Preface

This is the twenty-second edition of the Quarterly Trade Digest. Its main purpose is to give users preliminary quarterly summary trade statistics, before the production of more detailed data which are published in the Annual Trade Statistics, Trade Supplement reports and Trade Stats Brief. While the annual publication presents data for a reference year, the Trade Supplement and the Trade Stats Brief reports present time series data. The latter contains limited aggregated data.

The report consists of two sets of tables (import and export statistics) which are split by section, chapter and division. Commodity codes are presented at four-digit level, the first two denote the chapter and the last two the division. Details of direction of trade, breakdown of exports by domestic exports and re-exports are not included in this publication.

Data are presented in Unit of Account (UA), the common currency used by members of the Southern Africa Customs Union (SACU). The UA is equivalent to the South African Rand. Sources and methods used in the compilation of trade statistics are outlined in Appendix 1. For users who might be interested in converting data contained in this publication to other currencies, a table of some major currencies is included in Appendix 2. A list of other available CSO publications is attached as Appendix 3.

Summary

Exports revenue increased by 9.4 percent from UA 4,975 million in the second quarter of 2000 (Q2 2000) to UA 5,442 million in the second quarter of 2001 (Q2 2001).

The “major” component of the export earnings is diamonds. For the second quarter of 2001 they contributed 85.9 percent to Botswana export earnings, which is an increase of 2.6 percentage points on the exports of the corresponding quarter of 2000. Copper and Nickel Matte were the second major revenue earner, and accounted for 3.4 percent for the first quarter of 2001. “Other goods” (a residual group comprising miscellaneous items) were ranked the third major. Europe (The European Union and Other Europe) maintained her position as the major destination of Botswana’s exports, and accounted for 89.6 percent of the total exports.

Imports value increased from UA 3,418 million during the second quarter of 2000 to UA 3,949 million in the second quarter of 2001, an increase of 15.5 percent.

During the second quarter of 2001, Other Goods emerged as a “major” component of imports. They constituted 21.3 percent of the total imports value, which is an increase of 3.9 percentage points on the second quarter of 2000. Machinery and Electrical Equipment were the second leading imports component for the second quarter of 2001 and accounted for 19.9 percent, followed by Food, Beverages and Tobacco, which accounted for 13.1 percent of the total imports value.

The major source of Botswana’s imports was the Southern African Development Community (SADC) which accounted for 75.4 percent of total imports for the second quarter of 2001. The European Union became the second “major” source of Botswana’s imports and contributed 16.2 percent of total imports.

The summary tables below show trends in major commodity groupings of imports and exports and the direction of trade for the second quarter of 2000 through the second quarter of 2001.

APPENDIX I

SOURCES AND METHODS OF TRADE STATISTICS

This section covers step by step detail of the processing of Customs and Excise documents for the production of Trade data for Botswana. There are different sections through which documents pass for processing; sorting, coding and checking and data entry including validation. The processing of documents within these sections is detailed out below.

1.SORTING

Documents are sent on weekly and monthly basis from all Customs Points of Entry and Exit and Inland Stations to the Department of Customs and Excise. Relevant documents are then passed on to the External Trade Statistics Unit. These documents come in different groups; the "Import Bills of Entry", "Export Bills of Entry" and "Transfer Traffic Forms". The first two are received monthly, while the third is received weekly.

Accompanying each group of documents is a control form. Import bills of entry(BOE) are accompanied by form C. Misc 50 A, export bills of entry by form C. Misc 50 B, and the transfer traffic forms by C. Misc 51.

Sorting is done by procedure type (see Summary Table 1) and then the documents are batched in fifties. Each batch has a control sheet, C. Misc 52, where summary information about the documents in a batch is entered.

The procedure types used “for data processing purposes” were created within the unit for the purpose of uniquely identifying the lowest level of describing the customs procedure and clearance purpose combination for each transaction (see Summary Table 2).

The unit-assigned “form number” is one of the key items used to uniquely a document/transaction. The single letter form type indicated in Summary Table 1 above as “for data processing purposes” forms part of this form number. It was designed to be used for similar customs procedures (e.g. domestic exports and re-exports to CCA, procedure types C2 and C3 respectively, were both assigned letter D), except where a procedure type differs from others within a customs procedure (e.g. procedure type 50DP within customs procedure direct imports from outside CCA was assigned letter T while the rest were assigned letter U.) See Summary Table 2 for details on procedure types. Apart from the main purpose of uniquely identifying each document/transaction, this way of numbering is used to avoid mixing procedures at data entry.

After sorting, the documents are controlled out using the unit’s **Control form A**.

2. CODING

Botswana, being a member of the common customs area, uses the single “Declaration of Goods Removed Within the Southern Customs Area” document, **CCA1**, used to cover imports, exports and re-exports within the common customs area.

CCA1 IMPORTS

Documents are those dealing with imports (**procedure type C1**). An importer’s code, which is unique six digit number is assigned to each document. Next, the country of origin is highlighted to make it stand out and the mode of transport is coded 01 for rail, 02 for road and 03 for air.

The status of despatch is also checked by the coders to verify whether it is a permanent or just a temporary despatch. A despatch is temporary if the importer only intends to use the item in question for a short period of time in the country of import before returning it back to the country of origin.

The next stage of coding involves the checking of validity of the commodity code (tariff heading) and consistency with the commodity description. This is followed by examining the unit of the statistical quantity for consistency with the code, and then checking for the actual quantity.

After making the necessary corrections/adjustments following these coding procedures, values in the documents are checked. The main purpose of this stage is to get sensible freight and insurance costs for each consignment (all the transactions in single document constitute a consignment), a value that must sometimes be estimated. The freight and insurance costs are added to the total fob (free on board or cost) value that is already in the document to get the total cif (cost plus freight and insurance costs) value. At this stage, each line or transaction in the document is given a number to reduce the possibility of omission on the part of data entry.

Information on Botswana’s imports from outside the CCA cleared in CCA ports for customs purposes comes in a CCA1 accompanied by the relevant South Africa bill of entry completed in the CCA port. Information is transcribed from the bill of entry onto the CCA1 (**procedure type H**) at stations. Since the form CCA1 does not provide all the information needed (for example the fob value of the goods), it is important that the bills of entry which contain all the necessary information accompany it.

CCA1 Exports

Generally the same process is followed for the CCA exports (**procedure type C2**) re-exports (**procedure type C3**) as described in the imports from CCA above.

When the documents have been coded, they are controlled out to data entry.

CE23 and C & D

This bills of entry for the export of domestic products, not ex-warehouse, to outside the CCA CE23 and documents C & D for Malawi, (procedure type 23), usually only require assignment of the importer's code and some currency conversion (different documents are used for exports to Malawi because of an old agreement). Units of Statistical quantity are also checked.

Summary Table

BOE	CLEARANCE PURPOSE	Procedure Type
CE500 (Imports Direct) & CE 490	Duty Paid or Free (coded DP) General Rebates Schedule 4 excluding State Stores (GR) Technical Aid Industrial Rebates Schedule 3 Coded IR Ordinary Levy, formerly State Stores (coded OL)	50DP 50GR 50IR 50OL

CE24 and A & B

Re-export, or export of imported goods, to outside the CCA bills of entry, CE24 and documents A & B for Malawi, (**procedure type 24**), are quite similar to CE23 in processing.

CE25

The country's ex-warehouse domestic exports to outside the CCA are cleared in bill of entry CE25, (**procedure type 25**). These are dutiable products like cars and soft drinks, and the only coding involved covers trader code and country of destination.

CE 500 & 490, 510, 600 and 610

For bills of entry CE500 & CE490, CE510, CE600 and CE610, the procedure type depends on the clearance purpose. Listed below is a summary of the bills of entry by clearance purpose and procedure type. Summary Table 3 details out the bills of entry used together with the above, either for continuation purposes where there is more than one transaction (line) in a document, or vouchers of correction (amendment) where errors of omission and commission are discovered after clearing a consignment. If an error is made while completing a bill of entry, and later on the error is discovered, a fresh bill of entry with the correction(s) is prepared, and this is called a voucher of correction (VOC).

Summary Table

BOE	Continuation form	Voucher of Correction
CE500	CE501	CE504
CE510	CE501	CE514
CE600	CE601	CE604
CE610	CE611	CE614

CE500

Bill of entry CE500 deals with imports directly entering into the market. Care has got to be taken to make sure that the total number of lines (transactions) indicated as contained in the document are indeed present. WHEN coding, for each document codes are assigned on importers, country of origin and mode of transport following the same process as in the CCA1's.

There is need to find the total cost of freight and insurance for all the transactions in the document and this is worked out as the difference between the total c. i. f value and customs value (f.o.b).

CE490

CE490 is a departmental document, which works just as CE500 since it is used to allocate deposits on dutiable imports to the relevant duty heads after stipulated period. If someone imports a dutiable item but for some reason, does not pay the duty, a deposit decided on by the customs officer as equivalent to the chargeable duty is left with the customs station and the importer is given a period of time in which he can claim the money or a certain balance if the deposit is more than the correct duty. If he does not show up in the stipulated period of time, the deposit is taken as duty paid on a normal import CE500 and departmental document CE490 is completed.

Also included in the description and statistical code of the goods, the quantity and the customs (fob) value of the goods. Transport and insurance charges are estimated.

CE510

Bill of entry CE510 is used for transfer of liability, and the coding is similar to that of the CE500, except that the "rebate user" is taken as the importer.

Transfer of liability means that the importer will not pay the expected duties on the imports as they get cleared. Instead he passes on the responsibility to another party, on whose behalf the importation was done, who in most cases is a registered rebate user.

CE610

Dutiable CCA production (i.e. ex-warehouse) is cleared in bill of entry CE610 and coding is similar to that in the CE500. This production mostly is petroleum products, beverages, vehicles and cigarettes/cigars. There is no c.i.f value in the document so this has to be estimated. Botswana's dutiable local products are treated separately since they do not constitute trade. Instead of being entered on the system, the information is maintained on a separate spreadsheet, basically for SACU meetings purposes.

Form J

Individuals declare Personal Imports in Form J. These are in three categories namely, new goods with statistical code 999901, used goods coded 999900, and repairs/ improvement coded 999902 and there is a separate section for each one of the three categories in this form.

There is no commodity coding involved for individual transactions, rather the total value for each category is taken. Except for airports, the officers responsible for coding the form first add up the values of the three categories separately for each station for each month. From experience it was noticed that the country of origin of the goods is synonymous with the station, except for airports.

For the airports, however, each document is coded and data entered separately since information on country of origin differs from document to document.

C Mics 5

C Misc 5, the form used for the transfer of goods by post into the country is pre-coded. The countries are grouped by region (CCA, Overseas and Zimbabwe) and the packages are divided into three categories, Ordinary, Insured and Cash on Delivery. Table 4 details out a summary of these codes.

Summary Table 4

Region	Package Category	Code
CCA	Ordinary (O.R. D)	999801
	Insured (I. N. S)	999802
	Cash on Delivery (C. O. D)	999803
Overseas (Other Countries)	Ordinary (O. R. D)	999811
	Insured (I. R. S)	999812
Zimbabwe	Ordinary (O. R. D)	999821
	Insured (I. N. S)	999822
	Cash on Delivery (C. O. D)	999823

3. Data Entry

Trade statistics data entry utilises a computer network system. The data entry group is divided into two teams, one dealing with CCA1 import documents (by far the biggest in volume) and the second dealing with the rest of the documents:

There are three control forms used for data entry, the first two of which are for CCA1 imports. The first one is a supervisor's form for controlling the documents into the section, by batch. The second control form is for the operator and is completed after each entry session.

More details on data entry and technical aspect of it are available in the system documents. This includes a full description of the management program.

4.VALIDATION

Every few days a validation run which indicates the errors in addition (Cif value incorrect) and entry errors (Fob incorrect) together with "missing forms" is printed out for the validation team. They then have to investigate each reported error by scrutinising the documents involved.

5. TRANSFER TO EUROTRACE

When the data has satisfied the above validation procedure, it is then prepared into EUROTRACE readable form, pending transfer from the data entry system (the network file-server) to the management machine. (EUROTRACE is a processing package especially commissioned by EUROSTAT, the statistical office of the European Communities, for processing customs data).

One of the greatest strengths of EUROTRACE lies in its capacity to let a user to interrogate data extensively. Before one can use this facility, however, the information has got to be read (loaded) into the EUROTRACE data banks.

Many users make requests for information in a form different from the usual presentation in the publication. This is one area where comes in very handy since one can interrogate the data in many different ways, as long as the information is on products (commodities), trading partners (countries) and period.

For further information you can approach the External Trade Statistics Unit at Rizka House in the African Mall, Gaborone.

6. GLOSSARY

Let these definitions not be regarded, or interpreted, as legal definitions, since they are in general terms. They will, however, suffice as a guide to the user.

Bill of Entry	: A document against which goods are entered to obtain customs clearance and with which any duties thereon are paid.
Bond	: A bond is an instrument under seal whereby persons entering into it bind themselves to pay the government a specified sum of money on the breach of any of the conditions therein.
Bonded Warehouse	: Approved premises under revenue control for the storage of goods for which no duty has been paid. The duty element being secured by bond.
Boarder Post (station)	: Official premises located at the boarder between Botswana and any other country for the control of persons and goods entering Botswana.
C. I. F (Cost Insurance Freight)	: This means that the invoice price includes the price charged for the goods plus freight, insurance and all charges(including duty).
CCA	: Common Customs Area
C. Misc. Form	: Customs & Excise "Miscellaneous"
Customs Duty	: Duty levied on imported goods
Excise Duty	: A revenue raising duty applicable on certain home (CCA) produced goods
F. O. B (Free On Board)	: The price charged for goods plus the costs of transport to the point where the goods are deposited on board at the place of despatch. E.g London
Goods	: Includes wares, articles, merchandise, animals, currency, matters or things
Home Consumption	: Consumption or use within Botswana
Importer	: Includes any owner or other person possessed of, or beneficially interested in, the goods at any time between their importation and their clearance from customs charge.
R. I. B (Removal In Board)	: Means the removal of goods, the duty on which has not been paid, from one customs control point to another customs control point. The duty being secured by bond.
Rebate	: A reduction from the amount of duty to be paid.
Re-Export	: To export goods that have previously been imported.

Users are advised that the publication of annual average exchange rates particularly on export data will not produce the same results as the already published data in Pula. This is such because of the procedures for converting export data. Data on diamonds (the main export group) are converted using the appropriate daily exchange rate whereas other data are converted using the average monthly exchange rates. This is because of the sensitivity of the diamonds data. During the conversion exercise, calculations are carried out to 8 decimal places, so that rounding to lower number of decimal places will also result in differences. This applies for both export and import data. The exchange rates in this Appendix therefore have to be used with a lot of caution and will only yield crude estimates.
