PREFACE

This Tourism Statistics report provides statistics on non-citizens including temporary residents entering and leaving the country during 2019. This publication is released after the 2020 report due to the data being received late leading to the delay in the processing of the data and subsequent compilation of the Tourism Statistics Annual Report 2019.

The information contained in this publication is compiled from completed immigration embarkation forms. Non-citizen travelers entering and leaving the country are required to complete the arrival/departure forms at all gazetted ports of entry/departure. This covers all land borders as well as airports.

Users who require more information can contact the Directorate of Stakeholder Relations on **3671300**. All Statistics Botswana publications are available on the website at www.statsbots.org.bw and at the Statistics Botswana Information Resource Centre (Head-Office, Gaborone).

I sincerely thank all stakeholders involved in the formulation of this report for their continued support as we strive to better serve users of our products.

EXECUTIVE SUMMARY

A total of 2,360,834 non-citizens arrived in the country in 2019. Out of these 1,555,399 (65.9 percent) were international visitors (tourists). Tourists refer to both overnight and same day visitors. Overnight visitors made 93.5 percent (1,454,604) while same day visitors accounted for 6.5 percent (100,795) of total visitors. This shows a 15.0 percent (53,734) decrease in the number of tourists compared to 1,830,274 in the previous year. Tourists from South Africa accounted for 35.9 percent (558,875) while those from Zimbabwe represented 30.0 percent (465,988) of total tourists during the year.

Tourists from the top ten overseas countries accounted for 12.7 percent (197,205) of total tourists in 2019. Tourists who came for Holiday accounted for 21.3 percent (330,922) of total tourists, while those who came for Business and Visiting Friends & Relatives (VFR) represented 19.8 percent (307,591) and 30.9 percent (480,927) respectively.

Tourists who entered the country by air represented 7.7 percent (120,424) of total tourists during the year. Among the tourists who came by air, Sir Seretse Khama International Airport accounted for 54.4 percent (65,503) while those who came through Maun Airport represented 29.3 percent (35,262). December was the most popular month of arrival for tourists in 2019, with 10.2 percent (158,330), followed by August and July with 9.8 percent (152,432) and 9.3 percent (144,884) respectively.

Ages ranging from 25 to 44 years combined, accounted for 50.8 percent (790,441) of total tourists during the year.

Ramokgwebana Border Post was the busiest, having received 20.1 percent (473,704) of total arrivals (2,360,834) while 18.2 percent (447,644) of all departures (2,456,365) went out through the same border post.

CHAPTER 1: INTRODUCTION

1.1 Introduction

This annual publication presents statistics on arrivals and departures during the year. The statistics carried out in this report include Arrivals and Departures of visitors and non-visitors by country and region of nationality, residence, the purpose of entry, mode of travel used, point of entry and exit as well as sex and age distribution. The information contained in this report is derived from the Department of Immigration and Citizenship Arrival/Departure forms, which are completed by non-citizens at the gazetted points of entry and exit.

Botswana citizens are exempted from completing the Immigration Arrival/Departure forms. The figures on Arrivals and Departures contained in this publication therefore only cover non-citizens, both visitors and temporary residents of Botswana. However, with the increasing demand for statistics on outbound travelers, including information on citizens, it will be necessary to collect and compile data on citizens in the future

1.1.1 Arrangement of the Report

The report categorises the travelers into two parts, the first part provides information on tourists only while the second part presents information on all arrivals and departures during the year under review. The characteristics of visitors are presented in **Chapter 2**, while the second part, presented in **Chapter 3** focuses on all travelers entering and departing the country. **Chapter 4** gives Sources, Methods and Definitions of terms used in the report. **Chapter 5** contains appendices, consisting of detailed tables on which smaller tables and graphs, included in the body of the report are based.

1.1.2 Limitations of the Report

The focus of data collected is currently on non-citizens (temporary residents and foreign nationals) only. This report does not provide inbound and outbound data on citizens. As a consequence of having both automated and non-automated border posts in operation, it is not possible to calculate the actual length of stay of visitors even though data on the amount of time (days) granted is captured in the Immigration Entry/Departure forms. As people can enter the country through an automated border post but depart through a non-automated border post, this makes it difficult to calculate the actual length of stay in the country as data from automated and non-automated borders cannot be reconciled.

CHAPTER 2: TOURISTS

This chapter gives information on visitors who came into the country in 2019. These visitors are classified into overnight visitors and same-day visitors. Same-day visitors are mostly excursionists who take a trip that does not include an overnight stay, while overnight visitors represent tourists who spend at least a night in the country being visited. The chapter details statistics compiled according to country and region of residence, the purpose of visit, mode of travel, month of visit, port of entry as well as the demographic characteristics of the visitor.

In compilation of this report, half of the transit travelers are regarded as visitors. This is taking into consideration the fact that some of these transit travelers end up having expenditures in the country as they are transiting. This expenditure may be incurred through having to spend a night in the country and/or any other expenditure. As a result, tourist statistics discussed here include half of the transit travelers. The country of residence as opposed to nationality is used as a reference when compiling tourist statistics.

2.1 Tourists by Country and Region of Residence

Appendices 1 and **2** are dedicated to tourists only. **Appendix 1** gives both overnight tourists and same day tourists by country of residence as well as percentage distribution of total tourists at country level. **Appendix 2** presents tourists by Country of Residence as well as Purpose of Visit.

During 2019, Botswana received 1,555,399 tourists, with 93.5 percent (1,454,604) accounted for by overnight visitors while 6.5 percent (100,795) was attributed to same-day visitors. The total number of tourists shows a 15.0 percent (274,875) decrease compared to 1,830,274 during the previous year. As can be seen from **Appendices 1** and **2**, most visitors came from South Africa and Zimbabwe, with the two countries contributing 35.9 percent (558,875) and 30.0 percent (465,988) of the total visitors respectively. The majority of tourists, 82.4 percent (1,281,273), reside in the SADC Region.

2.2 Top Ten Overseas Countries

Table 1, which is based on Appendix 1, shows that the top ten overseas countries recorded 197,205 tourists, accounting for 12.7 percent of total tourists (1,555,399) in 2019.

Of the 197,205 tourists that reside in the top ten overseas countries, more than a quarter, 28.7 percent (56,618) were resident in the United States of America followed by those residing in Germany and the United Kingdom at 19.1 percent (37,616) and 14.6 percent (28,719) respectively.

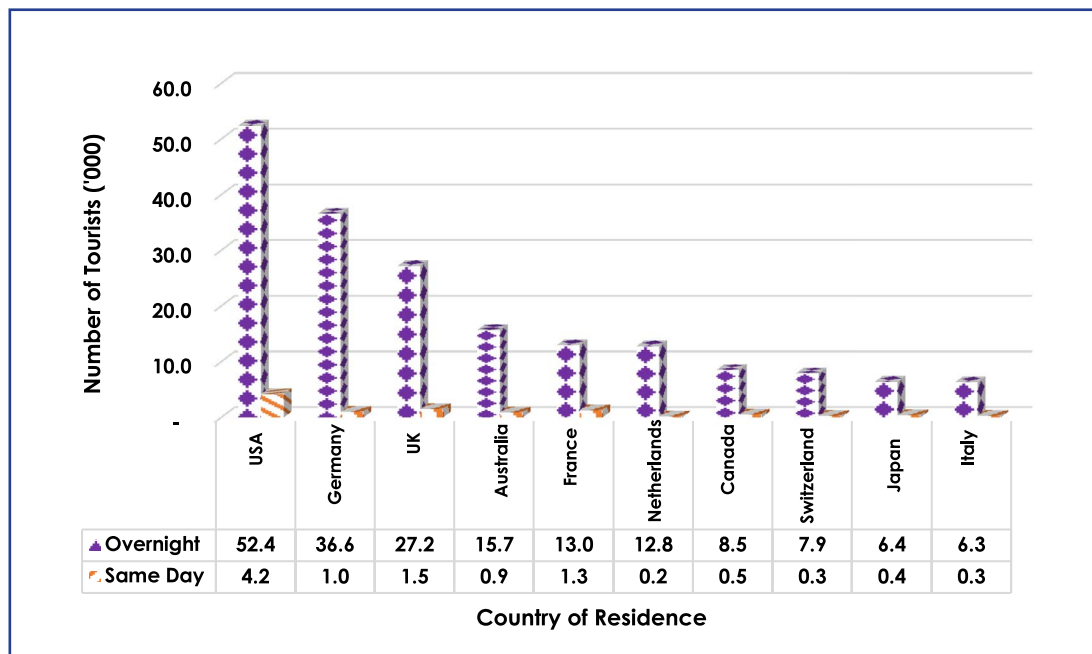

Overnight tourists from the Top Ten Overseas Countries make more than 90 percent of the total tourists from each of those countries.

2.3 Top Ten SADC Countries

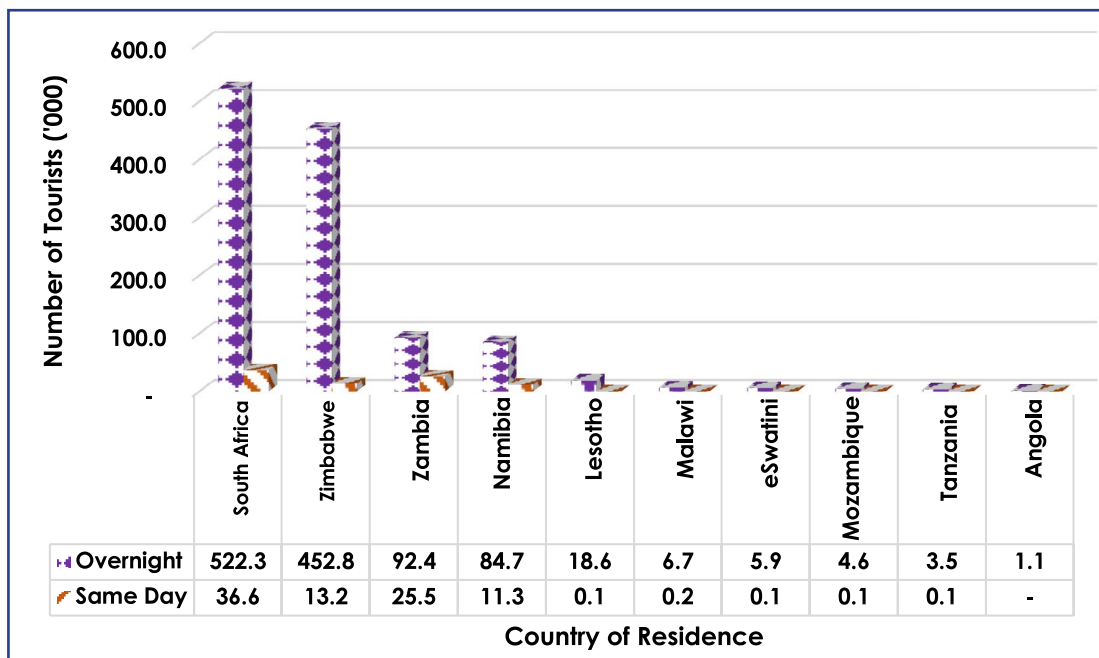

Figure 2 and **Table 2** show the top ten countries that provided tourists from the SADC Sub-continent. Tourists residing in the top ten countries of the SADC region make up 82.3 percent (1, 279,933) of the total tourists during the year under review. This shows a decrease of 0.8 of a percentage point when compared to the region's contribution of 83.1 percent registered in 2018. South Africa and Zimbabwe were the major contributors at 43.7 percent (558,875) and 36.3 percent (465,988) respectively. Other countries can be observed on **Table 2** and **Figure 2**.

Overnight Tourists constituted at least 90 percent of total tourists at country level for the top ten SADC countries, with the exception of Zambia and Namibia. Day Visitors from Zambia and Namibia accounted for 21.6 percent (25,455) and 11.8 percent (11,304) of all tourists from those respective countries.

2.8 Tourists by Age Distribution

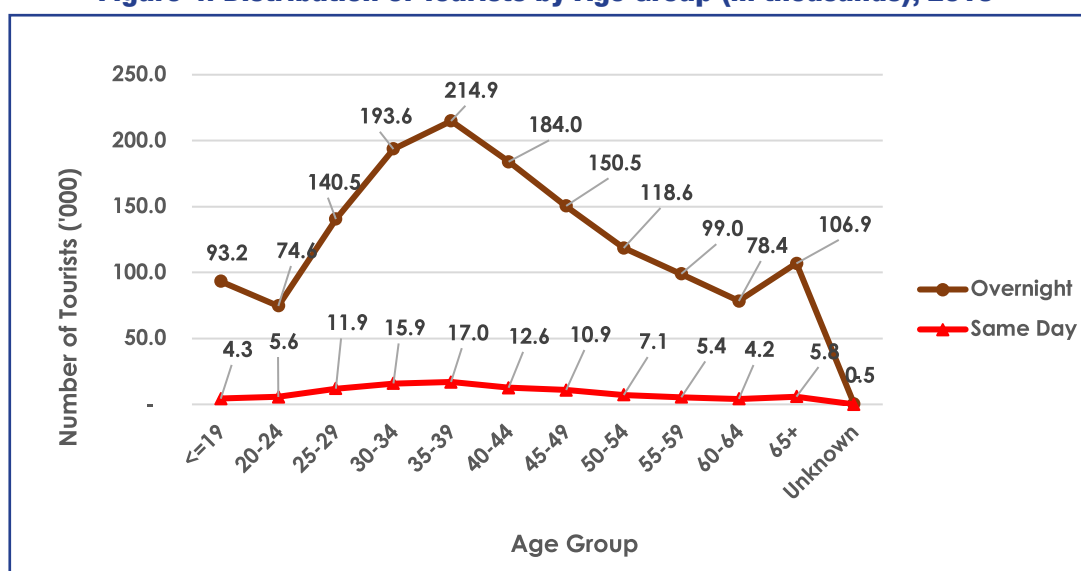

Table 6 gives the distribution of tourist arrivals by age-group, for Overnight Tourists, Day Visitors and Total Tourists during 2019. The graphical presentation of the same information is displayed in **Figure 4**.

During 2019, tourists aged 35-39 accounted for 14.9 percent (231,876) of all tourist arrivals. Tourists aged 19 years and below made up 6.3 percent (97,440) and were mainly children accompanying their parents or the principal visitor. Those aged 65 years and above made 7.2 percent (112,707) and their main purpose of visit was Holiday. There was a small number of tourists with unknown age, accounting for less than 0.1 percent (529) of total tourist arrivals.

CHAPTER 4: TECHNICAL NOTES

This chapter presents data sources, methodology and definitions of terms used in the production of tourism statistics. This is meant to enable users to interpret the statistics carried in the report with understanding of how the raw data is sourced, how processing and compilation of the report is done and what the various terms used in the report mean.

4.1 Data Source and Methodology

The data used in the production of this report is sourced from administrative records of the Department of Immigration and Citizenship.

International Tourist data is collected using Arrival and Departure forms that are filled in by non-citizens at all gazetted ports of entry and exit (Land Borders and Airports). Each form asks questions on personal characteristics of the traveler which include among others, sex, age, country of nationality, country of residence and purpose of entry. By default data is also collected on month of travel, mode of transport and point of entry.

Percentages are independently rounded, therefore in some cases they may not add to the total. The results and analysis presented in the report follow the guidelines, definitions and classifications recommended by United Nations World Tourism Organization (UNWTO) and the United Nations Statistical Commission (UNSC). This publication is produced in line with internationally accepted statistical standards and guidelines.
