PREFACE

This is the twenty-ninth issue of Education Statistics report series compiled and published by the Central Statistics Office (CSO).

As in the previous issues, this publication comprises six sections as follows:

Section 1: All levels
- Time series

Section 2: First level
- Primary schools

Section 3: Second level
- Secondary Schools
- Vocational and Technical Training
- Teacher Training Colleges

Section 4: Third level
- University
- Colleges of Education

Section 5: Examination results for 1st and 2nd level institutions

Section 6: Expenditure on Education for 1st, 2nd and 3rd levels

The data in this publication with exception of Sections 5 and 6 are collected directly from educational institutions through an annual postal questionnaire. Primary and Secondary Schools data relate to the first working day in April. The remaining institutions with different calendars are covered at the beginning of their academic year(s).

To assess the effectiveness of the policies geared towards an improved educational system, there has to be sufficient data collected and analysed to bring out all salient features of the system. Hence, we have always urged all those concerned to give complete and accurate data for the benefit of planning for the future. We therefore appreciate the efforts of all heads of institutions for providing the basic data requested.

Any comments and or suggestions regarding the improvement of the quality of this publication are welcome.

G. M. Charumbira
GOVERNMENT STATISTICIAN

May, 1997

ABSTRACT

During 1992 a National Commission on Education was formed to conduct a broad review of the education system in Botswana. In this respect, particular emphasis was on universal access to basic education, vocational education and training.

Access to education has been emphasized at all levels and significant developments are being made. More schools are being built, more teachers are being trained etc. In recent years, Community Junior Secondary Schools, Private Schools, Study Groups and Primary Schools etc. has been opened and continue to increase. This is because of efforts laid down towards improving access to education, consequently improving the social and economic status of Botswana.

Although the Central Statistics Office does not collect data on non-formal education, it recognises the efforts of Government to develop out-of-school education. This is through the adult basic education programme and the expansion of distance education.

Identification or estimation of the numbers of missing children of school-going age, disabled and handicapped children continues to be a problem. This is a serious policy concern on education. It poses the difficulty of fully assessing the effectiveness of education policies like Universal Primary Education (UPE). The Central Statistics Office (CSO) is jointly working on this issue with the Ministry of Education and the Ministry of Health.

As the absorption of pupils and students continue to improve in primary, secondary, vocational training centres and the University and its affiliates, concern is also raised regarding the coverage of pre-school education. The Central Statistics Office (CSO) has not up to now collected any information at this level of education. However, the office is jointly working together with the Department of Primary Education in facilitating data collection at this level. This will ensure a complete assessment of the performance of the educational system.
