Preface

This quarterly digest presents figures as at 2008, first quarter. The digest took into account data from the first quarter of 2007 to 2008, first quarter. Data carried in this report are provisional pending final editing.

The digest is divided into two parts. The first part, which is further divided into sections, gives a summary of results for the five quarters under consideration. Section One gives summary tables and charts for total trade; total imports, total exports and trade balance. Section Two gives summary tables and charts for principal imports and principal exports while Section Three presents trade by direction for both total imports and total exports during the five quarters.

Section Four presents external trade in other commodity classifications. These classifications are based on the Harmonised Commodity Description & Coding System of 2002 (HS 2002) and they are the Standard International Trade Classification (SITC, Revision 3) and the Broad Economic Classification (BEC).

Part two of the digest gives a set of two tables, one table for total imports while the second gives total exports at division level, i.e. four-digit Harmonized Commodity Coding System (HS Codes). The first two digits denote the chapter while the last two refer to the division. Each of the two tables is split into sections, chapters and divisions.

We hope that users will find this quarterly digest useful and that they will continue giving us feed back on how outputs of External Trade Statistics Unit can be improved to meet demands for external trade data.

SUMMARY

1.0 TOTAL TRADE

Table 1.1 gives imports, exports as well as trade balance for the period covering the first quarter of 2007 (Q1 07) to the first quarter of 2008 (Q1 08). For all the quarters of 2007, imports were gradually increasing. However, during the first quarter of 2008 (Q1 08) imports decreased. Nonetheless, comparison of the first quarter of 2008 to the first quarter of 2007 shows that imports increased during the first quarter of 2008 by P 2,457 million, from P 4,942 million to P 7,399 million, an increase of *49.7 percent*.

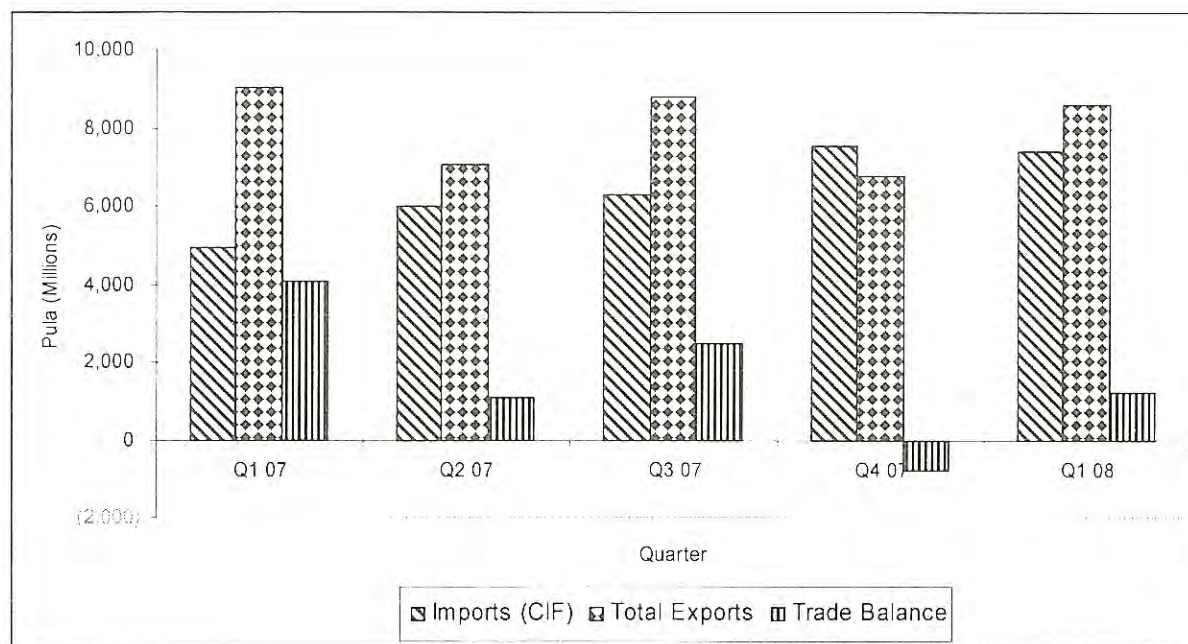

Total exports (domestic exports and re-exports) decreased from P 9,036 million during the first quarter of 2007 to P 8,625 million during the same quarter of 2008, representing a decrease of *4.5 percent*. The first quarter of 2007 recorded the highest total exports during the entire five quarter period under consideration. Chart 1.1 which is based on Table 1.1, gives graphical presentation of trade during the five quarters under consideration.

Four of the five quarters considered here, recorded trade surplus, except for the fourth quarter of 2007 where a trade deficit of P 791 million was registered.

This section gives external trade by region and individual trading partner countries for both imports and exports for the five-quarter period, from the first quarter of 2007 to the first quarter of 2008 trade years. Sub Section 3.1 deals with imports while exports are discussed in Sub Section 3.2. Graphical presentation of external trade by trading partner are only given for the first quarter of 2008 trade year for both imports and exports.

Chart 3.2: Exports by Region and Partner (Q1 2008)

*** Other major Partners (Chart 3.2) = Norway + USA + Rest of World

The major destination of Botswana's exports is the European Union (EU). During the first quarter of 2008 trade year, exports to the EU were valued at P 5,828.4 million, 67.7 percent of total exports during that quarter (Chart 3.2). Exports to the UK alone were worth P 5,676.4 million. Other countries that received Botswana's exports during the first quarter of 2007 up to the first quarter of 2008 can be observed in Table 3.2.

4.0 TRADE BY SITC and BEC

4.1 Standard International Trade Classification (SITC)

The SITC is a statistical classification of commodities entering external trade and is designed to provide the commodity aggregates required for purposes of economic analysis and to facilitate the international compilation of trade by commodity data. The SITC has 3,118 basic headings and sub headings which are assembled in 261 groups, 67 divisions and 10 sections. This report uses SITC Revision 3, which is based on HS 2002, and figures presented here are for the 10 sections only.

Tables 4.1A and 4.1B presents Botswana's Trade (Imports and Total Exports) by Standard International Trade Classification (SITC). During all the quarters under consideration, Botswana's top three imports were *Machinery & Transport Equipment*, *Mineral fuels, Lubricants & Related Materials* and *Manufactured goods classified chiefly by material*.

During the first quarter of 2008, import value on *Machinery and Transport Equipment* decreased by 8.1 percent (P 194.9 million); from P 2,415.4 million during fourth quarter of 2007 to P 2,220.5 million during 2008, first quarter. *Machinery & Transport Equipment* was valued at P 1,438.8 million during 2007, first quarter.

Comparison of the first quarter of 2008 to the fourth quarter of 2007 shows that *Mineral fuels, Lubricants & Related Materials* increased by 16.8 percent (P 185.4 million) from P 1,102.6 million during the fourth quarter of 2007 to P 1,288.1 million during 2008, first quarter. However, an increase of 70.4 percent was registered when comparing the first quarter of 2008 to first quarter of the previous year.

Total Exports by SITC (Table 4.1B) mainly consisted of *Manufactured goods classified chiefly by material* and *Crude Materials, (excl fuels)* during all the quarters under consideration. During the first quarter of 2008, *Manufactured goods classified chiefly by material* were valued at P 5,961.6 million, an increase of 59.0 percent (P 2,212.8 million), when compared to the value during 2007 fourth quarter. However comparison of first quarter 2008 and the same quarter in 2007 shows a small increase of 1.7 percent.

4.2 Broad Economic Classification (BEC)

BEC was designed to serve as a means for converting trade data compiled in terms of SITC into end-use categories that were meaningful within the framework of the System of National Accounts (SNA). These are approximating the three basic classes of goods in SNA; namely capital goods, intermediate goods and consumption goods. BEC has 19 basic categories that can be aggregated to approximate the three basic classes of goods, thus permitting trade statistics to be considered jointly with other sets of general economic statistics such as national accounts and industrial statistics for national, regional and global economic analysis.

The discussion here is only confined to the seven (7) sections of BEC.

Composition of imports by BEC shows that imports consist of *Industrial Supplies not elsewhere specified* (section 2) mainly. These constituted 29.3 percent (P 2,146.8 million) of total imports during the first quarter of 2008; 26.5 percent (P 1,983.3 million) of total imports during 2007 fourth quarter and 27.1 percent (P 1,338.9 million) of total imports during 2007 first quarter.

The second most contributor to total imports by BEC was Capital Goods (Section 4), followed by Fuels & Lubricants (Section 3) and Consumer Goods not elsewhere specified.

TECHNICAL NOTE

Botswana trade statistics are compiled by External Trade Statistics unit, being a part of Central Statistics Office (CSO). External trade statistics here refer to trade in goods only. Trade statistics in services are not compiled by this unit. The primary source of external trade data is Customs & Excise Division which is part of Botswana Unified Revenue Service. Customs is responsible for data capture for both computerized and manual borders and the monthly raw data files are transferred to CSO in electronic form for data processing.

Botswana practices special type of trade where only goods that have been cleared for local consumption in the case of imports, and those that are exported permanently form external trade statistics. This means that only goods that have been imported into Botswana and have been cleared by customs to be consumed in Botswana are recorded for external trade statistics as imports. In the case of exports, only goods that have been cleared by customs as being exported for consumption by the outside world are recorded as exports.

Currently goods imported or exported for inward or outward customs processing do not form part of Botswana international merchandise trade. These are goods that are either exported or imported for further processing and will either return to the country of origin or be exported to a different country in a different or altered form.

Imports are valued CIF (cost, insurance & freight) while exports are valued FOB (free on board). The value of imports includes transport and insurance costs to the importing country. Exports value consists only of the value of goods as they leave the exporting country.

Definitions used

Domestic exports: Goods of Botswana origin being exported permanently out of Botswana for consumption in the outside world

Re-Exports: Goods that were initially imported into Botswana for local consumption BUT are now being exported permanently out of Botswana for consumption in the outside world

Imports: Goods imported from the outside world, into Botswana for local consumption.
