Preface

This is the fifth digest in a series published quarterly. Its main purpose is to make available timely external trade data before the annual external trade statistics publication.

Tables on import and total export statistics at the division level are included in this publication without details on direction of trade, or break down of total exports into domestic exports and re-exports. More detailed information at the full six digit level, including detailed analysis, is available at the External Trade Statistics unit located at the Department of Customs and Excise headquarters. This information is also included in the annual External Trade statistics and the Trade Statistics Supplement publications.

The value of imports and exports (in UA, the unit of account for the Southern African Customs Union, which is equivalent to the South African rand) for each of the four quarters up to the third quarter of 1994 are shown in Table 1 (imports) and Table 2 (exports). The "total" column in these tables refer to the sum of four quarterly totals, and is thus the total for twelve-month period ending in September 1994. Figures for the final quarter of this publication (Quarter 3 1994) are provisional and may be subject to revision in later issues.

Not much meaning should be read in the pattern of imports and exports on quarter-to-quarter basis, and fluctuations in the level of trade for any particular commodity group should be interpreted with caution. Users should also note that figures for diamond exports given in this publication include exports of polished stones as well as exports of diamonds mined by Debswana; they may differ from diamond exports quoted in other publications for this reasons.

The summary tables below show the trends in major commodity groupings of imports and exports over each of the four quarters covered in this publication.
