GLOSSARY

COMMENTARY

Section 1: Headline Inflation

The annual inflation rate in May 2015 was 3.0 percent, a decrease of 0.1 of a percentage point on the April 2015 rate of 3.1 percent. Annual inflation in May 2015 was lower than the 4.5 percent recorded during the same month in 2014. The slowing pace of the annual inflation rate between May 2014 and May 2015 was attributed to the decrease in prices of commodities in the main component of *Transport* which dropped by 5.6 percentage points. The inflation rates for regions indicated that *Rural Villages*' went up to 3.6 percent from 3.4 percent, *Urban Villages*' decreased from 3.0 percent to 2.8 percent and *Cities & Towns* went down to 3.0 percent from 3.1 percent between April 2015 and May 2015, .

The national Consumer Price Index registered an increase of 0.2 percent, moving from 181.3 in April to 181.6 in May 2015. The *Rural Villages*' index realized an increase of 0.4 percent, moving from 187.4 to 188.1 between the two months. The *Urban Villages*' index went up by 0.2 percent, from 179.7 to 180.1 while *Cities & Towns*' index rose by 0.1 percent, moving from 180.0 to 180.2 during the same period.

Group indices were generally stable between April and May 2015, recording changes of less than 1.0 percent, except *Health* which recorded a change of 2.4 percent.

The *Health* group index went up from 167.9 to 171.9, registering an increase of 2.4 percent between April and May 2015. The increase was attributed to the general increase in the section indices, notably *Hospital Services* (3.9 percent).

The *Clothing and Footwear* group index went up from 171.1 to 172.1, registering an increase of 0.6 percent between April and May 2015. The increase was attributed to the general increase in the section indices.

The *Communication* group index recorded a rise of 0.5 percent, from 92.1 in April to 92.6 in May 2015. This was due to an increase in the constituent section index of *Postal Services*, which rose by 15.5 percent. The increase in *Postal Services* section index was attributed to the revised postal tariffs, which were effected on the 1st May 2015.

All-Tradable inflation rate was 1.7 percent in May, a decline of 0.2 of a percentage point from the April rate of 1.9 percent. The Domestic Tradable inflation rate decreased from 3.5 percent to 3.2 percent between April and May 2015. The Non-Tradable inflation rate registered an increase of 0.2 of a percentage point from 6.1 percent in April to 6.3 percent in May 2015. The Imported Tradable inflation rate recorded a drop of 0.1 of a percentage point, from 0.9 percent in April to 0.8 percent in May 2015.

The All-Tradable index moved from 186.7 in April to 186.9 in May 2015, recording a rise of 0.1 percent. The Non-Tradable index moved from 168.4 to 168.9 recording an increase of 0.3 percent between the two months. The Imported Tradable index registered an upturn of 0.1 percent, moving from 175.9 to 176.1, while the Domestic Tradable index advanced from 207.6 to 207.7.

Section 2: Core Inflation

The Trimmed Mean Core Inflation rate registered a decline of 0.1 of a percentage point, moving from 3.6 percent to 3.5 percent between the two months. The Core Inflation rate by exclusion registered a drop of 0.1 of a percentage point, moving from 4.8 percent to 4.7 percent, between April and May 2015.

PRICES COLLECTION COVERAGE FOR BOTSWANA CONSUMER PRICE INDEX (CPI)- 2015

Glossary

Consumer Price Index (CPI) is an index which measures price changes in goods and services with reference to a base period.

Inflation is a measurement of prices movement of goods and services in a particular country.

Domestic Tradable refers to the goods and services which a country (Botswana) can export to other countries.

Imported Tradable represents the goods and services which a country (Botswana) imports from other countries (trading partners).

Non-Tradable refers to the goods and services which a country cannot either export or import to other countries.

All -Tradable refers to the total of **Domestic** and **Imported tradable**.

Trimmed Mean Core Inflation- attempts to remove 8 percent (by weight) of the commodity sub-groups with the largest price changes at each of the ends of an ordered series of price changes in any given month.

Core inflation by Exclusion is a measure used to remove the volatility inherent in prices that are only adjusted periodically and not always in response to currently prevailing market forces.
