STATISTICS BOTSWANA

**TRANSPORT AND INFRASTRUCTURE
STATISTICS**
QUARTER 2, 2026

PREFACE

This Stats Brief presents a summary of Transport and Infrastructure Statistics for Q2 2026. The publication provides an overview of Motor Vehicle Registrations, Rail and Air Transport during the quarter under review.

In Q2 2026, a total of 7,536 motor vehicles were registered for the first time, representing a decrease of 7.2 percent compared to the 8,119 vehicles registered in the previous quarter. Passenger cars dominated first-time registrations at 73.0 percent of the total, while vans accounted for an 8.3 percent share.

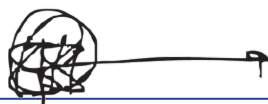

The volume of goods transported by rail this quarter dropped by 16.4 percent, from 171,175 net tonnes in the previous quarter to 143,531 net tonnes. This cargo movement generated P39.4 million, a decline of 8.2 percent compared to the P42.9 million generated in the previous quarter.

Aircraft movements recorded this quarter totaled 24,575, marking a 67.6 percent increase compared to the 14,667 movements registered in the previous quarter. Out of this, 81.8 percent were domestic while 18.2 were international. Passenger movements reached 257,801, an increase of 35.8 percent compared to the total recorded in the previous quarter.

For more information and further enquiries, contact the Directorate of Stakeholder Relations at **+267 367 1300**.

This publication, and all other Statistics Botswana outputs/ publications are available on the website at (<http://www.statsbots.org.bw>) and at the Statistics Botswana Information Resource Centre (Head-Office, Gaborone).

Statistics Botswana acknowledges and extends gratitude to the various Government departments and/or organizations that provided information for this publication.

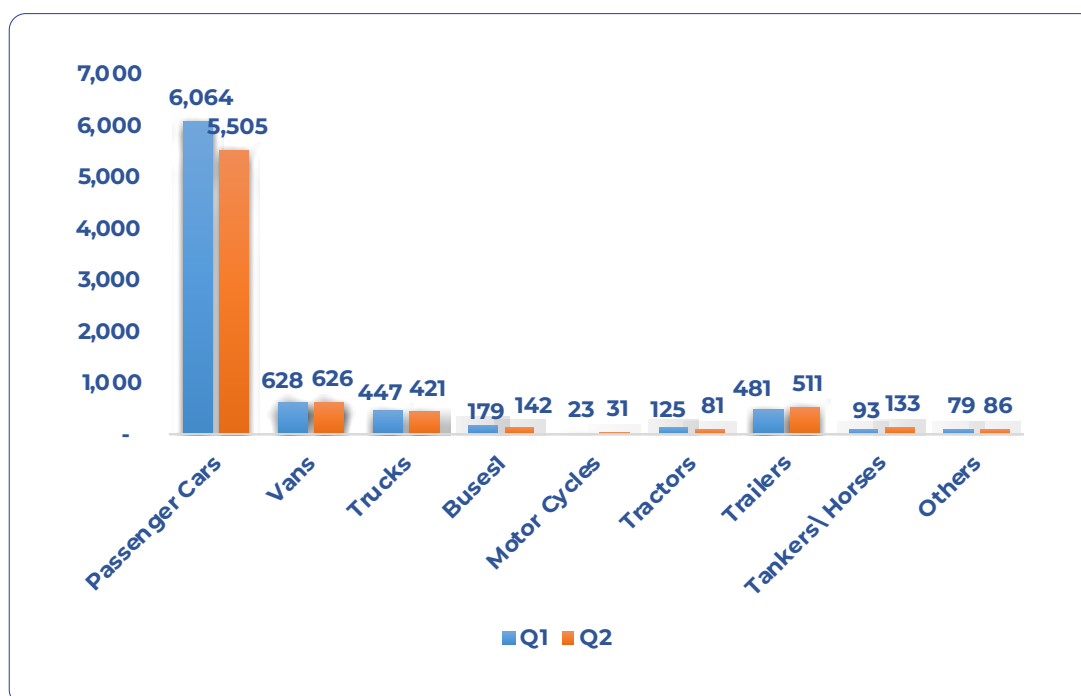

Dr. Khaufelo R. Lekobane
Statistician General
October 2026

1. MOTOR VEHICLE REGISTRATION

1.1 Motor Vehicles Registered For the First Time

Total vehicles registered for the first time declined by 7.2 percent in Q2 2026, compared with 8,119 vehicles registered in the previous quarter. The decline was reflected across several body types, including tractors (35.2 percent), buses (20.7 percent), passenger cars (9.2 percent), trucks (5.8 percent) and vans (0.3 percent). Conversely, registrations of tankers/horses went up by 43.0 percent, while motorcycles and trailers increased by 34.8 and 6.2 percent respectively. Passenger cars dominated registrations, accounting for 73.0 percent of the total, followed by vans (8.3 percent), trailers (6.8 percent), and trucks (5.6 percent). Motorcycles accounted for the smallest share at 0.4 percent. See **Table 1** in **Appendix 1** and **Figure 1** below.

FIGURE 1: Motor Vehicle Registered For The First Time by Country of Origin (% Contribution), Q1 & Q2 2026

Vehicles registered for the first time this quarter were predominantly used, accounting for 78.2 percent of the total; of these, 84.8 percent were passenger cars. Brand-new vehicles comprised 21.7 percent of the total registrations, with passenger cars and vans making up 30.7 percent and 28.1 percent of that segment, respectively. Furthermore, a deeper breakdown reveals that 90.8 percent of passenger cars were used-cars, 9.1 percent were brand-new, and 0.1 percent were rebuilt. In contrast, 73.5 percent of the vans were brand-new, 26.2 percent were used, and the remaining 0.3 percent were rebuilt. (see **Table 2** in **Appendix 1**).

Table 3 in **Appendix 1** shows that 67.9 percent (the majority) of the vehicles registered for the first time originated from Japan, and 99.2 percent of these vehicles were used. Vehicles originating from the Republic of South Africa represented the second-largest share at 19.4 percent, with brand-new vehicles accounting for 77.7 percent of these registrations. Botswana-origin vehicles accounted for 4.1 percent of the total, with 53.6 percent being used, 45.5 and 1.0 percent being brand-new and rebuilt respectively. Overall, the majority of used vehicles originated from Japan at 86.2 percent, whereas most brand-new vehicles originated from South Africa at 69.5 percent.

Mazda dominated first-time vehicle registrations this quarter at 20.3 percent, followed by Honda at 18.1 percent and Toyota at 17.4 percent (see **Table 4, Appendix 1**)

During Q2 2026, the highest monthly share of first-time vehicle registrations was recorded in June, accounting for 36.1 percent of the total. The months of April and May constituted 35.2 percent and 28.7 percent, respectively (see **Table 5, Appendix 1**).

First-time vehicle registrations were heavily concentrated in Gaborone stations, which represented 55.3 percent of the total. Francistown followed with 8.0 percent, whereas Molepolole accounted for 6.9 percent of total registrations (see **Table 6 in Appendix 1**).

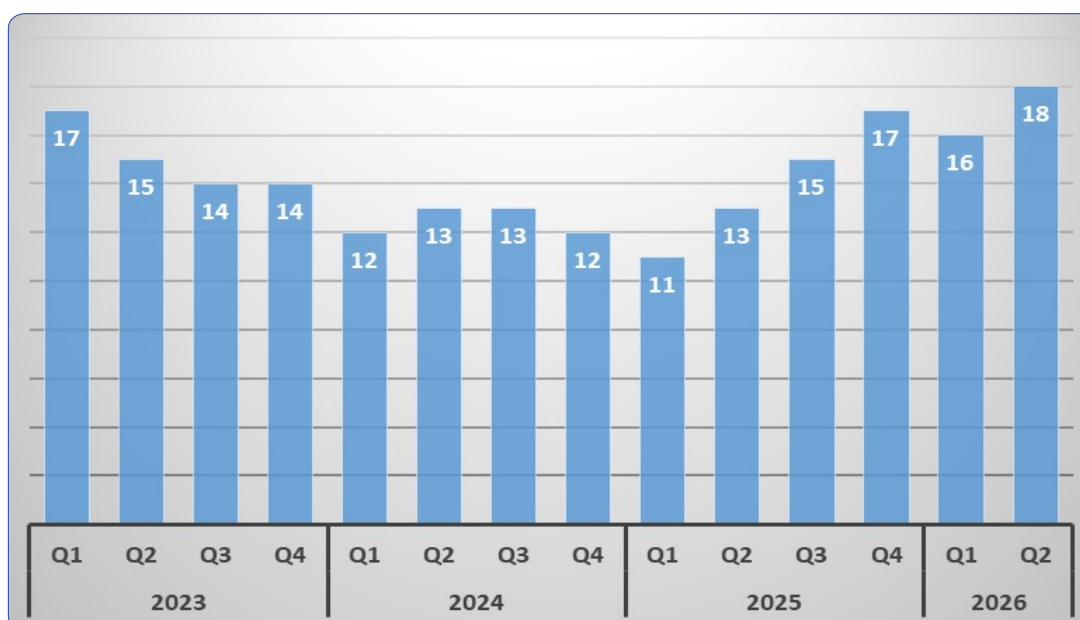

1.2 Motor Vehicle License Renewals

During the quarter under review, motor vehicle license renewals stood at 135,021, representing a 2.7 percent increase when compared to the 131,439 renewals in the previous quarter. However this reflected a 9.8 percent decline compared to the corresponding quarter of the previous year (Q2 2025). License renewals for passenger cars accounted for 65.7 percent of the total, followed by vans at 18.3 percent and trucks at 6.1 percent. The sharpest decline in renewals was recorded for tractors at 22.9 percent, whereas the highest increase was seen in passenger cars at 5.1 percent (see **Table 7 in Appendix 1**).

Monthly data indicates that license renewals peaked in June, representing 40.7 percent of the total. May contributed 30.5 percent, April accounted for the lowest share at 28.9 percent (See **Table 8, Appendix 1**).

By vehicle make, Toyota recorded the highest share of license renewals at 40.6 percent. Mazda followed at 10.6 percent, while Honda stood at 10.1 percent (see **Table 9, Appendix 1**).

Figure 2: Renewals-to-first-registrations ratio, Q1 2023 – Q2 2026

In Q2 2026, for every single first registration, there were approximately 18 license renewals. This renewals-to-first-registrations ratio increased from 11 in Q1 2025 to 18 in Q2 2026, reaching its highest level over the period under review. This indicates that license renewals have become increasingly dominant relative to first registrations. As illustrated in **Figure 2** above.

2. Rail Transport

2.1 Rail Freight

A total of 143,531 net tonnes of cargo was transported by rail during the quarter under review, representing a 16.4 percent decrease compared to the previous quarter. Of this volume, total exports accounted for 41.0 percent, local traffic comprised 22.2 percent, and total imports made up 18.7 percent, while transit traffic accounted for the remaining 18.1 percent. This quarter-on-quarter decline spanned almost all traffic categories except total exports, which grew by 10.5 percent. Conversely, total imports dropped by 36.6 percent, local traffic fell by 27.2 percent, and transit traffic decreased by 19.6 percent.

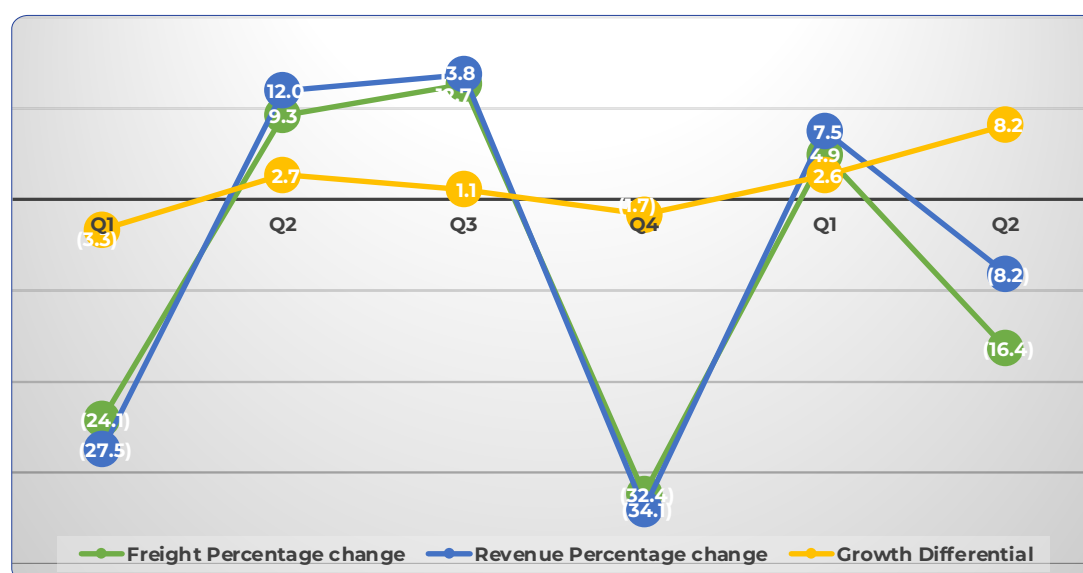

Monthly distribution shows that rail freight peaked in April, accounting for 40.9 percent of the quarterly total. May and June followed with 33.4 percent and 25.7 percent, respectively (see [Table 10](#) in [Appendix 2](#)).

2.2 Revenue Generated from Rail Freight

Revenue generated from rail transport during the quarter amounted to P39.4 million, signifying an 8.2 percent reduction compared to the P42.9 million generated in the previous quarter. The largest share of this revenue was derived from the transportation of exports at 34.9 percent, of which 85.8 percent came from exports to the South. Local traffic followed, contributing 25.6 percent of total revenue, while transit traffic and total imports constituted 23.7 percent and 15.9 percent, respectively.

This quarterly decline in total revenue was reflected across most traffic categories, with the sharpest contraction recorded in local traffic revenue at 20.6 percent. Revenue from transit traffic and total imports reduced by 11.7 percent and 9.3 percent, respectively. In contrast, revenue from total exports realized an increase of 7.5 percent (see [Table 11](#) in [Appendix 2](#)).

Figure 3: Growth Differential Between Rail Freight Traffic and Revenue, Q2 2026

In Q2 2026, traffic declined by 16.4 percent, while revenue decreased by a comparatively smaller 8.2 percent, resulting in a growth differential of 8.2 percent. This gap indicates that revenue was more resilient than freight traffic during the quarter, suggesting that revenue changes were not proportional to freight volume. See [Figure 3](#) above.

3. Air Transport

3.1 Aircraft Movements

During the quarter under review, aircraft movements surged by 67.6 percent compared to the previous quarter. Of the 24,575 aircraft movements, 81.8 percent were domestic and 18.2 percent were international. Both sectors recorded quarter-on-quarter growth, with domestic movements climbing by 78.5 percent and international movements rising by 31.4 percent. (See [Table 12, Appendix 3](#)).

The majority of international aircraft movements were scheduled (73.7 percent) whereas domestic movements were overwhelmingly non-scheduled (88.9 percent). Overall, non-scheduled flights constituted 77.2 percent of total traffic (94.2 percent domestic, 5.8 percent international). Non-scheduled arrivals and departures accounted for 38.8 and 38.4 percent, respectively. Scheduled flights accounted for 16.2 percent of the total (83.0 percent international, 17.0 percent domestic), evenly split between arrivals and departures at 8.1 percent each. Private movements made up the remaining 1.2 percent. Detailed breakdowns are available in [Tables 13a and Table 13b of Appendix 3](#).

Maun Airport handled the largest share of aircraft movements at 71.9 percent, followed by Kasane Airport at 15.3 percent. Sir Seretse Khama International Airport (SSKIA) accounted for 11.9 percent, while Phillip Matante International Airport recorded 0.7 percent (see [Table 14, Appendix 3](#)).

3.2 Air Passenger Movements

A total of 257,801 passenger movements were recorded this quarter, representing a 35.8 percent increase compared to the previous quarter. International traffic accounted for 60.0 percent of the total, while domestic movements made up the remaining 40.0 percent. Growth was realized across both categories, with domestic movements rising by 46.1 percent and international movements increasing by 29.7 percent (further details are provided in [Table 15, Appendix 3](#)).

Passenger movements were predominantly scheduled flights, which constituted 71.6 percent of the total. Non-scheduled movements accounted for 26.3 percent, while scenic and private movements represented 1.5 percent and 0.6 percent, respectively. Compared to the previous quarter, passenger traffic volume increased across most categories except for private movements, which declined by 7.4 percent. The highest growth was recorded in scenic movements at 158.3 percent, while non-scheduled and scheduled movements grew by 91.1 percent and 22.1 percent, respectively as shown in [Table 16 of Appendix 3](#).

During Q2 2026, SSKIA handled the largest share of passenger traffic at 42.7 percent, closely followed by Maun Airport at 42.3 percent. Kasane Airport accounted for 14.2 percent of movements, while Phillip Matante contributed 0.8 percent. Selebi Phikwe and Ghanzi recorded the smallest shares at 0.02 percent and 0.03 percent, respectively. Passenger volumes increased across most airports compared to Q1 2026; Kasane Airport recorded the sharpest growth at 105.3 percent, followed by Maun Airport at 63.3 percent. Conversely, was the only airport to register a decline, with traffic decreasing by 27.5 percent. Detailed data is available in [Table 17, Appendix 3](#).

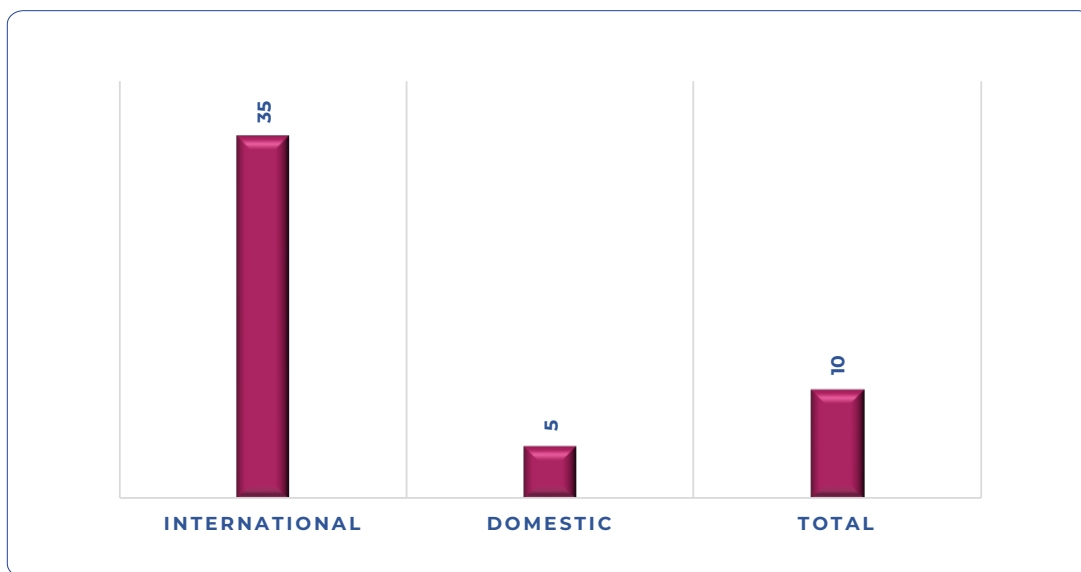

Figure 4: Passenger-per-aircraft ratio by Type of Flight, Q2 2026

Figure 4 above shows passenger movements per aircraft movement for both international and domestic traffic. It highlights a higher ratio (35) for international movements, implying that fewer aircraft movements carried a relatively larger volume of passengers. Conversely, the lower ratio (5) for domestic movements indicates substantial aircraft activity but relatively few passengers per movement.

APPENDIX 1:

MOTOR VEHICLE LICENSING AND REGISTRATIONS

TABLE 1: Motor Vehicles Registered For The First Time by Body Type, Q1 2022 - Q2 2026

Source :Department of Road Transport and Safety, Ministry of Transport and Public Works

A close-up, low-angle photograph of railway tracks. The foreground shows the metal rails and the gravel bed, with several metal fasteners (bolts and nuts) visible. The tracks curve into the distance, creating a sense of depth. The lighting is warm, highlighting the textures of the metal and gravel.

Explanatory Notes

1. Motor Vehicle Registrations

Motor vehicle registration deals with licensing of motor vehicles with respect to those registered for the first time and license renewal of pre-existing ones. First registrations are done at the Department of Road Transport and Safety (DRTS) only, while license renewals are done at DRTS offices, Post Offices country wide and some stores like Sefalana Cash and Carry. First Registration could be for a new, used or rebuilt vehicle.

Botswana Origin: Brand new vehicles (Botswana origin) are new vehicles bought from local dealerships e.g. Motor Centre. There are also trailers made locally in the country.

2. Rail Transport

Rail Transport covers passengers and goods transported by rail and the revenue generated from the conveyance of these goods and passengers. Botswana Origin is comprised of Total Exports and Local Traffic goods, while Botswana Total is an addition of Total Imports and Botswana Origin goods. Total Traffic is made up of Total Exports, Total Imports, Local Traffic and Transit Traffic. Local traffic refers to goods transported within Botswana and Transit Traffic refers to goods transported through Botswana to other countries.

3. Air Transport

Air transport section covers the movement of aircrafts and air passengers both locally and internationally.

International movements refer to movements made by aircrafts and passengers to destinations outside Botswana whilst domestic movements account for travels made within Botswana. The movements are further categorized into scheduled, non-scheduled and private.

Scheduled aircraft movements refer to commercial airlines operating on a time table while non-scheduled aircraft movements refer to commercial aircrafts which operate as and when needed. Private aircraft movements refer to non-commercial individual aircrafts. Scenic aircraft movements refer to airlines that focus on viewing wildlife and surrounding natures.

N.B Francistown International airport has been renamed Phillip Matante International Airport
