1. Introduction

This statistical release contains preliminary Gross Domestic Product estimates at current and constant prices for the fourth quarter of 2015, as well as 2015 preliminary annual estimates. Botswana's national accounts are compiled according to the 1993 System of National Accounts (1993 SNA). The accounts presented in this brief adhere to the enhanced General Data Dissemination System (e-GDDS) of the International Monetary Fund (IMF), which sets out standards on coverage, periodicity and timeliness of data.

The estimates are provisional and subject to change. First estimates are normally based on limited data and hence cannot be precise and absolute. The figures are revised after receiving finalized or audited data from companies in which some differences and inconsistencies in the previously published data may be observed.

These estimates are not seasonally adjusted hence the variations may differ depending on the quarters.

Statistics Botswana acknowledges and appreciates the contribution of all stakeholders in the production of this quarterly report.

3. Fourth quarter GDP

The estimated GDP at current prices for the fourth quarter of 2015 was P34, 904.1 million compared to a revised level of P37, 326.6 million registered in the third quarter of 2015 (See table 1).

The estimated GDP at constant 2006 prices for the fourth quarter of 2015 was P21, 729.8 million compared to P20, 707.3 million registered in the third quarter of 2015 (See table 3).

The domestic economy decreased by 1.9 percent in the fourth quarter of 2015 compared to an increase of 3.9 percent accrued in the same quarter of 2014. The decline was attributed to real Mining value added which decreased by 30.5 percent in the fourth quarter of 2015 compared to a decline of 0.2 percent registered in the same quarter of the previous year. The real Mining value added also decreased significantly in the third quarter of 2015 by 40.6 percent. A decline in the value added of the Mining sector is attributed to the continued weak recovery in the global markets, particularly in the major markets for diamonds. In the quarter under review, copper and diamond production decreased by 59.7 and 20.4 percent respectively. During the fourth quarter of 2015, Mowana and Thakadu copper mines were on provisional liquidation while there was also a plant shutdown at the BCL copper mine during the months of August, September and October 2015. All other industries recorded positive growth with the exception of Mining, Manufacturing and Agriculture which decreased by 30.5, 1.9 and 0.7 percent respectively (See table 4).

Water and Electricity value added at constant 2006 prices for the fourth quarter of 2015 was P42.7 million compared to P36.8 million registered in the fourth quarter of 2014. Although Electricity continued to record negative value added, it has shown some improvement. In the fourth quarter of 2015 Electricity recorded a negative value added of P95.2 million compared to a negative value added of P103.5 million registered in the fourth quarter of 2014. The improvement is attributed to an increase in local electricity production by 40.2 percent and a decrease of 34.2 percent in electricity imports. Imported Electricity is included in intermediate consumption.

Water has shown some improvement in the fourth quarter of 2015 compared to the previous quarter, it registered a decline of 1.9 percent compared to a decrease of 4.0 percent in the previous quarter.

Manufacturing recorded a decrease of 1.9 percent in the fourth quarter of 2015 compared to an increase of 4.6 percent in the same quarter of the previous year. The decline was attributed to a decline in the value added of all sub industries in this sector. Meat & meat products, Beverages, Textiles, Tanning & leather products and Other manufacturing decreased by 7.4, 5.9, 0.5, 4.6 and 0.6 percent respectively.

Other manufacturing comprises of diamond polishing and cutting companies which are also facing the same challenges as the diamond mining companies emanating from lower external demand of diamonds and lower commodity prices. Exports of polished diamonds decreased by 43.7 percent in the fourth quarter of 2015 compared to a decrease of 10.7 percent recorded in the fourth quarter of 2014.

The decline in real GDP was mainly due to Mining sector which recorded a decrease in real value added of 19.7 percent. The decline in the real value added of the Mining sector is attributed to 15.6 percent decrease in diamond production and 35 percent decline in copper production in 2015.

Contribution to GDP by industry is shown in table 2. Mining remains a major contributor to GDP. Its contribution decreased to 18.3 percent in 2015 compared to 24.0 percent recorded in 2014.
