Preface

This report presents Transport and Infrastructure Statistics for the calendar year 2022. It complements the quarterly Stats Briefs which were released earlier and shows the trend in the status and performance of transport infrastructure and the related services over the years, with emphasis on the year 2022. The report presents statistics relating to road, rail, air transport services. Road safety statistics has not been included in this report because of the malfunction of the system used in the data collection and will be included in subsequent reports.

Administrative data from the following organisations was used to produce this report: Department of Road Transport And Safety, Civil Aviation Authority Botswana, Botswana Railways, Central Transport Organisation, Roads Department, Ministry of Local Government and Rural Development. Statistics Botswana acknowledges and extends gratitude to these organisations for their assistance and support in the production of this report.

For more information and further enquiries, contact the Directorate of Stakeholder Relations on **+267 367 1300**. This publication, and all other Statistics Botswana outputs are available on the website at (<http://www.statsbots.org.bw>) and at the Statistics Botswana Information Resource Centre (Head-Office, Gaborone).

Dr. Burton S. Mguni
Statistician General

Executive Summary

This section gives only the highlights of the results. More detailed results are shown in the respective sections.

In 2022, the total road network in Botswana measured 32,564.8 km. Of this length, 18,507 km (56.8 percent) was under the care of the Central Government while 14,057.8 km (43.2 percent) was managed by Local Authorities. Road density in Botswana was 0.06 km sq.

There were 601,081 licensed vehicles in Botswana in 2022, a decrease of 2.1 percent from 613,845 licensed vehicles in 2021. Out of this total, privately owned vehicles accounted for 97.9 percent of the total while government fleet constituted only 2.1 percent.

An increase of 73.3 percent was realised in aircraft movements recorded in 2022, from 36,878 in 2021 to 63,911 aircraft movements. Domestic aircraft movements made up 78.9 percent of the total while international movements constituted 21.1 percent. A total of 652,141 air transport passengers were carried in 2022, 54.0 percent were international while 46.0 percent were domestic.

Goods transported by rail declined by 7.3 percent in 2022, from 1,054,118 net tonnes in 2021 to 977,094 net tonnes. Most categories of goods transported went down, except exports to the North which went up by 82.4 percent. Exports to the South went down by 16.6 percent, while total imports and local traffic went down by 12.8 and 12.3 percent respectively. Despite the decline in goods transported through rail, there was a 1.0 percent increase in revenue generated from the transportation of those goods. A total of 409 million net ton-kms were recorded in the financial year 2022/2023.

The contribution of the transport sector to Gross Domestic Product (current prices) in 2022 was 2.23 percent, an increase of 15.5 percent from 1.93 percent in 2021.

ROAD TRANSPORT

1. ROAD TRANSPORT

1.1 Road Network

Roads in Botswana are managed and maintained under two authorities, namely the Central Government and Local Authorities.

The total road network in Botswana stood at 32,564.8 km in 2022, of which 18,507 km (56.8 percent) was under the care of Central Government while 14,057.8 km (43.2 percent) was managed by Local Authorities. A greater length of roads were gravel, at 32.8 percent of all roads in the country. Bitumen roads followed at 32.4 percent. Earth, Sand/track, interlocking bricks and concrete made up 17.2, 16.7, 0.9 and 0.02 percent of the total, respectively. **See Tables 1.1a, 1.1b and Figure 1 below.**

Table 1.1a: Total Length of Roads in Botswana (km) , 2017 - 2022

| Year Road maintained | Type of road | | | | | | Total |
|----------------------|--------------|----------|----------------|----------|------------------------|----------|----------|
| | Bitumen | Gravel | Sand/ Track | Earth | Interlocking Bricks | Concrete | |
| 2017 | 9,795.7 | 11,014.2 | 5,262.5 | 5,574.9 | 93.0 | 6.0 | 31,746.2 |
| 2018 | 9,795.7 | 11,014.2 | 5,262.5 | 5,574.9 | 108.2 | 6.0 | 31,761.4 |
| 2019 | 5,463.4 | 5,302.4 | 11,044.6 | 10,065.2 | 233.0 | 6.1 | 32,114.7 |

Note: Buses¹ is an addition of Buses and Mini Buses

Figure 1: Total Road Network (Percent), 2022

Note: "Others" means roads paved with Interlocking Bricks and Concrete

Local Authorities are in charge of access roads which are less than 10 km as well as internal roads within locations. The total length of road network maintained by local authorities remained the same in 2022 as it was in 2021. The composition of the length of roads managed by Local Authorities in 2022 was, 39.9 percent of it was earth, 25.7 % was gravel while 22.3% was tar. The remaining length, 12.1 percent, consisted of sand/track, interlocking brick and concrete.

The bulk of tertiary roads were in the Central District and they made up 27.6 percent of the total. Southern District followed with 12.1 percent while Kweneng and Kgatleng Districts had 8.6 and 7.6 percent of the total road length respectively.

Most of the earth roads were found in the Central district, constituting 39.5 percent of total earth roads in the country. These earth roads also made up 57.0 percent of the total length of roads in the Central District. All districts that are found east or along the main north-south railway line, have no sand roads, which seem to be dominant on the western part of the country. However some of the districts on the western part of the country have done well in either gravelling or using earth on their roads as evidenced by Kgalagadi (67%), Southern (66%) and Central (57%) of their total roads networks. See **Tables 1.1c and 1.1d below**.

Table 1.1c: Length of Roads (Km) Maintained by Local Authorities by District and Type, 2022

| District/City/Town | Type of road | | | | | | Total | Total 2021 |

1.2 Motor Vehicle Registrations

The annual stock of motor vehicles comprises of government owned and privately owned motor vehicles. Privately owned motor vehicles are categorised into motor vehicles on first registration and those whose licenses are renewed.

1.2.1 National Motor Vehicle Stock

In 2022, national vehicles stock in Botswana went down by 2.1 percent from 613,845 vehicles in 2021 to 601,081. Most of the licensed vehicles were passenger cars and they made up 63.9 percent of the total. Vans and trucks followed with 19.3 and 6.1 percent respectively. National vehicles stock increased at an average annual rate of 5.2 percent between 2013 and 2022. This is shown by **Figure 2** below and **Table 1** in **Appendix 1**.

Figure 2: National Vehicle Stock Trend, 2013 - 2022

Privately owned vehicles constituted 97.9 percent of the national vehicles stock, while government vehicles made up 2.1 percent. The growth in vehicles is likely to negatively impact on the durability or life span of national roads, particularly in the more populated areas such as the eastern part of Botswana.

1.2.2 Private Motor Vehicle Stock

Private vehicle stock time series data shows a steady average annual increase of 4.3 percent from 2013 to date. The stock only reduced in 2020 and 2022, by 3.7 and 2.4 percent respectively.

In 2022, privately owned vehicles declined from 603,027 licensed vehicles in 2021 to 588,543; showing a fall of 2.4 percent. Except for motor cycles, trailers and tankers/horses which increased by 19.5, 1.8 and 0.8 percent respectively the stock of most categories of vehicles went down. This is as shown in **Table 2, Appendix 1**.

Vehicles per 1,000 population decreased by 2.4 percent in 2022, from 257.0 in 2021 to 250.9. Except in 2020 and 2022, vehicles per 1,000 population time series data shows an upward movement since 2013. Vehicle ownership affects transportation choices, especially with regards to the use of public transport. See **Figure 3**, **Figure 3a** and **Figure 4** below.

Figure 3: Population and Private Licensed Vehicles growth comparison, 2013-2022

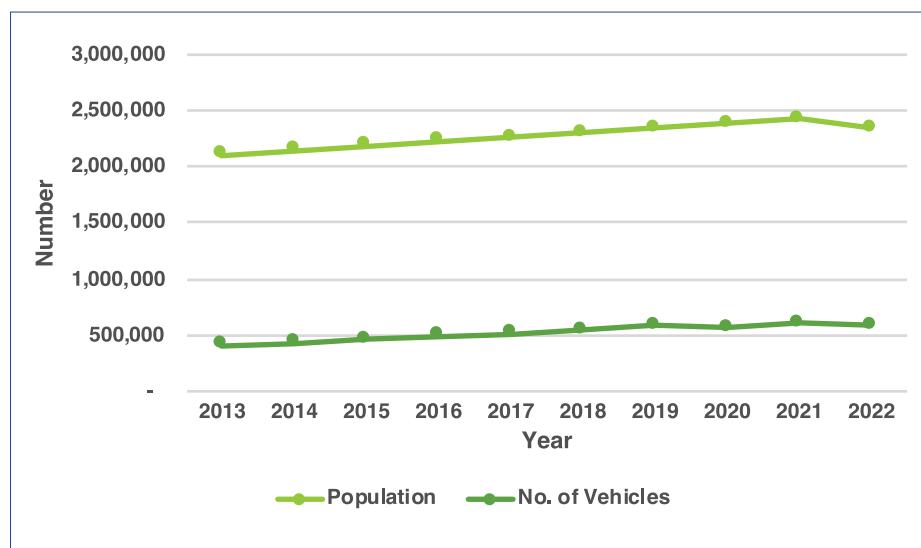

Figure 3a: Vehicles per 1000 Population, 2013-2021

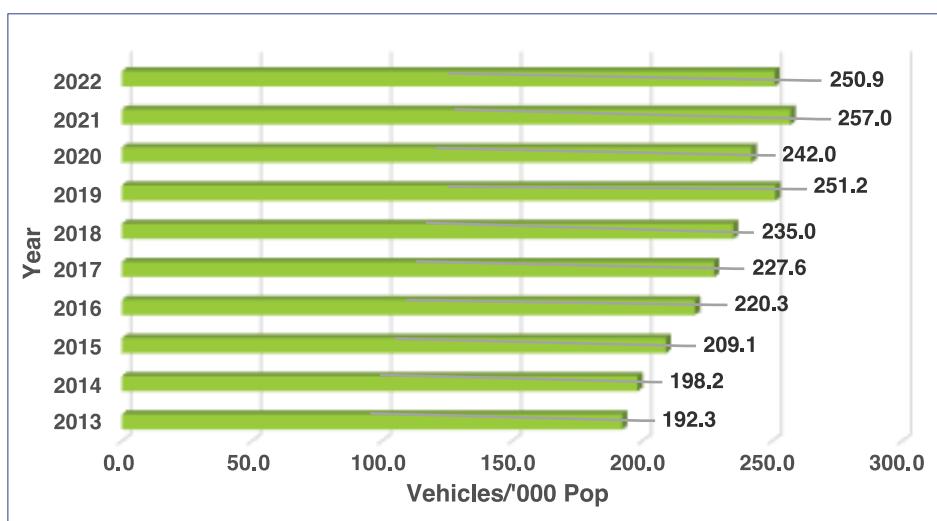

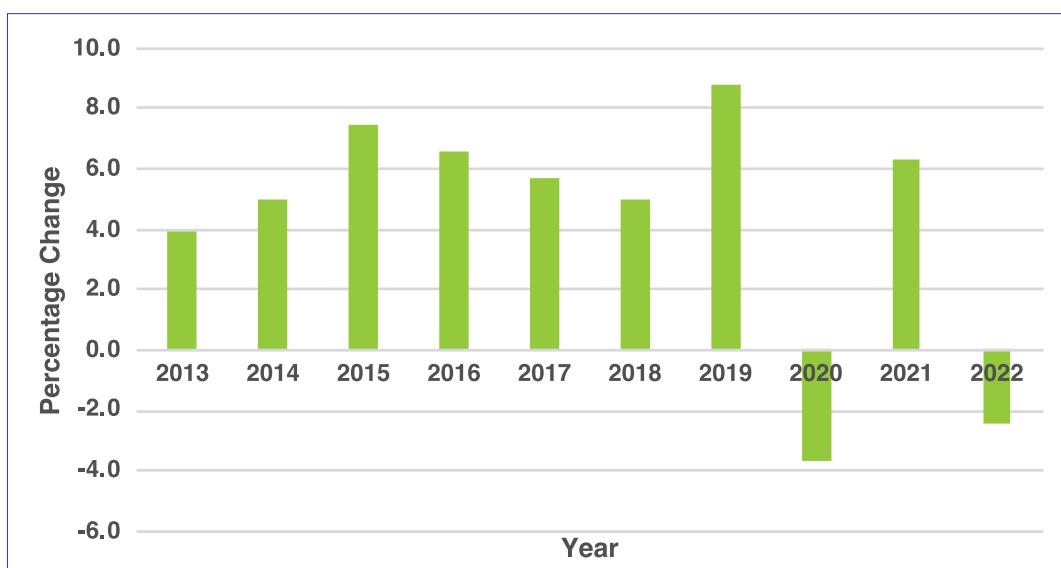

Figure 4: Private Vehicle stock(Annual Percentage Change), 2013-2022

1.2.2.1 Privately Owned Vehicles – Motor Vehicles Registered for the First Time

There was a decrease of 26.8 percent in vehicles registered for the first time in 2022, from 43,696 in 2021 to 32,004. Passenger cars dominated in first registrations at 70.9 percent. As Table 3 in Appendix 1 shows, Vans followed with 10.3 percent. The vehicle category with the least number of first registrations was motor cycles with 0.8 percent.

1.2.2.2 Privately Owned Vehicles – Motor Vehicles Registered for the First Time by Vehicle Type and Body Type

There are three categories of vehicles registered for the first time; namely Used, New and Rebuilt. Table 1.2 below shows that Used Vehicles accounted for 77.2 percent of the total, while New and Rebuilt vehicles constituted 22.7 and 0.1 percent respectively.

The table shows further that vehicles originating from Japan accounted for 66.6 percent of the total. South Africa and Botswana origins constituted 22.5 and 5.0 percent respectively. Most of Used vehicles came from Japan at 85.9 percent of total Used vehicles. South Africa contributed more brand new vehicles at 79.2 percent of total brand new vehicles.

Table 1.2: Motor Vehicles Registered for the first time by Vehicle Type and Country of Origin, 2022

| Country of Origion | Motor Vehicle Type | | | | Percent contribution |
|--------------------------|--------------------|--------------|-----------|---------------|----------------------|
| | Used | Brand New | Rebuilt | Total | |
| Botswana | 867 | 722 | 16 | 1,605 | 5.0 |
| Japan | 21,222 | 96 | 9 | 21,327 | 66.6 |
| Republic Of South Africa | 1,452 | 5,754 | 4 | 7,210 | 22.5 |
| United Kingdoms | 443 | 32 | 1 | 476 | 1.5 |
| Other countries | 723 | 662 | 1 | 1,386 | 4.4 |
| Total | 24,707 | 7,266 | 31 | 32,004 | 100 |

Source: DRTS, Ministry of Transport and Public works

1.2.2.3 Privately Owned Vehicles – Motor Vehicles Registered for the first time by Body Type and Make of Vehicle

Toyota brand vehicles which was mostly constituted by passenger cars at 67.7 percent, accounted for 28.6 percent of total first registrations. Massey Ferguson and Volkswagen brands followed at 13.4 and 12.1 percent respectively. This is shown in Tables 4a and 4b in Appendix 1.

1.2.2.4 Privately Owned Vehicles – Motor Vehicle License Renewals by Year and Type of Vehicle

Vehicle license renewals are done every year and each license is renewed on the month of the vehicle's first registration. License renewals of privately owned vehicles went down by 0.5 percent in 2022, from 559,331 renewals in 2021 to 556,539. Most of licenses renewed were for passenger cars, at 64.7 percent of the total. Licenses for Vans followed at 18.8 percent. See Table 5 Appendix 1.

1.2.2.5 Privately Owned Vehicles – Motor Vehicle License Renewals by Type and Make of Vehicle

Tables 6a and 6b in Appendix 1 show that Licenses of Toyota vehicles were the most renewed in 2022, at 41.5 percent of total vehicle license renewals. Licenses of Mazda brand vehicles followed at 7.9 percent. Honda and Nissan brand vehicles made up 7.6 percent and 6.7 percent respectively of all vehicles whose licenses were renewed. .

1. 2.3 Government Motor Vehicles Stock

Government vehicles stock constitutes vehicles owned by the Central Government under the custody of Central Transport Organisation (CTO). CTO is a Government department responsible for procurement, management, repair and disposal of Government vehicles. The Government fleet increased by 15.9 percent in 2022, from 10,818 in 2021 to 12,538. The composition of the fleet changes frequently due to new procurement, donations, boarding or privatisation of old vehicles when government departments are privatised. [See Table 7, Appendix 1](#).

A large commercial airplane, possibly a Boeing 737, is shown from a low angle on a runway. The aircraft is white with a dark blue tail fin. The background is a clear blue sky with a few wispy clouds.

AIR TRANSPORT

2. AIR TRANSPORT

2.1 Aircraft Movements

Aircraft movements have been increasing at an average annual rate of 7.5 percent from 2013 to 2022. There was an increase of 73.3 percent in aircraft movements in 2022, from 36,878 in 2021 to 63,911 [See Table 8, Appendix 2](#) and [Table 2.1](#) below.

Table 2.1 Aircraft Movements By Type of Flight: 2013 - 2022

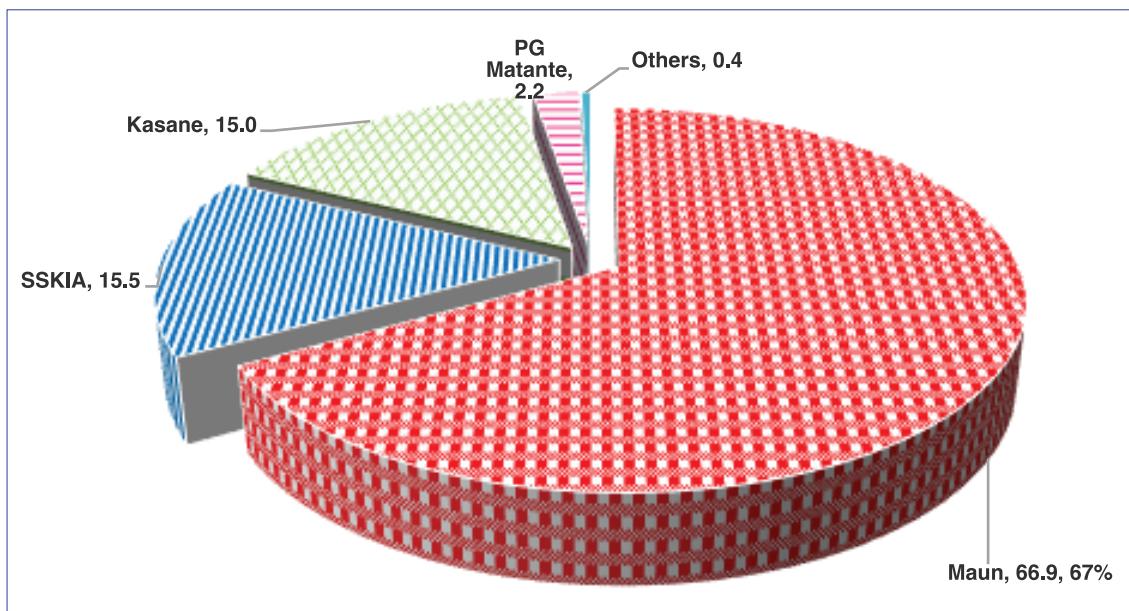

| Year | International Movements | | | | Domestic Movements | | | | | Total Movements | | | |
|---------------------------------|-------------------------|-----------|---------|--------|--------------------|-----------|---------|--------|--------|-----------------|-----------|---------|-------------|
| | Sched | Non-Sched | Private | Total | Sched | Non-Sched | Private | Scenic | Total | Sched | Non-Sched | Private | Grand Total |
| 2013 | 10,799 | 6,690 | 1,335 | 18,824 | 6,036 | 59,698 | 1,805 | - | 67,539 | 16,835 | 66,388 | 3,140 | 86,363 |

Source: Civil Aviation Authority Botswana

2.1.1 Aircraft Movements by Airport

The airport that had most aircraft movements in 2022 was Maun, with 66.9 percent of the total. This is justifiable as Maun is a tourist destination, and as such receives most of non-scheduled and scenic aircrafts. Sir Seretse Khama International Airport (SSKIA) received 15.5 percent of total aircraft movements. The airport that had the least number of movements was Selebi Phikwe with 0.2 percent of total aircraft movements. See [Table 8](#) in [Appendix 2](#) and [Figure 5](#) below.

Figure 5: Aircraft Movements (Percent) by Airport, 2022

Note: Others consists of Selibe Phikwe and Gantsi airports.

2.2 Air Passenger Movements

The glaring effect of the COVID-19 pandemic is depicted by a steep dive in the number of all passenger movements especially the international passengers, for the years 2020-2021 (**Figure 6**). However, in 2022, there was an increase of more than 100 percent in passenger movements from those recorded in 2021. International passenger movements increased by more than 100 percent while domestic movements increased by 81.1 percent.

Among the six airports, the airport that realised a fall in passenger movements was PG Matante which recorded a decrease of 8.7 percent. The other five airports registered increases in passenger movements of more than 100 percent. Details on Air Passenger Movements are shown in **Table 2.2**, **Figure 6**, as well as **Table 9** in **Appendix 3**.

Figure 6: International and Domestic Passenger Movements, 2013-2022

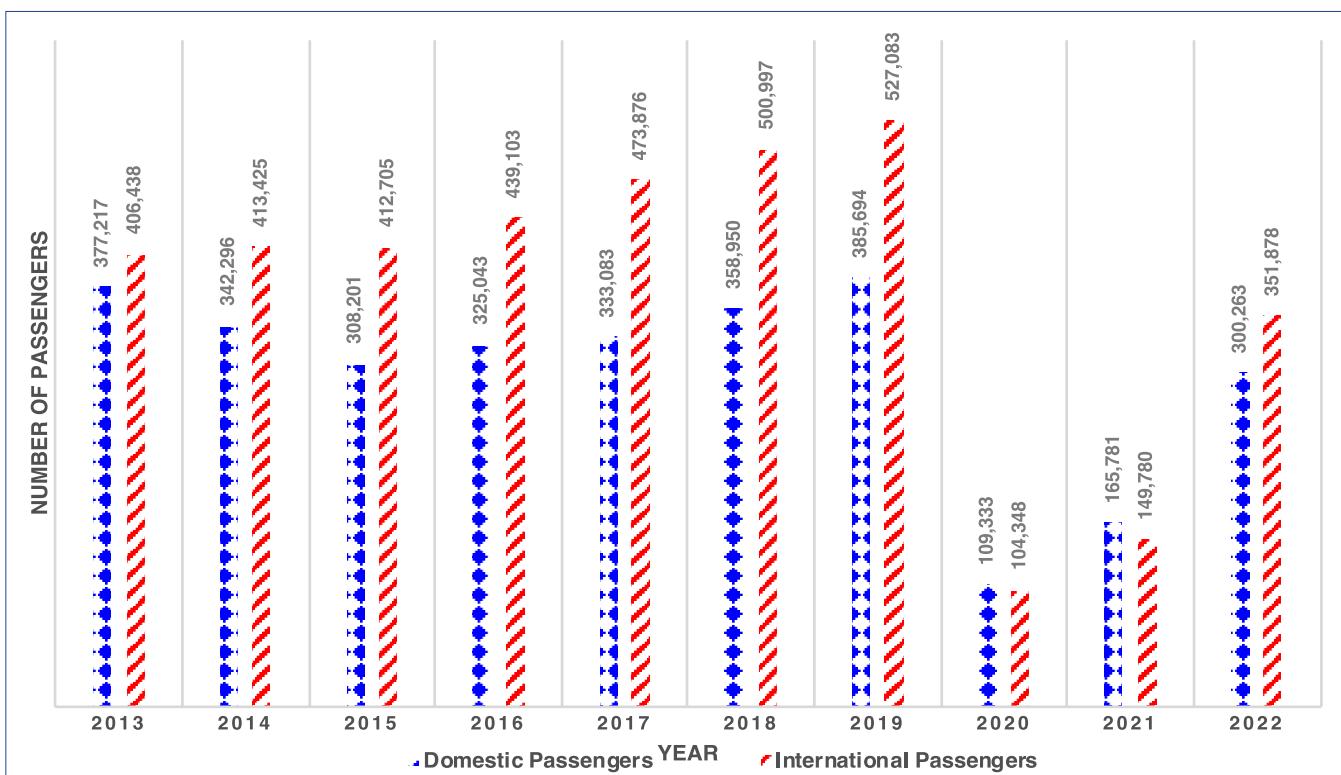

Table 2.2: International and Domestic Air Passenger Traffic, 2013 - 2022

| Year | International Traffic | | | Domestic Traffic | | | | Total International & Domestic Traffic |
|---------------------------------|-----------------------|------------|---------|------------------|------------|--------|---------|--|
| | Arrivals | Departures | Total | Arrivals | Departures | Scenic | Total | |
| Number of Passengers | | | | | | | | |

2.2.1 Air Passenger Movements by Type of Flight and Airport

Out of 325,016 air passenger departures from the six airports in 2022, 47.6 percent of them were from Sir Seretse Khama International airport. Those from Maun constituted 35.3 percent of the total. Air passenger departures from Kasane, PG Matante and Others (Gantsi and Selebi Phikwe) made up 14.5, 2.6 and 0.1 percent respectively.

In 2022, scheduled passenger movements accounted for 73.3 percent of the total, while non-scheduled, scenic and private movements constituted 24.3, 1.3 and 1.1 percent respectively. Compared to 2021, Scheduled passenger movements increased by 99.3 percent, while the other three increased by more than 100 percent.

Out of 477,813 scheduled passenger movements, 51.1 percent were scheduled departures, while 48.9 percent were scheduled arrivals. Scheduled passenger departures accounted for 75.0 percent of total departures. Non-scheduled and private departures made up 24.2 and 0.7 percent of total departures respectively. As for passenger arrivals, 74.1 percent were scheduled while 25.2 percent were non-scheduled and 0.7 percent were private. [See Table 10, Appendix 3 and Figure 7](#).

Figure 7: Total number of Passenger Departures by Airport, 2022

A photograph of a blue locomotive, labeled BD232, pulling a long train of white passenger cars through a railway station. The station features a large, modern-looking building with glass windows and a metal frame. In the foreground, the front of the locomotive is visible, showing its blue paint, yellow safety railings, and the number BD232. The train is moving along tracks that curve to the right. The background shows more railway infrastructure and some greenery.

RAILWAY TRANSPORT

3. RAILWAY TRANSPORT

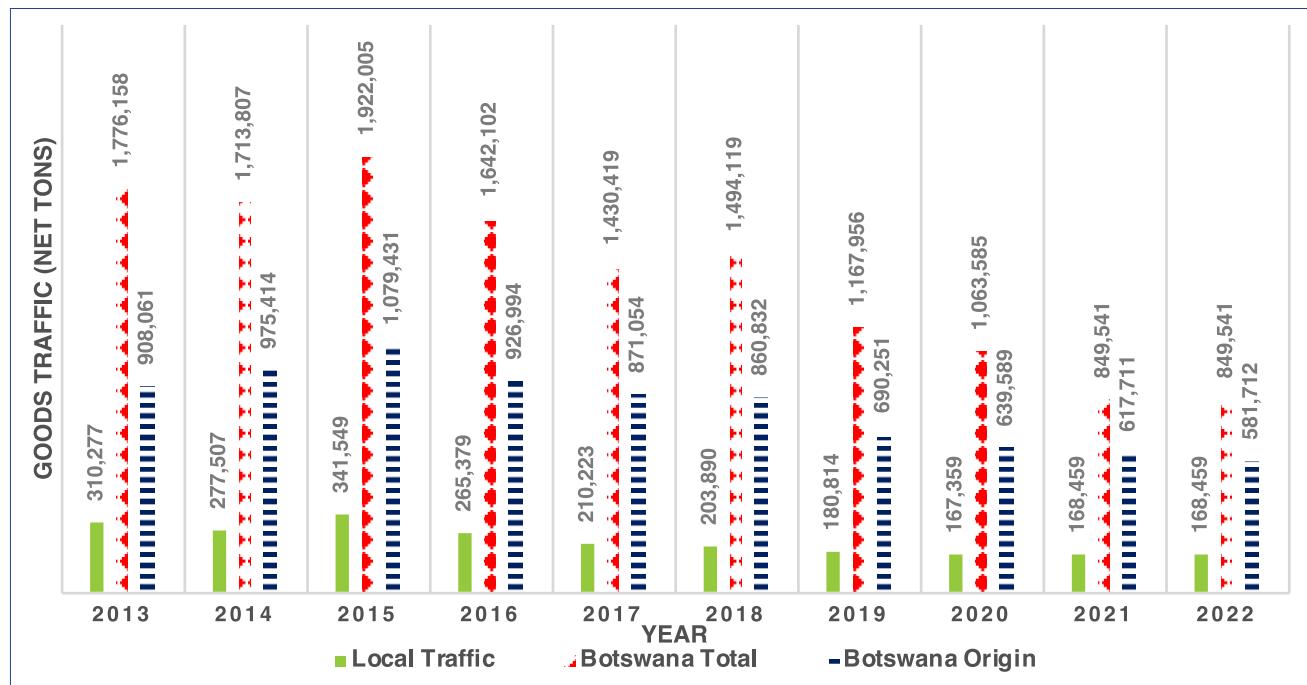

3.1 Rail Goods Traffic

Transportation of goods by rail depends on a lot of factors, some of these being the demand for goods in the market. Rail also faces stiff competition from road transport, as such it sometimes loses its customers to road transport.

The following terms used in Rail Goods Traffic needs to be taken into account when going through the associated table ([Table 11 in Appendix 4](#)). Local Traffic refers to goods originating from Botswana and ending in Botswana, Botswana Origin is total exports plus local traffic. Botswana Total is the sum of total imports and Botswana Origin. Total Traffic is the sum of Botswana Total and Transit Traffic.

There is unabated downward trend in the amount of goods transported through rail over the periods 2015 to 2022. [Table 11 in Appendix 3](#) and [Figure 8](#) below show that the volume of goods transported through rail in 2022 went down by 7.3 percent, from 1,054,118 net tonnes in 2021 to 977,094 net tonnes. Exports to the North realised an increase of 82.4 percent, while the rest of goods categories experienced a decrease when compared to 2021. Total imports and Local traffic went down by 12.8 and 12.3 percent respectively. Botswana total and Botswana origin went down by 8.1 and 5.8 percent respectively.

Figure 8: Rail Goods Traffic by Direction (Net tonnes), 2013-2022

3.1.1 Rail Goods Traffic (ton-km)

A total of 977,094 net tonnes of goods were transported through rail in 2022/23. These goods resulted in 409 million ton-km. The highest level of rail freight transport was recorded in the month of July at 42,222,174 ton-km. March 2023 and August 2022 followed with 41,280,258 and 40,846,944 ton-km. See [Table 3.1](#) below.

Table 3.1: Rail Goods by Year and Months (Net ton-km), 2022/23

| Year | Months | Volume of goods (Net ton km) |
|-------------|--------------|---------------------------------|
| 2022 | April | 29,487,992 |
| | May | 29,392,472 |
| | June | 36,187,989 |
| | July | 42,222,174 |
| | August | 40,846,944 |
| | September | 37,535,684 |
| | October | 28,480,236 |
| | November | 27,977,834 |
| | December | 33,935,907 |
| 2023 | January | 37,594,327 |
| | February | 24,462,962 |
| | March | 41,280,258 |
| | Total | 409,404,779 |

Source: Botswana Railways

3.2 Revenue From Rail Goods Traffic

Despite the decline in goods being transported by rail, there was an increase of 1.0 percent in the revenue generated from their transportation, from P204 million in 2021 to P206 million. This increase resulted from the increase of 6.3 percent in revenue generated from the transportation of Exports. Other goods categories that realized an increase in transportation revenue were Botswana Origin (1.7percent), Botswana total and transit traffic at 1.1 and 0.5 percent respectively. See **Table 12, Appendix 3**.

4. CONTRIBUTION OF THE TRANSPORT SECTOR TO THE ECONOMY

The contribution of the transport sector to Gross Domestic Product (current prices) in 2022 was 2.23 percent, an increase of 15.5 percent from 1.93 percent in 2021. The transport sub-sector that contributed much to GDP was roads with 1.9 percent, this was followed by the storage and transport support services with 0.15 percent. See **tables 4.1a** and **4.1b** below.

Table 4.1a: Transport & Storage Value Added by Sub-Industries at Current Prices (P million) by Year: 2014-2023

| Year | Transport and Storage Sub- Industries | | | | | | Total GDP | Contribution to GDP (%) |
|------|---------------------------------------|----------------|---------------|--|-----------------------------|---------------------|-----------|-------------------------|

TECHNICAL NOTE

The data used to compile this report is administrative data from different sources. Railways statistics is from Botswana Railways and the Department of Road Transport and Safety provides Motor Vehicle registrations data.

All the calculations in the report relating to population were derived from the 2011 Population and Housing Census' results and the other years beyond 2011 are projections, except the 2022 figure.
