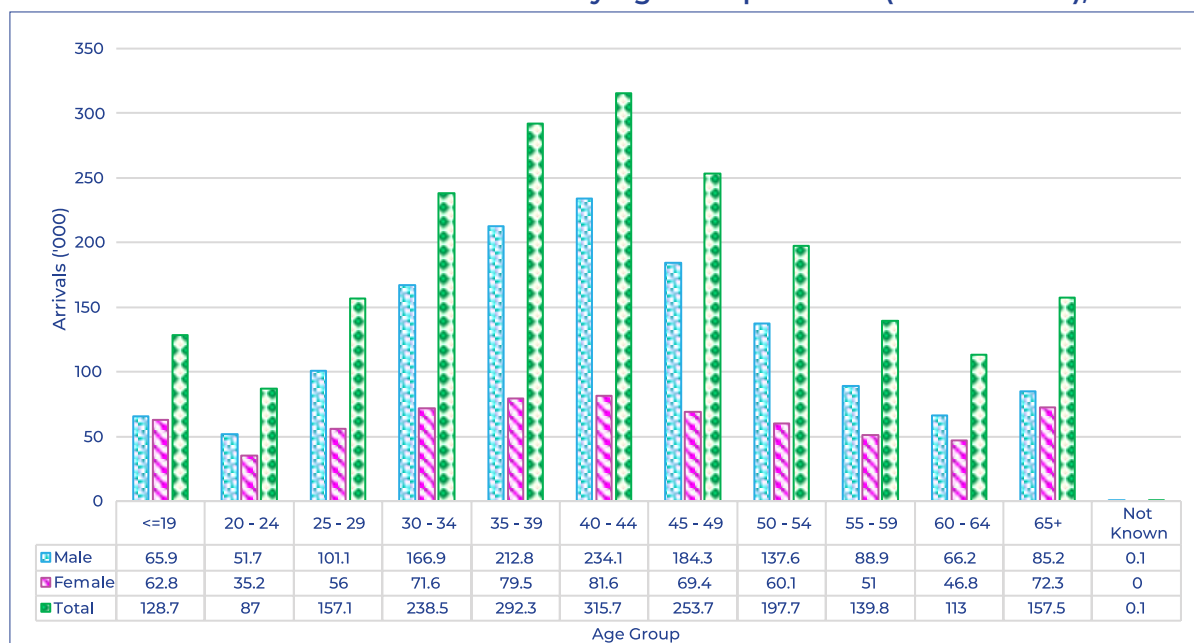

3.4 Age Group

Figure 10 illustrates the distribution of arrivals by age group and sex. The 40–44 age group recorded the highest number of arrivals, accounting for 315,667 arrivals, while the 20–24 age group recorded the lowest number, with 86,952 arrivals.

The figure further reveals variations in the sex distribution across age groups. The gap between male and female arrivals was smallest among the younger age groups (19 years and below and 20–24 years) and the older age groups (60–64 years and 65 years and above). In contrast, the disparity was most pronounced among the middle-aged groups, particularly those aged 35–39, 40–44, and 45–49 years.

Across all age groups, male arrivals exceeded female arrivals.

FIGURE 10: Distribution of Arrivals by Age Group and Sex (in thousands), 2024

3.5 Nationality

Appendix 3 shows that the majority of arrivals were nationals of countries within the Southern African Development Community (SADC) region, accounting for 82.0 percent (1,706,390) of all arrivals. Europe was the second-largest source region, contributing 8.8 percent (183,037) of total arrivals.

A more detailed analysis indicates that Zimbabwean nationals accounted for the largest share of arrivals at 32.1 percent (667,158), followed by South African nationals at 27.0 percent (560,892).

Among overseas (non-African) source markets, nationals of the United States of America recorded the highest number of arrivals, accounting for 3.8 percent (78,598) of the total. This was followed by nationals of Germany and the United Kingdom, who accounted for 2.5 percent (51,651) and 1.6 percent (33,579) of total arrivals, respectively.

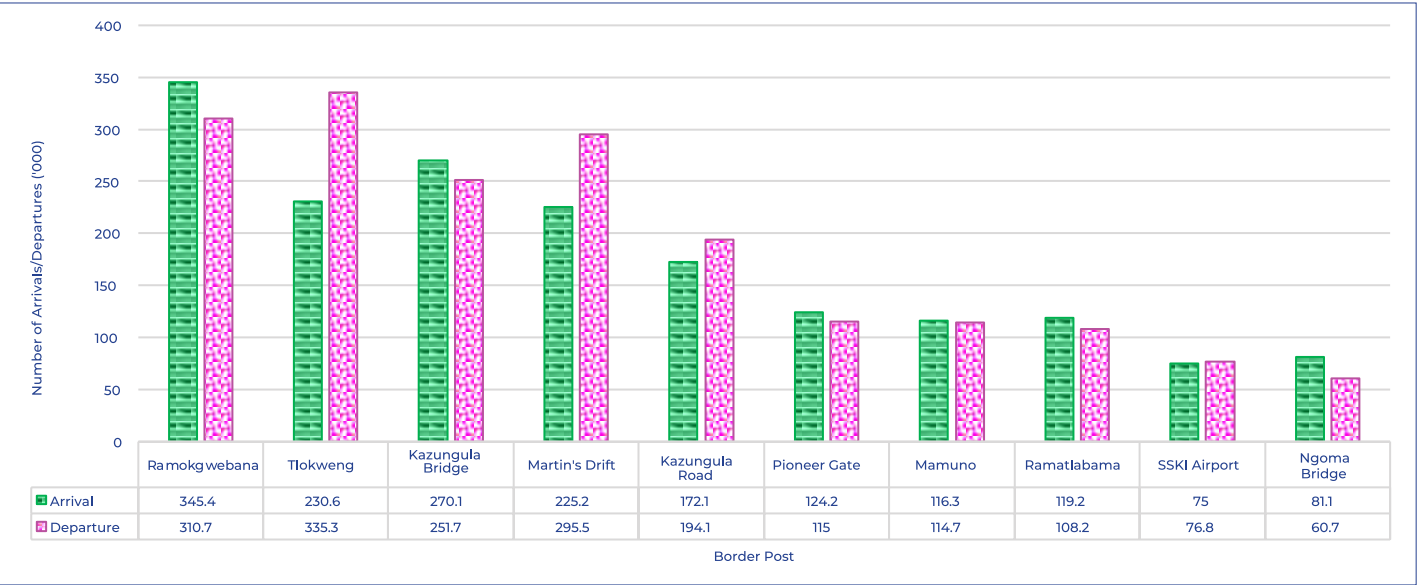

3.6 Border Post

The following analysis of arrivals and departures by border post is derived from **Appendices 13** and **14**. Ramokgwebana Border Post was the busiest port of entry, accounting for 16.6 percent (345,437) of all arrivals. It was followed by Kazungula Bridge and Tlokweng Border Post, which accounted for 13.0 percent (270,078) and 11.1 percent (230,596) of total arrivals, respectively.

For departures, Tlokweng Border Post was the most utilised port of exit, handling 15.2 percent (335,341) of all departures. Ramokgwebana and Martin's Drift Border Posts followed, accounting for 14.1 percent (310,664) and 13.4 percent (295,473) of total departures, respectively.

Based on **Appendices 13** and **14**, **Figure 11** presents a graphical representation of the ten busiest border posts, ranked by the volume of traveller movements processed at each port of entry.

FIGURE 11: Ten Busiest Border Posts (in thousands), 2024

CHAPTER 4: TECHNICAL NOTES

This section outlines the methodological framework underpinning the production of the tourism statistics presented in this report. It details the primary data sources, describes the procedures for data processing and compilation, and provides definitions of key terminology used in the report.

The information is intended to provide users with a clear understanding of the data sources, the methods used in data aggregation, and the precise meaning of the terminology applied throughout the report.

4.1. Data Source and Methodology

The data used in the production of this report are sourced from administrative records of the Department of Immigration and Citizenship (DIC). Data on international travellers are collected through Arrival Forms completed by non-citizens upon entry at all officially designated ports of entry, including land border posts and airports. These forms capture a range of traveller characteristics, including sex, age, country of nationality, country of residence, and purpose of entry. Supplementary information on the month of travel, mode of transport, and port of entry is also recorded by default.

Departure statistics are derived from border summary records compiled by immigration officials at all officially designated ports of exit.

The results and analysis presented in this report adhere to the guidelines, definitions, and classifications recommended by the United Nations World Tourism Organization (UN Tourism) and the United Nations Statistical Commission. The publication is therefore compiled in accordance with internationally accepted statistical standards and best practices.

In the compilation of this report, half of all in-transit travellers is classified as visitors. This approach recognises the potential economic contribution of a proportion of these travellers, who may incur expenditure within the country during transit, including through overnight accommodation or other ancillary spending.

4.2. Glossary

For the purposes of this publication, the following terms are defined as follows:

Overseas: Refers to all countries and territories outside the African continent.

Visitor: A non-resident entering Botswana for a period not exceeding twelve consecutive months, whose primary purpose of visit is not to undertake an activity remunerated from within Botswana.

Tourist (Overnight Visitor): An international visitor whose trip includes at least one night spent in either collective or private accommodation within Botswana.

Same-day Visitor: An international visitor whose travel does not include an overnight stay in any form of accommodation within Botswana.

Non-resident: A foreign national, excluding residents of Botswana, entering or departing the country.
