1. Introduction

This statistical release contains preliminary Gross Domestic Product estimates at current and constant prices for the first quarter of 2015. Botswana's national accounts are compiled according to the 1993 System of National Accounts (1993 SNA). The accounts presented in this brief adhere to the General Data Dissemination System (GDDS) of the International Monetary Fund (IMF), which sets out standards on coverage, periodicity and timeliness of data.

The estimates are provisional and subject to change. First estimates are normally based on limited data and hence cannot be precise and absolute. The figures are revised after receiving finalized or audited data from companies in which some differences and inconsistencies in the previously published data may be observed.

These estimates are not seasonally adjusted hence the variations may differ depending on the quarters.

Statistics Botswana acknowledges and appreciates the contribution of all stakeholders in the production of this quarterly report.

2. Gross Domestic Product

2.1 Revisions in this release

Although there were no revisions made to the Gross Domestic Product (GDP) estimates from the production side published in March 2015, GDP estimates from the expenditure side changed from 2010 due to revisions made on imports and exports.

3. First quarter GDP

The estimated GDP at current prices for the first quarter of 2015 was P35 855.6 million compared to P36 892.1 million registered in the fourth quarter of 2014.

The estimated GDP at constant 2006 prices for the first quarter of 2015 was P22 068.2 million compared to P22 364.5 million registered in the fourth quarter of 2014, amounting to a decrease of 1.3 percent (see table 3).

Real Gross Domestic Product (GDP) increased by 4.3 percent in the first quarter of 2015 compared to 3.6 percent accrued in the same quarter in 2014.

At industry level, most of the increase was attributed to Trade, Hotels & Restaurants, General Government and Finance and Business services sectors which increased by 6.1, 5.6 and 5.4 percent respectively. All other industries recorded a positive growth of at least 1.0 percent over the period with the exception of the Water and Electricity and Agriculture sectors which recorded a decrease of 1.7 and 0.7 percent respectively. Mining increased by 1.2 percent compared to 10.0 percent realized in the first quarter of 2014. The slow growth rate was attributed to a decline in diamond production by 2.5 percent compared to 33.9 percent registered in the same quarter of 2014. Copper/Nickel production increased by 14.9 percent on year-on-year basis and decreased by 15.3 percent on quarter-on-quarter comparison. The decline was mainly attributed to the closure of Discovery Metals Limited (Boseto) copper mine in March 2015.

The increase in the real value added of the Trade, Hotels and Restaurants sector was mainly due to the increase in hotels & restaurants, vehicle dealers and retailers by 8.9, 8.5 and 7.7 percent.

There was a significant improvement in the value added by the Water and Electricity sector for the quarter under review. The sector value added decreased slightly by 1.7 percent as compared to 236.4 percent decrease realized in the fourth quarter of 2014. The improvement was mainly attributed to the increase in local electricity production by 63.2 percent while the imported electricity decreased by 16.8 percent. Imported Electricity is included in the intermediate consumption. The decrease in the intermediate consumption automatically improves the level of value added.

Figure 1: Real GDP growth rates (over four quarters)

Total final consumption expenditure recorded an increase of 4.9 percent in the first quarter of 2015, whereas in the same quarter of the previous year it increased by 2.2 percent. However, household final consumption increased by 6.1 percent in the first quarter of 2015 while Government final consumption rose by 1.6 percent in the same quarter. Fixed capital formation recorded an increase of 0.7 percent in the quarter under review compared to an increase of 22.2 percent in the same period in 2014.

Real exports of goods and services went up by 7.2 percent in the first quarter of 2015 compared to a decrease of 0.6 percent recorded in the same quarter of 2014, while imports of goods and services registered an increase of 13.6 percent in the first quarter of 2015 compared to a 1.6 percent increase registered in the same quarter of 2014.
