## PREFACE

The current report presents International Merchandise Trade Statistics (IMTS) for Botswana during 2015. This report follows the 2012 IMTS Annual Report which was published in December 2016. Reports for 2013 and 2014 were skipped in an effort to provide close to recent information. The skipped reports will be produced at a later stage to complete the series.

Botswana International Merchandise Trade Statistics is mainly based on Harmonized Commodity Description \& Coding System (HS Codes). Other commodity classifications discussed in this report are the Standard International Trade Classification (SITC) and the Broad Economic Categories (BEC).

The 2015 IMTS report shows that imports were valued at P73, 149.8 million, having increased by 1.1 percent from the value of P72, 425.9 million during the previous year. Exports were valued at P63, 484.2 million compared to P76, 260.7 million in 2014, giving a decrease of 16.8 percent. The top four commodity import groups were Diamonds at 34.5 percent, Machinery \& Electrical Equipment at 12.6 percent, Fuel at 12.5 percent and Food, Beverages \& Tobacco at 9.6 percent. The Top two export groups were Diamonds at 83.1 percent and Copper/Nickel at 6.0 percent.

Major sources of imports were South Africa at 62.6 percent followed by Namibia and Canada at 15.5 percent and 7.0 percent respectively. Exports were mainly destined to four countries being; Belgium at 19.8 percent, South Africa at 15.5 percent, India at 12.4 percent and Namibia at 11.8 percent.

This report is divided into two parts, the first part carries discussions on IMTS during 2015 while the second part presents tables on which these discussions are based. The discussions are further divided into chapters and sections. Tables presented in part two are linked through table numbers, to the chapters and sections that discuss these various tables.

For more information contact the Directorate of Stakeholder Relations at 3671300. All Statistics Botswana publications are available on the website at www.statsbots.org.bw, and at the Statistics Botswana Information Resource Centre (Head-Office, Gaborone).

I sincerely thank all stakeholders involved in the formulation of this annual report, for their continued support and feedback, as we strive to better serve users of our products and services.

A. N. Majelantle

Statistician General
April 2018

## INTRODUCTION

This report presents Botswana International Merchandise Trade Statistics (BIMTS) during the year 2015. International Merchandise Trade Statistics (IMTS) refers to external trade in goods only. IMTS measures all transactions of goods between the compiling country and the rest of the world. What is measured in IMTS includes the monetary values and quantities of goods that are imported into and exported out of the country. The primary source of international merchandise trade data in Botswana is the Customs \& Excise transactions. In some countries informal trade surveys are carried out to augment customs data but this is currently not the case in Botswana. Importers and exporters surveys are also carried out in some countries either to augment or to cross check customs data but again currently this is not done in Botswana due to some constraints.

With regard to Botswana IMTS, currently customs \& excise transactions are the sole source of IMTS. The Customs \& Excise Division of Botswana Unified Revenue Service (BURS) is responsible for data capture for both computerized and manual borders, and the monthly raw data files are then transferred to Statistics Botswana for data processing.

Trade statistics is vital for formulation of monetary, fiscal, commercial and regional integration policies. As a result it is used by different researchers, investors, in understanding of the market for purposes of identifying viable products. IMTS is also used as a basis for trade negotiations. Botswana import various commodities. The total imports value is mainly influenced by six groups, being Diamonds; Machinery \& Electrical Equipment; Fuel; Food, Beverages \& Tobacco; Chemicals \& Rubber Products and Vehicles \& Transport Equipment.

Botswana revenue earning is dependent on mining, therefore the value of total exports is heavily dependent on exports of rough diamonds. Exports of Textiles and Meat \& Meat Products are to a less extent as far as the value of exports is concerned.

It is worth noting that total trade values as reported in this annual report, for 2015 may not necessarily give exact figures as the ones reported for 2015 in the recent monthly digests. This is as a result of some processes at source of data whereby some transactions can be held for some time pending investigations. When the affected transactions are finally cleared, they will update the year and month during which trade was initially lodged. As compilation of the annual report is a lengthy process, in case an update was made after data for the report was extracted from the database, it will not be easy to factor in the update due to the numerous interrelated tables.

## CHAPTER 1: TOTAL TRADE

This section deals with the components of total trade, which are; total exports, imports and trade balance. Total exports refer to the sum of domestic exports (exports of Botswana origin) and re-exports (goods which were exported in the same condition as imported or after undergoing minor transformation which leaves them not substantially changed). Imports are based on cost, insurance and freight (CIF) value. Trade balance is the difference between total exports and imports for a given period of time. The components of IMTS are presented on Table 1.1, which gives annual data for the period covering 2011 to 2015. Table 1.2 gives monthly, quarterly and yearly figures for 2014 and 2015.

### 1.1. Yearly Total Trade

Yearly Total Trade presents total exports, imports and trade balance. Discussions on yearly total trade are based on Table 1.1. The discussions in the sub-sections below focus on 2015 total trade, with comparison made to 2014 total trade.

### 1.1.1 Imports

Imports are valued Cost, Insurance \& Freight (CIF), which includes the cost of the commodity plus insurance and freight charges, but excludes customs or any other duty paid on arrival. Imports increased by 1.1 percent (P763.9 million) from the 2014 import value of P72, 425.9 million to P73, 189.8 million in 2015. The slight increase was mainly influenced by increase in commodities such as Machinery \& Electrical Equipment which recorded 11.5 percent (P952.78 million) from P8, 255.5 million in 2014 to P9, 208.3 million in 2015. Food, Beverages \& Tobacco with 11.7 percent (P735.84 million) from the value of P6, 286.7 million registered during 2014 to P7, 022.5 million in 2015. Chemicals \& Rubber Products with increased with 8.8 percent (P515.42 million) from P5, 870.6 million in 2014 to P6, 386.1 million in 2015 Table 2.1 A. The overall increase is however slight as it has been counteracted by decreases in other commodity groups.

### 1.1.2. Total Exports

Exports are valued Free On Board (FOB), i.e. the value of goods including charges up to delivery. In 2015, total exports were valued at P63, 484.2 million as compared to $\mathrm{P} 76,260.7$ million of 2014. This shows a decrease of 16.8 percent (P12, 776.5 million). The decrease was mainly due to the decrease in Diamonds exports, which decreased by 19.3 percent (P12, 597.8 million). Other Commodities which recorded decreases were Copper \& Nickel with 13.7 percent (P602.0 million), Iron, Steel \& Related Products with 33.2 percent (P120.9 million) and Gold with 26.7 percent (P105.0 million).

### 1.1.3 Trade balance

Botswana recorded a trade deficit of P9, 705.6 million during the 2015 trade year. This was influenced by the decrease in exports of diamonds.

Table 1.1: Total Trade, 2011-2015 (Millions of Pula)

| Flow Type \Year | $\mathbf{2 0 1 1}$ | $\mathbf{2 0 1 2}$ | $\mathbf{2 0 1 3}$ | $\mathbf{2 0 1 4}$ | $\mathbf{2 0 1 5}$ |
| ---: | ---: | ---: | ---: | ---: | ---: | ---: |
| Imports | $50,029.7$ | $62,115.3$ | $70,219.1$ | $72,425.9$ | $73,189.8$ |
| Domestic Exports | $38,802.7$ | $44,805.8$ | $64,749.3$ | $74,309.5$ | $58,861.6$ |
| Re-Exports | $1,226.6$ | $1,109.7$ | $1,655.3$ | $1,951.1$ | $4,622.5$ |
| Total Exports | $40,029.3$ | $45,915.5$ | $66,404.6$ | $76,260.7$ | $63,484.2$ |
| Trade Balance | $(10,000.4)$ | $(16,199.8)$ | $(3,814.4)$ | $3,834.8$ | $(9,705.6)$ |

() denotes negative numbers

Chart 1.1 which is based on Table 1.1, gives the graphical presentation of components of total trade from 2011 to 2015. It is evident from this graph that imports were higher than exports during most of the period displayed except in 2014. As a result, most of the years registered trade deficits. Trade deficits are more pronounced for 2012, followed by 2011 and then by the year under review.

Chart 1.1: Total Trade, 2011-2015 (Millions of Pula)

### 1.2. Monthly and Quarterly Trade

This section presents components of total trade by month, quarter and year for 2015 and 2014 only. The associated data is carried in Table 1.2. The graphical presentation of these components is given in Chart 1.2, which is based on this table.

### 1.2.1 Imports

Table 1.2 shows that comparison of Quarterly data for 2015 and 2014 (quarter on quarter differences) shows that the first three (3) quarters of 2015 registered increases over 2014 imports for corresponding quarters except fourth quarter. All discussions carried in this section are based on this table.

### 1.2.1.1. Quarter on Quarter Comparison for 2015 Compared to 2014

During the first quarter of 2015, imports were valued at P18, 267.3 million, which is an increase of 0.7 percent (P120.8 million) from the value of P18, 146.5 million registered during 2014 first quarter.

Comparison of import values for the second quarter of 2015 and the same quarter in 2014 shows an increase of 6.6 percent (P1, 218.4 million) from the value of $\mathrm{P} 18,532.5$ million registered during the second quarter of 2014 to the value of P19, 750.9 million recorded during 2015 second quarter.

Total imports for the third quarter of 2015 were valued at P18, 096.7 million, having increased by 1.1 percent (P188.2 million) as compared to the value of P17, 908.5 million registered during the corresponding quarter of 2014.

The fourth quarter of 2015 total imports, valued at P17, 074.9 million, registered a decrease of 4.3 percent (P763.5 million) as compared to P17, 838.4 million recorded during 2014 fourth quarter.

### 1.2.1.2. Comparison of 2015 Quarters with the preceding Quarter

Import for the first quarter of 2015 were valued at P 18, 267.3 million, which is an increase of 2.4 percent (P428.9 million) over the value of P17, 838.4 million recorded during 2014 fourth quarter.

Comparison of the second and first quarters of 2015 shows an increase of 8.1 percent (P1, 483.6 million) from P18, 267.3 million registered during the first quarter to $\mathrm{P} 19,750.9$ million recorded during the second quarter. The third quarter of 2015 shows a decrease of 8.4 percent ( $\mathrm{P} 1,654.2$ million) in total imports value, from P19, 750.9 million recorded during second quarter to P $18,096.7$ million registered during the third quarter.

Total imports during the fourth quarter of 2015 shows a decrease of 5.6 percent ( $\mathrm{Pl}, 021.8$ million) in total imports value, from P18, 096.7 million recorded during the third quarter to P17,074.9 million during the fourth quarter of the same year.

### 1.2.2. Total Exports

Discussions on this sub-section are based on Table 1.2.

### 1.2.1.3. Quarter on Quarter Comparison for 2015 and 2014

The quarter on quarter comparison for total exports during 2015 and 2014 shows that the first quarter of 2015 registered an increase of 13.4 percent ( $\mathrm{P} 2,306.5$ million) from P17, 179.8 million recorded during the first quarter of 2014 , to P19, 486.3 million during the same quarter in 2015.

Total exports during the second quarter of 2015 registered a decrease of 5.9 percent (P1, 245.5 million) from P21, 043.1 million recorded during the second quarter of 2014 to P19, 797.6 million during the same quarter of the year under review.

Total exports value recorded during the third quarter of 2015 (P11, 832.9 million) shows a decrease of 40.4 percent (P8, 014.4 million) when compared to the value of P19, 847.3 million recorded during the third quarter of 2014.

The fourth quarter of 2015 total exports, valued at P12, 367.3 million, decreased by 32.0 percent (P5, 823.2 million) when compared to P18, 190.5 million recorded during 2014 fourth quarter.

The quarter on quarter comparison shows that the first quarter of 2015 is the only quarter that showed increase over the same quarter of 2014 while the other three quarters recorded decreases as compared to the same quarters of the previous year.

### 1.2.1.4. Comparison of 2015 Quarter and the Preceding Quarter

Comparison of total exports value during the first quarter of 2015 and the fourth quarter of 2014 shows an increase of 7.1 percent (P1, 295.8 million), from P18, 190.5 million during 2014 fourth quarter to $\mathrm{P} 19,486.3$ million during 2015 first quarter.

The second quarter of 2015 recorded an increase of 1.6 percent (P311.3 million) from the value of P19, 486.3 million recorded during the first quarter to P19, 797.6 million during the second quarter of the same year.

A decrease of 40.2 percent (P7, 964.7 million) was observed when comparing 2015 third quarter total exports, valued at P11, 832.9 million to the value of P19, 797.6 million recorded during the second quarter of the same year.

During the fourth quarter of 2015, total exports were valued at P12, 367.3 million, having increased by 4.5 percent (P534.4 million) as compared to P11, 832.9 million recorded during the third quarter of the same year.

### 1.2.3. Trade Balance

In 2015, nine months registered trade deficits, in the exception of Janvary, March and May, while six months, being February, March, May, September, October and November, recorded trade deficits in 2014. Movements on trade balance are better depicted by Chart 1.2 which is based on Table 1.2.

The imports trend line starts at around five billion Pula in January 2014 and reaches the highest peak of just above seven billion Pula during June 2015, closing the two year period with just over six billion Pula during December 2015.

The total exports trend line also starts at around six billion Pula in January 2014, reaching the highest peak of just above eight billion Pula during May 2015 and closing the period with just over five billion Pula during December 2015.

Table 1.2 shows that the worst monthly trade deficit of P3, 475.5 million was recorded during August 2015, while the highest trade surplus of P2, 735.5 million is noticeable during July 2014.

Chart 1.2: Total Trade, 2014 and 2015 (Millions of Pula)

## CHAPTER 2: TRADE BY PRINCIPAL COMMODITIES

Principal commodity groups refer to commodities grouped together to form major groups of related commodities. Commodities forming a group may be of related chapters, for example; "Machinery \& Electrical Equipment" which combines machines and electrical appliances; "Vehicles \& Transport Equipment" which combines vehicles and other equipment used for transport purposes.

In some cases it becomes a challenge to come up with further groups of related chapters or commodities. This is in the case when commodity groupings' contributions to the total remain minimal. In such cases, the commodities are grouped together under one category called "Other".

### 2.1. Composition of Principal Imports

In 2015, the principal imports commodity groups were driven mainly by six groups, being Diamonds; Machinery \& Electrical Equipment; Fuel; Food, Beverages \& Tobacco; Chemicals \& Rubber Products and Vehicles \& Transport Equipment. The discussion on principal imports is based on Table 2.1A and Table 2.1B which present values on principal imports and percentage distributions respectively.

During 2015, total imports were valued at P73, 189.8 million having increased by 1.1 percent (P763.9 million) as compared to P72, 425.9 million recorded during 2014. The six commodity groups mentioned above made a combined contribution of 85.1 percent (P62, 289.5 million) to total import value in 2015 as compared to 86.9 percent (P62, 925.1 million) in 2014.

Diamonds registered the highest contribution of 34.5 percent (P25, 231.6 million) to total imports (P73, 189.8 million) during the year under review. This was followed by Machinery \& Electrical Equipment with 12.6 percent (P9, 208.3 million). The third most contributing group was Fuel with 12.5 percent (P9, 116.7 million) followed by Food, Beverages \& Tobacco with 9.6 percent (P7, 022.5 million), Chemicals \& Rubber Products with 8.7 percent (P6, 386.1 million) and Vehicles \& Transport Equipment with 7.3 percent (P5, 324.4 million).

### 2.1.1. Quarter on Quarter Comparison of Principal Imports for 2015 and 2014

During the first quarter of 2015, Diamonds contributed the most to total imports with 36.2 percent (P6, 618.6 million) of P18, 267.3 million as compared to a contribution of 41.2 percent (P7, 469.1 million) of P18, 146.5 million during the same quarter in 2014. This was followed by Fuel with a contribution of 14.1 percent (P2,581.3 million) to first quarter total imports in 2015 as compared to a contribution of 13.9 percent ( $\mathrm{P} 2,518.8$ million) to total imports during 2014 first quarter.

Machinery \& Electrical Equipment contributed 10.9 percent (P1, 993.0 million) to total imports during the first quarter of 2015 as compared to a contribution of 10.7 percent (P1, 946.4 million) during the same quarter in 2014. It can be observed from Table 2.1A and Table 2.1B that the percentage contributions of Machinery \& Electrical Equipment to the quarterly totals and the values recorded for this group, as well as the quarterly totals for quarter one 2015 and 2014 first quarter did not differ much.

Food, Beverages \& Tobacco contributed 8.9 percent (P1, 625.3 million) to total imports during quarter one of 2015 as compared to a slightly lower contribution of 8.3 percent (P1, 507.4 million) to total imports during 2014 first quarter. Comparison of contributions made by other import commodity groups to first quarter total imports for 2015 and 2014 can be observed on the above mentioned tables.

The second quarter of 2015 recorded imports amounting to P19, 750.9 million. Diamonds contributed the most to total imports with 40.1 percent (P7, 920.3 million) as compared to a slightly lower contribution of 39.8 percent (P7, 382.7 million) to 2014 second quarter total imports valued at P18, 532.8 million. This was followed
by Machinery \& Electrical Equipment with 11.9 percent (P2, 359.5 million) as compared to a contribution of 9.7 percent (P1, 805.2 million) to total imports during the same quarter in 2014 . Fuel contributed 10.7 percent (P2, 107.8 million) as compared to a contribution of 15.1 percent (P2, 801.5 million) during 2014 second quarter.

Diamonds registered the highest contribution of 33.2 percent (P6, 012.9 million) during the third quarter of 2015 as compared to a slightly higher contribution of 33.3 percent (P5, 960.3 million) during 2014 third quarter. This was followed by Machinery \& Electrical Equipment with 14.0 percent (P2, 525.2 million) during the third quarter of 2015 as compared to 12.2 percent (P2, 181.5 million) during 2014 third quarter. Fuel contributed 12.9 percent ( $\mathrm{P} 2,331.9$ million) to total imports during the third quarter of 2015 as compared to a contribution of 15.1 percent ( $\mathrm{P} 2,709.7$ million) to third quarter 2014 total imports (P17, 908.5 million). Food, Beverages \& Tobacco contributed 9.7 percent ( $\mathrm{P} 1,762.6$ million) to 2015 third quarter total imports ( $\mathrm{P} 18,096.7$ million) as compared to 9.1 percent ( $\mathrm{P} 1,631.6$ million) of $\mathrm{P} 17,908.5$ million during 2014 third quarter.

During the fourth quarter of 2015, Diamonds contributed 27.4 percent (P4, 679.9 million) to total imports (P17, 074.9 million) during the quarter, as compared to a contribution of 29.0 percent (P5, 167.2 million) to the value of (P17, 838.4 million) recorded during the same quarter of the previous year. Machinery \& Electrical Equipment followed with 13.6 percent ( $\mathrm{P} 2,330.6$ million), then Fuel with 12.3 percent ( $\mathrm{P} 2,095.7$ million) as compared to contributions of 13.0 percent ( $P 2,322.5$ million) and 16.1 percent ( $P 2,865.0$ million) respectively for the same quarter during the year before. Food, Beverages \& Tobacco contributed 12.1 percent (P2, 070.2 million) as compared to 9.7 percent (P1, 730.1 million) during 2014 fourth quarter.

Percentage distributions for other Principal Import Commodity Groups can be observed on Table 2.1B which is based on Table 2.1A. The graphical presentation of Principal Import Commodity Groups for 2015, is displayed on Chart 2.1.

Chart 2.1: Principal Import Commodity Groups - 2015 (Percentage Distributions)

Note: Other Goods, include All Other Goods not specified in Table 2.1 B

### 2.1.2. Comparison of 2015 Quarters and the Preceding Quarter

This subsection compares Principal Import Commodity Groups for 2015 quarters, each with what was recorded during the preceding quarter and the discussion is based on Table 2.1 A.

The first quarter of 2015 imports of Diamonds were valued at P6, 618.6 million, giving an increase of 28.1 percent (P1, 451.4 million) over P5, 167.2 million recorded for the same commodity group during 2014 fourth quarter. Comparison of values recorded during the first two quarters of 2015, for the same commodity group shows an increase of 19.7 percent (P1, 301.7 million), from ( $\mathrm{P} 6,618.6$ million) recorded during the first quarter to P7, 920.3 million recorded during the second quarter of the same year.

The value of imports of Diamonds during the third quarter of 2015 show a decrease of 24.1 percent (P1, 907.4 million) when compared to P7, 920.3 million recorded during the second quarter of the same year. During the fourth quarter of 2015, imports of Diamonds were at the lowest quarterly value of P4, 679.9 million, giving a decrease of 22.2 percent (P1, 333.0 million) when compared to the value of P6, 012.9 million during the previous quarter.

### 2.2. Composition of Principal Exports

In 2015, Botswana's principal exports consisted mainly of three (3) major commodity groups; these being Diamonds, Copper \& Nickel and Machinery \& Electrical Equipment. Discussions on major export groups are based on Tables 2.2A and 2.2B.

Diamonds discussed here consist of those from the aggregation process as well as those from diamond polishing or manufacturing companies. Machinery \& Electrical Equipment include those that were originally imported for home consumption and are now being re-exported for reasons best known by the exporter.

Total exports were valued at P63, 484.2 million in 2015 . Diamonds contributed 83.1 percent (P52, 730.4 million), followed by Copper \& Nickel with 6.0 percent (P3, 789.8 million) and Machinery \& Electrical Equipment with a contribution of 3.2 percent ( $\mathrm{P} 2,021.5$ million) during the period under review.

### 2.2.1. Quarter on Quarter Comparison of Principal Exports during 2015 and 2014

The quarterly data follows a similar trend to that of the yearly data for 2015, with Diamonds, Copper \& Nickel and Machinery \& Electrical Equipment continuing to be the three major groups.

During the first quarter, Diamonds contributed 84.6 percent (P16, 477.1 million) of P19, 486.3 million as compared to a contribution of 87.6 percent ( $\mathrm{P} 15,041.6$ million) of P17, 179.8 million during 2014 first quarter. The same commodity group contributed 83.9 percent (P16, 618.5 million) to P19, 797.6 million during the second quarter of 2015 as compared to a contribution of 86.8 percent (P18, 266.1 million) to P21, 043.1 million during the same quarter of the previous year.

Comparison for the third quarter of 2015 and the same quarter in 2014 show that Diamonds constituted 81.2 percent (P9, 608.9 million) of P11, 832.9 million during the third quarter of 2015 as compared to 85.5 percent (P16, 966.6 million) of P19, 847.3 million during 2014 quarter three. During the fourth quarter of 2015, Diamonds contributed 81.1 percent (P10, 025.9 million) of P12, 367.3 million as compared to a contribution of 82.8 percent (P15, 053.8 million) to P18, 190.5 million during 2014 quarter four.

Copper \& Nickel constituted 6.9 percent (P1, 343.8 million) of P19, 486.3 million during the first quarter of 2015 as compared to 5.3 percent (P906.0 million) of P17, 179.8 million during the first quarter of the previous year. Comparison of the second quarters show that Copper \& Nickel constituted 6.6 percent (Pl, 308.5 million) of P19, 797.6 million during 2015 second quarter as compared to 5.4 percent (P1, 131.5 million) of P21, 043.1 million during the second quarter of the previous year.

As for comparison of the third quarters, Copper \& Nickel constituted 3.2 percent of P374.8 million of P11, 832.9 million during 2015 third quarter as compared to a contribution of 4.8 percent (P953.2 million) to P19, 847.3 million during 2014 quarter three. During the fourth quarter of 2015 , the same commodity group contributed
6.2 percent ( P 762.7 million) to $\mathrm{P} 12,367.3$ million as compared to a contribution of 7.7 percent ( $\mathrm{P} 1,401.0$ million) to P18, 190.5 million for the same quarter of the previous year.

Percentage distributions of other commodity groups can be observed on Table 2.2B while Chart 2.2 displays percentage distributions for the year 2015 as a whole.

Chart 2.2: Principal Export Commodity Groups - 2015 (Percentage Distributions)

Note: Other Goods, include All Other Goods not specified in Table 2.2 B

### 2.2.2. Comparison of 2015 Quarters and the Preceding Quarter

This subsection compares Principal Export Commodity Groups for 2015 quarters, each with what was recorded during the preceding quarter and the discussion is based on Table 2.2 A.

During the first quarter of 2015, Diamond exports were valued at P16, 477.1 million, giving an increase of 9.5 percent (P1, 423.3 million) over the value of P15, 053.8 recorded during the last quarter of 2014. Comparison of the second and first quarters of 2015 shows that the same commodity group increased slightly by 0.9 percent (P141.5 million) from P16, 477.1 million during the first quarter to P16,618.5 million during the second quarter.

Comparison of the third and second quarters of 2015 shows that Diamond exports dropped by 42.2 percent (P7, 009.5 million) from P16, 618.5 million during the second quarter of 2015 to P9, 608.9 million during the third quarter of the same year. The fourth quarter of the same year showed improvement in the value of Diamond exports as compared to the value recorded during the previous quarter, having registered and increase of 4.3 percent ( P 417.0 million) from $\mathrm{P} 9,608.9$ million to $\mathrm{P} 10,025.9$ million.

With regard to Copper \& Nickel exports, the first quarter of 2015 recorded $\mathrm{P} 1,343.8$ million, which was a decrease of 4.1 percent (P57.3 million) from P1, 401.0 million during the fourth quarter of 2014. The second quarter of 2015 recorded a decrease of 2.6 percent (P35.2 million) from P1, 343.8 million to P1, 308.5 million. Exports of the same commodity group also showed a downward trend during the third quarter of 2015, having recorded a decrease of 71.4 percent (P933.8 million) from $\mathrm{P} 1,308.5$ million during the second quarter to P374.8 million during the third quarter of the same year. However, the fourth quarter showed improvement in exports of Copper \& Nickel, having recorded an increase of slightly more than 100 percent (P387.9 million) from P374.8 million during the third quarter to P762.7 million during the fourth quarter.

## CHAPTER 3: DIRECTION OF TRADE

Direction of trade presents trade by major trading partners for principal commodity groups. Section 3.1 discusses principal imports by source at region and country level while Section 3.2 deals with destination of principal exports at region and country level. At country level, only those countries that had significant trade with Botswana during 2015 are shown separately while those with insignificant trade are grouped together under one category referred to as "Other".

### 3.1. Principal Imports by Source

Principal Import Commodity Groups at Region and Country level in value terms, are presented in Table 3.1A, while Tables 3.1B and 3.1C display percentage distributions based on Table 3.1A.

### 3.1.1. Principal Imports Commodity Groups as a Percentage of Total Imports at Country or Regional Level

This Sub-Section discusses import commodity groups presented as percentages of total imports at region and major trading partner countries. The associated percentage distributions are presented in Table 3.1B which is derived from Table 3.1A. The column totals of Table 3.1B give import groups as a percentage of total yearly imports, the same information that is presented in Chapter Two, Chart 2.1.

During the year 2015, 62.6 percent (P45, 813.1 million) of total imports (P73, 189.8 million) into Botswana were from South Africa. Fuel contributed the highest at 16.9 percent (P7, 724.9 million), followed by Diamonds with 14.4 percent (P6, 611.7 million). Machinery \& Electrical Equipment and Food, Beverages \& Tobacco contributed 14.2 percent each at values of P6, 506.6 million and $\mathrm{Pb}, 494.1$ million respectively (see Tables 3.1A and $B$ ).

The European Union (EU) supplied imports valued at 5.7 percent (P4, 191.8 million) of total imports during the year. The imported goods consisted mainly of Diamonds, 46.4 percent (P1, 946.5 million) followed by Machinery \& Electrical Equipment with 27.2 percent (P1, 140.6 million) of total imports from that region during the same year (Refer to Table 3.1B).

The other region that was a significant source of imports during 2015 was Asia, having supplied imports valued at 5.7 percent (P4, 164.2 million), consisting mainly of Machinery \& Electrical Equipment, 25.5 percent (P1, 061.6 million), Diamonds, 22.3 percent (P927.9 million), Vehicles \& Transport Equipment contributing 15.1 percent (P628.8 million) and Chemical \& Rubber Products with 14.8 percent (P617.1 million).

Canada supplied imports valued at P5, 151.2 million, representing 7.0 percent of the total imports (P73, 189.8 million) during 2015. The group that made the most contribution to imports from Canada during the year under review was Diamonds with 98.6 percent (P5, 078.7 million).

### 3.1.2. Principal Imports Commodity Groups by Region and Partner as a Percentage of Total Import Group

Table 3.1C presents percentage distributions for principal import groups by country and region as a percentage of total import groups during 2015. This table is also derived from Table 3.1A.

Southern Africa Customs Union (SACU), was the major source of imports into Botswana accounting for 78.2 percent (P57, 248.6 million) of P73, 189.8 million. Within the Union, South Africa was the main source having supplied 62.6 percent (P45, 813.1 million), followed by Namibia with 15.5 percent (P11,361.1 million) of total imports during the year.

During 2015, Imports from the European Union (EU) as a whole were valued at P4, 191.8 million, representing 5.7 percent of total imports. Belgium contributed the highest with 2.9 percent ( $\mathrm{P} 2,128.6$ million) during the year under review. Germany supplied 1.2 percent (P902.4 million) of total imports during the year.

Asia as a block contributed 5.7 percent (P4, 164.2 million) of total imports during 2015. China and Israel respectively contributed 1.5 percent ( $\mathrm{P} 1,063.1$ million) and 1.0 percent ( P 695.3 million) of total imports during the same year.

Imports from Canada were valued at P5, 151.2 million, representing 7.0 percent of the total imports value of P73, 189.8 during 2015.

Graphical representation of percentage distributions of imports by major trading partners during 2015 is given on Chart 3.1.

Diamonds were mostly imported from Namibia at 41.1 percent ( $\mathrm{P} 10,373.8$ million), followed by South Africa with 26.2 percent (P6, 611.7 million), Canada with 20.1 percent (P5, 078.7 million) and Belgium with 7.4 percent (P1, 863. 3 million) of total imports of diamonds during that year. These diamonds were mainly for aggregation process (Table 3.1 C).

Imports of Machinery \& Electrical Equipment were valued at P9, 208.3 million. With 70.7 percent (P6, 506.6 million) of this coming from South Africa, 5.5 percent (P506.5 million) from Germany and 3.4 percent (P315.5 million) from China.

Fuel was mostly imported from South Africa at 84.7 percent (P7, 724.9 million), while Namibia and Mozambique supplied 9.3 percent (P848.4 million) and 4.9 percent (P447.7million) of the same product respectively.

South Africa supplied most of Food Beverages \& Tobacco (P6, 494.1 million), representing 92.5 percent of P7, 022.5 million while Zimbabwe supplied 2.7 percent ( P 189.2 million).

Total Imports for Chemicals \& Rubber Products were valued at P6, 386.1 during 2015, with 82.4 percent (P5, 262.2 million) imported from South Africa. India supplied 6.5 percent (P415.8 million).

Most of Vehicles \& Transport Equipment, 74.1 percent (P3, 944.8 million) were imported from South Africa during 2015, while 7.8 percent ( P 413.8 million) came from Japan. Germany and the USA respectively supplied 4.4 percent ( P 235.0 million) and 3.7 percent ( P 195.6 million) of the same commodity group.

Chart 3.1: Total Imports by Region and Partner - 2015 (Percentage Distributions)

Note: Others includes all other trading partners not specified as in Table 3.1 A

### 3.2. Principal Exports by Destination

Discussions on major exports by destination for 2015 are based on Tables 3.2 A, B and C, with Table 3.2 A presenting values while percentage distributions appear on Table 3.2 B and Table 3.2 C.

Asia as a block received most of Botswana's exports during 2015, representing 31.2 percent (P19, 807.6 million) of the total exports (P63, 484.2 million) for the year under review. India received 12.4 percent (P7, 892.9 million) of total exports while Israel got 6.0 percent (P3, 819.8 million) and United Arab Emirates (UAE) received 5.3 percent (P3, 394.6 million). Singapore received 3.3 percent (P2, 109.0 million).

SACU as a regional block received 27.3 percent (P17, 331.0 million) of total exports during 2015. Exports destined to South Africa were the highest in the block with value of P9, 833.8 million, accounting for 15.5 percent of total exports followed by Namibia with a value of P7, 484.7 million, representing 11.8 percent of total exports during the year under review.

Exports destined to the European Union (EU) were valued at P14, 202.2 million, representing 22.4 percent of total exports during the year under review. Exports to Belgium constituted 19.8 percent ( $\mathrm{P} 12,579.0$ million) of total exports during the same period.

Canada, Switzerland, Norway and the USA were also significant destinations for Botswana exports during 2015. Canada received 6.3 percent (P3, 987.7 million), Switzerland and Norway received 4.3 percent (P2, 743.6 million) and 4.1 percent ( $\mathrm{P} 2,596.6$ million) respectively, of total exports during the period under review. The USA received 2.5 percent (P1, 605.8 million) of total exports during 2015.

### 3.2.1. Principal Exports Commodity Groups as a Percentage of Total Exports at Country or Region level

During 2015, total exports to Belgium were valued at P12, 579.0 million, representing 19.8 percent of total exports during the year. Diamonds were the major contributor to the total exports to that country, accounting for almost 100 percent (P12, 577.0 million) of exports destined for the country during the year.

South Africa followed with total exports valued at P9, 833.8 million, representing 15.5 percent of total exports during the year, with Diamonds contributing 57.3 percent (P5, 630.4 million) of total exports to the country.

Machinery \& Electrical Equipment constituted 16.4 percent (P1, 614.8 million), Salt \& Soda Ash 3.9 percent (P379.8 million) and Meat \& Meat Products made a contribution of 3.8 percent (P376.4 million) of total exports during the same year (Table 3.2A and Table 3.2B).

Total Exports to India were valued at P7, 892.9 million, representing 12.4 percent of total exports during the year, with 96.3 percent (P7, 598.0 million) of total exports to the country attributable to Diamonds.

Namibia received exports valued at P7, 484.7 million representing 11.8 percent of total exports during the year, with 95.1 percent (P7, 115.3 million) of exports to the country being diamonds.

Exports to Canada and Israel were valued at P3, 987.7 million and P3, 819.8 million in that order, representing 6.3 percent and 6.0 percent respectively of total exports during the year. Exports to these two countries were almost all diamonds.

Diamonds constituted 99.8 percent (P3, 388.1 million) of P3, 394.6 million worth of exports to the United Arab Emirates. Of all the exports destined to Switzerland (P2, 743.6 million), 86.4 percent was attributed to Diamonds while 13.3 percent (P365.3 million) was attributed to Copper \& Nickel. Almost all exports destined for Norway was Copper \& Nickel with a value of P2,596.2 million out of P2, 596.6 million.

### 3.2.2. Principal Exports Commodity Groups by Region and Partner as a Percentage of Total Export Group

Table 3.2C gives major export groups at country or region level as a percentage of the total for a particular major export group. Discussions that follow are based on this table together with Table 3.2A.

Diamonds was the major commodity group exported during 2015, constituting 83.1 percent (P52, 730.4 million) of P63, 484.2 million worth of total exports. Belgium was the main destination of Diamonds during the year, having received 23.9 percent ( $\mathrm{P} 12,577.0$ million), followed by India with 14.4 percent ( $P 7,598.0$ million), Namibia with 13.5 percent (P7, 115.3 million) while South Africa received 10.7 percent (P5, 630.4 million). Canada, Israel and UAE received 7.6 percent ( $\mathrm{P} 3,986.0$ million), 7.2 percent ( $\mathrm{P} 3,815.8$ million) and 6.4 percent (P3, 388.1 million) respectively.

During 2015, most of Copper \& Nickel exports were destined to Norway with 68.5 percent ( $\mathrm{P} 2,596.2$ million) of $\mathrm{P} 3,789.8$ million. Finland followed with 16.1 percent ( P 608.3 million), Switzerland with 9.6 percent (P365.3 million) while South Africa received 5.6 percent (P212.1 million) of the same product. Machinery \& Electrical Equipment (mainly re-exports) were mostly exported to the SADC region during 2015 with South Africa having received 79.9 percent (P1, 614.8 million), followed by Zambia with 5.2 percent (P105.7 million), Namibia with 4.1 percent (P82.8 million) and Zimbabwe with 2.9 percent (P57.8 million).

Meat \& Meat Products were exported to EU and SACU market. In the EU market, the UK received 37.4 percent (P438.2 million), Netherlands received 12.7 percent ( P 148.6 million), while Italy got 10.1 percent ( P 118.0 million) of total exports of that commodity group. In SACU, South Africa accounted for 32.1 percent (P376.4 million) of Meat \& Meat products.

Chart 3.2: Total Exports by Region and Partner - 2015 (Percentage Distributions)

Note: Others includes all other trading partners not specified as in Table 3.2 A

## CHAPTER 4: TRADE AT CHAPTER LEVEL

Trade at Chapter level presents international merchandise trade at the 2-digit level of the Harmonized Commodity Description and Coding System (HS Codes). This trade appears on this section for both imports and exports during 2015. Table 4 presents trade values together with the associated percentage distributions for the 99 chapters of the HS Codes, excluding Chapter 77 which is reserved for future customs use and Chapter 98 which was in the past utilized by Botswana for importation of vehicle parts for vehicle assembly during the time when there were vehicle assembly plants in the country.

### 4.1. Total Imports by Chapter

Botswana imports all commodities found in all the chapters of the HS Codes. The discussion will be centered on chapters that contributed not less than 2.0 percent of total imports during 2015, and statistics associated with other chapters, can be viewed in Table 4.

Chapter 71, consisting of "Natural or Cultured Pearls, Precious or Semi-Precious Stones and Precious Metals" registered the value of P25, 262.3 million, representing 34.5 percent of total imports value of P73, 189.8 million during the year. This was followed by Chapter 27 which consists of "Mineral Fuels \& Associated Products" with 12.5 percent (P9, 116.7 million). Chapter 84 which consists of "Boilers, Machinery, Mechanical Appliances \& parts thereof" followed with 7.5 percent (P5, 463.3 million), while Chapter 87, "Vehicles \& Parts" contributed 6.3 percent (P4, 630.5 million) to total imports.

Some of the chapters that contributed imports representing 2.0 percent or more of total imports during 2015 were Chapter 85 "Machinery \& Electrical Equipment, Sound Recorders \& Reproducers, Television image \& Parts" and Chapter 73 "Articles of Iron or Steel" which contributed 5.1 percent (P3, 746.4 million) and 2.0 percent (P1, 448.7 million) respectively, to total imports.

### 4.2. Total Exports by Chapter

A few chapters contributed significantly to the total exports, with contributions in excess of one percent, while most chapters contributed less than 1.0 percent of the yearly total. Discussions on total exports at chapter level are confined to chapters that contributed not less than 1.0 percent of the yearly total during 2015 while others can be viewed on Table 4.

During 2015, total exports consisted mainly of minerals, especially rough diamonds. Chapter 71 which comprises "Natural or Cultured Pearls, Precious or Semi-Precious Stones and Precious Metals" contributed 83.5 percent (P53, 300.7 million) of total exports value of P63, 484.2 million. Chapter 75 , consisting of "Nickel \& Articles thereof" contributed 5.1 percent (P3, 217.5 million) of total exports during the same year. This was followed by chapter 85, "Electrical machinery \& equipment and parts" accounting for 2.1 percent (P1, 327.8 million).

Other chapters that contributed exports representing more than 1.0 percent of total exports during 2015 were Chapter 2; "Meat and edible meat offal" representing 1.8 percent (P1, 173.0 million) and Chapter 84; "Boilers, Machinery \& Mechanical Appliances and Parts thereof" accounting for 1.1 percent (P693.7 million) of total exports during the year under review.

Other Chapters together with associated percentage distributions can be viewed on Table 4.

## CHAPTER 5: MOST TRADED COMMODITIES

This section presents the most traded commodities during 2015, for both imports and total exports. As imports into Botswana are of a wide variety, the top 100 imported commodities during 2015 are presented in this report, while with regard to exports, only the top 50 are given since the top 50 exported commodities contribute over 90 percent of total exports. The top 100 imported commodities together with associated percentage distributions are presented in Table 5.1 while Table 5.2 presents the top 50 exported commodities.

### 5.1. The Most Imported Commodities

During 2015, the top most imported commodity was "Non-industrial diamonds unworked or simply sawn, cleaved or bruted", with a contribution of 26.8 percent (P19, 600.0 million) to total imports, followed by "Distilled Fuel" with 5.7 percent (P4, 180.0 million). Most of the Diamonds imports are for aggregation process.

Unsorted diamonds and Petrol contributed 4.9 percent ( $\mathrm{P} 3,600.0$ million) and 4.4 percent ( $\mathrm{P} 3,230.0$ million) respectively. Other individual commodities which are among the top 100 imports can be observed in Table 5.1.

### 5.2. The Most Traded Exports

In 2015, "Non-industrial diamonds unworked or simply sawn, cleaved or bruted" contributed 75.3 percent (P47, 804.6 million) to total exports during the year. "Non-industrial diamonds, not mounted or set" followed with 7.0 percent (P4, 444.0 million). Other commodities which contributed more than 1.0 percent to total exports are "Nickel Mattes" with 5.1 percent (P3, 217.5 million) and "Ignition wiring sets and other wiring sets for vehicles, aircraft" with 1.6 percent (P1, 047.3 million). Other commodities can be viewed on Table 5.2.

## CHAPTER 6. TRADE BY MODE OF TRANSPORT

The main modes of transport for Botswana international merchandise trade are Road, Air and Rail. The mode of transport here refers to the means of transporting goods in and out of Botswana.

### 6.1. Imports and Exports by Mode of Transport

During 2015, the majority of Botswana international merchandise trade were transported using Road and Air.
Imports into Botswana were transported mainly by Road and Air. Road transport accounted for 49.8 percent (P36, 444.7 million) of total imports when considering the value of imported goods. Air transport followed with 33.1 percent ( $\mathrm{P} 24,254.6$ million). Rail accounted for 17.1 percent ( $\mathrm{P} 12,490.2$ million) of total imports during the year.

Botswana Exports mainly use Air as means of transport. This is because exports value is heavily dependent on high valued diamonds, which are transported by Air. During 2015, Air Transport accounted for 84.7 percent (P53, 767.7 million) of total exports from Botswana. Road transport followed with 14.5 percent (P9, 181.4 million) while goods transported by Rail represented 0.8 percent (P532.5 million) of total exports during the year under review.

## CHAPTER 7: TRADE BY OTHER COMMODITY CLASSIFICATIONS

This chapter gives trade by two other commodity classifications, which are based on the Harmonized Commodity Description \& Coding System (HS Codes). The commodity classifications discussed here are the Standard International Trade Classification (SITC Revision 3) and the Broad Economic Categories (BEC Revision 3).

### 7.1. Standard International Trade Classification (SITC)

The Standard International Trade Classification is a statistical classification of commodities entering external trade and is designed to provide the commodity aggregates required for purposes of economic analysis, to facilitate the international compilation of trade by commodity data. The SITC has 3,118 basic headings and sub headings which are assembled in 261 groups, 67 divisions and 10 sections.

This report uses SITC Revision 3, which is based on Harmonized Commodity Description \& Coding System of 2012 (HS 12). Figures presented here are for the Sections and Divisions only. Table 7.1A gives imports while Table 7.1B presents exports.

### 7.1.1. Imports by Standard International Trade Classification (SITC) - 2015

A total of P73, 189.8 million worth of imports was recorded in 2015. During 2015, Manufactured Goods classified chiefly by material (Section 6) contributed 41.6 percent (P30, 447.1 million). Divisions that contributed the most to this Section were Division 66, Non-metallic Mineral Manufactures with 34.4 percent (P25, 146.7 million) of total imports; followed by Division 69, Manufactures of Metals Not Elsewhere Specified (NES) with 2.1 percent (P1, 559.3 million); Division 67, Iron \& Steel with 1.5 percent (P1, 091.4 million) and Division 62, Rubber Manufactures NES, with 1.3 percent at the value of $P 979.1$ million.

The other section that contributed significantly to total imports is Section 7, which comprises Machinery \& Transport Equipment, with 19.9 percent (P14, 557.5 million). Division 78, Road vehicles (including air-cushion vehicles) contributed 6.1 percent (P4, 491.9 million) to total imports; followed by Division 72, "Machinery specialized for particular industries" with 3.2 percent (P2, 372.3 million); Division 77, "Electrical machinery, apparatus \& appliances and electrical parts thereof" with 3.0 percent (P2, 210.1 million); Division 74, "General industrial machinery and equipment, NES, and machine parts, NES" and Division 76, "Telecommunications and sound-recording and reproducing apparatus and equipment" with 2.6 percent (P1,915.8 million) and 1.8 percent (P1, 304.6 million) respectively.

Section 3 which comprises Mineral Fuels, Lubricants \& Related Materials contributed 12.4 percent (P9, 057.9 million) to total imports. The Divisions that contributed mostly in this Section were Division 33, "Petroleum, Petroleum Products \& Related Materials" with 10.8 percent (P7, 887.2 million) and Division 35 , "Electric Current" with 1.4 percent (P1, 042.2 million).

Chart 7.1 A: Imports by Standard International Trade Classification (SITC) - 2015

Note: NES= Not Elsewhere Specified
Goods NES =All other commodities not specified as in Table 7.1A

### 7.1.2. Exports by Standard International Trade Classification (SITC) - 2015

TheSection that contributed the most to total exports during 2015 was Section 6, which consists of "Manufactured Goods classified chiefly by material". This Section accounted for 83.6 percent (P53, 076.9 million) of total exports (P63, 484.2 million) during the year. The Division that contributed the most in this Section was Division 66 which comprises "Non-metallic mineral manufactures not elsewhere specified". This Division contributed 82.7 percent (P52, 502.2 million) to total exports during the year. This is the Division that contains diamonds.

The Section consisting of "Crude Materials inedible, excluding Fuels", Section 2, followed with a contribution of 7.2 percent ( $\mathrm{P} 4,578.3$ million) to total exports during 2015. The Division that contributed the most in this section was Division 28, which comprises "Metalliferous Ores and Scrap Metal", with 6.1 percent (P3, 856.1 million) of total exports during the year. This is the Division that contains Copper/Nickel, which is one of the major exports of Botswana.
"Machinery \& Transport Equipment" (Section 7) contributed 4.3 percent (P2, 699.3 million) to total exports during 2015 with Division 77, "Electrical Machinery, Apparatus \& Appliances NES" contributing 2.0 percent ((P1, 244.7 million) of total exports during the year. Section 0 consisting of "Food \& Live Animals" registered 2.1 percent (P1, 307.3 million) with Division 01, "Meat \& Meat Preparations" accounted for 1.9 percent (P1, 174.8 million).

The other section which contributed more than 1.0 percent is "Chemicals \& Related Products, NES" (Section 5 ) with 1.3 percent ( P 812.9 million). Other sections can be viewed on Table 7.1B

Chart 7.1B: Exports by Standard International Trade Classification (SITC) - 2015

Note: NES = Not Elsewhere specified
Goods NES*=All other commodities not specified as in Table 7.1B

### 7.2. $\quad$ Broad Economic Categories (BEC)

The Broad Economic Categories classification was designed to serve as a means for converting trade data compiled in terms of SITC into end use categories that were meaningful within the framework of System of National Accounts (SNA). These categories are approximating the three basic classes of goods in SNA; namely capital goods, intermediate goods and consumption goods.

Broad Economic Categories has 19 basic categories that can be aggregated to approximate the three basic classes of goods, thus permitting trade statistics to be considered jointly with other sets of general economic statistics such as national accounts and industrial statistics; for national, regional and global economic analysis. The discussion here is only based on sections and divisions of the Broad Economic Categories.

### 7.2.1. Imports by Broad Economic Categories (BEC)

In 2015, imports by Broad Economic Categories, consisted mainly of "Industrial Supplies NES" (Section 2). This Section contributed 50.2 percent (P36, 743.1 million) of total imports (P73, 189.8 million) during the year (Table 7.2). Most contribution in this Section came from Division 21; "Industrial supplies, NES, primary form", with 36.1 percent (P26, 404.2 million) of total imports during the year.

Section 3, "Fuel \& Lubricants", constituted 12.4 percent (P9, 047.0 million) of total imports during the year. This contribution was almost all attributable to Division 32 "Fuel \& Lubricants, Processed" with a contribution of 11.5 percent at the value of $\mathrm{P} 8,434.9$ million.
"Capital Goods (Excluding Transport Equipment) Parts \& Accessories", Section 4, constituted 12.4 percent (P9, 081.7 million) of total imports during 2015, with 8.1 percent (P5, 893.0 million) attributable to Division 41; "Capital Goods (Excluding Transport Equipment)".

Section 5, "Transport Equipment, Parts \& Accessories" constituted 8.8 percent (P6, 438.0 million) of total imports during 2015, with Divisions 52 and 53; "Other Transport Equipment" and "Parts \& accessories of transport equipment " contributing 3.2 percent each, to total imports during the year, at values of P2, 325.4 million and P2, 314.8 million respectively.

Section 6, "Consumer Goods NES" constituted 8.0 percent (P5, 883.3 million) of total imports during 2015, with Division 63 and 62; "Non-Durable Consumer Goods NES" and "Semi-durable Consumer Goods NES" making contributions of 4.0 percent (P2, 939.9 million) and 3.1 percent (P2, 241.3 million) respectively.
"Food \& Beverages", Section 1 constituted 8.0 percent (P5, 863.4 million) of total imports during 2015, with 5.6 percent (P4, 111.2 million) attributable to Division 12; "Food and Beverages, Processed". Division 11; "Food and Beverages in Primary Form" contributed 2.4 percent (P1, 752.2 million) of total imports during the same period.

Contributions made by other Sections and Divisions of the Broad Economic Categories can be observed in Table 7.2 and Chart 7.2 A.

Chart 7.2A: Imports by Broad Economic Categories (2015)

Note: NES= Not Elsewhere Specified

### 7.2.2. Exports by Broad Economic Categories (BEC)

It is also of interest to look at the commodities that are exported by Broad Economic Categories. This presentation will give a country an idea with regard to which goods are exported unprocessed or in primary form. The country can as a result make plans to set up processing industries to create employment and at the same time end up exporting finished goods which will bring in more revenue. This data is also presented in Table 7.2 together with the imports data.

This table shows that during 2015, over 90 percent of total exports were "Industrial Supplies NES"; Section 2. The Section contributed 92.4 percent (P58, 616.4 million) to total exports (P63, 484.2 million), with 77.7 percent (P49, 305.1 million) attributable to Division 21, "Industrial Supplies in primary form", and 14.7 percent (P9, 311.4 million) contributed by Division 22, "Industrial Supplies, Processed".

Section 5, "Transport Equipment, Parts \& Accessories thereof", contributed 2.9 percent (P1, 871.8 million). Section 1, Food \& Beverages made a contribution of 2.2 percent ( $\mathrm{P} 1,363.3$ million) during the year, with 2.1 percent (P1, 309.5 million) attributable to Division 12, "Food and Beverages processed". Section 6; "Consumer Goods NES" contributed 0.8 percent (P482.4 million) to total exports during the year, with 0.5 percent (P322.5 million) attributable to Division 62, "Semi-durable consumer goods".

Contributions made by other Sections and Divisions of the Broad Economic Categories can be observed in Table 7.2 and Chart 7.2B.

## 8. TECHNICAL NOTES

IMTS are compiled by the International Merchandise Trade Statistics Section of Statistics Botswana. International Merchandise Trade refers to external trade in goods only. International Service Trade Statistics (ISTS) are however not compiled by this section. The primary source of international merchandise trade data is the Customs \& Excise Division at the Botswana Unified Revenue Service (BURS). The Customs \& Excise Division is responsible for data capture for both computerized and manual borders, and the monthly raw data files are transferred to Statistics Botswana for data processing.

Until the April 2009 Monthly Digest, Botswana was practicing Relaxed Special Trade Type. The Relaxed Special Trade Type takes into account goods that are exported or imported for inward or outward customs processing while the Strict Special Trade Type does not include the same. Strict Special Trade Type comprises imports for home consumption, permanent exports, re-exports and goods cleared out of warehouse (ex-warehouse) only.

In June 2009, the Botswana External Trade Database was revised to cater for General Trade Type as per the United Nations Statistics Division (UNSD) recommendations. The General Trade Type gives complete coverage of external trade as compared to the Special Trade Type. As a result of this, trade reported in the monthly digests for May 2009 onwards is based on the General Trade Type.

Imports are valued CIF (cost, insurance \& freight) while exports are valued FOB (free on board). The value of imports includes transport and insurance costs to the importing country. The Exports value consists only of the value of goods as they leave the exporting country.

### 8.1. Time of Recording of Trade

IMTS is compiled using date of recording of trade as opposed to date of assessment of goods by customs. This means that as goods cross the border, trade is recorded and this is the reference month for compilation of IMTS. Some of these goods may however be held by customs for some time pending final assessment for tax or duty purposes.

If the final assessment is done later, for example two or three months, or even more, after the goods had crossed the border, the affected trade will then update trade for the particular month when the goods crossed the border, therefore it does not form part of trade for the month during which the final assessment was done. This is mostly common with imports. Revision of data for the month preceding the one under review will normally show high values as compared to revisions for other months due to more goods (from the previous month) being released after final assessment.

### 8.2. Concepts and Definitions

Domestic Exports: These are goods originating from the compiling country, being permanently exported out of the country for consumption in the outside world. This includes products from customs inwards processing; for example, if a country imports wheat, processes the wheat into bread flour and exports the bread flour and bye products from the milling process, these will all leave the country as domestic exports. Re - Exports: These are exports of foreign goods that were initially recorded as imports into the compiling country. These goods are exported in the same state that they came in except for wear and tear. An example will be re-exportation of a motor vehicle that was initially imported into the compiling country and after being used it is now being exported to a foreign country. Total exports: This is the sum of domestic exports and re-exports. Imports: These are goods imported from the outside world, into the compiling country, for local consumption. This includes re-importation of locally produced goods that were initially exported and are now being imported back into the country.

Trade Balance (Net Export): This refers to the total value of goods exported minus the total value of goods imported by a given economy in a given period of time. A positive trade balance (trade surplus) indicates
that a country is exporting more in value terms than it is importing. A negative trade balance (trade deficit) indicates that the country is importing more than it is exporting.

### 8.3. $\quad$ Treatment of Diamonds from Aggregation Process

In July 2012, the Diamond Trading Company International which was undertaking aggregation of diamonds relocated from the United Kingdom to Botswana. This meant that the process of aggregation of diamonds was now to be done in Botswana. Following the relocation, initially it was not clear how this trade was to be recorded as there was no prior common understanding of the processes involved between all the relevant parties. After thorough discussions with key stakeholders, Statistics Botswana decided to record this trade as imports for processing and that export of the same after aggregation be recorded as direct permanent exports. This was based on IMTS 2010 Compilers' Manual (Page 225) and IMTS 2010 Concepts \& Definitions; Page 16; Paragraph 1.20 concept that mixing of goods of different qualities to produce goods of a new quality is part of processing in compilation of IMTS.

### 8.3.1. Sorting out Diamonds imports

These imports will mainly be from Canada, Namibia and South Africa. Some of these may include diamonds that were originally bought from Botswana and are being sold back to Botswana. The original declaration will not indicate whether the consignment is a mixture of diamonds from various countries. However, a follow-up document, referred to as "attached document" will show a disaggregation of these imports according to the various countries that contributed to the consignment.
I. In case the consignment was from one country, this will be recorded as imports into Botswana from that particular country,
II. In case the consignment was from various countries, the recording of these imports will be according to the various countries that contributed to the consignment,
III. If part of the consignment was originally from Botswana, that part is recorded as re-import and will form part of total imports.

### 8.3.2. Sorting out Diamonds exports

These exports will be from the aggregation process and will consist of exports of Botswana origin and exports of diamonds that were originally imported. The original declaration will give an aggregated export which will be a consignment bought by an individual trader. This consignment will consist of diamonds of the same colour, shape and size but originating from various countries. The "attached document", giving a disaggregation of the consignment in value and carats by countries that contributed, will be used to record trade accordingly. As per IMTS 2010 Concepts \& Definitions, goods resulting from processing are to be included in merchandise trade at their full value and as direct permanent exports (Domestic exports) in case they are exported (IMTS Concepts \& Definitions; page 16, paragraph 1.20). As a result of this, diamonds that originated from outside Botswana as well as those originating from Botswana are recorded as direct permanent exports or domestic exports.

Both diamonds originating from Botswana and those that originated from elsewhere have always been recorded under Domestic Exports. Values for diamonds that originated from elsewhere can be provided separately if needed.

### 8.4. Exclusions from IMTS

### 8.4.1. Goods in Transit

This is trade that is simply passing through the compiling country solely for the purpose of being transported to another country.

International Merchandise Trade Statistics Annual Report - 2015

### 8.4.2. Goods temporarily admitted or dispatched

These are goods that at the time of admission/dispatch, are intended to stay in the receiving country temporarily and that after their stay they will be returned in the same state. These goods include display equipment for trade fairs and exhibitions, commercial samples, means of transport, containers, equipment for working etc.

### 8.4.3. Monetary Gold

This is gold to which the monetary authorities have title and is held as reserve assets.

### 8.4.4. Issued banknotes and securities and coins in circulation

These goods represent evidence of financial claims and are excluded from IMTS
The above list of exclusions from IMTS is however not exhaustive and only a few that are common, simple, straightforward and easy to understand have been picked as examples.

## 9. APPENDICES

## Appendix 1: Principal Imports

Chemicals \& Rubber Products: Chapters 28-40
Food, Beverages \& Tobacco: Chapters 01-24
Fuel: Chapters 27
Furniture: Chapter 94
Machinery \& Electric Equipment: Chapters 84 \& 85
Metals \& Metal Products: Chapters 72-83
Salt Ores \& Related Products: Chapters 25 \& 26
Textile \& Footwear: Chapters 50-67
Vehicle \& Transport Equipment: Chapters 86-89
Wood \& Paper Products: Chapters 44-49
Other Goods: This is the residual of Total Imports and Principal Imports

## Appendix 2: Principal Exports

Copper \& Nickel:
26030000: Copper ores and concentrates
26040000: Nickel ores and concentrates
7501 1000: Nickel mattes
74011000: Copper mates
Diamonds:
71021000: Unsorted diamonds
71022100 : Industrial diamonds unworked or simply sawn, cleaved or bruited
71022900: Industrial diamonds, not mounted or set; NES
71023100: Non-industrial diamonds unworked or simply sawn, cleaved or brute 71023900: Non-industrial diamonds, not mounted or set, NES
Gold:
71081100: Non-monetary gold; powder
71081200: Non-monetary gold; other unwrought form
71081300: Non-monetary gold; other semi manufactured forms
Hides \& Skins: Chapter 41
Iron Steel \& Related Products: Chapters 72 \& 73
Machinery \& Electrical Equipment: Chapters 84 \& 85
Meat \& Meat Products: Chapter 02
Plastic \& Plastic Products: Chapters 39
Salt \& Soda Ash: Commodities 25010000 and 2836200
Textiles: Chapters 50-63
Vehicles \& Parts: Chapters 87
Other Goods: This is the residual of Total Exports and Principal Exports
