Release Date: 25th June 2014

#### **Preface**

This International Merchandise Trade Statistics (IMTS) Monthly Digest presents statistics on Botswana's total imports and exports of goods as at the end of April 2014. Data for imports and exports of goods is currently complete up to February 2014. Data for March and April 2014 is from borders with automated facilities only, constituting about 98 percent of total trade in value terms.

Since Statistics Botswana receives new data on monthly basis, and there is continuous data editing as various tables and reports are produced, the database is therefore updated from time to time. As a result of editing and revision of data, figures on previous Monthly Digests (for subsequent months) and that on the current Monthly Digest may differ.

This monthly digest presents summaries of Total Merchandise Trade from the first quarter of 2009 to April 2014 as presented on **Table 1**. Trade by Principal Commodity groups is presented on **Tables 2.1** for imports and **Table 2.2** for exports, giving data from the first quarter of 2009 to the month under review. **Table 2.3** gives trade on diamonds only. Direction of trade is given for the most recent twelve months and this appears on **Tables 3.1** and **3.2** for imports and exports respectively.

Three graphical presentations appear in this digest. **Chart 1** shows imports, total exports and trade balance from January 2008 to April 2014 while **Charts 2.1** and **2.2** shows Principal Commodity groups for major imports and major exports respectively, for April 2014 only.

In the current digest, data for April 2014 have been added to the disaggregation process, meaning that diamonds imports for January 2013 up to April 2014 are those that were only imported into Botswana for processing (polishing and cutting), and excludes those coming in for aggregation leading to re-export. Exports for these months comprise exports of Botswana diamonds plus exports from diamond processing companies operating in Botswana. We are having challenges in getting disaggregated data for July 2012 to December 2012. However efforts are still being made to get the necessary information.

Statistics on commodities that were mostly traded during the most recent two months, in this case March 2014 and April 2014, appear on **Tables 4.1 (A) & (B)** for imports while exports are presented on **Tables 4.2 (A) & (B)**. Trade at Chapter Level (2 digits Harmonized Commodity Description & Coding System) appears on **Table 5**, presenting data for March 2014 and April 2014.

**Table 1** distinguishes domestic exports from re-exports while other tables give total exports, which is the sum of the two.

We sincerely thank all stakeholders involved in the formulation of this monthly digest, their continued support and feedback, as we strive to better serve Batswana and all other important users of our services.

Dabilani Buthali

MEBULLON

**Acting Statistician General** 

25<sup>th</sup> June 2014

#### 1.0 Total Trade

Total merchandise trade as presented in this section refers to imports, domestic exports and re-exports as well as trade balance.

#### 1.0.1 Data Revision

It should be noted that IMTS is compiled using date of recording of trade as opposed to date of assessment of goods by customs. This means that as goods cross the border, trade is recorded and this is the reference month for compilation of IMTS. Some of these goods may however be held by customs for some time pending final assessment for tax or duty purposes.

If final assessment is done two or three months, or even more, after goods had crossed the border, the affected trade will then update trade for the particular month when the goods crossed the border, therefore it does not form part of trade for the month during which final assessment was done. This is mostly common with imports. Revised Data for the month preceding the one under review will normally be high as compared to the other months due to more goods (from the previous month) being released after final assessment. At times incorporation of data from manual border posts also adds to the difference.

Table A: Data Revision; January 2014 to March 2014 and as at March 2014 to April 2014 Digests (000 PULA)

() denotes negative numbers

March 2014 data is from automated borders only, constituting 98% of total expected trade

Discussions on total trade (Section 1) are based on **Table 1**.

## 1.1 Imports

Discussions on imports are based on cost, freight and insurance (CIF) value. April 2014 total imports were valued at P4, 687.2 million, showing a decrease of 3.3 percent (P161.2 million) from the revised March 2014 value of P4, 848.4 million. When annualizing total import figures, April 2014 imports value increased by 12.1 percent (P505.5 million) from the April 2013 value of P4, 181.6 million.

# 1.2 Total Exports

In April 2014 total exports were valued at P5, 150.8 million, an increase of 18.9 percent (P818.3 million) from the March 2014 revised value of P4, 332.5 million. Comparison of April 2014 total exports value to that of April 2013 shows a decrease of 15.7 percent (P962.4 million) from P6, 113.3 million to P5, 150.8 million.

#### 1.3 Trade Balance

April 2014 recorded a trade surplus of P463.6 million.

Chart 1: Total Merchandise Trade - January 2008 to April 2014 (Million PULA)

() denotes negative number

March & April 2014 data is from automated borders only, constituting about 98 % of total expected trade

**Chart 1** shows trade surplus in April 2014. It should be noted that trade balance is largely dependent on the value of diamonds traded as these are associated with high values.

#### 2.0 TRADE BY PRINCIPAL COMMODITIES

Principal commodity groups refer to selections of related commodities grouped together to form major groups. Commodities forming a group may be of related chapters, for example; "Machinery & Electrical Equipment" which combines machines and electrical appliances; "Vehicles & Transport Equipment" which combines vehicles and other equipment used for transport purposes.

In some cases it becomes challenging to come up with further groups of related chapters or commodities. This occurs when commodity groupings' contributions to the total, are minimal. In such cases, the commodities are grouped together under the general category called "Other".

# 2.1 Principal Imports

Imports by Principal Commodity Groups together with the associated percentage distributions, appear on **Table 2.1**, covering the first quarter of 2009 to April 2014. Percentage distributions are however only shown for totals of years 2011 to 2013, as well as also for March and April 2014. **Chart 2.1**, however gives graphical presentation of Principal Import Commodity groups for April 2014 only.

Composition of imports by principal commodities for April 2014, shows that Fuel contributed the highest at 25.2 percent (P1, 181.4 million) to total imports (P4, 687.2 million), followed by Diamonds with 18.7 percent (P876.0 million), Machinery & Electrical Equipment with 12.9 percent (P606.7 million). Food, Beverages & Tobacco, Chemicals & Rubber Products and Vehicles & Transport Equipment contributed 10.2 percent (P475.8 million), 9.0 percent (P420.4 million) and 8.7 percent (P409.6 million) respectively.

Chart 2.1: Principal Imports Composition – April 2014

Note: Other Goods include all Other Goods not elsewhere specified as in Table 2.1 Based on data from automated borders only

## 2.2 Principal Exports

April 2014 total exports were valued at P5, 150.8 million, with 84.9 percent (P4, 371.0 million) attributed to exports of Diamonds. The diamond trade is for both rough and polished diamonds and **Table 2.3** gives trade in diamonds at a disaggregated level from the first Quarter of 2009 to April 2014. However, it should be noted that diamond exports for January 2013 to April 2014 are for rough diamonds originating from Botswana plus those from diamonds processing companies only. Re-exports of diamonds from aggregation process are not included in the January 2013 to April 2014 data.

Copper/Nickel, Vehicles & Transport Equipment and Machinery & Electrical Equipment contributed 4.9 percent (P254.8 million), 2.3 percent (P118.6 million) and 2.0 percent (P103.4 million) respectively.

Percentage distributions for major export groups can be observed on **Table 2.2** while **Chart 2.2** gives the graphical presentation for April 2014 only. It should however be noted that total exports discussed here are the sum of domestic exports and re-exports.

Chart 2.2: Principal Exports Composition – April 2014

Note: Other Goods: include all Other Goods not elsewhere specified as in Table 2.2 Based on data from automated borders only

#### 3.0 Trade by Regional and Major Partners

Direction of trade gives imports by source while exports are presented by last known destination. Only major trading partners are considered individually, while smaller trading partners are grouped together under a general category. Data for the most recent twelve months appear on **Table 3.1** for imports and **Table 3.2** for exports.

# 3.1 Imports by Region and Major Trading Partners

Imports for April 2014 were valued at P4, 687.2 million, with 70.3 percent (P3, 294.3 million) coming from South Africa. Canada supplied imports valued at P655.6 million, which is 14.0 percent of total imports for the month under review. Imports from Asia were valued at P263.6 million in April 2014, representing 5.6 percent of total imports. Israel contributed the most to imports from Asia with 2.0 percent (P91.9 million), followed by India with a contribution of 1.2 percent (P58.3 million).

The European Union (EU) supplied imports valued at P242.7 million during April 2014, representing 5.2 percent of total imports during the month. Imports from the EU were mainly from the United Kingdom and Belgium with contributions of 1.6 percent (P74.8 million) and 1.5 percent (P70.3 million) respectively, of total imports during the month under review. Imports from the United States of America (USA) were valued at P49.8 million, representing 1.1 percent of total imports during April 2014.

Imports at regional and country level (for selected countries) are presented on **Table 3.1**; however, percentage distributions do not form part of this table.

# 3.2 Exports by Region and Major Partner Countries

Total exports for April 2014 were valued at P5, 150.8 million, with 50.4 percent (P2, 596.8 million) destined to Asia. India received most of exports destined to Asia, having received 24.0 percent (P1, 238.2 million) while Israel received 9.1 percent (P468.2 million). Singapore, United Arab Emirates (UAE) and Hong Kong received 6.2 percent (P317.1 million), 6.1 percent (P312.6 million) and 4.0 percent (P204.6 million) respectively, of total exports during April 2014.

Exports destined to the EU were valued at P1, 305.5 million, representing 25.3 percent of total exports during the period under review. From the EU, Belgium and the United Kingdom received 23.2 percent (P1, 192.7 million) and 2.0 percent (P101.2 million) respectively, of total exports during April 2014.

South Africa, Namibia and Zimbabwe received 10.8 percent (P553.8 million), 2.4 percent (P125.2 million) and 1.5 percent (P76.4 million) respectively, of total exports during the month under review.

Exports to the USA were valued at P159.3 million, representing 3.1 percent of total exports (P5,150.8 million) during April 2014, while Norway and Switzerland received 2.6 percent (P136.4 million) and 2.1 percent (P108.0 million) respectively.

Other destinations for exports can be observed on Table 3.2; however, percentage distributions do not form part of the table.

# 4.0 ANNEXURE

Table 1: Total Merchandise Trade - Quarter 1 of 2008 to April 2014 ('000 Pula)

Data for April 2014 are from computerized borders only & constitute 98% of total monthly trade in value terms

#### 5.0 Technical Notes

IIMTS are compiled by International Merchandise Trade Statistics Section of Statistics Botswana. External trade statistics here refers to trade in goods only. International Service Trade Statistics (ISTS) are not compiled by this unit. The primary source of External Trade data is Customs & Excise Division which is part of Botswana Unified Revenue Service (BURS). Customs & Excise Division is responsible for data capture for both computerized and manual borders and the monthly raw data files are transferred to Statistics Botswana for data processing, in electronic form.

Up to April 2009 Monthly Digest, Botswana was practicing Relaxed Special Trade Type. The Relaxed Special Trade Type takes in to account goods that are exported or imported for inward or outward customs processing while the Strict Special Trade Type does not include the same.

In June 2009, the Botswana External Trade database was revised to cater for General Trade Type as per the United Nations Statistics Division recommendations. The General Trade Type gives a complete coverage of External Trade as compared to the Special Trade Type.

Imports are valued CIF (cost, insurance & freight) while exports are valued FOB (free on board). The value of imports includes transport and insurance costs to the importing country. Exports value consists only of the value of goods as they leave the exporting country. Goods are valued as at the time they cross the border of the exporting country.

#### 5.1 Definitions used

**Domestic Exports:** Goods of Botswana origin being exported permanently out of Botswana for consumption in the outside world.

**Re-Exports:** Goods that were initially imported for local consumption and are now being exported permanently out of the country or goods which were exported in the same condition as imported or after undergoing minor transformation which leaves them not substantially changed.

**Imports:** Goods imported from the outside world, into Botswana, for local consumption.

**Trade Balance (Net Export):** This refers to the total value of goods exported minus the total value of goods imported by a given economy in a given period of time. A positive trade balance (trade surplus) indicates that a country is exporting more in value terms than it is importing. A negative trade balance (trade deficit) indicates that the country importing more than it is exporting.
