## 1. Preface

This statistical release contains the third quarter of 2020 Gross Domestic Product (GDP) estimates by economic activity and components of final demand at current and constant prices.

Botswana's National Accounts are compiled according to the 1993 System of National Accounts (1993 SNA). The accounts presented in this publication adhere to the enhanced General Data Dissemination System (e-GDDS) of the International Monetary Fund (IMF), which sets out standards on coverage, periodicity and timeliness of data.

**The estimates are provisional and subject to change. First estimates are normally based on limited data and hence cannot be precise and absolute. The figures are revised after receiving finalized or audited data from companies in which some differences and inconsistencies in the previously published data may be observed.**

These estimates are not seasonally adjusted hence the variations may differ depending on the quarters.

The nominal Gross Domestic Product (GDP) for the third quarter of 2020 was P44, 671.4 million compared to a revised P36, 882.2 million registered during the previous quarter. This represents a quarterly increase of 21.1 percent in nominal terms between the two periods. During the quarter under review, Trade, Hotels & Restaurants became the major contributor to GDP by 18.7 percent, followed by General Government, Finance & Business Services and Mining & Quarrying by 17.6, 15.6 and 9.5 percent respectively. The contribution of other sectors was below 7.5 percent, with Water & Electricity being the lowest at 1.7 percent.

Real GDP for the third quarter of 2020 decreased by 6.0 percent compared to a deep contraction of 24.0 percent registered in the previous quarter. The improvement in the third quarter GDP, reflected continued efforts to reopen businesses and resume activities that were postponed or restricted due to the COVID-19 pandemic.

Statistics Botswana acknowledges and appreciates the contribution of all stakeholders in the production of this report.

For more information and further enquiries, contact the Directorate of Stakeholder Relations at 3671300 or info@statsbots.org.bw. All Statistics Botswana outputs/publications are available on the website at www.statsbots.org.bw and at the Statistics Botswana Information Resource Center (Head-Office, Gaborone).

## 2. Quarterly Gross Domestic Product (GDP)

### 2.1 Revisions in this release

Rewvisions in the National Accounts are always necessary because it allows for incorporation of additional and improved data that were not available at the release date.

Rewvisions have been made to the quarterly Gross Domestic Product (GDP) estimates published in September 2020. The changes were due to the updated source data and have affected Mining, Manufacturing and Water & Electricity industries.

Table A1: Revisions in real percentage changes for the previous quarter

	Publication September 2020	Publication December 2020
Mining	-60.2	-60.5
Manufacturing	-31.3	-31.2
Water and Electricity	0.3	1.3
<b>Total GDP</b>	<b>-24.0</b>	<b>-24.0</b>

Table A2: Key figures

	Real Gross Domestic Product		Total Final Consumption		Gross Fixed Capital Formation	
	Percentage Change					
	Quarter-on-Quarter	Year-on-Year	Quarter-on-Quarter	Year-on-Year	Quarter-on-Quarter	Year-on-Year
First quarter 2016	3.5	2.2	2.3	2.6	-5.8	3.5
Second quarter 2016	1.8	3.9	-4.9	0.7	11.0	6.6
Third quarter 2016	-1.1	6.9	3.8	2.6	-1.4	1.1
Fourth quarter 2016	0.1	4.3	1.9	3.0	0.3	3.5
First quarter 2017	0.1	1.0	1.2	1.9	-12.6	-3.9
Second quarter 2017	1.8	0.9	-0.7	6.4	-4.2	-17.1
Third quarter 2017	1.4	3.4	3.9	6.4	8.7	-8.6
Fourth quarter 2017	3.0	6.4	1.2	5.6	4.2	-5.1
First quarter 2018	-1.8	4.3	1.2	5.6	-1.2	7.2
Second quarter 2018	2.7	5.3	-0.8	5.5	1.5	13.6
Third quarter 2018	0.2	4.1	1.5	3.1	1.9	6.5

First quarter 2019	-1.8	4.3	0.4	1.1	-1.2	5.6
Second quarter 2019	1.6	3.1	1.9	3.9	4.2	8.3
Third quarter 2019	0.3	3.1	0.9	3.2	1.1	7.5
Fourth quarter 2019	1.7	1.7	4.3	7.7	0.9	4.9
First quarter 2020	-0.9	2.7	-2.4	4.7	3.8	10.3
Second quarter 2020	-24.8	-24.0	-7.5	-5.0	-36.4	-32.7
Third quarter 2020	24.1	-6.0	9.5	3.2	35.9	-9.5

### 2.2 Third quarter GDP

#### 2.2.1 Key Findings

Real GDP at constant 2006 prices for the third quarter of 2020 was P23, 403.8 million compared to the revised P18, 856.2 million recorded in the second quarter of 2020 ([See table 3](#)).

The real GDP declined by 6.0 percent during the period under review, compared to an increase of 3.1 percent in the same quarter of 2019. The contraction in the domestic economy was observed across all sectors except Government, Agriculture, Water & Electricity and Social & Personal Services. The unfavorable performance of the economy was mainly due to the impact of measures that were put in place to combat the spread of the COVID-19 pandemic ([See table 4](#)).

The full economic effects of the COVID-19 pandemic cannot be quantified in the GDP estimate because the impacts are embedded in source data and cannot be separately identified.

#### Non-Mining GDP

The Non-mining GDP decreased by 5.0 percent in the third quarter of 2020 compared to a 3.7 percent increase registered in the same quarter of the previous year.

Figure 1: Real GDP growth rates

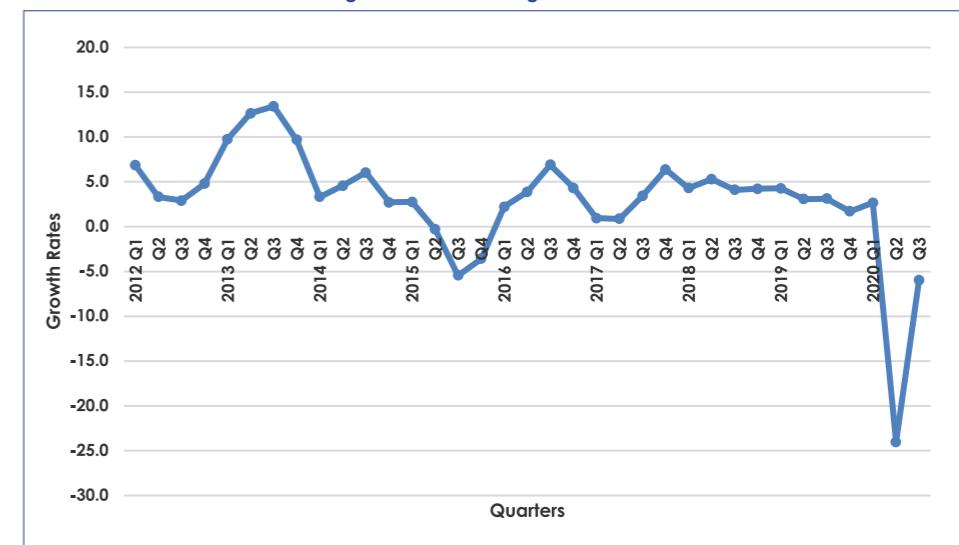

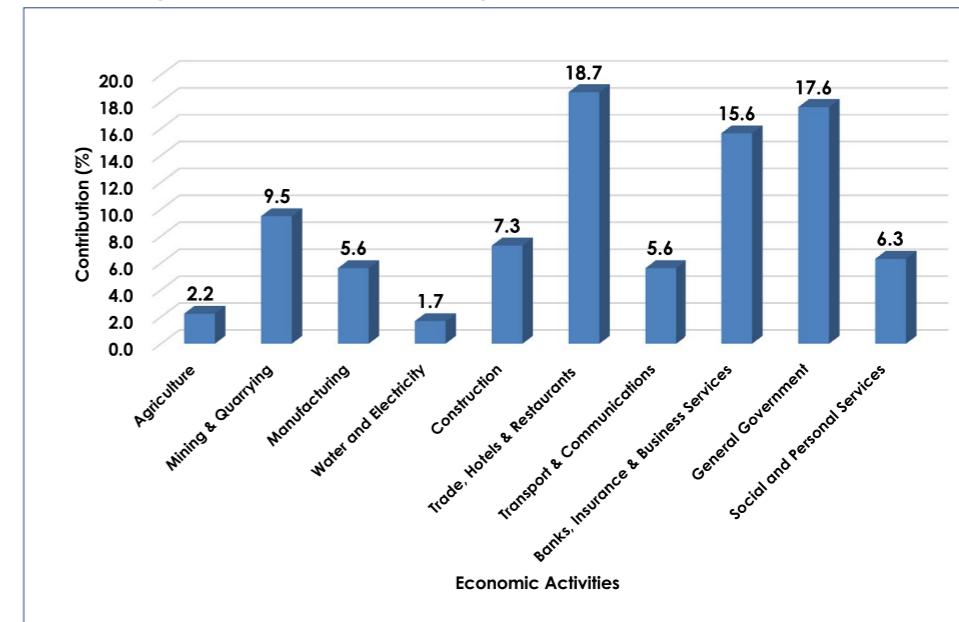

Figure 2: Contributions to GDP by Economic Activities (2020 Q3)

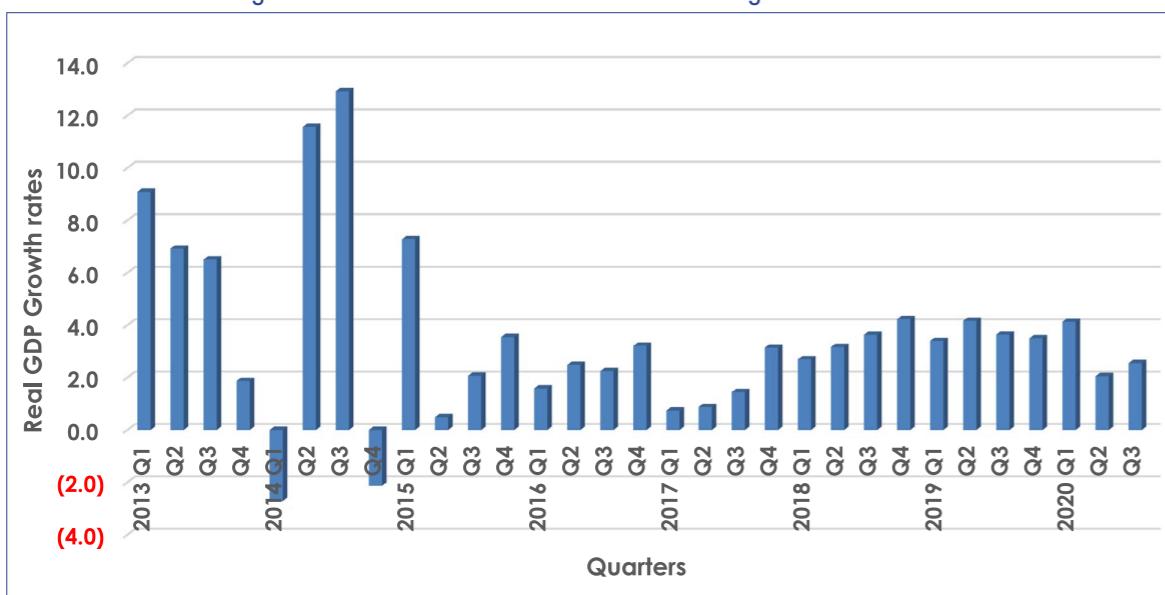

#### General Government

The General Government sector increased by 2.5 percent in real value added compared to 3.6 percent during the corresponding quarter of 2019. In response to the global COVID-19 pandemic, many governments implemented a wide range of support measures to mitigate its impact on the economy and society.

The positive performance is mainly attributed to the increased number of personnel brought in to combat the spread of the pandemic e.g. recruitment of teachers, Safety and Health Employees (SHE) and other temporary employees across Ministries.

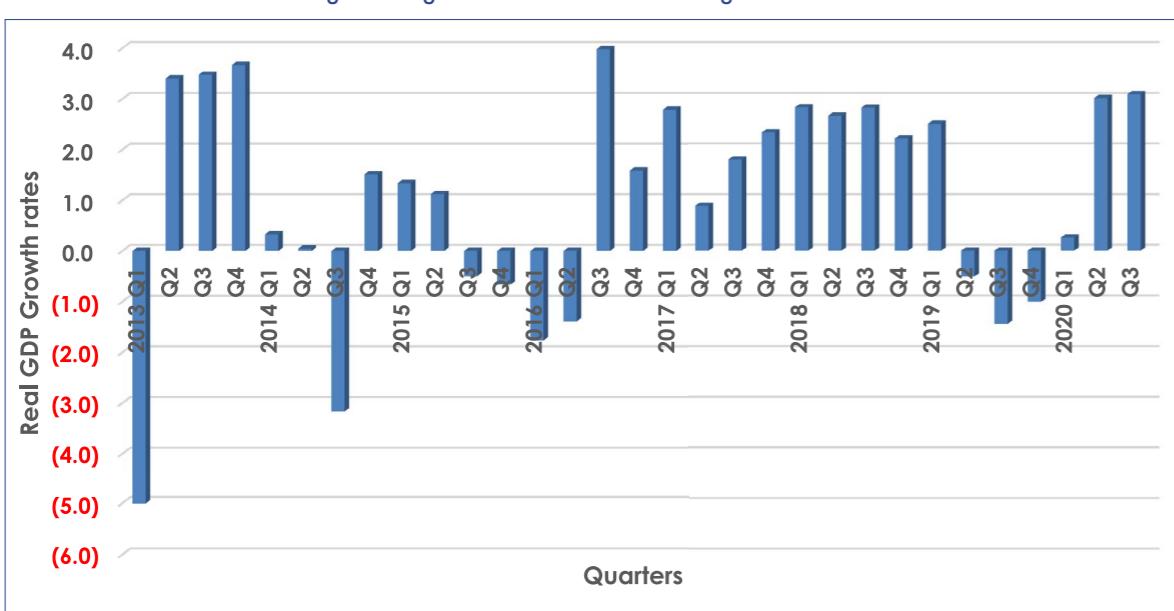

Figure 3: General Government real value added growth rates

## Agriculture

The Agriculture industry increased by 3.1 percent in real value added during the third quarter of 2020, relative to a contraction of 1.4 percent registered during the same quarter of 2019. The main driver of the improved performance stems from an increase in real value added of Horticulture, Crops and Livestock farming sub-industries, which posted growth of 2.6, 2.0 and 1.3 percent respectively.

Figure 4: Agriculture real value added growth rates

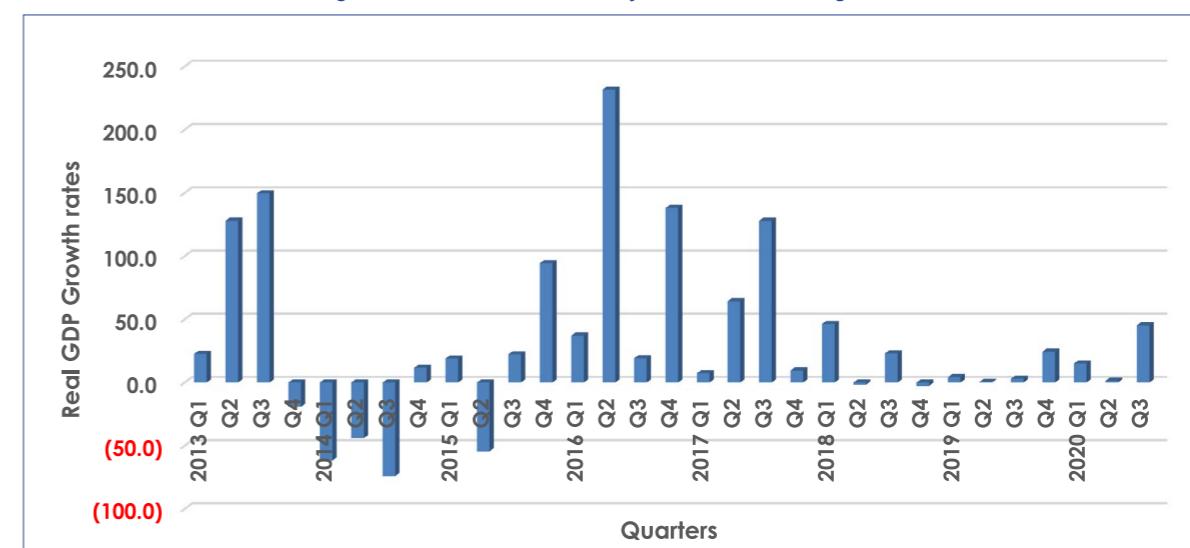

## Water and Electricity

Water and Electricity value added at constant 2006 prices for the third quarter of 2020 was P368.7 million compared to P 253.9 million registered in the same quarter of 2019, recording an increase of 45.2 percent. Even though the industry recorded the positive growth, its contribution to the economy still remained the lowest.

In the third quarter of 2020, Electricity recorded a value added of P87.4 million compared to P26.8 million registered in the same quarter of 2019, leading to a significant growth of 225.8 percent. The local electricity production increased by 29.2 percent while imports of Electricity dropped by 22.9 percent during the quarter under review, hence an increase in real value added. Morupule A power station was operating at full capacity.

The water industry recorded a value added of P283.4 million compared to P229.2 million registered in the same quarter of the previous year, registering an increase of 23.7 percent. Water consumption in kilolitres from all Management Centers rose by 24.6 percent during the quarter under review.

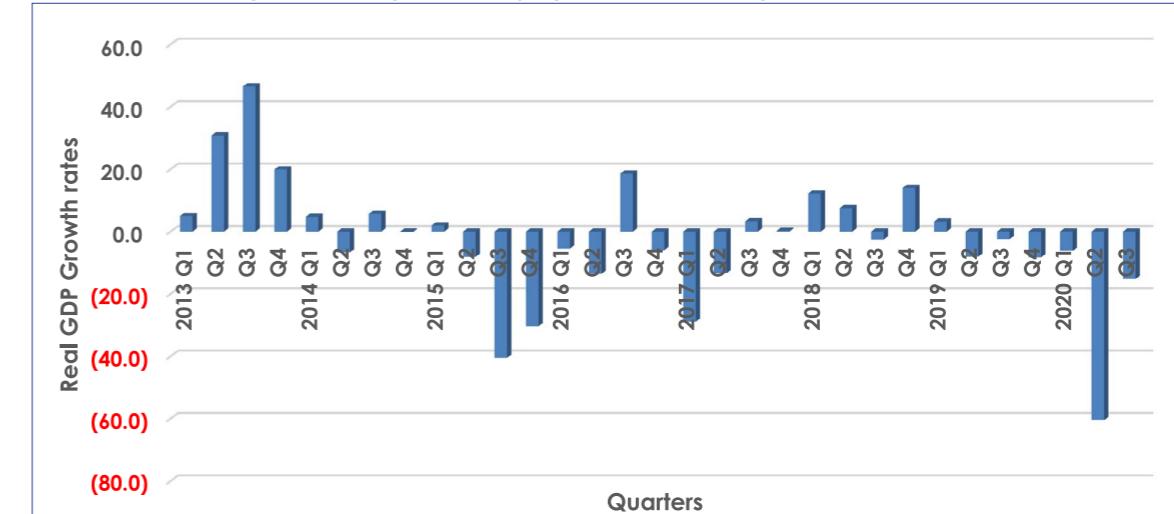

Figure 5: Water and Electricity real value added growth rates

## Mining and Quarrying

A decrease in the real value added of Mining by 15.2 percent was mainly influenced by Diamond and Soda Ash real value added. Diamond production in carats went down by 15.3 percent while Soda Ash production in tonnes decreased by 53.1 percent. The poor performance of the diamond sub industry is attributed to the reduction in the production due to weak demand from global markets. Diamonds are luxury goods and therefore are bound to fluctuate due to the appetite of reliable customers as the world is highly affected by the outbreak of the Coronavirus pandemic. With regard to Soda Ash, the plant was put under care and maintenance.

Figure 6: Mining and Quarrying real value added growth rates

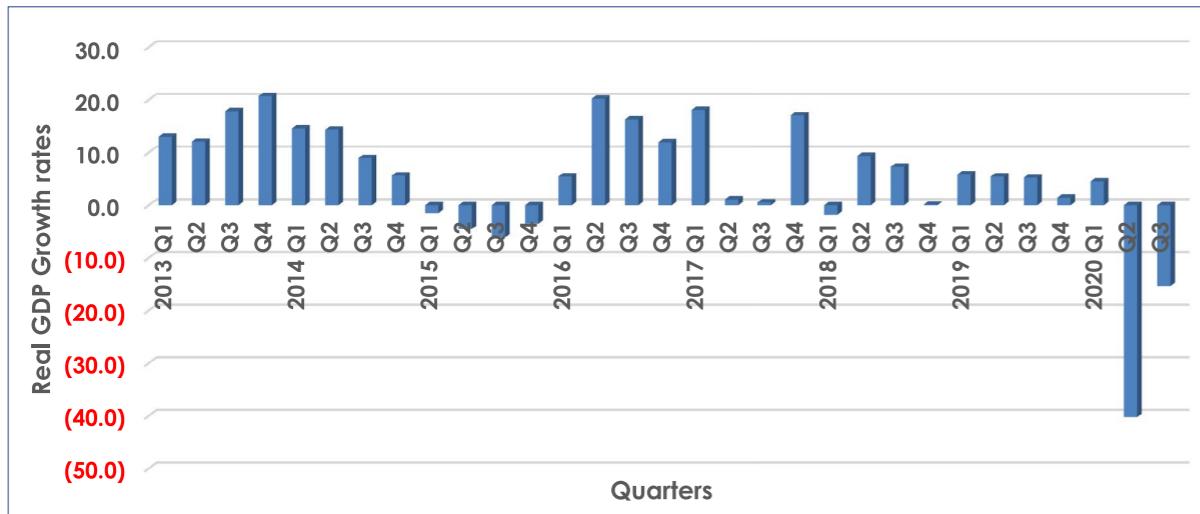

## Trade, Hotels and Restaurants

Trade, Hotels and Restaurants real value added declined by 15.3 percent in the third quarter of 2020 compared to an increase of 5.3 percent registered in the same quarter of the previous year. The reduction is largely attributed to a decrease of 46.9 percent in real value added of the Hotels & Restaurants sub-industry.

The suspension of air travel occasioned by Covid-19 containment measures impacted on the number of tourists entering the borders of the country and hence affecting the output of Hotels and Restaurants industry. COVID-19 restriction measures resulted in reduced demand for leisure and conferencing activities, as conferences are held through virtual platforms.

Nevertheless, increased economic activities were reported for Wholesale and Retail trade by 8.5 and 4.6 percent respectively. The positive growth in the Wholesale value added is due to improved performance of downstream diamond industries during the quarter under review. Food and Non-food retailers showed a strong performance post the Q2 2020 which was hard hit by the implementation of strict COVID-19 pandemic protocols.

Figure 7: Trade, Hotels & Restaurants real value added growth rates

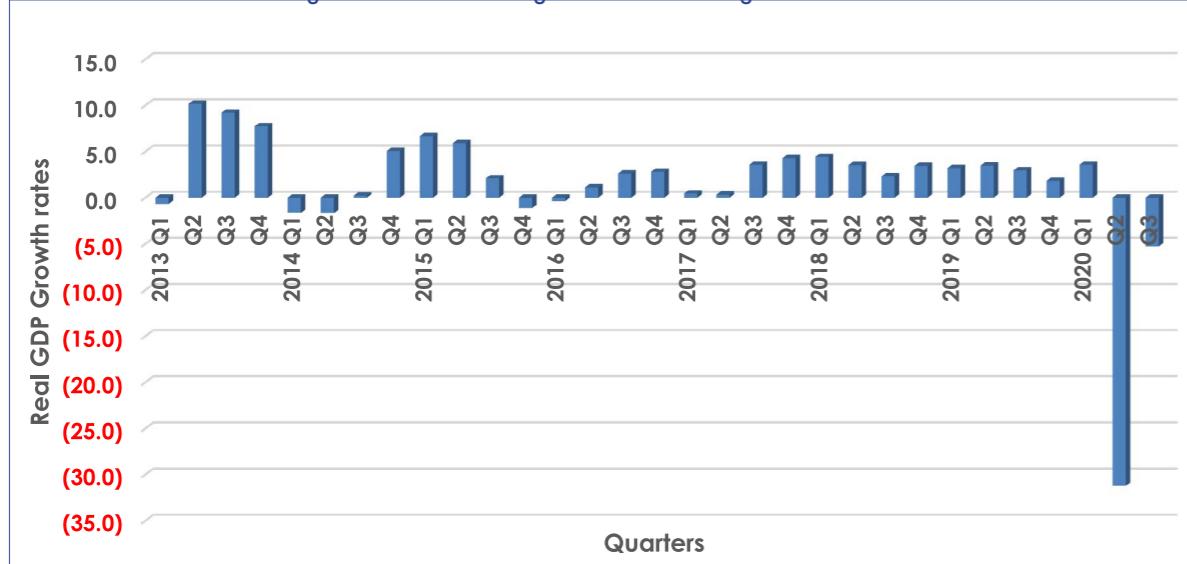

## Manufacturing

The Manufacturing industry recorded a decline of 5.3 percent in real value added during the third quarter of 2020, compared to a growth of 3.0 percent registered in the corresponding quarter of 2019.

The contractionary performance in the industry is observed across the majority of the sub-industries except the Textile and Clothing sub-industry. The reduction is attributed to a substantial decline in the sub-industries of Beverages and Tanning & Leather Products by 31.4 and 21.8 percent respectively. The production of Beverages (Chibuku and Beers) declined by 32.1 percent due to the alcohol ban for a period of two weeks in August 2020 in order to combat the spread of the COVID-19 virus.

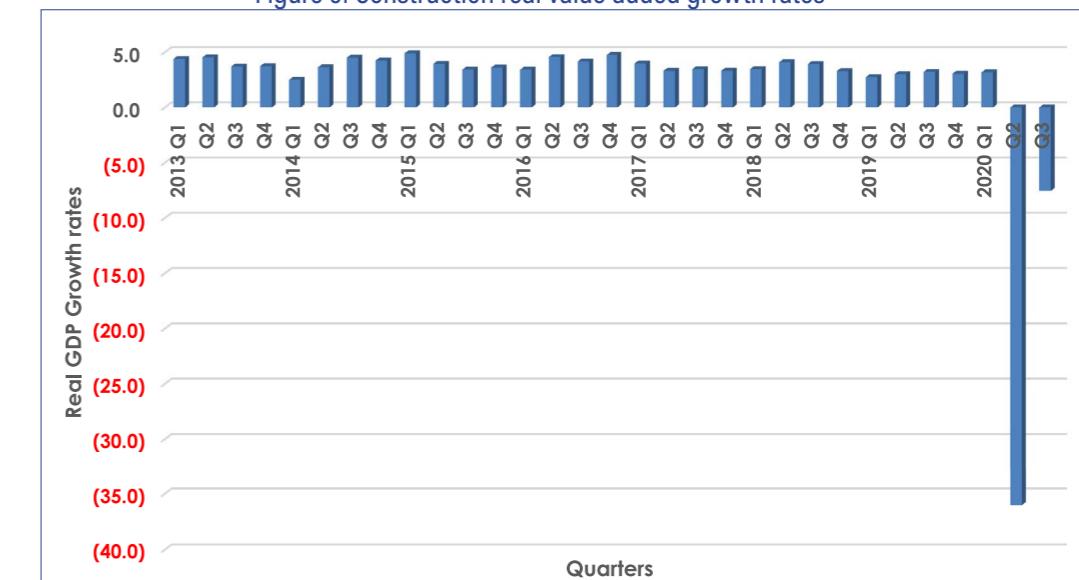

Figure 8: Manufacturing real value added growth rates

## Construction

The Construction industry recorded a decline of 7.6 percent compared to an increase of 3.2 percent realized in the corresponding quarter in 2019. This industry comprises of buildings construction, civil engineering and specialized construction activities. The industry is still recovering from the consequences of COVID-19 pandemic.

Figure 9: Construction real value added growth rates

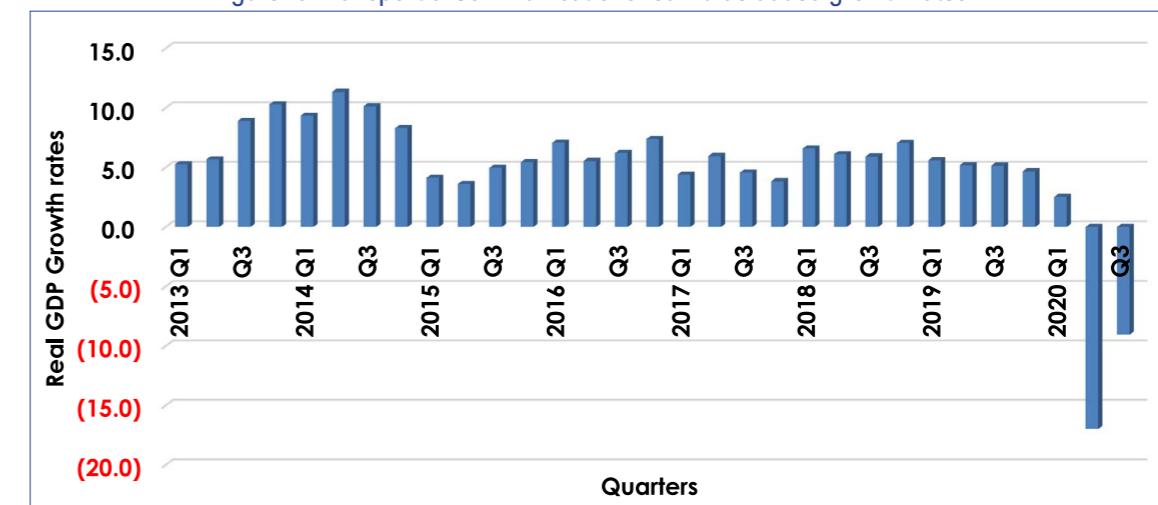

## Transport and Communications

The Transport and Communications value added decreased by 9.0 percent in the third quarter of 2020, compared to a 5.1 percent increase recorded in the same quarter of the previous year. The negative performance of the industry was mainly attributed to the decline in real value added of Air Transport by 94.7 percent, followed by Tour operators & Travel agents and Rail by 9.0 and 0.8 percent respectively.

The significant reduction in Air Transport services was due to the suspension of air travel occasioned by Covid-19 containment measures.

However, a strong performance was observed in the Information and Communications industry which recorded a growth of 7.0 percent in real value added for the third quarter of 2020, compared to an increase of 6.5 percent registered in the corresponding quarter of 2019. The strong performance is attributed to the high demand for data services and internet connectivity from educational institutions, Government, businesses and households during the reporting period.

Figure 10: Transport & Communications real value added growth rates

## Finance and Business Services

The Finance and Business Services industry registered a negative growth of 1.0 percent due to the decline in the real value added of Business Services and Real Estate by 3.9 and 4.8 percent respectively.

In spite of this, a resilient performance of the industry was reflected in both Banking and Insurance sub- industries that recorded positive growths of 4.0 percent and 2.0 percent in real value added respectively. Total loans to Government, Businesses and households increased by 4.4 percent during the quarter under review.

Figure 11: Finance and Business Services real value added growth rates

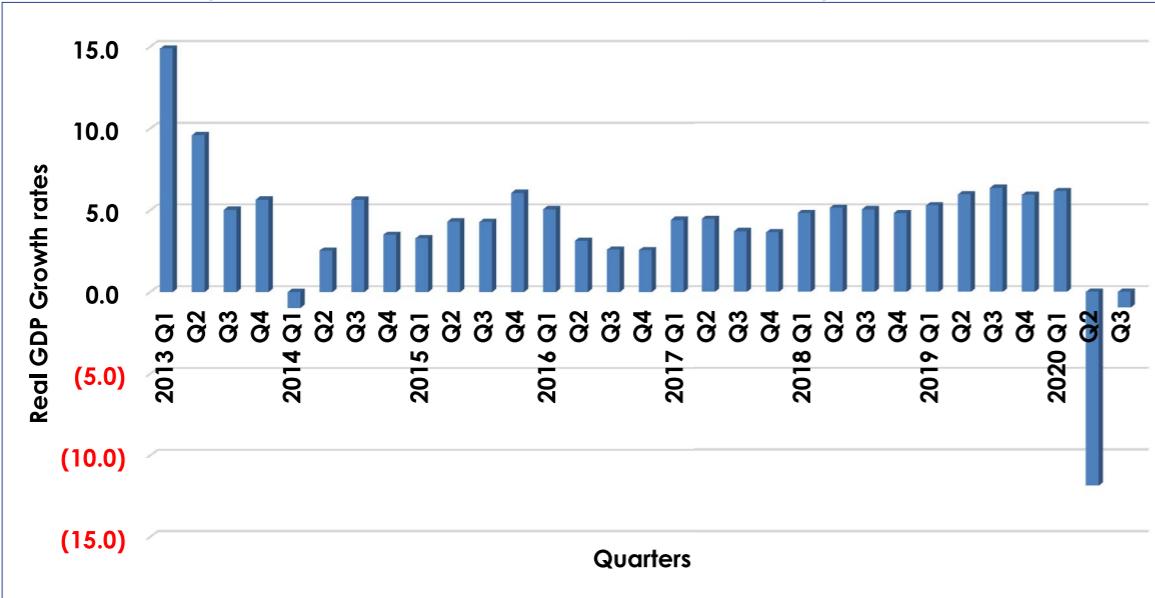

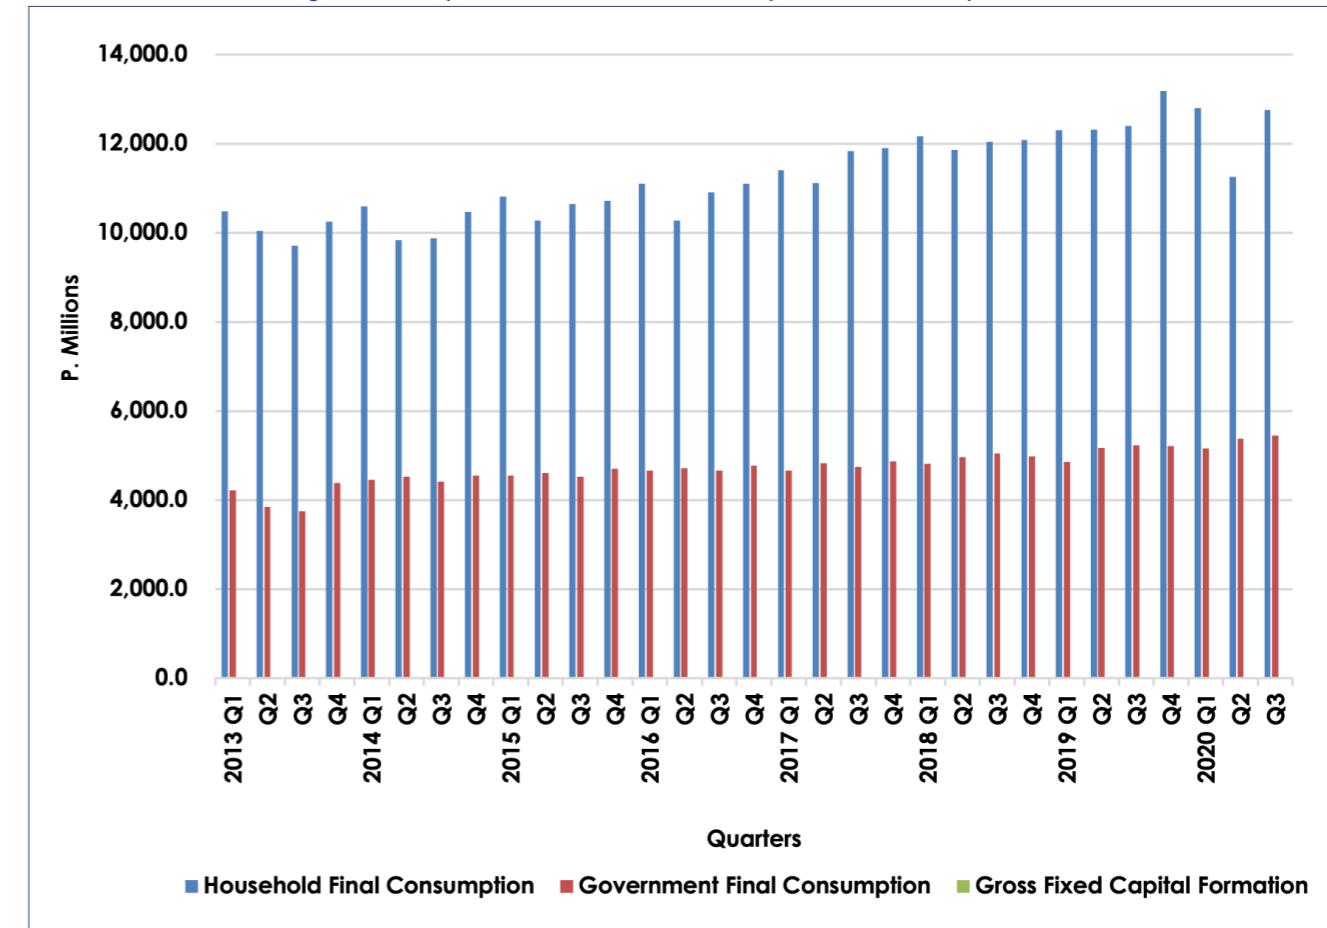

Figure 12: Components of Gross Domestic Expenditure at 2006 prices

## 2.2.2 Components of GDP by Type of Expenditure

Total final consumption expenditure recorded an increase of 3.2 percent in the third quarter of 2020 compared to the same growth recorded in the corresponding quarter of 2019. Household Final Consumption increased by 2.8 percent while Gross Fixed Capital Formation went down by 9.5 percent. Government Final Consumption rose by 4.1 percent in the quarter under review.

In the case of foreign trade, real exports of goods and services increased by 9.4 percent in the third quarter of 2020 compared to a decline of 28.4 percent realised in the same quarter of 2019. Diamond is a major export commodity. The year on year growth of diamond exports indicates a significant increase of 16.3 percent.

Real Imports of goods and services increased by 11.6 percent during the quarter under review, compared to a 4.2 percent increase realised in the same quarter of the previous year.

## 3. Annual National Accounts

### 3.1 Revisions in this release

Revisions have been made to the 2019 annual national accounts estimates published in March 2020. The changes were due to the updated source data and affected the industries indicated in [Table A3](#).

Table A3: Annual revisions in real percentage changes

	Publication March 2020	Publication December 2020
Industries	2019	2019
Mining	-3.9	-4.1
Water and Electricity	6.3	8.4
Trade, Hotels & Restaurants	4.1	4.5
Transport & Communications	5.3	5.1
<b>Total Value Added</b>	<b>3.2</b>	<b>3.2</b>
<b>GDP</b>	<b>3.0</b>	<b>3.0</b>

GDP at current prices stood at P197, 503.6 million in 2019 compared to P190, 365.3 million in 2018, recording an increase of 3.7 percent.

Real GDP increased by 3.0 percent in 2019 compared to a 4.5 percent increase in 2018. The rise in real GDP was mainly attributed to Water & Electricity, Finance & Business Services and Transport & communications industries which recorded an increase in real value added of 8.4, 5.9, and 5.1 percent respectively. ([See table 4](#)).

Water and Electricity real value added at constant 2006 prices for the year 2019 was P1,052.0 million compared to P970.5 million registered in the previous year, recording an increase of 8.4 percent. In 2019, Electricity recorded a value added of P112.0 million compared to P57.5 million registered in the previous year, while the Water sub-industry real value added stood at P948.2 million accounting for 90.1 percent share to the overall Water and Electricity industry.

The increase of 5.9 percent in the real value added of the Finance and Business Services industry was mainly due to the rise in the value added of Business Services, Real Estate and Banks by 6.7, 6.6 and 6.5 percent respectively.

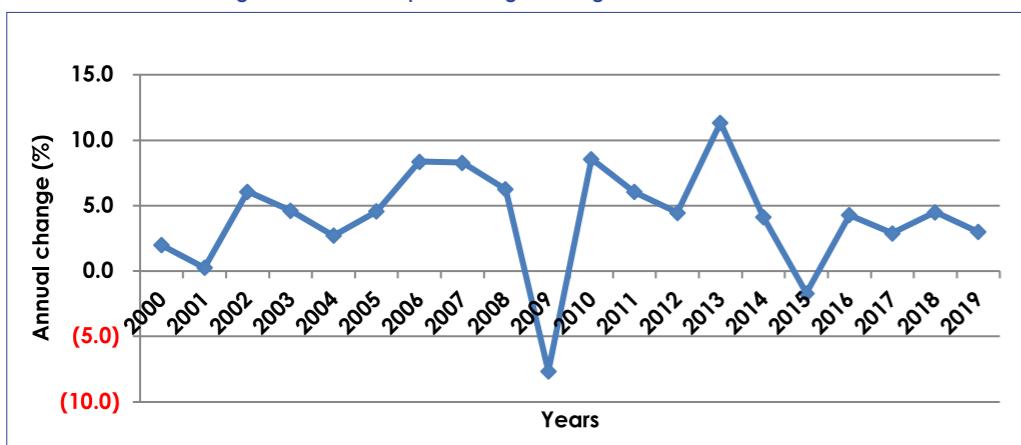

Transport and Communications real value added increased by 5.1 percent in 2019. The growth was mainly driven by the increase in real value added of Post & Communications, Air and Road transport by 6.9, 6.1 and 5.1 percent respectively.

Contribution to GDP by industry is shown in [table 2](#). In 2019, Trade, Hotels & Restaurants and Mining industries remained major contributors to GDP, at 19.7 percent and 15.2 percent respectively ([See table 2](#))

**Table A4: Annual percentage change in Real GDP by Economic Activity**

	2015	2016	2017	2018	2019
Agriculture	0.3	0.6	1.9	2.6	-0.1
Mining	-19.6	-3.5	-11.1	7.6	-4.1

**Figure 13: Annual percentage change in real GDP**

### 3.2. Gross Domestic Product by Expenditure

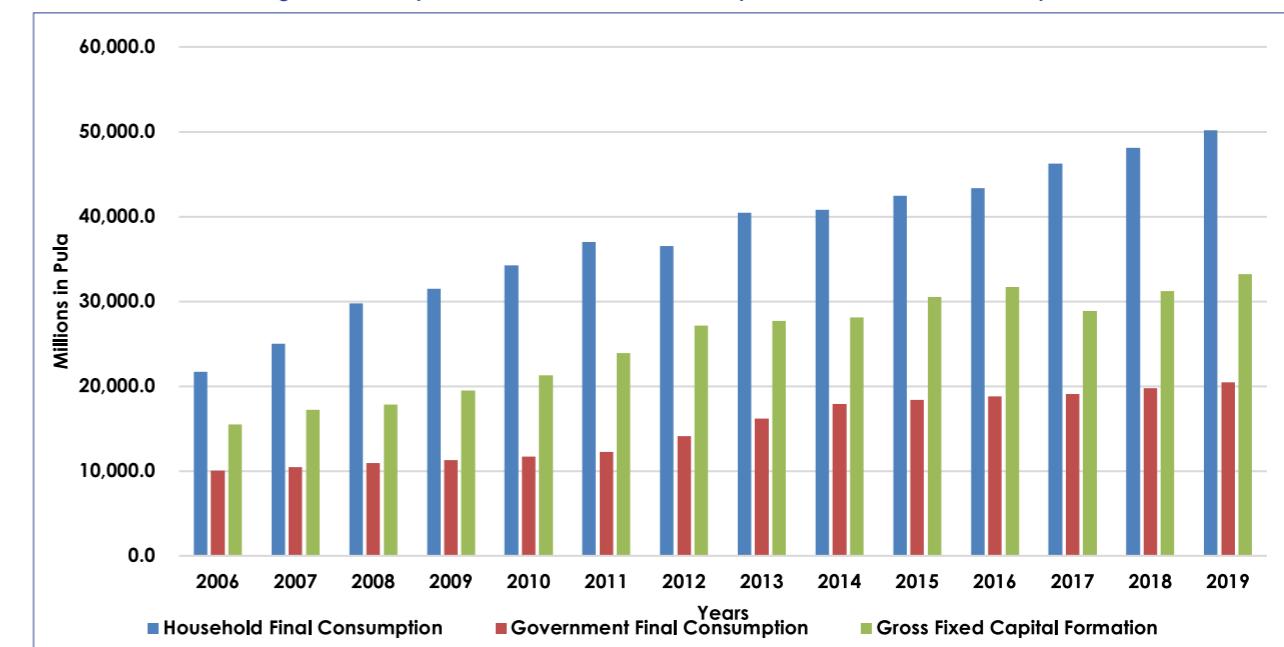

**Table A5: Annual percentage change in Real GDP by Expenditure**

	2017	2018	2019
<b>Total final consumption expenditure</b>	<b>5.1</b>	<b>4.0</b>	<b>4.0</b>
Household Final Consumption Expenditure	6.6	4.1	4.3
Final Consumption of NPISH	3.1	3.7	3.1
Government Final Consumption Expenditure	1.5	3.7	3.3
<b>Gross Capital Formation Expenditure</b>	<b>-8.8</b>	<b>8.1</b>	<b>6.6</b>
<b>Gross Domestic Expenditure</b>	<b>-0.6</b>	<b>5.2</b>	<b>9.5</b>
Exports of Goods and Services	-16.2	7.2	-16.7
Imports of Goods and Services	-21.1	11.8	6.7
<b>Gross Domestic Product</b>	<b>2.9</b>	<b>4.5</b>	<b>3.0</b>

Real Gross Domestic Expenditure rose by 9.5 percent in 2019. Total final demand increased by 4.0 percent compared to the same growth realised in 2018. Gross Fixed Capital Formation went up by 6.6 percent.

In the case of foreign trade, real exports of goods and services decreased by 16.7 percent in 2019 compared to an increase of 7.2 percent in 2018, while real imports of goods and services rose by 6.7 percent as opposed to an increase of 11.8 percent in 2018.

**Figure 14: Components of Gross Domestic Expenditure at constant 2006 price**

**Table A6: Annual percentage changes in National Accounts Aggregates**

	2017	2018	2019
Gross National Income	6.0	5.0	4.8
Gross National Disposable Income	7.7	3.4	3.7
Gross Savings	5.0	-1.1	-4.7
Capital Stock	3.8	4.4	4.7
Consumption of Fixed Capital	4.3	5.3	6.6
Compensation of Employees	8.5	7.3	13.1

### 3.3 Compensation of Employees by Economic Activity (COE)

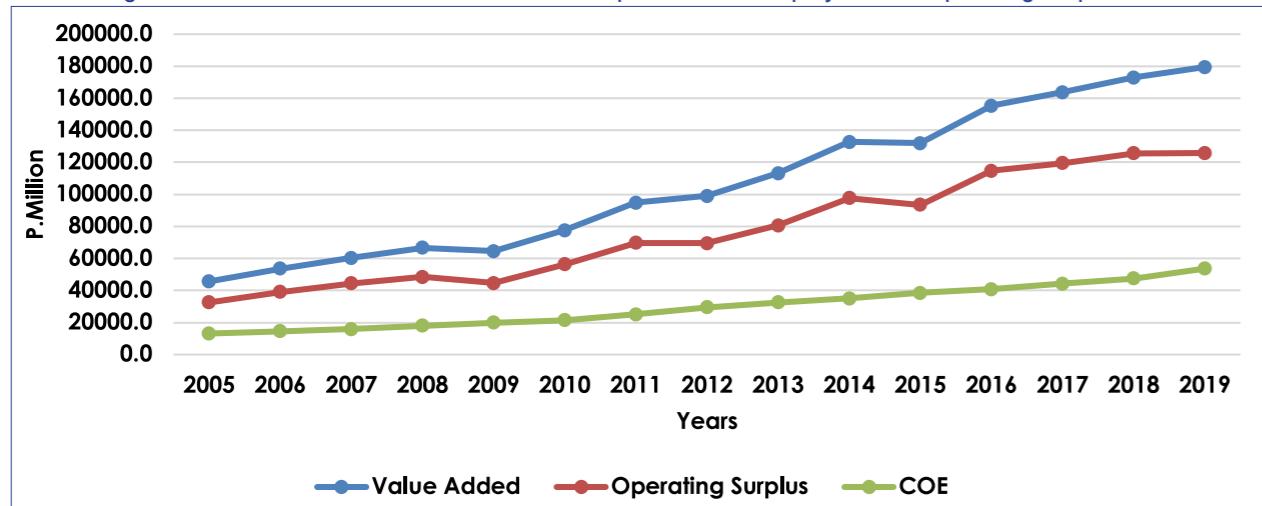

Compensation of Employees is the total remuneration payable by an enterprise to the employees for work done during the accounting period. There are three main components of Compensation of Employees; being wages & salaries in cash, wages & salaries in kind, and employer's social contributions (consists of social contributions payable by the employer for the benefit of their employees).

Compensation of Employees increased by 13.1 percent from P47, 427.4 million in 2018 to P53, 655.8 million in 2019 ([See table 7](#)).

### 3.4 GDP by Income approach

GDP by income approach is the sum of primary incomes distributed by resident producer units. This is calculated as the sum of Compensation of Employees by economic activity plus Taxes on Production plus Consumption of Fixed Capital and Operating Surplus which is calculated as a residual. Operating Surplus increased by 0.2 percent in 2019 ([See table 8](#)).

[Figure 15: Relations between Value Added, Compensation of employees and Operating Surplus](#)

### 3.5 Gross National Income (GNI)

Gross Domestic Product is an aggregate measure of production; it refers to the production of all resident units within the borders of a country, which is not exactly the same as the production of all productive activities of residents. Some of the productive activities of residents may take place abroad. The contribution of labour is accounted for through the compensation of employees paid to non-residents and received by the economy. In addition, some primary income generated within the country may go to non-residents.

GNI is derived as Gross Domestic Product plus net primary incomes from abroad (net compensation of employees from abroad plus net property income from abroad).

Net compensation of employees is income earned by Botswana residents abroad minus income earned by non-residents in Botswana. Net property income is Botswana Investment abroad minus foreign investment in Botswana.

Gross National Income increased by 4.8 percent in 2019 while Gross Domestic Product at current prices increased by 3.7 percent during the same year. In 2019, GNI was estimated at P182, 514.6 million while GDP was P197, 503.6 million ([See table 9](#)).

### 3.6 Gross National Disposable Income (GNDI)

Gross National Disposable Income measures income available to the total economy for final consumption and gross saving. GNDI is derived as Gross National Income plus the inflow of current transfers minus outflows of current transfers. Current transfers' inflows include SACU receipts.

GNDI increased by 3.7 percent from P188, 658.3 million to an amount of P195, 630.6 million in 2019 ([See table 9](#)).

### 3.7 Gross Savings (GS)

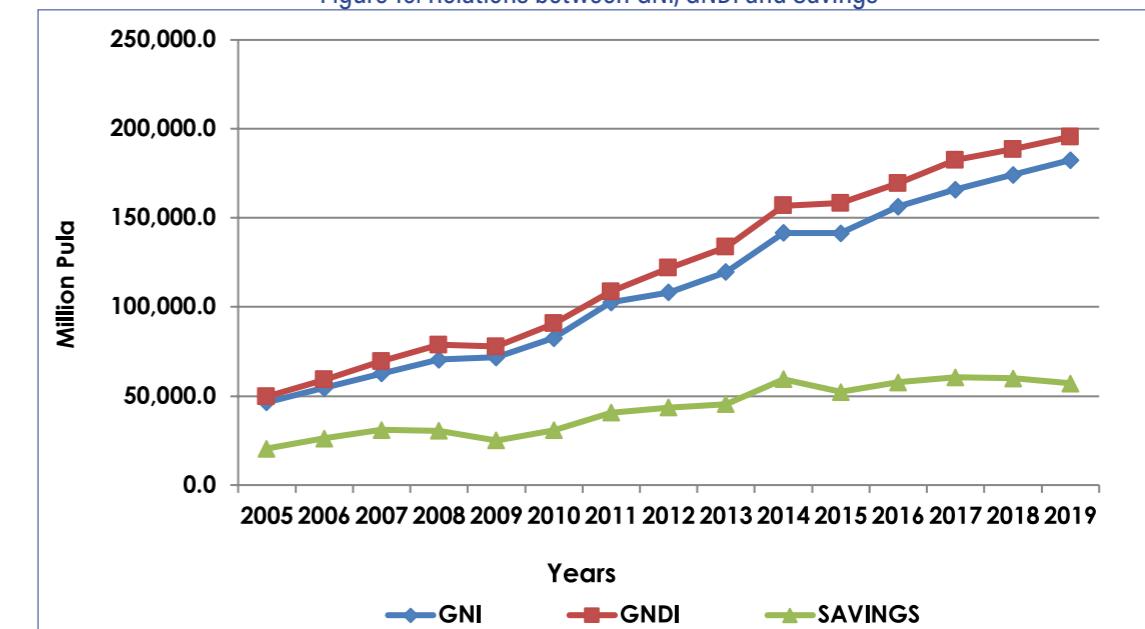

Gross Saving represents excess of current income over current expenditure. It is derived as Gross National Disposable Income minus final consumption expenditure which comprises of government consumption expenditure, household consumption expenditure and Non Profit Institutions Serving Households (NPISH) expenditure.

In 2019, Gross Savings of the nation decreased by 4.7 percent ([See table 9](#)).

### 3.8 Consumption of Fixed Capital (CFC)

The CFC is the decline, during the course of the accounting period, in the current value of the stock of fixed assets owned and used by a producer as a result of physical deterioration, normal obsolescence or normal accidental damage. In 2019, Consumption of fixed capital was P40, 098.0 million compared to P37, 606.7 million registered in 2018, recording an increase of 5.2 percent ([See table 10](#)).

[Figure 16: Relations between GNI, GNDI and Savings](#)

### 3.9 Capital Stock

It is generally accepted that the level of Gross Fixed Capital Formation, and hence the growth in fixed capital stock, has a material influence on an economy's labour productivity, business competitiveness and ultimately the rate of increase in the standard of living. Estimates of capital formation and the stock of physical capital are therefore key indicators for assessing macro-economic performance.

An estimate of the capital stock refers to a value that is attached to the total physical capital in existence at a specific point in time in an economy. In addition, the estimates of the value of capital stock reflect the actual physical capacity available for repeated use in the production of other goods and services. In practice, it is usually calculated as gross or net capital stock in real terms and the "perpetual inventory method" (PIM) was used to produce estimates of the stock of tangible reproducible assets.

At current prices, the capital stock was estimated at P391, 823.7 million in 2019 compared to P365, 695.1 registered in the previous year, an increase of 7.1 percent ([See table 11](#)).

At constant prices, capital stock increased by 4.7 percent in the year under review from P197, 312.5 million recorded in the previous year to P206, 667.6 million ([See table 12](#)).

#### 4.0 Public and Private Capital Stock

In 2019, Private Capital Stock contributed 66.4 percent to the total stock of assets while Public Capital Stock accounted for 33.6 percent.

Table A7: GDP per capita (Pula)

Year	Nominal GDP per capita	Real GDP per capita
1994	7,869.2	22,793.4
1995	8,800.8	23,789.8
1996	10,550.8	24,562.5
1997	11,707.1	25,958.7
1998	12,615.7	25,437.9
1999	15,627.3	27,583.6
2000	17,991.2	27,814.8
2001	19,077.2	27,229.8
2002	20,097.5	28,349.6
2003	21,311.8	29,113.9
2004	23,650.1	29,350.0
2005	28,026.8	30,121.2
2006	32,038.3	32,038.3
2007	35,727.9	34,050.1
2008	39,021.1	35,509.2
2009	37,656.0	32,186.9
2010	43,705.9	34,298.6
2011	51,844.3	35,702.1
2012	53,116.0	36,507.0
2013	59,313.9	39,846.8
2014	67,868.0	40,743.3
2015	66,822.0	39,380.8
2016	76,841.0	40,450.3
2017	79,903.7	40,991.5
