ABSTRACT

During 1992 a National Commission on Education was set up to conduct a broad range review of the education system, with particular emphasis on universal access to basic education, vocational education and training among other objectives.

Access to education has been emphasized at all levels and significant developments are being made. More schools are being built; more teachers are being trained etc. Over the years, before and after the commission, Community Junior Secondary Schools and Primary Schools continue to increase. Communities, as well as, individuals have picked up the message. Private schools or study groups also continue to increase; all these being efforts towards improving access to education, hence improving the social and economic status of Batswana.

Although the Central Statistics Office does not collect data on non-formal education, it recognises the efforts of Government to develop out-of-school education through the adult basic education programme and the expansion of distance education (Report of the National Commission on Education 1993), hence the 1993 Literacy Survey Report.

Identification or estimation of the numbers of missing children of school-going age, disabled or handicapped children continues to be a problem and a serious concern to policy makers on education as it poses the difficulty of fully assessing the effectiveness of education policies such as Universal Primary Education (UPE). The Ministry of Education has set up Special Education Unit in the Primary Education Department with the aim of identifying children with special needs as early as at primary level. The Central Statistics Office (CSO) is jointly working on this issue with the Ministry of Education and the Ministry of Health.

As the absorption of pupils and students continue to improve in Primary, Secondary, Vocational Training Centres, the University and its affiliates, concern is also raised regarding the coverage of pre-school education. Central Statistics Office (CSO) has not up to now collected any information at this level of education. However, CSO is collaborating with the Department of Primary Education in facilitating data collection at this level. The Ministry of Education has set up a Pre-school/Pre-primary Unit. This should almost complete the endeavour to assess the performance of the educational system, at least as far as access is concerned.

Footnote:

1. Report of the National Commission on Education 1993

PREFACE

This is the thirtieth issue of Education Statistics report series compiled and published by the Central Statistics Office (CSO).

As in the previous issues, this publication comprises six sections as follows:

- Section 1: All levels - Statistics in Brief
 - Time series
- Section 2: First level - Primary schools
- Section 3: Second level - Secondary Schools
 - Vocational and Technical Training
 - Teacher Training Colleges
- Section 4: Third level - University
 - Colleges of Education
- Section 5: Examination results
- Section 6: Expenditure on Education

The data in this publication are collected directly from educational institutions through an annual postal questionnaire. Data on Primary and Secondary Schools relate to the first working day in April, while the remaining institutions with different calendars are covered at the beginning of their academic year(s).

We gratefully appreciate the efforts of all heads of institutions for providing the basic data requested. However, the CSO wishes to express a sentiment previously expressed by taking this opportunity to keep soliciting unbending co-operation of those who still tend to respond later than expected, or fail completely to do so. To assess the effectiveness of the policies geared towards an improved educational system, there has to be sufficient data collected and analysed to bring out all salient features of the system. Hence, we would like to urge all those concerned to give complete and accurate data for the benefit of both the CSO and planners, for which this information is particularly intended.

As the source of all information in this publication is the educational institutions, they are therefore urged, with due respect, to keep proper school records regarding enrolments, staff, facilities, finances etc. so that verification of any data given may be facilitated.

Comments and suggestions regarding the improvement of the quality of this publication are always welcome and should be addressed to the Government Statistician, Private Bag 0024, Gaborone.
