# SEPTEMBER 2014 <br> MONTHLY DIGEST STATISTICS BOTSWANA 

Copyrights@Statistics Botswana 2015

## Preface

This International Merchandise Trade Statistics (IMTS) Monthly Digest presents statistics on Botswana's total imports and exports of goods as at the end of September 2014. Since Statistics Botswana receives new data on a monthly basis, and there is continuous data editing as various tables and reports are produced, the database is therefore updated from time to time. As a result of editing and revision of data, figures on previous Monthly Digests and that on the current Monthly Digest (for the corresponding months) may differ.

This Monthly Digest presents summaries of Total Merchandise Trade from the first quarter of 2009 to September 2014 as presented on Table 1. Trade by Principal Commodity groups is presented on Tables $\mathbf{2 . 1}$ for imports and Table 2.2 for exports, giving data from the first quarter of 2009 to the month under review. Table 2.3 gives trade on diamonds only. Direction of trade is given for the most recent twelve months and this appears on Tables 3.1 and 3.2 for imports and exports respectively.

Three graphical presentations appear in this digest. Chart 1 shows imports, total exports and trade balance from January 2009 to September 2014 while Charts 2.1 and 2.2 show Principal Commodity groups for major imports and major exports respectively, for September 2014 only.

Statistics on commodities that were mostly traded during the most recent two months, in this case August 2014 and September 2014, appear on Tables 4.1 (A) \& (B) for imports while exports are presented on Tables 4.2 (A) \& (B). Trade at Chapter Level (2 digits Harmonized Commodity Description \& Coding System) appears on Table 5, presenting data for August 2014 and September 2014.

Table 1 distinguishes domestic exports from re-exports while other tables give total exports, which is the sum of the two.

We sincerely thank all stakeholders involved in the formulation of this monthly digest, their continued support and feedback, as we strive to better serve Batswana and all other important users of our services.

### 1.0 TOTAL TRADE

Total merchandise trade as presented in this section refers to imports, domestic exports, re-exports as well as trade balance.

### 1.1 Data Revision

Table A, presents revision of data for the three months prior to the month under review; these months being June, July and August 2014. This table shows a small increase of 0.1 percent (P3.0 million) in import value for June 2014 import value when comparing figures as at September and August 2014. This difference may be as a result of incorporation of June 2014 trade that was assessed later and only released in September 2014. .

Discussions on Sub-Sections 1.2 to 1.4 are based on Table 1.
Revision of the database to cater for changes in the treatment of Diamonds for aggregation is done as ongoing processes as this is a rigorous exercise that entails checks and cross checks in the customs and statistics database. In the current monthly digest, only data for May to September 2014 has been revised. Data for July 2012 until April 2014 is still as published in the August 2014 Monthly Digest and revision of the data is continues.

### 1.2 Imports

Discussions on imports are based on cost, insurance and freight (CIF) value. September 2014 total imports were valued at P6, 256.4 million, showing an increase of 2.9 percent (P175.3 million) from the revised August 2014 value of P6, 081.1 million. When annualizing total import figures, September 2014 imports value decreased by 13.4 percent ( P 964.5 million) from the September 2013 value of P7, 220.9 million.

### 1.3 Total Exports

In September 2014 total exports were valued at P3, 555.9 million, a decrease of 55.2 percent (P4, 387.9 million) from the August 2014 revised value of P7, 943.5 million. Comparison of September 2014 total exports value to that of September 2013 ( $\mathrm{P} 7,641.1$ million) shows a decrease of 53.5 percent ( $\mathrm{P} 4,085.2$ million). The huge decreases are brought by the fact that in September 2014, less Diamonds were exported.

### 1.4 Trade Balance

A trade deficit of P2, 700.5 million was recorded in September 2014.

## Chart 1: Total Merchandise Trade - January 2009 to September 2014 (Million PULA)

[^0]Chart 1 shows trade deficit in September 2014. It should be noted that trade balance is largely influenced by the value of Diamonds traded as these are associated with high values.

### 2.0 TRADE BY PRINCIPAL COMMODITIES

Principal commodity groups refer to selections of related commodities grouped together to form major groups. Commodities forming a group may be of related chapters, for example; "Machinery \& Electrical Equipment" which combines machines and electrical appliances; "Vehicles \& Transport Equipment" which combines vehicles and other equipment used for transport purposes.

In some cases it becomes challenging to come up with further groups of related chapters or commodities. This occurs when commodity groupings' contributions to the total, remain minimal. In such cases, the commodities are grouped together under the general category called "Other".

### 2.1 Principal Imports

Imports by Principal Commodity Groups together with associated percentage distributions, appear on Table 2.1, covering the first quarter of 2009 to September 2014. Percentage distributions are however only shown for totals of years 2012 and 2013, as well as for months of August and September 2014. Chart 2.1, gives graphical presentation of Principal Import Commodity groups for September 2014 only.

Composition of imports by principal commodities for September 2014, shows that Diamonds contributed the highest to total imports (P6, 256.4 million) with 35.0 percent (P2, 186.8 million), followed by Fuel with 14.1 percent (P885.2 million). Machinery \& Electrical Equipment and Food, Beverages \& Tobacco and Chemicals \& Rubber Products contributed 12.5 percent (P781.6 million) and 8.6 percent ( P 540.3 million respectively.

Chart 2.1: Principal Imports Composition - September 2014

Note: Other Goods include all Other Goods not specified as in Table 2.1

### 2.2 Principal Exports

September 2014 total exports were valued at $\mathrm{P} 3,555.9$ million, with 66.0 percent ( $\mathrm{P} 2,347.9$ million) attributed to exports of Diamonds. It should be noted that these values include Diamonds exported from the aggregation process. Consequently these are not diamonds produced Botswana only.

Copper Nickel contributed 15.0 percent (P535.1 million) while Machinery \& Electrical Equipment; Meat \& Meat Products and Vehicles \& Transport Equipment contributed 5.3 percent (P187.5 million); 3.8 percent (P135.2 million) and 1.3 percent (P47.3 million) respectively. Machinery \& Electrical Equipment consists mainly of re-export of goods that were initially imported.

Percentage distributions for major export groups can be observed on Table 2.2 while Chart 2.2 gives the graphical presentation for September 2014 only. Total exports discussed here are the sum of domestic exports and re-exports.

Chart 2.2: Principal Exports Composition - September 2014

Note: Other Goods: include all Other Goods not specified in Table 2.2

### 3.0 TRADE BY REGIONAL AND MAJOR PARTNERS

Direction of trade gives imports by source while exports are presented by last known destination. Only major trading partners are considered individually, while smaller trading partners are grouped together under a general category. Data for the most recent twelve months appear on Table 3.1 for imports and Table 3.2 for exports.

### 3.1 Imports by Region and Major Trading Partners

Imports for September 2014 were valued at P6, 256.4 million, with 64.7 percent (P4, 049.2 million) coming from South Africa and 15.6 percent (P978.5 million) from Namibia.

The European Union (EU) supplied imports valued at P359.4 million, representing 5.7 percent of total imports during September 2014. Germany, Belgium and the United Kingdom contributed 1.9 percent (P121.7 million); 1.6 percent (P101.1 million) and 1.1 percent (P71.6 million) of total imports during the same period.

During the period under review, imports from Asia were valued at P237.4 million, representing 3.8 percent of total imports. India and China contributed 1.1 percent (P68.5 million) and 1.0 percent (P61.0 million) respectively, to total imports recorded during September 2014.

Imports from Canada and the United States of America (USA) were valued at P414.4 million and P101.5 million in September 2014, which is 6.6 percent and 1.6 percent respectively of total imports during the month.

Imports at regional and country level (for major trading partners) are presented on Table 3.1; however, percentage distributions do not form part of this table.

### 3.2 Exports by Region and Major Partner Countries

Total exports for September 2014 were valued at P3, 555.9 million, with 27.6 percent (P981.7 million) destined to Asia. India received most of the exports destined to Asia at the value of P281.2 million, representing 7.9 percent of total exports. Israel, Singapore, China, Thailand, Hong Kong and United Arab Emirates (UAE) followed with 6.7 percent (P239.5 million), 5.4 percent (P193.5 million), 1.8 percent (P63.6 million), 1.7 percent (P59.7 million), 1.7 percent (P58.9 million) and 1.5 percent (P54.5 million) respectively.

Exports destined to the EU were valued at P859.4 million, representing 24.2 percent of total exports during the period under review. Belgium received most exports destined to EU at 19.0 percent (P676.7 million) of total exports. The United Kingdom (UK) got 3.6 percent (P129.1 million) of total exports during the same month.

South Africa, Namibia, Zimbabwe and Zambia received 16.3 percent (P578.2 million), 4.3 percent (P153.3 million), 2.6 percent (P93.1 million) and 1.1 percent (P39.7 million) respectively, of total exports during the month under review.

Exports to Norway were valued at P358.4 million, representing 10.1 percent of total exports (P3, 555.9 million) during September 2014, while Switzerland, the United States of America (USA) and Canada received 6.3 percent ( P 223.0 million), 5.0 percent ( P 179.4 million) and 2.3 percent ( P 81.0 million) respectively.

Other destinations for exports can be observed on Table 3.2; however, percentage distributions do not form part of the table.

### 5.0 TECHNICAL NOTES

IMTS are compiled by the International Merchandise Trade Statistics Section of Statistics Botswana. External trade statistics here refers to trade in goods only. International Service Trade Statistics (ISTS) are however not compiled by this section. The primary source of External Trade data is the Customs \& Excise Division at the Botswana Unified Revenue Service (BURS). The Customs \& Excise Division is responsible for data capture for both computerized and manual borders and the monthly raw data files, in electric form, are transferred to Statistics Botswana for data processing.

Until April 2009 Monthly Digest, Botswana was practicing Relaxed Special Trade Type. The Relaxed Special Trade Type takes in to account goods that are exported or imported for inward or outward customs processing while the Strict Special Trade Type does not include the same.

In June 2009, the Botswana External Trade database was revised to cater for General Trade Type as per the United Nations Statistics Division recommendations. The General Trade Type gives a complete coverage of External Trade as compared to the Special Trade Type.

Imports are valued CIF (cost, insurance \& freight) while exports are valued FOB (free on board). The value of imports includes transport and insurance costs to the importing country. Exports value consists only of the value of goods as they leave the exporting country. Goods are valued as at the time they cross the border of the exporting country.

### 5.1 Time of Recording of Trade

It should be noted that IMTS is compiled using date of recording of trade as opposed to date of assessment of goods by customs. This means that as goods cross the border, trade is recorded and this is the reference month for compilation of IMTS. Some of these goods may however be held by customs for some time pending final assessment for tax or duty purposes.

If final assessment is done later, two or three months, or even more, after goods had crossed the border, the affected trade will then update trade for the particular month when the goods crossed the border, therefore it does not form part of trade for the month during which final assessment was done. This is mostly common with imports. Revised Data for the month preceding the one under review will normally be high as compared to the other months due to more goods (from the previous month) being released after final assessment. Incorporation of data from manual border posts also adds to the difference.

### 5.2 Definitions used

Domestic Exports: Goods of Botswana origin being exported permanently out of Botswana for consumption in the outside world.

Re-Exports: These are goods that were initially imported for local consumption and are now being exported permanently out of the country or goods which were exported in the same condition as imported or after undergoing minor transformation which leaves them not substantially changed.

Imports: Goods imported from the outside world, into Botswana, for local consumption.
Trade Balance (Net Export): This refers to the total value of goods exported minus the total value of goods imported by a given economy in a given period of time. A positive trade balance (trade surplus) indicates that a country is exporting more in value terms than it is importing. A negative trade balance (trade deficit) indicates that the country is importing more than it is exporting.

[^0]:    () denotes negative number
