

INTERNATIONAL MERCHANDISE TRADE STATISTICS

Preface

This International Merchandise Trade Statistics (IMTS) Monthly Digest presents statistics on Botswana's total imports and exports of goods during August 2018 and follows the May 2018 digest released in July 2018. As a result of unavailability of timely raw data for June and July 2018, the digests for those months could not be released separately and the current digest includes new data for June, July and August 2018. Even though the current digest involves new data for three months, discussion will be based on the current month only and data for the other months will be viewed in the various tables carried in the report.

During August 2018, total imports were valued at P4, 974.4 million while total exports were valued at P2, 562.8 million, resulting in a trade deficit of P2, 411.6 million. Total imports value for August rose by 11.8 percent compared to the July 2018 value of P4, 448.0 million. Diamonds contributed the most to total imports at 20.0 percent, followed by Machinery & Electrical Equipment; Fuel and Food, Beverages & Tobacco at 15.0 percent, 14.6 percent and 13.6 percent respectively. Diamonds constituted 76.8 percent of total exports during the period under review.

Southern African Customs Union **(SACU)** was the main source of imports into Botswana during August 2018. Within SACU region, South Africa was the biggest source of imports into Botswana, contributing 63.8 percent of total imports during the month. Fuel and Food, Beverages & Tobacco dominated imports from South Africa by contributing 21.3 percent and 20.5 percent respectively. Machinery & Electrical Equipment and Chemicals & Rubber Products also contributed significantly to imports from South Africa, at 16.0 percent and 11.7 percent respectively.

The three top regional destinations for Botswana exports during the current period were Asia, the European Union **(EU)** and **SACU** with 55.7 percent, 19.5 percent and 14.1 percent respectively. Exports destined for Asia were mainly constituted by Diamonds. India alone received 30.7 percent of total exports. During August 2018, total exports fell by 46.6 percent compared to the July 2018 revised value of P4, 794.8 million.

The current digest presents revised data for March 2018 to May 2018 as presented in **Table A**. Total trade for January 2015 to August 2018 appears in **Table 1**. Trade by Principal Commodity groups is presented in **Table 2.1** for imports and **Table 2.2** for total exports. **Table 2.3** gives trade on diamonds only. Direction of trade appears in **Table 3.1A** (imports) and **Table 3.2A** (total exports), presenting Principal Commodity groups by partner country and region for August 2018. **Tables 3.1B** and **3.2B** give direction of trade for Principal Commodity groups by individual countries and regions as a percentage of total trade for imports and total exports respectively during the month under review. **Table B** displays trade by mode of transport for both imports and exports.

For more information contact the Directorate of Stakeholder Relations at 3671300. All Statistics Botswana publications are available on the website at www.statsbots.org.bw, and at the Statistics Botswana Information Resource Centre (Head-Office, Gaborone).

I sincerely thank all stakeholders involved in the formulation of this monthly digest, for their continued support and feedback, as we strive to better serve users of Statistics Botswana products and services.

Dr. Burton S. Mguni Statistician General November 2018

1.0 TOTAL TRADE

Total Merchandise trade as presented in this section refers to imports, domestic exports, re-exports and trade balance. Discussions for Total Trade are based on data for the current month, August 2018.

1.1 Data Revision

Table A presents revised data from March 2018 to May 2018, comparing figures as at May 2018 digest and the current situation.

The current data revision is mainly associated with transactions related to late tax assessment. Though transactions can be lodged with customs, related duties paid accordingly, further assessment is undertaken to ensure that the duties paid are correct for the imported commodities. These assessments will include any other validation or examination of goods found necessary by customs.

After all the necessary assessments have been completed, the goods are cleared and records of associated transactions released to Statistics Botswana for compilation of **IMTS**. As compilation of IMTS is based on the date that goods crossed the border and not the date of final assessment, data for records with late assessment will then update trade for the month during which transactions were initially lodged with customs. Date of lodgement of transactions is used as a proxy for the date of crossing the border as per guidelines in **IMTS 2010 Concepts and Definitions**.

It has been observed that transactions for March 2018 to May 2018 had late assessments which were finalised after compilation of May 2018 digest, hence the need to show data revision for the affected months.

Table A: Data Revision October 2017 to May 2018 (Million Pula)

	As at	May 2018	Digest	As at A	ugust 2018	Digest		Difference	•	Diffe	rences as	%

^() Denotes negative numbers

Discussions on Sub-Sections 1.2 to 1.4 are based on Table 1.

1.2 Imports

Discussions on imports are based on Cost, Insurance and Freight (CIF) value and associated figures are presented in Table 1 and Table 2.1. During August 2018, total imports were valued at P4, 974.4 million showing an increase of 11.8 percent (P526.4 million) from the July 2018 value of P4, 448.0 million. This increase was mainly attributed to the rise in imports of Machinery & Electrical Equipment, which recorded an increase of 22.7 percent (P137.7 million) from P607.3 million recorded during July 2018 to P745.0 million in August 2018.

Imports value for August 2018, compared to the same month in 2017 shows an increase of 12.6 percent (P557.3 million), from P4, 417.1 million recorded during August 2017 to P4, 974.4 million recorded during August 2018. This was mainly attributed to the increase of 94.0 percent (P483.1 million) in Diamonds, from P514.1 million during August 2017 to P997.2 million in August 2018. Vehicles & Transport Equipment also contributed significantly to the increase in total imports, after recording an increase of P213.5 million, 80.0 percent from P267.0 million during August 2017 to P480.6 million in the current period.

1.3 Total Exports

During August 2018, total exports were valued at P2, 562.8 million, showing a drop of 46.6 percent (P2, 232.0 million) from July 2018 revised value of P4, 794.8 million. The decrease was mainly due to Diamonds, having recorded a fall of 54.5 percent (P2, 358.7 million) from P4, 325.9 million in July 2018 to P1, 967.2 million during the current period (Table 2.2).

Comparison of total exports value for August 2018 and August 2017 shows a decrease of 30.8 percent (P1, 140.0 million) from P3, 702.7 million to P2, 562.8 million. The decline was mainly due to the decrease in Diamonds exports, having recorded a fall of 39.4 percent (P1, 279.0 million) from P3, 246.3 million in August 2017 to P1, 967.2 million in August 2018 (Table 2.2).

1.4 Trade Balance

Botswana recorded a trade deficit of P2, 411.6 million in August 2018. This follows a trade surplus of P346.8 million recorded for July 2018.

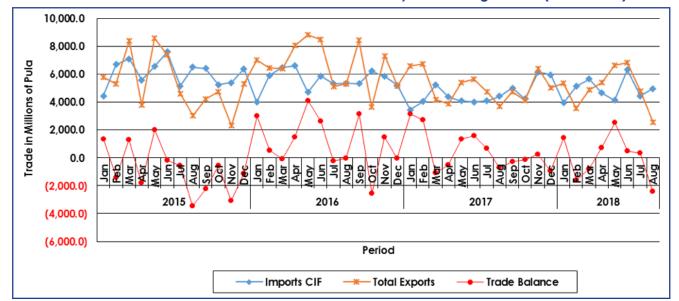

Chart 1.1: Total International Merchandise Trade - January 2015 to August 2018 (Million Pula)

2.0 TRADE BY PRINCIPAL COMMODITIES

Principal commodity groups refer to selections of related commodities grouped together to form major groups. Commodities forming a group may be of related chapters, for example; "Machinery & Electrical Equipment" which combines machines and electrical appliances; "Vehicles & Transport Equipment" which combines vehicles and other equipment used for transport purposes.

In some cases it becomes a challenge to come up with further groups of related chapters or commodities. This occurs when commodity groups' contributions to the total remain minimal. In such cases, the commodities are grouped together under the general category called "Other".

2.1 Principal Imports

Imports by Principal Commodity Groups together with associated percentage distributions, appear in **Table 2.1**, covering January 2015 to August 2018. Percentage distributions are however only shown for totals for 2016, 2017 as well as July 2018 and August 2018. **Chart 2.1** gives graphical presentation of Principal Import Commodity Groups for August 2018.

Users are advised that the Principal Commodity Group, "Textiles & Footwear", has been revised to remove commodities that did not fit well in the group.

During August 2018, composition of imports by principal commodity groups shows that Diamonds contributed the most to total imports (P4, 974.4 million), with 20.0 percent (P997.2 million), followed by Machinery & Electrical Equipment; Fuel and Food, Beverages & Tobacco with 15.0 percent (P745.0 million), 14.6 percent (P727.1 million) and 13.6 percent (P675.6 million) respectively.

Percentage distributions for other commodity groups during August 2018 can be viewed on Table 2.1 and Chart 2.1.

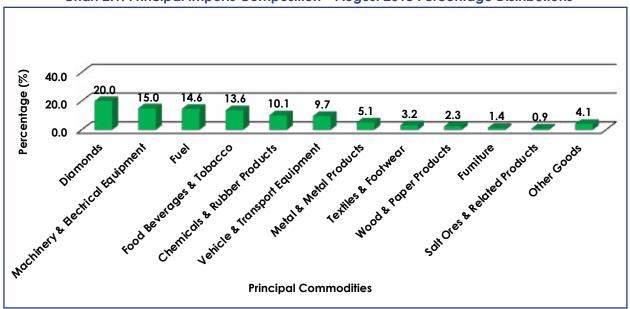

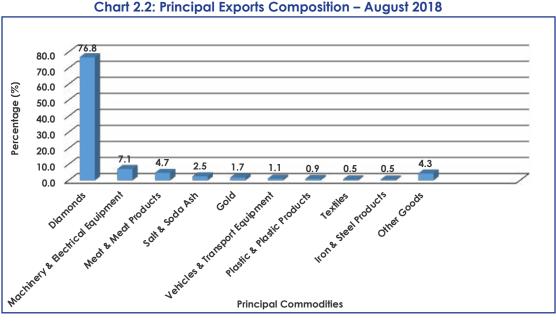

Chart 2.1: Principal Imports Composition – August 2018 Percentage Distributions

2.2 Principal Exports

Total exports for August 2018, were valued at P2, 562.8 million, with 76.8 percent (P1, 967.2 million) attributed to exports of Diamonds, followed by Machinery & Electrical Equipment; Meat & Meat Products and Salt & Soda Ash with 7.1 percent (P181.2 million), 4.7 percent (P119.4 million) and 2.5 percent (P64.0 million) respectively.

Percentage distributions for major export groups can be observed on Table 2.2, while Chart 2.2 gives graphical presentation for August 2018.

3.0 DIRECTION OF TRADE

Direction of trade gives imports by source while exports are presented by last known destination. Only major trading partners are considered individually, while smaller trading partners are grouped together under a general category. Data by major trading partner countries, regions and principal commodity groups for imports and exports, during August 2018 appear in Table 3.1A and Table 3.2A respectively. Table 3.1B (imports) and Table 3.2B (exports) display percentage distributions for major sources and destinations respectively, by principal commodity groups during the same month.

3.1 Imports by Major Trading Partner Countries and Regions

Discussions that follow relate to imports by source at both regional and partner country level as displayed in Chart 3.1 and tables 3.1 A & B.

The Southern African Customs Union (SACU) was the major source of imports into Botswana, accounting for 64.4 percent (P3, 201.9 million) of total imports during August 2018. Imports from SACU were primarily coming from South Africa, with a contribution of 63.8 percent (P3, 171.4 million) to total imports during the month under review.

Fuel and Food, Beverages & Tobacco were the major commodities imported from South Africa with contributions of 21.3 percent (P675.1 million) and 20.5 percent (P648.9 million) respectively, of total imports from that country (Table 3.1 B) during the month under review. Machinery & Electrical Equipment and Chemicals & Rubber Products followed with contributions of 16.0 percent (P507.0 million) and 11.7 percent (P371.5 million) respectively, to total imports from South Africa during the current period.

Asia supplied imports valued at P520.1 million, representing 10.5 percent of total imports during the same month. India and China were the main sources of imports from Asia, having contributed 4.6 percent (P226.6 million) and 1.7 percent (P86.7 million) respectively, of total imports during August 2018.

The European Union (EU) supplied imports valued at P285.0 million, accounting for 5.7 percent of total imports during August 2018. Belgium and Germany were the main sources of imports within the **EU** having supplied 1.9 percent (P95.9 million) and 1.3 percent (P66.7 million) to total imports during the reference period.

Imports from Canada were valued at P747.5 million, representing 15.0 percent of total imports during the current period, comprising mainly of "Unsorted Diamonds", with a contribution of 98.8 percent (P738.6 million) to total imports from the country. The United States of America (USA) contributed 1.4 percent (P70.3 million) of total imports during the same period.

Chart 3.1 gives the graphical presentation of imports by major trading partner countries and regions during August 2018.

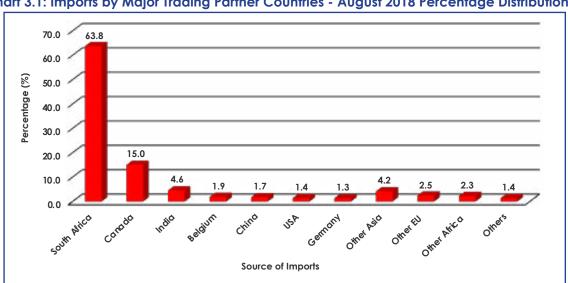

Chart 3.1: Imports by Major Trading Partner Countries - August 2018 Percentage Distributions

3.2 Exports by Major Trading Partners Countries and Regions

Discussions under this sub-section are based on Chart 3.2 and tables 3.2 A & 3.2 B.

During August 2018, Asia received 55.7 percent (P1, 426.9 million) of Botswana total exports (P2, 562.8 million). India and the United Arab Emirates (UAE) received 30.7 percent (P787.5 million) and 9.9 percent (P254.2 million) respectively, of total exports during the month under review. Hong Kong and Israel followed with 9.0 percent (P230.4 million) and 4.6 percent (P117.0 million) respectively. The major commodity group exported to Asia during the current period was Diamonds, at 99.9 percent (P1, 425.5 million) of all goods destined to the regional block.

Exports destined to EU region were valued at P499.7 million, representing 19.5 percent of total exports during August 2018. Belgium was the main destination for exports to the **EU**, having received 15.6 percent (P400.7 million) of total exports during the month under review, followed by the Netherlands; the United Kingdom (UK) and Italy with 1.4 percent (P36.0 million), 1.3 percent (P32.8 million) and 1.0 percent (P26.6 million) respectively. Exports to Belgium consisted mainly of Diamonds, at 99.9 percent (P400.3 million) of total exports to that country. Exports to Netherlands, the UK and Italy were mainly attributed to Meat & Meat Products at 99.8 percent (P35.9 million), 48.3 percent (P15.8 million) and 100 percent (P26.6 million) of total exports to the respective countries.

The **SACU** region received exports valued at P360.7 million, representing 14.1 percent of total exports during August 2018. South Africa was the main destination for exports to the SACU region, having received exports accounting to 13.0 percent (P334.4 million) of total exports during the month under review. Namibia followed with 1.0 percent (P24.5 million). Machinery & Electrical Equipment was the main commodity group exported to South Africa and Namibia during the current period, at 42.5 percent (P142.2 million) and 39.8 percent (P9.7 million) of all the goods destined to the respective countries.

Switzerland and the **USA** received 4.7 percent (P120.6 million) and 2.6 percent (P65.4 million) respectively, of total exports during the month under review. Exports to Switzerland consisted mainly of Diamonds at 63.5 percent (P76.6 million) and Gold at 36.4 percent (P43.9 million) of total exports to that country during the month under review. Exports to the USA were mainly Diamonds at 98.9 percent (P64.7 million) of total exports to that country.

Other destinations for exports can be observed in tables 3.2 A and 3.2 B. Chart 3.2 gives the graphical presentation of exports by major destinations for August 2018

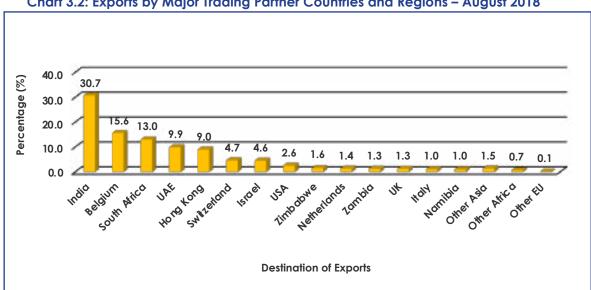

Chart 3.2: Exports by Major Trading Partner Countries and Regions – August 2018

4.0 Imports and Exports by Mode of Transport

The mode of transport here refers to the means of transporting goods in and out of the country. The modes of transport that are mainly used in Botswana for international merchandise trade are Road, Air and Rail. Statistics relating to mode of transport is presented in **Table B**.

During August 2018, slightly below two thirds of total imports, 62.1 percent (P3, 088.3 million), were transported by road. Air and Rail transport accounted for 23.0 percent (P1, 146.4 million) and 14.8 percent (P738.1 million) respectively.

Considering the value of exported commodities, Botswana Exports mainly use Air as means of transport. This is because the value of exports is highly influenced by the value of diamonds, which are transported by Air. Air Transport accounted for above three quarters of total exports, 81.6 percent (P2, 090.4 million) during August 2018. Road transport accounted for 17.6 percent (P450.0 million) of total exports during the month under review (Table B).

Table B: Imports and Total Exports by Mode of Transport - August 2018; Value in Million Pula

	Impoi	rts	Total E	xport
Trans type \ Flow Type	Value	%	Value	%
Rail Transport	738.1	14.8	21.7	0.8

6.0 TECHNICAL NOTES

IMTS are compiled by the International Merchandise Trade Statistics Section of Statistics Botswana. International Merchandise Trade refers to external trade in goods only. International Service Trade Statistics (ISTS) are however not compiled by this section. The primary source of international merchandise trade data is the Customs & Excise Division at the Botswana Unified Revenue Service (BURS). The Customs & Excise Division is responsible for data capture for both computerized and manual borders, and the monthly raw data files are transferred to Statistics Botswana for data processing.

Until the April 2009 Monthly Digest, Botswana was practicing Relaxed Special Trade Type. The Relaxed Special Trade Type takes into account goods that are exported or imported for inward or outward customs processing while the Strict Special Trade Type does not include the same. Strict Special Trade Type comprises imports for home consumption, permanent exports, re-exports and goods cleared out of warehouse (exwarehouse) only.

In June 2009, the Botswana External Trade Database was revised to cater for General Trade Type as per the United Nations Statistics Division (UNSD) recommendations. The General Trade Type gives complete coverage of external trade as compared to the Special Trade Type. As a result of this, trade reported in the monthly digests for May 2009 onwards is based on the General Trade Type.

Imports are valued CIF (cost, insurance & freight) while exports are valued FOB (free on board). The value of imports includes transport and insurance costs to the importing country. The Exports value consists only of the value of goods as they leave the exporting country.

6.1 Time of Recording of Trade

IMTS is compiled using date of recording of trade as opposed to date of assessment of goods by customs. This means that as goods cross the border, trade is recorded and this is the reference month for compilation of IMTS. Some of these goods may however be held by customs for some time pending final assessment for tax or duty purposes.

If the final assessment is done later, for example two or three months, or even more, after the goods had crossed the border, the affected trade will then update trade for the particular month when the goods crossed the border, therefore it does not form part of trade for the month during which the final assessment was done. This is mostly common with imports. Revision of data for the month preceding the one under review will normally show high values as compared to revisions for other months due to more goods (from the previous month) being released after final assessment.

6.2 Concepts and Definitions

Domestic Exports: These are goods originating from the compiling country, being permanently exported out of the country for consumption in the outside world. This includes products from customs inwards processing; for example, if a country imports wheat, processes the wheat into bread flour and exports the bread flour and bye products from the milling process, these will all leave the country as domestic exports.

Re - Exports: These are exports of foreign goods that were initially recorded as imports into the compiling country. These goods are exported in the same state that they came in except for wear and tear. An example will be re-exportation of a motor vehicle that was initially imported into the compiling country and after being used it is now being exported to a foreign country.

Total exports: This is the sum of domestic exports and re-exports

Imports: These are goods imported from the outside world, into the compiling country, for local consumption. This includes re-importation of locally produced goods that were initially exported and are now being imported back into the country.

Trade Balance (Net Export): This refers to the total value of goods exported minus the total value of goods imported by a given economy in a given period of time. A positive trade balance (trade surplus) indicates that a country is exporting more in value terms than it is importing. A negative trade balance (trade deficit) indicates that the country is importing more than it is exporting.

6.3 Treatment of Diamonds from Aggregation Process

In July 2012, the Diamond Trading Company International which was undertaking aggregation of diamonds relocated from the United Kingdom to Botswana. This meant that the process of aggregation of diamonds was now to be done in Botswana. Following the relocation, initially it was not clear how this trade was to be recorded as there was no prior common understanding of the processes involved between all the relevant parties. After thorough discussions with key stakeholders, Statistics Botswana decided to record this trade as imports for processing and that export of the same after aggregation be recorded as direct permanent exports. This was based on IMTS 2010 Compilers' Manual (Page 225) and IMTS 2010 Concepts & Definitions; Page 16; Paragraph 1.20 concept that mixing of goods of different qualities to produce goods of a new quality is part of processing in compilation of IMTS.

6.3.1 Sorting out Diamonds imports

These imports will mainly be from Canada, Namibia and South Africa. Some of these may include diamonds that were originally bought from Botswana and are now being sold back to Botswana. The original declaration will not indicate whether the consignment is a mixture of diamonds from various countries. However, a follow-up document, referred to as "attached document" will show a disaggregation of these imports according to the various countries that contributed to the consignment.

- In case the consignment was from one country, this will be recorded as imports into Botswana from that particular country
- II. In case the consignment was from various countries, the recording of these imports will be according to the various countries that contributed to the consignment
- III. If part of the consignment was originally from Botswana, that part is recorded as re-import and will form part of total imports.

6.3.2 Sorting out Diamonds exports

These exports will be from the aggregation process and will consist of exports of Botswana origin and exports of diamonds that were originally imported. The original declaration will give an aggregated export which will be a consignment bought by an individual trader. This consignment will consist of diamonds of the same colour, shape and size but originating from various countries. The "attached document", giving a disaggregation of the consignment in value and carats by countries that contributed, will be used to record trade accordingly. As per IMTS 2010 Concepts & Definitions, goods resulting from processing are to be included in merchandise trade at their full value and as direct permanent exports (Domestic exports) in case they are exported (IMTS Concepts & Definitions; page 16, paragraph 1.20). As a result of this, diamonds that originated from outside Botswana as well as those originating from Botswana are recorded as direct permanent exports or domestic exports.

Both diamonds originating from Botswana and those that originated from elsewhere have always been recorded under Domestic Exports.

Values for diamonds that originated from elsewhere can be provided separately if needed.

6.4 Exclusions from IMTS

Goods in Transit

This is trade that is simply passing through the compiling country solely for the purpose of being transported to another country

Goods temporarily admitted or dispatched

These are goods that at the time of admission/dispatch, are intended to stay in the receiving country temporarily and that after their stay they will be returned in the same state. These goods include display equipment for trade fairs and exhibitions, commercial samples, means of transport, containers, equipment for working etc.

Monetary Gold

This is gold to which the monetary authorities have title and is held as reserve assets.

Issued banknotes and securities and coins in circulation

These goods represent evidence of financial claims and are excluded from IMTS

The above list of exclusions from IMTS is however not exhaustive and only a few that are common, simple, straightforward and easy to understand have been picked as examples.
